DEPARTMENT OF ENVIRONMENTAL PROTECTION

OFFICE OF COASTAL ZONE MANAGEMENT

Nominated Areas of Public Concern
In The
New Jersey Coastal Zone

A Staff Report

This report was made possible by the people of New Jersey who submitted postcards, letters, and detailed papers nominating and commenting on areas of particular concern in the New Jersey coastal zone. The American Littoral Society was particularly helpful in publicizing the request for public nominations.

The nominations were reviewed, and the report prepared by staff of the Office of Coastal Zone Management in the Department of Environmental Protection. The work was primarily performed by Martin K. Pillsbury, Andrea L. Topper and John R. Weingart.

INTRODUCTION

As part of the Office of Coastal Zone Management's (OCZM) continuing effort to involve the public in the formation and implementation of New Jersey's coastal zone management program, OCZM solicited public suggestions for "Nominated Areas of Public Concern" (NAPC's) beginning in the fall of 1976. Over a nine month period, nominations for 176 areas were received from 140 individuals and organizations. The areas nominated were diverse, and covered the entire coastal zone, ranging from the urbanized Hudson River waterfront, to the Jersey shore, to the Delaware Bay and River waterfront. This document will explain the purpose and background of the NAPC nomination process, discuss how the nominations will be used, summarize the nominations received, and describe the regional distribution of the nominations.

Coastal planning in New Jersey, as in other states, has led to policies toward general types of areas rather than to statements on specific sites. New Jersey's Interim Land Use and Density Guidelines for the Coastal Area, for example, state that development will be "encouraged" in urban infill areas and "discouraged" in wetlands areas. In general, New Jersey's coastal zone is too large for a state agency to be able to make site-specific policies; that is more properly the function of local government.

Certain sites in the coastal zone, however, are of statewide importance and interest. Some, like New Jersey's beaches, are well known but others are familiar to fewer people. This nomination process was intended to bring areas of regional or statewide concern to the attention of both the Office of Coastal Zone Management, and the public.

The public nomination process is also in part a response to the federal Coastal Zone Management Act of 1972 which requires that states designate "areas of particular concern within the coastal zone." Under the federal Act, states must designate two or more areas which meet specific criteria established in the Rules and Regulations adopted under the Act (15 CFR Part 923.13). These areas, known as "GAPC's", for "Geographic Areas of Particular Concern," will eventually be selected from the Nominated Areas. At this time, New Jersey OCZM is considering Atlantic City in Atlantic County, Higbee Beach in Cape May County, Greenwich Township in Cumberland County, and all coastal wetlands for formal GAPC designation. All NAPC's, however, will receive attention from NJ OCZM and hopefully from other appropriate government and private agencies.

PUBLIC NOMINATION PROCESS

The Office of Coastal Zone Management, in seeking the suggestions of the public, hoped that the nomination process would not only provide specific workable suggestions, but would also serve as an indicator of general public concerns about the coastal zone.

The public nominations were solicited by notices in local newspapers and on radio stations, through an announcement in The Jersey Coast, the OCZM newsletter, and by a formal legal notice published in the New Jersey Register (9 N.J.R. 77). The public was asked to nominate favorite spots along the Jersey Coast, whether it be a fishing or swimming spot, an area of scenic beauty or historical value, an area in need of preservation or conservation, or an area suited to certain types of development. (See Appendix C; page 119)

The nomination process is open ended. OCZM continues to welcome public comments on specific areas. This report has been prepared to summarize the results to date.

WHAT IT MEANS TO BE A NAPC

The Office of Coastal Zone Management has received 176 Nominations of Areas of Public Concern. The responses ranged from a single sentence on a postcard to lengthy and detailed letters and reports, some accompanied by maps and drawings.

Each nomination has been transferred to a standardized form and evaluated by OCZM staff. These forms follow page 11 of this report. In addition, OCZM will share the individual evaluations and this summary report with appropriate county and municipal planning boards and environmental commissions, relevant state agencies including Green Acres and the Divisions of Water Resources, Environmental Quality, and Solid Waste Management in the Department of Environmental Protection, and the Departments of Agriculture, Community Affairs, Energy, Labor and Industry and Transportation.

OCZM's review has classified the nominations in terms of their location. Nominated areas outside the coastal zone delineated by OCZM are classified as "Non-Coastal". The non-coastal sites will be shared with appropriate state and local agencies but are not listed in this report. In addition, a nomination is considered a "Generic NAPC" when it includes a type of area, such as "all barrier beaches", rather than a specific site.

No further classification is made at this time. An Estuarine Contract, being performed during the next year for OCZM by Jack McCormick and Associates, will use the information submitted in the nominations to help OCZM make specific coastal policy statements.

Effective immediately, however, the nominations will automatically be included in the review process for CAFRA permit applications. After New Jersey submits the coastal zone management program to the National Oceanic and Atmospheric Administration, this information will also be included in the processing of other state and federal coastal permit programs.

OVERVIEW OF NOMINATIONS

Nominations were received for areas throughout the coastal zone, but they were concentrated in Cape May, Ocean, and Monmouth Counties. The overwhelming majority of nominations were for the preservation or conservation of natural resources or specific sites. Several were for historic sites, and several others urged agricultural preservation, creation of parks or study areas, and public access to shore areas. Only one nomination for a development site was received.

Most nominations were submitted by interested individuals. A significant number were also submitted by local and state environmental groups, including the Audubon Society, the American Littoral Society, the Sierra Club, Citizen Association for Protection of the Environment (CAPE), Save Our River Environment (SORE), Committee for a Better Environment, and the New Jersey Conservation Foundation. Several were submitted by county planning boards and environmental agencies and municipal governments and environmental commissions. A number of nominations were received from out-of-state; of note are the nominations of the Palisades by the Wave Hill Center for Environmental Studies in New York, and of New Jersey's barrier islands by the Barrier Beach Workshop in Washington.

The request for public nominations was designed to bring important areas to the state's attention. It was not a vote or popularity contest. Nevertheless, it is interesting to note that 28 sites received more than one nomination. The largest number (33) was received by Ocean Crest State Park, apparently as the result of an organized campaign on behalf of the park. The other sites nominated by three or more people are:

Pine Barrens	8
Higbee Beach	7
Sandy Hook	4
Hackensack Meadowlands	4
Stone Harbor Point	4
Great Egg Harbor River	4
Natco Lake	4
Passaic River	3

The list of multiple nominations shows that some of the most environmentally sensitive and valuable sites throughout the coastal zone have been identified by the public. Development proposals at several of these sites have been the subject of considerable controversy.

Most nominations received expressed a concern for the appropriate use of the sites. The nominations have been grouped according to the uses which have been suggested for them as most appropriate by the nominators. The use groups are:

1. Preservation -- The concern in these nominations is the preservation and/or conservation of valuable natural resources, such as marsh land, prime forests, endangered species, water quality, and wildlife habitats. These nominations are primarily concerned with the maintenance of the quality of the ecosystem.

2. Historic -- These nominations suggested the preservation of historically significant sites or areas. Landmarks, houses, cemeteries, and entire historic districts have been nominated.

3. Recreation -- These nominations are concerned with one of the following aspects of recreation: (a) acquisition of land or water areas with high recreation use potential; (b) improved maintenance of existing recreation facilities; or (c) improved public access to existing or potential recreation sites, typically at the water's edge.

4. Visual -- Some nominations were concerned with the maintenance of the scenic beauty of an area, or the visual and aesthetic quality of a site. These were usually either outstanding natural areas, or pockets of scenic beauty near urbanized areas which are seen as a necessary visual buffer around dense development.

5. Other -- Almost all of the nominations fall into one of the above four categories. The remaining few cover topics including creation of study areas, public utilities development, and extending the CAFRA boundary to new areas.

The following page contains a summary of the nominations received in each county, as well as the generic nominations, showing the breakdown among the five use groups.

SUMMARY OF NOMINATIONS BY COUNTY

This section briefly describes the types of nominations received for each county in the coastal zone. The northeastern counties of Bergen, Essex, Hudson, and Union are grouped into one category called the Northeast Waterfront.

Northeast Waterfront (15 nominations)

More than in any of the other counties, the nominations in the Northeast Waterfront counties reflected a concern for open space, recreation opportunities, and visual amenity. Many urban waterfront lands were nominated for their potential contribution to urban open space and recreation, and as a buffer from development.

1. Hackensack Meadowlands
2. Passaic River Bank
3. Palisades
4. Paramus site
5. Paramus site

9. Passaic estuary
10. Hackensack estuary
11. Passaic River floodplain
12. Weehawken riverfront sites
13. North Bergen riverfront sites
14. Hoboken riverfront sites
15. Hudson waterfront

Middlesex (14)

Eleven of the fourteen nominations in Middlesex county were concerned with preservation. Of these, four identified the Raritan River or Bay; the balance identified other streams, ponds or flood plain areas.

1. Raritan River
2. Smith Creek - Sewaren
3. South Amboy tidal area
4. Henderson Woods/Morgan landfill
5. Jamesburg Park
6. Old Bridge - Historic district
7. Lawrence Brook
8. Weston Mills Pond
9. Helmetta Pond
10. Pidgeon Swamp & Burnt Fly Bog
11. Metuchen site
12. Old Bridge - Old Provost Cemetery
13. Raritan Bay
14. Helmetta woods & bog

Monmouth (25)

Half of Monmouth County's nominations were for preservation and conservation. Most of these focused on water bodies such as Sandy Hook Bay, Raritan Bay, the Shrewsbury and Navesink Rivers, and wetlands. Interest was also expressed in historic sites in Atlantic Highlands, Keyport, and Eatontown. The Natco Lake area, which received three nominations for preservation, is the site of a CAFRA application. These nominations have been included in the CAFRA permit review.

1. Keyport
2. Sandy Hook
3. Navesink estuary
4. Shark River estuary
5. Wetland tract (2160)
6. Wetland tract (2166)
7. Henry Hudson Springs

8. Atlantic Highlands Site
9. Long Branch Site
10. Monmouth Beach Site
11. Coastal jetties
12. Port Monmouth site
13. Wampum Lake district
14. Middletown site
15. Natco Lake area
16. Atlantic Highlands
17. Manasquan -,Yard tract
18. Navesink & Shrewsbury Islands
19. Swimming River shoreline
20. Horseshoe Cove, Sandy Hook
21. Shrewsbury estuary
22. Wreck Pond
23. Rumson Peninsula
24. Raritan Bay shores
25. Deal, West End, Elberon, Long Branch beaches

Ocean (32)

Twenty-three of Ocean County's 32 nominations were for preservation. Most often nominated were Long Beach Island and its beaches, Barnegat Bay, and Little Egg Harbor and its shores and marshes. The beaches of Lavallette, Mantoloking, and Bay Head were identified for the need for better public access. The unique pygmy pines (upper and lower plains) in the Pine Barrens were also nominated.

1. Long Beach Island beaches
2. Manahawkin site
3. Upper & Lower Plains
4. Goose Creek
5. Riverview Point
6. Sedge Island
7. Toms River riverbanks
8. Dillon Creek
9. Mantoloking, Lavallette, and Bayhead (beach access)
10. Pt. Pleasant to Island Beach State Park
11. Harvey Cedars marsh
12. Kettle Creek (Bricktown) site
13. Pt. Pleasant Boro site
14. Oyster Creek (north bank) & Barnegat Bay shore
15. Forked River Beach site
16. Old Forked River Airport area - east
17. Old Forked River Airport area - north
18. South Seaside Park - marsh
19. Barnegat Bay - west shore
20. Barnegat Bay islands
21. Marsh - west of Long Beach Island
22. Little Egg Harbor
23. Manahawkin Bay
24. Barnegat Bay
25. Tract near Lebanon State Forest
26. Egg Harbor Bay marshes

27. Long Beach Island
28. Island in Great Bay
29. Beaches, Island Beach State Park south to Ocean Beach
30. Tuckerton Marsh
31. Great Bay
32. Island Beach Sedge Islands

Burlington (East) (4)

The eastern (Atlantic Watershed) portion of Burlington County received nominations for its major rivers, the Mullica River, Oswego River, and Wading River watershed. All nominatons were for preservation.

1. Oswego River & Lake
2. Sim Place tract
3. Wading River watershed
4. Mullica River

Atlantic (12)

Atlantic County received 12 nominations, 9 of which were for preservation. These included the Great Egg Harbor River, the wetlands, ocean beaches, and several inland wildlife sites. One nomination identified the area between Atlantic City and the mainland, citing the increased pressure for development on this wetland area due to the approval of the Casino referendum.

The only nomination for a development site is in Atlantic County. This is City Island, nominated by the Atlantic County Sewerage Authority because of its suitability for public utilities development.

1. City Island - southern half
2. Great Egg Harbor River
3. Great Blue Heron Rookery
4. Mattix Run
5. Great Creek Bog
6. Maple Run Creek
7. Longport Sod banks
8. Gull Island
9. Area between Atlantic City & mainland
10. Inlet, waterway shores - Atlantic City to Longport
11. Coast of North Brigantine
12. Weymouth Lake - wooded tract
13. Egg Harbor Bay marshes

Cape May (35)

This county received 35 nominations -- the largest number of any county in the State. Twenty-two were for preservation, including Higbee Beach, Pond Creek, Stone Harbor Point, Avalon Dunes, Ocean

Crest State Park, Gravens Island, several swamps and bogs, the ocean beaches, the bay shore, and the wetlands. Cape May City and North Wildwood were nominated for their visual amenity and character. Five historic zones were also identified. Higbee Beach and Stone Harbor Point have been the subjects of recent CAFRA permit decisions.

1. Higbee Beach
2. Great Cedar Swamp
3. Timber Beaver Swamp
4. Cedar Island
5. Flood Prone areas
6. Bay shoreline
7. Barrier Beach south of Wildwood Crest
8. Coast Guard Base
9. Whale Beach
10. Stone Harbor Point
11. Pond Creek
12. Cape May Canal
13. Bennett's Bog
14. Cooper's Swamp
15. Avalon Dunes
16. Strathmere Beach
17. Ocean front wetlands
18. North Graven's Island
19. Cape May/North Wildwood
20. Cape May City
21. Cape May Point
22. Cape May Court House
23. Dennisville
24. Route 9 corridor
25. North Wildwood to Cape May Point beaches
26. Lower Township, Cape May City area
27. Ocean Crest State Park
28. Coastal waters, bays, wetlands, floodways
29. Agricultural areas
30. Shoreline, beach areas
31. Sally Marshall Crossing
32. High's Beach
33. Nummy Island
34. Reed's Beach
35. Cedar Islands

Cumberland (13)

Twelve of Cumberland County's thirteen nominations were for preservation, including the Delaware Bay and its shoreline and wetlands, the Maurice and Cohansey Rivers, and several lowland swamp forests. The towns of Greenwich and Othello were nominated for their historic value.

1. Cohansey waterbed
2. Bear Swamp
3. Hansey Creek Swamp

4. Garrens Neck Swamp
5. Maurice River watershed
6. Indian Head
7. Greenwich & Othello
8. Delaware Bay Oyster Seed Beds
9. Delaware Bay marshes
10. Delaware Bay shoreline
11. Delaware Bay mudflats
12. Dividing Creek
13. Maurice River - Millville Site

Salem (4)

All four nominations in Salem County were for preservation. Parvin State Park, Mannington Meadow and the Delaware River coastal lands were identified.

1. Parvin State Park
2. Delaware River shoreline
3. Mannington Meadows
4. Islands in Mannington Meadow & agricultural land (Delaware Bay shoreline)

Gloucester (1)

Gloucester County's one nomination was for preservation of the banks of Racoon Creek. The Delaware River banks were also mentioned in a nomination for Salem County's riverfront lands.

1. South bank Racoon Creek (Delaware River shoreline)

Camden (5)

The principal rivers and streams of Camden County were nominated for preservation, including the Delaware River, Pennsauken Creek, Cooper River, Newton Creek and Big Timber Creek.

1. Delaware River Shoreline
2. Pennsauken Creek
3. Cooper River System
4. Newton Creek
5. Big Timber Creek

Burlington (West) (6)

The western (or Delaware Watershed) portion of Burlington County received two preservation nominations, including Rancocas Creek, and four for recreation, including Rancocas State Park and Sylvan Lake.

1. Plum Point
2. Rancocas State Park

3. Sylvan Lake
4. Rancocas Creek waterbed
5. Moorestown Site
6. Moorestown Site

Generic (10)

Nine preservation nominations were received for "generic" types, including the pine barrens, coastal waters, barrier islands, wildlife areas, and wetlands. One nomination urged restricting high rise development at the Jersey shore.

1. Pine Barrens
2. Coastal waters/N.Y. Bight
3. N.J. watershed
4. Wildlife areas
5. Barrier islands
6. Wetlands
7. Atlantic Basin watersheds
8. Jersey Shore (no high-rises)
9. Prime Forest area
10. Streams, rivers, swamps, wetlands, bays, ocean

CONCLUSION

This public nomination process cannot insure that the areas nominated will automatically assume the character or use suggested. Decisions affecting the areas nominated are not made only by state agencies. Private interests, municipal bodies, and, in many cases, county and/or federal authorities also determine the future of coastal areas. Bringing specific areas to public attention, however, will serve as a guide and a catalyst to OCZM and other agencies charged with making land use decisions.

The results of the nomination process demonstrate the public concern and interest in the management of New Jersey's coastal resources. Preservation is, in fact, the dominant use suggested for the nominated areas, even though the request for nominations specifically invited suggestions for development locations. Also, the preservation emphasis was strong even though OCZM sent the request for nominations to the 5,000 people on the OCZM mailing list, which includes federal, state and local agencies, interest groups ranging from builders associations to energy related industry to environmental groups, and other interested individuals. The NAPC process is clearly not a scientific test of public sentiment, but it does indicate a strong public concern for preservation and conservation in the management of the New Jersey coast.

APPENDIX A: THE NOMINATIONS

This section contains a brief description of each public nomination. The information is presented on a standardized form which describes each nomination's location, significance, suggested use, and nominator(s), as well as OCZM's classification of each nomination as either site-specific, generic, or non-coastal. The map key numbers correspond to the numbers on the maps in the next section beginning on page 107.

APPENDIX C: PUBLIC NOTICE OF REQUEST FOR NOMINATIONS

The following pages reproduce several of the public notices the Department of Environmental Protection used to solicit nominations for geographic areas of particular concern. Included are two pages of Issue 3 of The Jersey Coast published in November 1976, the DEP press release announcing the project, the notice published in the New Jersey Register on February 10, 1977 and an unsolicited letter to the editor written by the leader of an environmental group to publicize the request for nominations.

NOMINATIONS FOR GEOGRAPHIC AREAS OF PARTICULAR CONCERN

During the past three years, the Department of Environmental Protection has worked to develop sound principles and pragmatic guidelines for managing the future of New Jersey's coastal lands and waters. Many citizens have participated in these efforts, and the book is by no means closed on such contributions.

The time is now ripe, however, for identifying specific places of particular importance. As part of its management strategy under the federal Coastal Zone Management Act, (CZMA) New Jersey must identify "geographic areas of particular concern." These are coastal locations meriting special attention because of their natural ecological value, or perhaps because of their suitability for development.

The New Jersey Office of Coastal Zone Management (OCZM) is asking all interested citizens to help name or "nominate" these special geographic areas. The nominations should be as specific as possible, such as, - "Development should be encouraged in a specific section of Atlantic City" or "This swamp area in X municipality should be preserved."

The nominations submitted will be considered by OCZM staff and discussed with local and county officials and interest groups. The characteristics of specific areas will be the significant factor, rather than the number of nominations received for a particular site.

In some areas, DEP may have insufficient power to regulate the area. In others, adequate state or local authority may already exist. But in many cases, coastal zone management may provide a means for protecting the natural resources or encouraging the best use of an area.

To assist you in organizing your nominations, the general types of geographic areas identified in OCZM's "Interim Land Use and Density Guidelines for the Coastal Area of New Jersey" are listed below. This list is suggestive only. Please feel free to nominate sites which do not fit into any of these categories:

Coastal Waters and Bays	Barrier Beaches
Rivers, Streams and Lakes	Shoreline and Beach
Wetlands	Prime Forest Areas
Barrier Islands	Sloped Land
Flood Prone Land	Historic Sites
Prime Agricultural Land	
Residential and Allied Areas	Urban Infill/Extension
Urban Economic Centers	Urban Depressed Areas

Areas described should be near coastal waters since that is the land most likely to be in the coastal zone under the Federal CZMA.

NOMINATIONS FOR GEOGRAPHIC AREAS OF PARTICULAR CONCERN

Submit as much information as possible on this form. Use extra paper if needed and return to OCZM. If it is more convenient, you need not use this form at all. For example, newspaper articles or letters describing an area are welcome.

Note for Mailing: 1) On reverse side of this sheet, cross off bottom address section including stamp and, if you wish, your name; 2) Fold, with OCZM address outside, staple, apply 13¢ stamp and mail.

NOMINATE YOUR
FAVORITE SPOT
FOR COASTAL POLL

TRENTON--Do you have a favorite fishing spot, barrier beach or scenic area you'd like to see protected under the state's coastal zone management plan?

Here's your chance to let New Jersey's Department of Environmental Protection (DEP) know about geographic areas of particular concern. Just send your nominations to David Kinsey, chief of DEP's Office of Coastal Zone Management, Box 1889, Trenton, 08625 before March 31.

Kinsey said designation of geographic areas of particular concern is a basic part in the development of New Jersey's overall plan for managing the coastal areas.

Some samples, said Kinsey, could be areas having cultural and scenic importance, historical significance, vulnerable natural habitat, high potential for development, or other unusual factors. You can nominate places such as coastal waters and bays, rivers, streams, lakes, wetlands, barrier beaches, prime forest areas, even depressed urban areas, or other various locations deserving special consideration.

"This is your opportunity to nominate your favorite area," Kinsey pointed out. "Let DEP know before the end of March so we can consider your suggestion."

Notice of Nominations for Geographic Areas of Particular Concern

Take notice that, the Department of Environmental Protection has issued the following Notice concerning nominations for geographic areas of particular concern.

Pursuant to the program development requirements of the Federal Coastal Zone Management Act, P.L. 92-583, 16 U.S.C. 1451 et seq., the Department of Environmental Protection must identify Geographic Areas of Particular Concern within the coastal zone of New Jersey.

Such Geographic Areas of Particular Concern are areas:

Of unique, scarce, fragile or vulnerable natural habitat, physical features, historical significance, cultural and scenic importance,

Of high natural productivity including fish, and wildlife, of substantial recreational value,

Where development is dependent on access or utilization of coastal waters,

Of urban concentration where shoreline and water uses are highly competitive,

Of significant hazard if developed due to storms, floods, erosion or the like,

Needed to protect, maintain or replenish coastal lands or resources.

Examples of such geographic areas include but are not limited to:

Coastal Waters and Bays.
Rivers, Streams and Lakes.
Wetlands.
Barrier Islands.
Flood Prone Land.
Prime Agricultural Land.
Residential and Allied Areas.
Urban Economic Centers.
Barrier Beaches.
Shoreline and Beaches.
Prime Forest Areas.
Sloped Land.
Historic Sites.
Depressed Urban Areas.
Urban Infill/Extension.

The New Jersey Office of Coastal Zone Management encourages public involvement in all phases of its program development activities. Therefore, the Office of Coastal Zone Management invites all interested persons to submit nominations for Geographic Areas of Particular Concern. Such nominations should be near coastal waters and identified as specifically as possible with respect to area type and location.

Nominations may be submitted on or before March 31, 1977 to:

David N. Kinsey
Department of Environmental Protection
Office of Coastal Zone Management
P.O. Box 1889
Trenton, N.J. 08625

Revisions for Preservation of Sea Clam Resources

On December 22, 1976, David J. Bardin, Commissioner of Environmental Protection, pursuant to authority of P.L. 1975, c.398, N.J.S.A. 50:1-5, 50:2-6.1 et seq., 13:1B-42, 13:1D-4, 13:1D-9 and in accordance with applicable provisions of the Administrative Procedure Act, adopted revisions to N.J.A.C. 7:25-12.1, known within the Department of Environmental Protection as Docket No. DEP 025-76-10, concerning the preservation of sea clam resources, substantially as proposed in the Notice published November 4, 1976, at 8 N.J.R. 508(b), but with subsequent, substantive changes not detrimental to the public, in the opinion of the Department of Environmental Protection.

The substantive changes concern changes from a daily to a weekly catch limit, the addition of a gallonage/bushel conversion figure for those persons who shuck their catch at sea and the clear enunciation of a 250,000-bushel harvest for the season.

An order adopting these revisions was filed on December 22, 1976, as R.1976 d.427 to become effective on December 27, 1976.

Emergency Revisions on Control And Prohibition of Air Pollution From Gasoline-Fueled Motor Vehicles

On December 30, 1976, David J. Bardin, Commissioner of Environmental Protection, pursuant to authority of N.J.S.A. 13:1D-1 et seq. and in accordance with applicable provisions of the Administrative Procedure Act, adopted an emergency revision to Table I in N.J.A.C. 7:27-15.4, concerning the control and prohibition of air pollution from gasoline-fueled motor vehicles. The effect of the adopted revisions is to delete the date of January 1, 1977, from the heading of the last column in that Table.

These revisions are known within the Department of Environmental Protection as Docket No. DEP 032-76-12.

Take notice that there appears, prior to this point in this issue of the New Jersey Register, a Notice of Proposed Revisions that, if adopted, will further affect the contents of Subchapter 15 of Chapter 27 in Title 7 of the New Jersey Administrative Code.

THE SUNDAY RECORD, NOVEMBER 28, 1976

Beauty Spots

Editor, The Record:

The people of New Jersey have a chance to nominate their favorite spots to be preserved from development. According to the federal Coastal Zone Management Act, the state must identify "geographical areas of particular concern" — areas of natural ecological value such as rivers, forests, marshes; historic sites; areas heavily used for recreation; and even scenic overlooks.

The state will discuss these nominations with local and county officials and interest groups and should shape its upcoming land-use plan around your wishes as expressed through the areas you nominate.

A nomination can be as simple as: "I nominate as an area of geographical concern the lowland west of Route 555 where it meets Ocean Boulevard. This area provides a view of the marsh to the east." Or you can go into detail. You should follow up your letter by asking what decision was reached.

Nominations should be mailed to: David Kinsey, Office of Coastal Zone Management, Box 1889, Trenton, N.J., 08625. If possible, please send a copy to Littoral Society, Highlands, N.J., 07732.
