## INTRODUCTION

It had been my hope that I would be able to make use of the collections of the G. W. Blunt White Library at Mystic Seaport for this fifth volume as I did for the fourth which appeared in 1976. Unfortunately I was unable to arrange a visit to Mystic to accomplish that. Thus this fifth volume is similar to the third in that it is based primarily upon the holdings of the Texas A&M University Library. The holdings at Texas A&M relative to maritime and naval history have improved substantially over the past years. This, plus a modest search of two historical data bases--"America: History and Life" and "Historical Abstracts"--have made it possible for this fifth volume to be more comprehensive than the third one was. The search of the data bases was funded through the Texas A&M University Library Research Committee with monies made available by the University Research Council from the Organized Research Fund. The data bases contained a number of significant titles not written in English. I have included them even though such foreign language items have been excluded from the previous four volumes.

As has been my practice in the past, I have compiled complete author and vessel indexes and a selective subject index. Since the bibliography is arranged into seventeen broad subject areas, it appears that a detailed subject index is not an absolute necessity.

Copies of the previous volumes are available as follows: To the best of my knowledge those covering the years 1970 and 1971 may still be purchased from Mystic Seaport Stores, Inc., Mystic, Connecticut, 06355. A few copies of the volume covering the years 1972-1973 are available from Sea Grant College Program, Texas A&M University, College Station, Texas 77843. The supply of the 1974-1975 volume is exhausted. Microfiche copies of both the 1972-1973 and the 1974-1975 volumes are available from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. The order numbers are as follows: 1972-1973--COM-75-11775/AS; 1974-1975--PB-262462.

- \_\_\_\_\_, "The Date of Juan de La Cosa's World Map and Its Implications for American Discovery," Geographical Journal, No. 1, 1976, pp. 111-116. The world map has been a cartographic yardstick by which to assess those American coasts discovered by 1500. In recent years attempts have been made to give it a later date, even as late as 1529. The author admits that La Cosa did not draw the map, and suggests that the considerable error made in the latitude of the coasts and islands of the Caribbean means that it cannot be dated later than 1501. Amerigo Vespucci may have helped with it and may have taken it to Portugal.
