Summaries of Domestic and Joint Venture Groundfish Catches
(Metric Tons) in the Northeast Pacific Ocean and Bering Sea, 1990

compiled by

Michael Guttormsen, Jessica Gharrett, Galen Tromble,
Jerald Berger, and Sueto Murai

This booklet contains summaries of 1990 domestic and joint venture groundfish catches taken in the Bering Sea-Aleutian Islands region, the Gulf of Alaska region, and Washington-Oregon-California (WOC) region (Figures 1, 2 and 3). Domestic catch estimates are based on processor reports submitted on a weekly basis to the Regional Office in Juneau. Joint venture catch estimates are produced by the U.S. Observer Program and consist of a blend of vessel reports and observer data within week-nation-area-vessel class data cells. Observer data were used when coverage within a data cell was as least 20%; vessel reports were used when coverage was less than 20%. A further qualification is that if the observed estimate of a species was within 10% of the vessel report, the vessel report was used.

In 1990, domestic fishing occurred in all three regions. Joint venture fishing occurred in the Bering Sea-Aleutian Islands and WOC regions. Nations participating in the Bering Sea-Aleutian Islands joint venture fishery were Japan, the Republic of Korea, the U.S.S.R., the People's Republic of China, and Poland. In the WOC region, participating nations were Japan, the Republic of Korea, and the U.S.S.R. No joint venture fishing occurred in the Gulf of Alaska region, and no foreign fishing occurred in any region.

Definitions

Target fishery was calculated on a vessel-by-vessel basis for each week and area fished and gear type used (domestic fishing only). In this report, "flatfish" target refers to catches when the retained amount of yellowfin sole, rock sole, and other flatfish (excluding Pacific halibut, Greenland turbot, arrowtooth flounder, and Kamchakta flounder in the Bering Sea-Aleutian Islands region and Pacific halibut in the Gulf of Alaska region) was at least 20% of the retained allocated catch; all other target fisheries are referred to as "nonflatfish". All joint venture catches in the Bering Sea-Aleutians region were targeted as "flatfish" targets, and in the WOC region all catches were targeted as "nonflatfish"; thus, target is not included in tables for joint venture fisheries.

Definitions of gear types are given in Table 1. Gear types are applicable only to domestic fisheries.

Table 1.--Definition of gear types used in U.S. domestic groundfish fisheries in the Bering Sea-Aleutian Islands, Gulf of Alaska, and Washington-Oregon-California regions in 1990.

Gear Type	Definition
BTR	Trawls containing bobbins, rollers, or chafing gear on the footrope to protect against contact with the seabed.
PTR	Trawls on which neither the net nor the trawl doors operates in contact with the seabed and has no protective devices that would make it suitable for fishing in contact with the seabed.
LGL	A stationary, buoyed, and anchored line containing baited hooks.
POT	A string or group of baited pots.

BERING SEA-ALEUTIAN ISLANDS GROUND FISH FISHERIES

The following descriptions and species groups apply to tables for the Bering Sea-Aleutian Islands domestic and joint venture fisheries.

Species groups

Pollock	- <u>Theragra chalcogramma</u>
Pacific cod	- <u>Gadus macrocephalus</u>
Sablefish	- <u>Anoplopoma fimbria</u>
Atka mackerel	- <u>Pleurogrammus monopterygius</u>
POP	- Pacific ocean perch, <u>Sebastes alutus</u> , Rougheye rockfish, <u>S. aleutianus</u> , Northern rockfish, <u>S. polyspinus</u> , Sharpchin rockfish, <u>S. zacentrus</u> , and Shortraker rockfish, <u>S. borealis</u>
Other rockfish	- All rockfish except POP
Arrowtooth	- Arrowtooth flounder, <u>Atheresthes stomias</u> , and Kamchatka flounder, <u>A. evermanni</u>
Yellowfin sole	- <u>Pleuronectes asper</u>
Rock sole	- <u>Lepidopsetta bilineata</u>
Greenland turbot	- <u>Reinhardtius hippoglossoides</u>
Other flounders	- All flounders except yellowfin sole, rock sole, Greenland turbot, arrowtooth flounder, and Kamchatka flounder
Squid	- All species of squid
Herring	- <u>Clupea pallasii</u>
Other fish	- Sharks, skates, rays, sculpins, smelts, eulachon, capelin, and octopus

PACIFIC COAST PACIFIC WHITING FISHERY

The following species groups apply to tables for the Pacific Coast Pacific whiting fishery.

Species groups

Pacific whiting	- <u>Merluccius productus</u>
Jack mackerel	- Retained <u>Trachurus symmetricus</u>
Sablefish	- Retained <u>Anoplopoma fimbria</u>
POP	- Retained Pacific ocean perch, <u>Sebastes alutus</u>
Other rockfish	- Retained rockfish (except POP)
All flounders	- Retained flatfish species (except halibut)
Other fish	- All other retained groundfish and invertebrate species (except salmon, halibut, and crab)
POP discards	- Discarded POP
Other rockfish discards	- Discarded other rockfish
Sablefish discards	- Discarded sablefish
Jack mackerel discards	- Discarded Jack mackerel
Flatfish discards	- Discarded flatfish (except halibut)
Other discards	- All other discarded groundfish and invertebrate species (except salmon, halibut, and crab)
