

# NOAA LIVING MARINE RESOURCES COOPERATIVE SCIENCE CENTER

The NOAA Living Marine Resources Cooperative Science Center (LMRCSC) was created in 2001 by cooperative agreement with the National Oceanic and Atmospheric Administration. The Mission of the Center is *to conduct research congruent with the interests of NOAA Fisheries and to prepare students for careers in research, management, and public policy that support the sustainable harvest and conservation of our nation's living marine resources.*

## Undergraduate Support

**LMRCSC offers the following types of financial support to undergraduate students pursuing degrees in Fisheries and Marine Science. Students must be accepted into and enroll in a degree program at one of the institutions below to qualify for funding. Students must have a cumulative GPA or 3.0 or better on a 4.0 scale and be US citizens.**

### University of Maryland Eastern Shore

- *Tuition assistance (equivalent to in-state tuition and fees)*
- *Stipends for students working on LMRCSC research projects*
