ADMINISTRATIVE REPORT LJ-00-11

"This report is used to ensure prompt dissemination of preliminary results, interim reports, and special studies to the scientific community. The material is not ready for formal publication since the paper may later be published in a modified form to include more recent information or research results. Abstracting, citing, or reproduction of this information is not allowed. Contact author if additional information is required."

Subject & Author Indexes

Preface

These citations and indexes were generated from a computer database at the SWFSC Library in La Jolla. Initially, the database entry for the citations was very basic and often incomplete, but provided the quick identification necessary for retrieval of filed reports. In some cases, the only information available for some entries comes from the original log sheet used to assign the report numbers, as there is no file copy to be found.

The report database's primary function remains one of quick identification & access to filed reports. The searching capabilities of a computer allows more extensive retrieval of relevant records, so you may find the indexes in this bibliography too limiting. If you need a particular keyword or group of words searched and printed, please call or write Debra Losey at the Southwest Fisheries Science Center Library, in La Jolla, California.

My thanks to the Library's summer Upward Bound students for their careful entry of bibliographic data into various library databases.

My thanks also to the many authors & center staff who have verified a tiny bit of information or replaced a missing file copy.
