NOAA
ATTN FOIA OFFICER

Dear Sir/Madam:

This is a request under the Freedom of Information Act.

I request a copy of documents containing ambient air quality readings from every monitoring station in Southern Louisiana including Chalmette, Venice, New Orleans, and surrounding areas, from April, 2010 until the present. I seek readings including, but not limited to, the aggregate presence of volatile organic compounds (VOCs), the presence of specific component VOCs such as benzene, and the presence of hydrogen sulfide. Additionally, I request water quality monitoring records, including the levels of crude oil, VOCs, dispersants, and other components of crude oil and/or dispersants used to clean the oil in the Gulf, for the same period of time and for the same region of Southern Louisiana.

I further request any documents or information concerning the United States Coast Guard directing BP to monitor water and air levels of VOCs, hydrogen sulfide, dispersants, and any other elements or byproducts related to the oil spill and/or the subsequent cleanup in the Gulf.

Please notify me at your earliest convenience regarding any costs associated with this request and payment will be remitted promptly.

Thank you for your assistance. If you have any questions or need clarification of this request, please feel free to contact Max Webster mwebster@fgmapleslaw.com or (615) 512-5633.
