FOG

This brief bibliography provides a selected guide to the literature on fog -- its formation and distribution, forecasting, and control. Most of the citations are to the recent literature but some older materials have been included from the extensive weather and climate collections of the NOAA Central Library.

Current references were selected from Meteorological and Geoastrophysical Abstracts, published by the American Meteorological Society, Boston, MA, and from the National Technical Information Service (NTIS) database, U. S. Dept. of Commerce, Springfield, VA. The citations are in alphabetical order by author within each category.

Questions about this material may be addressed to: Reference Desk, NOAA Central Library, 6009 Executive Blvd., Rockville, MD 20852, or call (301) 443-8330. Suggestions for topics to be included in future issues of this bibliographic series are always welcome.

I. Formation and Distribution

Low-temperature fog in the Northwest Territories.
Berry, M. O.; Lawford, R. G.
Downsview, Ont.: Fisheries and Environment Canada, Atmospheric Environmen Service, 27p., 1977.

Observations of the structure of a deep fog.
Brown, R.
Meteorological Magazine, Bracknell, Eng., 116(1384): 329-338, Nov. 1987.

The physical processes in the formation of radiation fog.
Davis, Francis K.
Ann Arbor, MI: University Microfilms, 92 leaves, 1973.

Study of fog and stratus for selected cold regions.
Guttman, Nathaniel B.
Asheville, NC: Published by direction of the Commander, Naval Weather Servic Command, 85p., 1975.

Study of worldwide occurrence of fog, thunderstorms, supercooled low cloud and freezing temperatures.
Guttman, Nathaniel B.
Asheville, NC: National Oceanic and Atmospheric Administration, Environmenta Data Service, National Climatic Center, 1971.

Urban clear islands in California Central Valley fog.
Lee, Thomas F.
Monthly Weather Review, 115(8): 1794-1796, Aug. 1987.

Seerauch. Sea smoke.
Meier, H.J.; Kaufeld, L.
Wetterlotse, Hamburg, 38(469/470): 20-27, Jan./Feb. 1986.

FOG-82: a cooperative field study of radiation fog.
Meyer, Michael B.; Lala, G. Garland; Jiusto, James E.
American Meteorological Society, Boston, Bulletin, 67(7): 825-832, July 1986

Winter fog and air transportation in Sacramento, California.
Mitchell, Martin D.; Suckling, Philip W.
Climatological Bulletin, Ontario, Canada, 21(3): 16-22, Oct. 1987.

Fog chemistry at an urban midwestern site.
Muir, Patricia S.
Air Pollution Control Association, Pittsburgh, PA, Journal (JAPCA), 36(12) 1359-1361, Dec. 1986.

Numerical study of the formation and the dissipation of radiation fogs.
Ohta, Sachio; Tanaka, Masayuki.
Journal of the Meteorological Society of Japan, Tokyo, 64(1): 65-77, Feb 1986.

Observations of the natural dissipation of Appalachian Valley fog.
Plank, Vernon G.; Spatola, Alfred A.
Hanscom AFB, MA: Meteorology Division, Air Force Geophysics Laboratory, 20p. 1976.

The life cycle of California coastal fog offshore.
Rogers, William; et al.
Hanscom AFB, MA: Air Force Cambridge Research Laboratories, 85p., 1974.

Urban influences on fog.
Stewart, Dorothy A.
Redstone Arsenal, AL: U.S. Army Missile Command, 33p., 1982.

Stratocumulus nature of fog.
Welch, Ronald M.; Wielicki, Bruce A.
Journal of Climate and Applied Meteorology, Boston, 25(2): 101-111, Feb 1986.

Satellite observations of widespread fog.
Wexler, Ruth L.
Fort Belvoir, VA: U.S. Army Corps of Engineers, Engineer Topographi Laboratories, 16p., 1984.

II. Forecasting

A maritime boundary layer model for the prediction of fog.
Barker, Edward H.
Monterey, CA: Environmental Prediction Research Facility, Naval Postgraduat School, 51p., 1975.

Monthly infrared imagery enhancement curves: a tool for nighttime sea fo identification off the New England coast.
Maturi, Eileen M.; Holmes, Susan J.
Washington, D.C.: National Oceanic and Atmospheric Administration, Nationa Environmental Satellite, Data, and Information Service, Satellit Applications Laboratory, 40p., 1985.

Some empirical rules for forecasting fog and stratus over northern Florida southern Georgia and adjacent coastal waters.
Ricks, Emmett L.
Miami, FL: National Oceanic and Atmospheric Administration, National Weathe Service,(Southern Region); Springfield, VA: available from the Nationa Technical Information Service, 9p., 1981.

Program performance specification for North Atlantic fog forecasting.
Rogers, C. William
Monterey, CA: Naval Environmental Prediction Research Facility, 24p., 1988

ZEUS: A knowledge-based expert system that assists in predicting visibilit at airbases. Final Rept. Dec 85-Dec 86.
Stunder, M. J.; Koch, R. C.; Sletten, T. N.; Lee, S. M.
Germantown, MD: Geomet Technologies, Inc.; Funder: Air Force Geophysics Lab. Hanscom AFB, MA, 162p., January 1987.

Objective prediction of fine scale variations in radiation fog intensity.
Tahnk, William R.
Hanscom AFB, MA: Meteorology Laboratory, Air Force Cambridge Researc Laboratories, 37p., 1975.

An evaluation of an advection fog prediction model.
Weyman, James.
Hanscom AFB, MA: Atmospheric Sciences Division, Air Force Geophysics Laboratory, 45p., 1984.

III. Control

Fog dispersion.
Christensen, Larry S.; Frost, Walter.
Washington, D.C.: National Aeronautics and Space Administration, Scientific and Technical Information Office, 118 p., 1980.

Research on control technology for ice fog from mobile sources.
Coutts, Harold J.; Turner, Ronald K.
Corvallis, OR: Corvallis Environmental Research Laboratory, Office of Research and Development, U. S. Environmental Protection Agency, 90p., 1978

Charged particle concepts for fog dispersion.
Frost, Walter; Collins, Frank G.; Koepf, David.
Washington, D.C.: National Aeronautics and Space Administration, Scientific and Technical Information Branch, 107p., 1981.

Field evaluation of fog dispersal tests at Elmira, NY: Final report.
Rogers, C. W.; Wattle, B. J.; Mack, E. J.
Friendswood, TX: Energy Innovations, Inc.; Funder: U. S. Department of Energy, 42p., June 1987.

Clearing fog by seeding with charged water drops: a numerical study.
Tag, Paul M.
Monterey, CA: Naval Environmental Prediction Research Facility, 49p., 1976

Compressed air for supercooled fog dispersal.
Weinstein, Alan I.; Hicks, James R.
Hanscom AFB, MA: Meteorology Laboratory, Air Force Cambridge Research Laboratories, 32p., 1975.
