## PREFACE

### FISHERIES OF THE UNITED STATES, 1997

This publication is a preliminary report for 1997 on commercial and recreational fisheries of the United States with catches in the U.S. waters and foreign Exclusive Economic Zones (EEZ) waters. This annual report provides timely answers to frequently asked questions.

### SOURCES OF DATA

Information in this report came from many sources. Field offices of the National Marine Fisheries Service (NMFS), in cooperation with various States, collected and compiled data on U.S. commercial landings and processed fishery products. The NMFS Fisheries Statistics and Economics Division in Silver Spring, MD, managed the collection and compilation of recreational statistics, and tabulated and prepared all data for publication. Sources of other data appearing in this publication are: U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Coast Guard, U.S. Customs Service, U.S. Department of the Interior, U.S. Department of Agriculture, and the Food and Agriculture Organization (FAO) of the United Nations.

### PRELIMINARY AND FINAL DATA

Data on U.S. commercial and recreational landings, employment, prices, and production of processed products are preliminary for 1997. Final data will be published in other NMFS Current Fishery Statistics publications.

The Fisheries Statistics and Economics Division of NMFS takes this opportunity to thank members of states, industry, and foreign nations who provided the data that made this publication possible.

Program leaders of the field offices were: Gregory Power, New England, Middle Atlantic, and Chesapeake; Tony Frank, National Biological Service Science Center, Great Lakes States; Nelson Johnson, Guy Davenport, and Margot Hightower for the South Atlantic and Gulf States; Patricia J. Donley, California and Hawaii; John K. Bishop, Oregon and Washington; and David Ham, Alaska.

### NOTES

The time series of U.S. catch by species and distance from shore included in this year's "Fisheries of the U.S." is estimated by the National Marine Fisheries Service.

As in past issues of this publication, the units of quantity and value are defined as follows: U.S. landings are shown in round weight (except mollusks which are in meat weight), unless otherwise noted; quantities shown for U.S. imports and exports are in product weight, as reported by the U.S. Bureau of the Census, unless otherwise noted; the value of the U.S. domestic commercial catch is exvessel (in the Review Section on important species actual and deflated exvessel prices are shown. The deflated value was computed using the Gross Domestic Products Implicit Price Deflator); the value for U.S. imports is generally the market value in the foreign (exporting) country and, therefore, excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance; the value for exports is generally the value at the U.S. port of export, based on the selling price, including inland freight, insurance, and other charges. Countries and territories shown in the U.S. foreign trade section are established for statistical purposes in the Tariff Schedules of the United States Annotated (International Trade Commission) and reported by the U.S. Bureau of the Census.

### SUGGESTIONS

The Fisheries Statistics and Economics Division wishes to provide the kinds of data sought by users of fishery statistics, and welcomes any comments or suggestions that will improve this publication.

Address all comments or questions to:

## REVIEW

**U.S. LANDINGS.** Commercial landings (edible and industrial) by U.S. fishermen at ports in the 50 states were 9.8 billion pounds or 4.5 million metric tons valued at \$3.5 billion in 1997--an increase of 280.9 million pounds (up 3 percent), but a decrease of \$20.1 million (down 1 percent) compared with 1996. The volume of 1997 U.S. landings was increased due to landings of major species such as menhaden, yellowfin flounder, snow (tanner) crab, Atlantic cod and Pacific hake (whiting), and due to the inclusion of seaweed (kelp) that had been incompletely reported in past surveys. The decreased value of 1997 landings occurred due to the relatively low value associated with menhaden and seaweed and decreased landings of some high-value fisheries such as salmon and shrimp. Finfish accounted for 85 percent of the total landings, but only 50 percent of the value. The 1997 exvessel price paid to fishermen was 35 cents compared to 36 cents they received in 1996.

Commercial landings by U.S. fishermen at ports outside the 50 states or transferred to internal water processing vessels (IWPs) were an additional 378.6 million pounds (171,700 metric tons) valued at \$185.5 million. This was a 7 percent, or 27.5 million pounds (12,500 metric ton) decrease in quantity, but an increase of \$25.5 million (16 percent) in value compared with 1996. Most of these landings consisted of halibut landings in Canada, sea herring and tuna landed in Puerto Rico, American Samoa and other foreign ports, and IWP transfers of sea herring.

Edible fish and shellfish landings in the 50 states were 7.2 billion pounds (3.3 million metric tons) in 1997--a decrease of 226 million pounds (103,000 metric tons) compared with 1996.

Landings for reduction and other industrial purposes were 2.6 billion pounds (1.2 million metric tons) in 1997--an increase of 20 percent compared with 1996.

The 1997 U.S. marine recreational finfish catch (including fish caught and released alive) on the Atlantic, Gulf, and Pacific coasts was an estimated 366.2 million fish taken on an estimated 68.1 million fishing trips. The harvest (fish kept)

was estimated at 163.6 million fish weighing 234.2 million pounds.

**WORLD LANDINGS.** In 1996, the most recent year for which data are available, world commercial fishery landings were 121.0 million metric tons--an increase of 3.7 million metric tons (up 3 percent) compared with 1994.

China was the leading nation with 26.4 percent of the total catch; Peru, second with 7.9 percent; Chile, third with 5.7 percent; Japan, fourth with 5.6 percent; and United States, fifth with 4.5 percent.

**PRICES.** The 1997 annual exvessel price index for edible fish and shellfish showed an increase of 5 percent while industrial fish increased 20 percent when compared with 1996. Exvessel price indices decreased for 12 of the 33 species groups being tracked, increased for 20 species groups and were not calculated for calico scallops. The sea herring price index had the largest decrease (50 percent) while the bay scallops price index showed the largest increase (61 percent).

**PROCESSED PRODUCTS.** The estimated value of the 1997 domestic production of edible and nonedible fishery products was \$6.8 billion, \$1.2 billion (15 percent) less than the \$8.0 billion in 1996. The value of edible products was \$6.2 billion--a decrease of \$1.1 billion (15 percent) compared with 1996. The value of industrial products was \$579.1 million in 1997--a decrease of \$65.4 million (10 percent) compared with 1996.

**FOREIGN TRADE.** The total import value of edible and nonedible fishery products was \$14.5 billion in 1997--an increase of \$1.5 billion (11 percent) compared with 1996. Imports of edible fishery products (product weight) were 3.3 billion pounds (1.5 million metric tons) valued at \$7.8 billion in 1997--an increase of 169.1 million pounds (5 percent) and \$1.0 billion (15 percent) compared with 1996. Imports of nonedible (i.e., industrial) products were \$6.8 billion--an increase of \$443.3 million (7 percent) compared with 1996.

## REVIEW

Total export value of edible and nonedible fishery products was \$9.4 billion in 1997--an increase of \$700.2 million (8 percent) compared with 1996. United States firms exported 2.0 billion pounds (915,800 metric tons) of edible products valued at \$2.7 billion--a decrease of 93.2 million pounds, and \$319.2 million compared with 1996. Exports of nonedible products were valued at a record \$6.6 billion, \$1.0 billion more than 1996.

**SUPPLY.** The U.S. supply of edible fishery products (domestic landings plus imports, round weight equivalent) was 13.7 billion pounds (6.2 million metric tons) in 1997--an increase of 115.0 million pounds compared with 1996. The supply of industrial fishery products was 3.7 billion pounds (1.7 million metric tons) in 1997--an increase of 843.0 million pounds (6 percent) compared with 1996.

**PER CAPITA CONSUMPTION.** U.S. consumption of fishery products was 14.6 pounds of edible meat per person in 1997, down 0.2 pound from the 1996 per capita consumption of 14.8 pounds.

**CONSUMER EXPENDITURES.** U.S. consumers spent an estimated \$46.5 billion for fishery products in 1997. The 1997 total includes \$31.3 billion in expenditures at food service establishments (restaurants, carry-outs, caterers, etc.); \$14.8 billion in retail sales for home consumption; and \$323.3 million for industrial fish products. By producing and marketing a variety of fishery products for domestic and foreign markets, the commercial marine fishing industry contributed \$24.4 billion (in value added) to the U.S. Gross National Product.

## REVIEW

### OTHER IMPORTANT FACTS

Alaska pollock, with landings of 2.5 billion pounds (1.1 million metric tons), was the most important species in quantity and fifth in value for 1997, accounting for 26 percent of the commercial fishery landings in the United States.

Menhaden was the second most important species in quantity, but low in value.

Cods were third in quantity and sixth in value.

Salmon were fourth in quantity and fourth in value.

Flounders were fifth in quantity, and seventh in value.

Hakes were sixth in quantity, but low in value.

Shrimp were ninth in quantity, but first in value.

Crabs were seventh in quantity, but second in value.

Lobsters were low in quantity, but third in value.

Tuna landings by U.S.-flag vessels at ports outside the continental United States amounted to 373.8 million pounds. Halibut, grouper and sea herring also were landed at ports outside the United States or transferred to internal water processing vessels in U.S. waters.

Dutch Harbor-Unalaska, Alaska, was the leading U.S. port in quantity of commercial fishery landings, followed by: Reedville, Virginia; Empire-Venice, Louisiana; Cameron, Louisiana; and Seattle, Washington.

Dutch Harbor-Unalaska was also the leading U.S. port in terms of value, followed by: New Bedford, Massachusetts; Kodiak, Alaska; Empire-Venice, Louisiana; and Key West, Florida.

Alaska led all states in volume with landings of 4.8 billion pounds, followed by Louisiana, 1.4 billion; California, 648.7 million; Virginia, 611.5 million; and Washington, 438.6 million pounds.

Alaska led all states in value of landings with \$1.1 billion, followed by Louisiana, \$318.8 million; Maine, \$223.2 million; Massachusetts, \$214.7 million; and Florida, \$209.2 million.

## IMPORTANT SPECIES

**ALASKA POLLOCK AND OTHER PACIFIC TRAWL FISH.** U.S. landings of Pacific trawl fish (Pacific cod, flounders, hake, Pacific ocean perch, Alaska pollock, and rockfishes) were 4.4 billion pounds valued at \$525.1 million--an increase of 3 percent in quantity and a 6 percent increase in value compared with 1996.

Landings of Alaska pollock decreased 4 percent to 2.5 billion pounds and were 15 percent lower than the 1992-1996 5-year average. Landings of Pacific cod

were 661.3 million pounds -- an increase of 9 percent from 605.3 million pounds in 1996. Pacific hake (whiting) landings were 499.6 million pounds (up 16 percent) valued at \$27.3 million (up 6 percent from 1996). Landings of rockfishes were 117.0 million pounds (up 23 percent) and valued at \$47.9 million (up 23 percent) compared to 1996. The 1997 rockfish landings were 12 percent higher than the 5-year average.

**ANCHOVIES.** U.S. landings of anchovies were 12.7 million pounds--an increase of 2.8 million pounds (28 percent) compared with 1996. Eighty-two percent of all landings were used for animal food or reduction and 12 percent were used for bait.

**HALIBUT.** U.S. landings of Atlantic and Pacific halibut were 69.9 million pounds (round weight) valued at \$117.4 million--an increase of 20.8 million pounds (42 percent) and \$33.9 million (41 percent) compared with

1996. The Pacific fishery accounted for all but 30,000 pounds of the 1997 total halibut catch. The average exvessel price per pound in 1997 was \$1.68 compared with \$1.70 in 1996.

**HERRING, SEA.** U.S. commercial landings of sea herring were 347.9 million pounds valued at \$40.9 million--an increase of 30.3 million pounds (9 percent) and a decrease of \$40.1 million (49 percent) compared with 1996. Landings of Atlantic sea herring were 211.0 million pounds valued at \$11.5 million--an increase of 13.9 million pounds (7 percent) and \$349,000 (3 percent) compared with 1996.

Landings of Pacific sea herring were 136.9 million pounds valued at \$29.3 million--an increase of 16.4 million pounds (14 percent) but a decrease of \$40.4

million (58 percent) compared with 1996. Alaska landings accounted for 84 percent of the Pacific coast with 115.5 million pounds valued at \$15.9 million--an increase of 8.1 million pounds (8 percent) and a decrease of \$38.9 million (71 percent) compared with 1996.

**JACK MACKEREL.** California accounted for 100 percent of the U.S. landings of jack mackerel in 1997. Total landings were 2.6 million pounds valued at \$281,000--a decrease of 2.2 million pounds (47 percent), and \$15,000 (5 percent) compared with 1996. The 1997 average exvessel price per pound rose to 11 cents.

# REVIEW

## IMPORTANT SPECIES

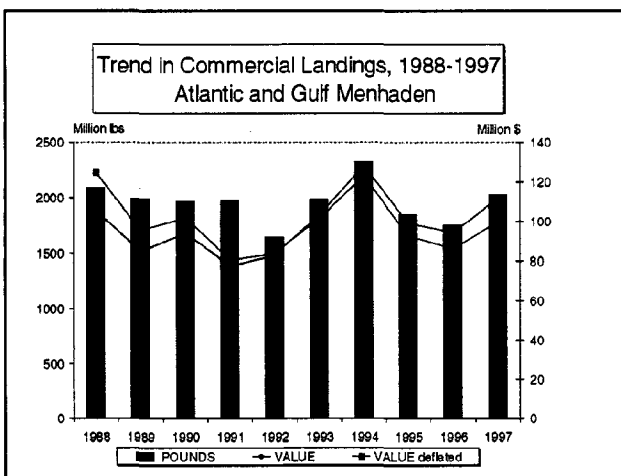

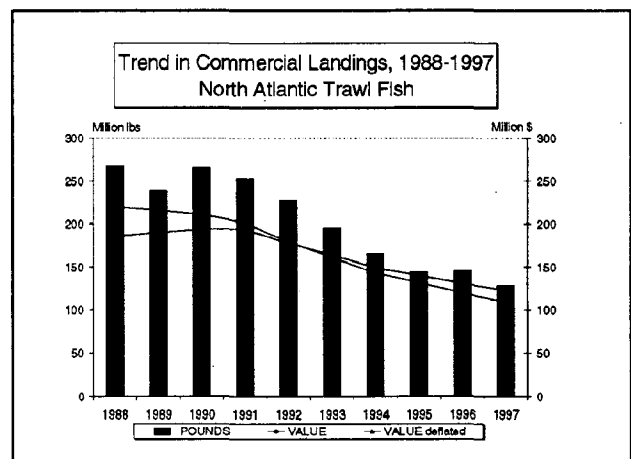

**MACKEREL, ATLANTIC.** U.S. landings of Atlantic mackerel were 33.9 million pounds valued at \$9.5 million--a decrease of 861,000 pounds (2 percent), but an increase of \$4.9 million (106 percent) compared with 1996. Rhode Island with 21.3 million pounds and New Jersey with 9.5 million pounds accounted for 91 percent of the total landings. The average exvessel price per pound in 1997 was 28 cents, up from 13 cents in 1996. The price increase was due to Rhode Island and New Jersey mackerel frozen at sea which provided a higher exvessel price to fishermen.

**MACKEREL, CHUB.** Landings of Chub mackerel were 40.6 million pounds valued at \$2.8 million--an increase of 18.6 million pounds (84 percent) and \$1.4 million (107 percent) compared with 1996. The average exvessel price per pound was 7 cents, up from 6 cents in 1996.

**MENHADEN.** The U.S. menhaden landings were 2.0 billion pounds valued at \$112.1 million--an increase of 272.3 million pounds (16 percent) and \$17.9 million (19 percent) compared with 1996. Landings decreased by 15.0 million pounds (2 percent) in the Atlantic states and increased 287.3 million pounds (27 percent) in the Gulf states compared with 1996. Landings along the Atlantic

production of meal, oil, and solubles. Small quantities are used for bait and animal food.

**NORTH ATLANTIC TRAWL FISH.** Landings of butterfish, Atlantic cod, cusk, flounders (winter/blackback, summer/fluke, yellowtail and other), haddock, red and white hake, ocean perch, pollock and whiting (silver hake) in the North Atlantic (combination of New England, Middle Atlantic, and Chesapeake Regions) were 116.0 million pounds valued at \$108.1

coast were 656.7 million pounds valued at \$40.0 million. Gulf region landings were 1.4 billion pounds valued at \$72.0 million. Menhaden are used primarily for the

million--a decrease of 18.6 million pounds (14 percent) and a decrease of \$7.0 million (6 percent) compared with 1996. Of these species, flounder led in total value in the North Atlantic, accounting for 53 percent of the total; followed by cod, 23 percent; and whiting, 7 percent.

The 1997 landings of Atlantic cod were 28.6 million pounds valued at \$24.5 million--a decrease of 2.8 million pounds (9 percent) and \$2.1 million (8 percent) compared with 1996. The exvessel price per pound was 93 cents in 1997 up from 85 cents per pound in 1996.

Landings of yellowtail flounder were 6.3 million pounds--an increase of 1.0 million pounds (19 percent) from 1996, and about 14 percent lower than its 5-year average.

Haddock landings increased to 3.3 million pounds (164 percent) and \$3.6 million (141 percent) when compared with 1996.

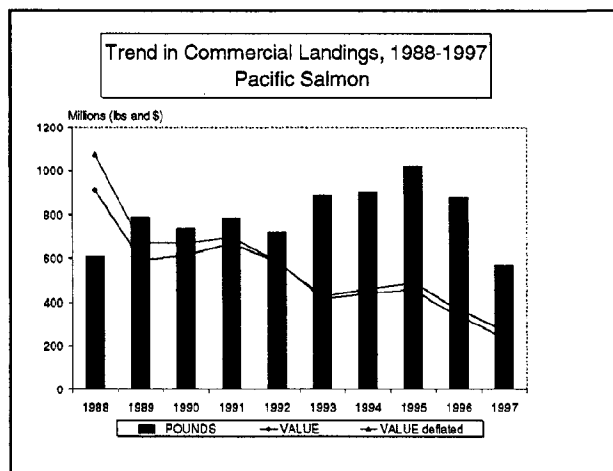

coast were 656.7 million pounds valued at \$40.0 million. Gulf region landings were 1.4 billion pounds valued at \$72.0 million. Menhaden are used primarily for the

# REVIEW

## IMPORTANT SPECIES

North Atlantic pollock landings were 9.4 million pounds valued at \$5.3 million--an increase of 2.9 million pounds (44 percent) and \$0.9 million (18 percent) compared with 1996.

**PACIFIC SALMON.** U.S. commercial landings of salmon were 567.7 million pounds valued at \$270.4 million--a decrease of 309.4 million pounds (35 percent), and \$98.3 million (27 percent) compared with 1996. Alaska and Washington accounted for 94 percent and 4 percent of the total landings, respectively. Sockeye salmon landings were 192.5 million pounds valued at \$177.3 million--a decrease of 125.9 million pounds (40 percent), and \$89.1 million (33 percent) compared with 1996. Chinook salmon landings increased to 21.8 million pounds--up 1.3 million pounds (6 percent) from 1996. Pink salmon landings were 227.0 million pounds--a decrease of 82.8 million pounds (27 percent); chum salmon decreased to 103.1 million pounds (43 percent); and coho salmon decreased to 23.3 million pounds--a decrease of 24.4 million pounds (51 percent) compared with 1996.

Alaska landings were 537.9 million pounds valued at \$247.8 million--a decrease of 316.9 million pounds (37 percent), and \$104.6 million (30 percent) compared with 1996. The distribution of Alaska salmon landings by species in 1997 was: sockeye, 185.5 million pounds (34 percent); pink, 219.9 million pounds (41 percent); chum, 98.9 million pounds (18 percent); coho, 22.3 million pounds (4 percent); and chinook, 11.2 million pounds (2 percent). The exvessel price per

pound for all species in Alaska was 46 cents in 1997-- an increase of 5 cents from 1996.

Washington salmon landings were 20.7 million pounds valued at \$12.3 million--an increase of 6.5 million pounds (46 percent), and \$5.4 million (78 percent) compared with 1996. The biennial fishery for pink salmon went from no catch in 1996 to 7.1 million pounds in 1997. Washington landings of sockeye salmon were 6.9 million pounds (up 245 percent); followed by chum salmon, 4.2 million pounds--a decrease of 2.7 million pounds (down 39 percent); silver, 824,000 pounds (down 67 percent); and chinook, 1.7 million pounds (down 38 percent) compared with 1996. The average exvessel price per pound for all species in Washington increased from 48 cents in 1996 to 59 cents in 1997.

Oregon salmon landings were 2.2 million pounds valued at \$2.8 million--a decrease of 588,000 pounds (21 percent) and \$516,000 (16 percent) compared with 1996. Landings of chinook salmon were 2.1 million pounds (down 20 percent) and coho with 151,000 pounds (down 30 percent). The average exvessel price per pound for all species in Oregon increased from \$1.16 in 1996 to \$1.24 in 1997.

California salmon landings were 6.1 million pounds valued at \$7.3 million--an increase of 1.4 million pounds (28 percent) and \$1.3 million (22 percent) compared with 1996. Landings of chinook salmon were 6.1 million pounds; coho landings were 6,000 pounds. The average exvessel price per pound paid to fishermen in 1997 was \$1.20 compared with \$1.26 in 1996.

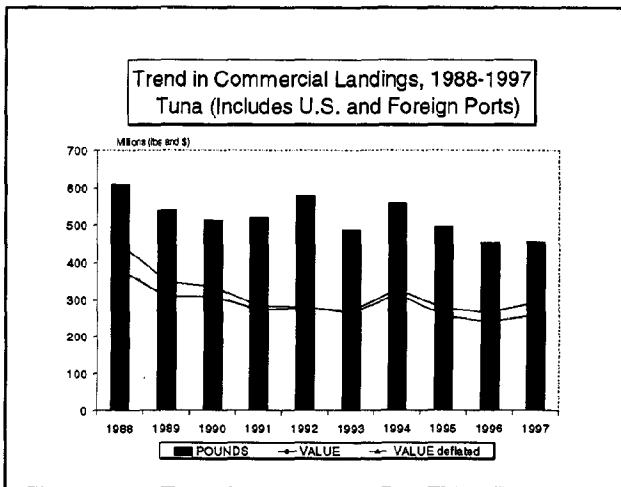

**SABLEFISH.** U.S. commercial landings of sablefish were 52.9 million pounds valued at \$108.8 million--a decrease of 7.0 million pounds (12 percent) and a decrease of \$232,000 (less than 1 percent) compared with 1996. Landings decreased in Alaska to 35.1 million pounds, a decrease of 14 percent compared with 1996. Landings increased in Washington to 5.0 million pounds (1 percent) and \$9.7 million (up 15 percent). The 1997 Oregon catch was 6.5 million pounds (down 8 percent) and \$10.4 million (up 3 percent) compared with 1996. California landings of 6.4 million pounds and \$8.9 million represent a 9 percent decrease in quantity and a 3 percent increase in value from 1996. The average exvessel price per pound in 1997 was \$2.06 compared with \$1.82 in 1996.

# REVIEW

## IMPORTANT SPECIES

**TUNA.** Landings of tuna by U.S. fishermen at ports in the 50 United States, Puerto Rico, American Samoa, other U.S. territories, and foreign ports were 456.6 million pounds valued at \$294.3 million--an increase of 300,000 pounds (less than 1 percent) and \$28.2 million (11 percent) compared with 1996. The average exvessel price per pound of all species of tuna in 1997 was 64 cents compared with 58 cents in 1996.

Bigeye landings in 1997 were 14.7 million pounds--an increase of 300,000 pounds (2 percent) compared with 1996. The average exvessel price per pound was \$1.69 in 1997 compared with \$1.91 in 1996.

Skipjack landings were 247.3 million pounds--a decrease of 36.1 million pounds (13 percent) compared with 1996. The average exvessel price per pound was 45 cents in 1997, compared to 40 cents in 1996.

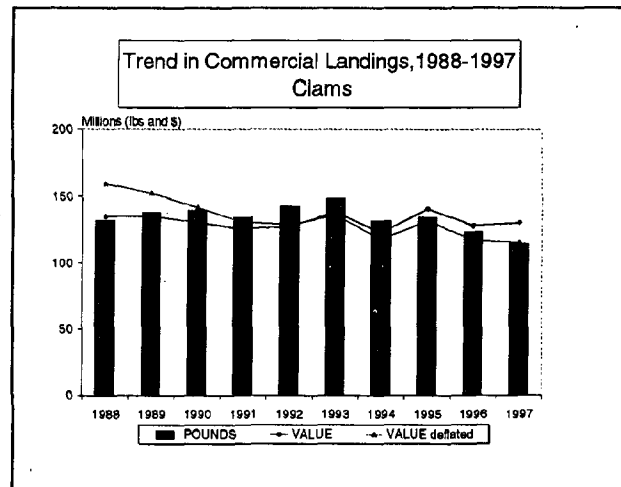

Yellowfin landings were 141.6 million pounds--an increase of 37.6 million pounds (36 percent) compared with 1996. The average exvessel price per pound was 72 cents in 1997 compared with 64 cents in 1996.

Bluefin landings were 7.3 million pounds--a decrease of 4.8 million pounds (40 percent) compared with 1997. The average exvessel price per pound in 1997 was \$2.78 compared with \$1.80 in 1996.

**CLAMS.** Landings of all species yielded 114.2 million pounds of meats valued at \$129.7 million--a decrease of 9.1 million pounds (7 percent), but an increase of \$1.9 million (1 percent) in value compared with 1996. The average exvessel price per pound in 1997 was \$1.14 compared with \$1.04 in 1996.

Surf clams yielded 58.0 million pounds of meats valued at \$35.2 million--a decrease of 5.4 million pounds (9 percent) and \$3.0 million (8 percent) compared with 1996. New Jersey was the leading state with 45.6 million pounds (down 6 percent), followed by New York, 6.9 million pounds (down 10 percent) compared with 1996. The average exvessel price per pound of meats was 61 cents in 1997, up one cent from 1996.

The ocean quahog fishery produced 43.9 million pounds of meats valued at \$19.9 million--a decrease of 2.5 million pounds (5 percent) and \$623,000 (3 percent) compared with 1996. New Jersey had landings of 18.3 million pounds (up 3 percent) valued at \$7.6 million (up 4 percent) while Massachusetts production was 20.4 million pounds (up 17 percent) valued at \$8.6 million (up 17 percent). Together, they accounted for 88 percent of the total ocean quahog production in 1997. The average exvessel price per pound of meats increased from 44 cents in 1996 to 45 cents in 1997.

## REVIEW

### IMPORTANT SPECIES

The hard clam fishery produced 7.7 million pounds of meats valued at \$41.9 million--a decrease of 2.3 million pounds (23 percent) and \$7.5 million (15 percent) compared with 1996. Landings in the New England region were 1.5 million pounds of meats (unchanged); Middle Atlantic region, 4.6 million pounds (unchanged); Chesapeake region, 687,000 pounds (down 14 percent); and the South Atlantic region, 993,000 pounds (down 44 percent). The average exvessel price per pound of meats increased from \$4.94 in 1996 to \$5.43 in 1997.

Soft clams yielded 2.3 million pounds of meats valued at \$9.9 million--an increase of 99,000 pounds (5 percent) and \$1.7 million (20 percent) compared with 1996. Maine was the leading state with 1.8 million pounds of meats (down 16 percent) followed by New York with 271,000 pounds (up 32 percent) and Maryland with 249,000 pounds (down 22 percent). The average exvessel price per pound of meats was \$4.32 in 1997 compared with \$3.75 in 1996.

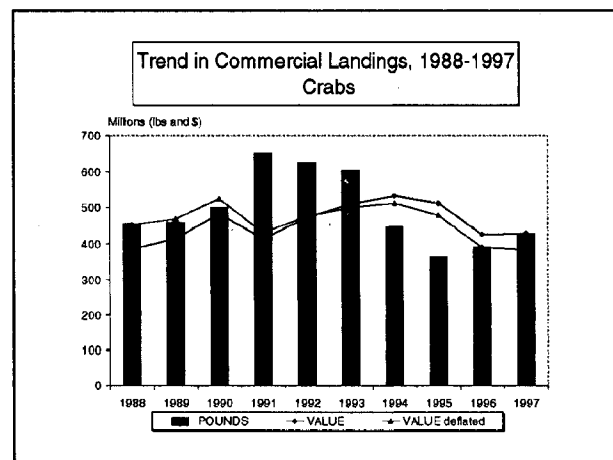

**CRABS.** Landings of all species of crabs were 430.0 million pounds valued at \$429.5 million--an increase of 38.2 million pounds (10 percent), and \$2.8 million (1 percent) compared with 1996.

Hard blue crab landings were 230.8 million pounds valued at \$158.2 million--an increase of 11.9 million pounds (5 percent) and \$11.1 million (8 percent) compared with 1996. North Carolina landed 25 percent of the total; Maryland, 19 percent; Louisiana, 19 percent; and Virginia, 18 percent of the total U.S. landings. Hard blue crab landings in the Chesapeake region were 87.4 million pounds--an increase of 28 percent; the South Atlantic region with 75.3 million pounds decreased 13 percent; and the Gulf region, 61.2 million pounds, increased 7 percent. The Middle Atlantic region with 10.6 million pounds valued at \$7.3 million had an increase of 3.4 million pounds (48 percent) compared with 1996. The average exvessel price per pound of hard blue crabs was 69 cents in 1997, two cents more than in 1996.

Dungeness crab landings were 38.2 million pounds valued at \$75.7 million--a decrease of 26.8 million pounds (41 percent) and \$12.2 million (14 percent) compared with 1996. Washington landings of 15.7 million pounds (down 43 percent) led all states with 41 percent of the total landings. California landings were

10.0 million pounds (down 19 percent) compared with 1996. Oregon landings were 7.7 million pounds (down 60 percent) and Alaska landings were 4.9 million pounds (down 17 percent) compared with 1996. The average exvessel price per pound was \$1.98 in 1997 compared with \$1.35 in 1996.

U.S. landings of king crab were 18.0 million pounds valued at \$50.6 million--a decrease of 3.0 million pounds (14 percent) and \$12.0 million (19 percent) compared with 1996. The average exvessel price per pound in 1997 was \$2.81 compared with \$2.98 in 1996.

Snow (tanner) crab landings were 118.9 million pounds valued at \$95.7 million--an increase of 51.0 million pounds (43 percent) and \$2.4 million (3 percent) compared with 1996. The average exvessel price per pound was 80 cents in 1997, down from \$1.37 in 1996.

**LOBSTER, AMERICAN.** American lobster landings were 83.9 million pounds valued at \$267.2 million--an increase of 12.3 million pounds (17 percent), and \$25.4 million (11 percent) compared with 1996. Maine led in landings for the sixteenth consecutive year with 46.8 million pounds valued at \$137.5 million--an increase of 10.8 million pounds (30 percent) compared with 1996. Massachusetts, the second leading producer, had landings of 14.9 million pounds valued at

## IMPORTANT SPECIES

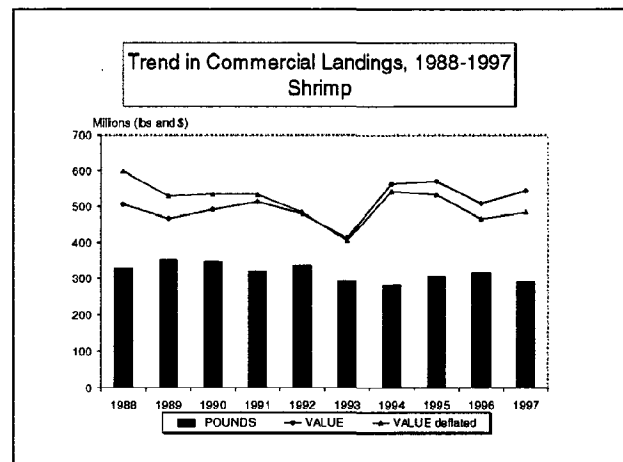

\$52.1 million--a decrease of 800,000 pounds (5 percent) compared with 1996. Together, Maine and Massachusetts produced 73 percent of the total national landings. The average exvessel price per pound was \$3.18 in 1997 compared with \$3.38 in 1996.

**LOBSTERS, SPINY.** U.S. landings of spiny lobster were 7.2 million pounds valued at \$33.4 million--a decrease of 1.1 million pounds (13 percent) and \$1.8 million (5 percent) compared with 1996. Florida, with landings of 6.1 million pounds valued at \$25.4 million, accounted for 85 percent of the total catch and 76 percent of the value. This was a decrease of 1.3 million pounds (18 percent), and \$3.2 million (12 percent) compared with 1996. Overall the average exvessel price per pound was \$4.61 in 1997 compared with \$4.24 in 1996.

**OYSTERS.** U.S. oyster landings yielded 39.7 million pounds of meats valued at \$111.2 million -- an increase of 1.6 million pounds (4 percent), but a decrease of \$3.7 million (3 percent) compared with 1996. The Gulf region led in production with 23.2 million pounds of meats, 58 percent of the national total; followed by the Pacific region (principally Washington, with 89 percent of the region's total volume) with 8.9 million pounds (22 percent), and the New England region, with 4.2 million pounds (11 percent). The average exvessel price per pound of meats was \$2.80 in 1997 compared with \$3.02 in 1996.

**SHRIMP.** U.S. landings of shrimp were 290.3 million pounds valued at \$544.1 million--a decrease of 26.6 million pounds (8 percent), but an increase of \$34.9 million (7 percent) in value compared with 1996. Shrimp landings decreased in the South Atlantic (down 37 percent) and New England (down 33 percent), and were down 6 percent in the Gulf. The landings in the Pacific increased 22 percent when compared with 1996. The average exvessel price per pound of shrimp increased to \$1.87 in 1997 compared with \$1.61 in 1996. Gulf region landings were the nation's largest with 205.5 million pounds, and 71 percent of the national total. Louisiana led all Gulf states with 93.2 million pounds (up 3

percent), followed by Texas, 71.3 million pounds (down 6 percent); Florida (West Coast), 19.7 million pounds (down 23 percent); Alabama, 11.6 million pounds (down 30 percent); and Mississippi, 9.7 million pounds (down 2 percent). In the Pacific region, Oregon had landings of 19.6 million pounds (up 25 percent), California had 15.3 pounds (up 31 percent), and Washington had landings of 6.1 million pounds (down 10 percent) compared with 1996.

**SCALLOPS.** U.S. landings of bay, calico and sea scallops totaled 15.5 million pounds of meats valued at \$94.2 million -- a decrease of 2.7 million pounds (17 percent), and \$7.7 million (8 percent) compared with 1996. The average exvessel price per pound of meats increased from \$5.60 in 1996 to \$6.09 in 1997.

Bay scallop landings were 72,000 pounds of meats valued at \$310,000--an increase of 37,000 pounds (106 percent) and \$216,000 (230 percent) compared with 1996. The average exvessel price per pound of meats was \$4.31 in 1997 compared with \$2.68 in 1996.

Sea scallop landings were 13.8 million pounds of meats valued at \$90.3 million--a decrease of 4.4 million pounds (24 percent) and \$11.5 million (11 percent) compared with 1996. Massachusetts and Virginia were the leading states in landings of sea scallops with 7.1 and 3.3 million pounds of meats,

## IMPORTANT SPECIES

respectively. These represent 75 percent of the national total. The average exvessel price per pound of meats in 1997 was \$6.55 compared with \$5.61 in 1996.

Florida accounted for the total landings of calico scallops with 1.6 million pounds valued at \$3.6 million in 1997.

percent) compared with 1996. California was the leading state with 156.4 million pounds, 70 percent of the national total. The Pacific region landings were 157.6 million pounds (down 10 percent), followed by the Middle Atlantic, 33.2 million pounds (up 11 percent); New England, 31.8 million pounds (down 7 percent); and the South Atlantic region, 840,000 pounds (up 300 percent) compared with 1996. The average exvessel price per pound for squid was 25 cents in 1997, unchanged from 1996.

**SQUID.** U.S. commercial landings of squid were 223.8 million pounds valued at \$55.5 million--a decrease of 16.3 million pounds (7 percent) and \$4.7 million (8

## REVIEW

### PER CAPITA CONSUMPTION

The NMFS calculation of per capita consumption is based on a "disappearance" model. The total U.S. supply of imports and landings is converted to edible weight and decreases in supply such as exports and inventories are subtracted out. The remaining total is divided by a population value to estimate per capita consumption. Data for the model are derived primarily from secondary sources and are subject to incomplete reporting; changes in source data or invalid model assumptions may each have a significant effect on the resulting calculation.

U.S. per capita consumption of fish and shellfish was 14.6 pounds (edible meat) in 1997. This total was 0.2 pounds less than the 14.8 pounds consumed in 1996. Per capita consumption of fresh and frozen products was 9.9 pounds, 0.1 pound less than 1996.

Fresh and frozen finfish accounted for 6.1 pounds while fresh and frozen shellfish consumption was 3.8 pounds per capita. The fresh and frozen finfish includes approximately 0.9 pound of farm raised catfish. Consumption of canned fishery products was 4.4 pounds per capita in 1997, a decrease of 0.1 pound from 1996. Cured fish accounted for 0.3 pound per capita, the same as in previous years. Imports of edible seafood made up 61 percent of the consumption.

**PER CAPITA USE.** Per capita use is based on the supply of fishery products, both edible and non-edible (industrial), on a round-weight equivalent basis without considering beginning or ending stocks, defense purchases, or exports. The per capita use of all edible and industrial fishery products in 1997 was 63.9 pounds, up 1.8 pounds compared with 1996.

## PROCESSED FISHERY PRODUCTS

### FRESH AND FROZEN

**FISH FILLETS AND STEAKS.** In 1997 the U.S. production of raw (uncooked) fish fillets and steaks, including blocks, was 397.5 million pounds--25.8 million pounds less than the 423.3 million pounds in 1996. These fillets and steaks were valued at \$908.9 million--\$4.9 million more than 1996. Alaska pollock fillets and blocks led all species with 112.0 million pounds--28 percent of the total. Production of groundfish fillets and steaks (see Glossary Section-Groundfish) was 219.5 million pounds compared with 245.4 million pounds in 1996.

**FISH STICKS AND PORTIONS.** The combined production of fish sticks and portions was 264.7 million pounds valued at \$349.6 million compared with the 1996 production of 279.2 million pounds valued at \$362.3 million--a decrease of 14.5 million pounds and \$12.7 million.

The total production of fish sticks amounted to 69.1 million pounds valued at \$64.3 million--an increase of 3.9 million pounds and \$8.5 million compared with 1996. The total production of fish portions amounted to 195.6 million pounds valued at \$285.3 million --

a decrease of 18.4 million pounds and \$21.2 million compared with 1996.

**BREADED SHRIMP.** The production of breaded shrimp in 1997 was 117.0 million pounds valued at \$333.3 million, compared with the 1996 production of 108.5 million pounds valued at \$341.8 million.

**FROZEN FISHERY TRADE.** In 1997, stocks of frozen fishery products in cold storage were at a low of 318.4 million pounds on February 28 and a high of 507.8 million pounds on October 31. Cold storage holdings of shrimp products were at a high of 47.7 million pounds on December 31 and a low of 29.0 million pounds on July 31. Holdings of saltwater fillets and steaks reached a high of 88.7 million pounds on July 31 and were at a low of 64.5 million pounds on January 31. Holdings of blocks and slabs were at a high of 60.3 million pounds on December 31 and a low of 41.4 million pounds on February 28. Surimi reached a high of 19.8 million pounds on November 30 and was at a low of 11.2 million pounds on July 31. Analog Products reached a high of 4.8 million pounds on January 31 and a low of 3.4 million pounds on December 31.

## PROCESSED FISHERY PRODUCTS

### CANNED FISHERY PRODUCTS

**CANNED FISHERY PRODUCTS.** The pack of canned fishery products in the 50 states, American Samoa, and Puerto Rico was 1.6 billion pounds valued at \$1.6 billion—a decrease of 311.9 million pounds, and \$206.7 million compared with the 1996 pack. The 1997 pack included 952.8 million pounds valued at \$1.4 billion for human consumption and 612.3 million pounds valued at \$231.8 million for bait and animal food.

**CANNED SALMON.** The 1997 U.S. pack of salmon was 162.1 million pounds valued at \$252.8 million, compared with 197.2 million pounds valued at \$284.3 million packed in 1996.

**CANNED SARDINES.** The pack of Maine sardines (small herring) was 16.0 million pounds valued at \$29.0 million, a decrease of 1.7 million pounds and \$830,000 compared with 1996. There were 5.9 million pounds of herring valued at \$11.2 million packed in 1997 -- 362,000 pounds less, but \$346,000 more in value than the 1996 pack.

**CANNED TUNA.** The U.S. pack of tuna was 627.0 million pounds valued at \$918.7 million—a decrease of 48.8 million pounds in quantity and \$38.2 million in value compared with the 1996 pack. The pack of

albacore tuna was 185.3 million pounds--19.7 million pounds more than the 165.6 million pounds produced in 1996. Albacore tuna comprised 30 percent of the tuna pack in 1997. Lightmeat tuna (bigeye, bluefin, skipjack, and yellowfin) comprised the remainder with a pack of 441.7 million pounds--68.4 million pounds less than the 510.2 million pounds packed in 1996.

**CANNED CLAMS.** The 1997 U.S. pack of clams (whole, minced, chowder, juice, and specialties) was 124.9 million pounds valued at \$114.6 million—a decrease of 4.5 million pounds and \$2.7 million less in value than the pack in 1996. The pack of whole and minced clams was 43.7 million pounds--2.2 million pounds more than the 1996 pack and accounted for 35 percent of the total clam pack. Clam chowder and clam juice was 69.9 million pounds and made up the majority of the pack.

**CANNED SHRIMP.** The U.S. pack of natural shrimp was 1.2 million pounds valued at \$4.6 million—an increase of 349,000 pounds, but a decrease of \$1.5 million in value compared with the 1996 pack.

**OTHER CANNED ITEMS.** The pack of pet food was 612.3 million pounds valued at \$231.8 million—a decrease of 211.8 million pounds compared with the 1996 pack.

### PROCESSED FISHERY PRODUCTS

#### INDUSTRIAL FISHERY PRODUCTS

**INDUSTRIAL FISHERY PRODUCTS.** The value of the domestic production of industrial fishery products was \$347.4 million--an increase of \$73.8 million compared with the 1996 value of \$273.6 million.

**FISH MEAL.** The domestic production of fish and shellfish meal was 724.7 million pounds valued at \$173.9 million--an increase of 81.5 million pounds, and \$36.0 million compared with 1996. Menhaden meal production was 478.5 million pounds valued at \$115.7 million--an increase of 59.6 million pounds and \$28.9 million compared with 1996. Menhaden accounted for 66 percent of the 1997 production of meal. Shellfish meal production was 18.1 million pounds--an increase of 476,000 pounds from the 1996 level. Tuna and mackerel meal production was 56.1 million pounds--a decrease of 662,000 pounds from 1996. Production of unclassified meal (consisting mainly of Alaska pollock and unclassified fish) was 171.9 million pounds--an increase of 22.1 million pounds compared with 1996.

**FISH SOLUBLES.** Domestic production of fish solubles was 144.0 million pounds, 62.0 million pounds more than the 1996 production.

**FISH OILS.** The domestic production of fish oils was 283.4 million pounds valued at \$55.3 million--an increase of 35.0 million pounds, and \$11.3 million in value compared with 1996 production. The production of menhaden oil was 278.0 million pounds valued at \$53.7 million--an increase of 31.5 million pounds, and \$10.0 million compared with 1996. Menhaden oil accounted for 98 percent of the volume and value of the total 1997 fish oil production.

**OTHER INDUSTRIAL PRODUCTS.** Oyster shell products, together with agar-agar, animal feeds, crab and clam shells processed for food serving, fish pellets, Irish moss extracts, kelp products, dry and liquid fertilizers, pearl essence, and mussel shell buttons were valued at \$108.6 million, compared with \$85.6 million in 1996--an increase of \$23.0 million.

# REVIEW

## FOREIGN TRADE IN FISHERY PRODUCTS

**IMPORTS.** U.S. imports of edible fishery products in 1997 were valued at \$7.8 billion, \$1.0 billion more than in 1996. The quantity of edible imports was 3.3 billion pounds, 169.1 million pounds more than the quantity imported in 1996.

Edible imports consisted of 2.9 billion pounds of fresh and frozen products valued at \$7.0 billion, 387.1 million pounds of canned products valued at \$525.3 million, 69.0 million pounds of cured products valued at \$131.6 million, 4.3 million pounds of caviar and roe products valued at \$31.2 million, and 16.9 million pounds of other products valued at \$44.2 million.

The quantity of shrimp imported in 1997 was 648.3 million pounds, 65.9 million pounds more than the quantity imported in 1996. Valued at \$2.9 billion, shrimp imports accounted for 37 percent of the value of total edible imports. Imports of fresh and frozen tuna were 438.5 million pounds, 90.2 million pounds less than the 528.7 million pounds imported in 1996. Imports of canned tuna were 212.2 million pounds, 19.1 million pounds more than in 1996. Imports of fresh and frozen fillets and steaks amounted to 514.8 million pounds, an increase of 38.3 million pounds from 1996. Regular and minced block imports were 234.0 million pounds, a decrease of 238,000 pounds from 1996.

Imports of nonedible fishery products were valued at \$6.8 billion--an increase of \$443.3 million

compared with 1996. The total value of edible and nonedible products was \$14.5 billion in 1997, \$1.4 billion more than in 1996 when \$13.1 billion of fishery products were imported.

**EXPORTS.** U.S. exports of edible fishery products were 2.0 billion pounds valued at \$2.7 billion, a decrease of 93.2 million pounds, and \$319.2 million when compared with 1996. Fresh and frozen items were 1.8 billion pounds valued at \$2.1 billion, a decrease of 29.6 million pounds, and \$189.8 million compared with 1996. In terms of individual species, fresh and frozen exports consisted principally of 189.9 million pounds of salmon valued at \$307.5 million, 310.2 million pounds of surimi valued at \$331.0 million and 47.2 million pounds of lobsters valued at \$208.6 million.

Canned items were 129.5 million pounds valued at \$202.7 million. Salmon was the major canned item exported, with 81.6 million pounds valued at \$135.4 million. Cured items were 10.6 million pounds valued at \$20.9 million. Caviar and roe exports were 90.0 million pounds valued at \$369.1 million.

Exports of nonedible products were valued at \$6.6 billion compared with \$5.6 billion in 1996. Exports of fish meal amounted to 216.3 million pounds valued at \$57.2 million. The total value of edible and nonedible exports was \$9.4 billion--an increase of \$700.2 million compared with 1996.

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks such as clams, oysters, and scallops, which are reported in weight of meats (excluding the shell). Landings for Mississippi River drainage area States are not available.

(-) Data are not available prior to 1997 for the production of "FUS."

Note.--Metric tons are arrived at by dividing the landings of individual species and group totals by 2.2046. Data are preliminary. Data do not include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States, or catches by U.S.-flag vessels transferred to internal water processing vessels (IWPs) in U.S. waters. Data do not include aquaculture products, except oysters and clams.

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks, such as clams, oysters, and scallops, which are reported in weight of meats (excluding the shell). The National Marine Fisheries Service estimated the distance-from-shore landings for data collected by the Service and States. (2) Includes landings from the Great Lakes and other inland waters, but excludes Mississippi River drainage area States. (3) Less than 500 lb or \$500. NOTE:--Data are preliminary. Data include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States and catches by U.S.-flag vessels transferred to internal water processing vessels (IWPs) in U.S. waters. Therefore, they will not agree with "U.S. Commercial Landings" tables beginning on page 1. There may also be differences in totals due to rounding. Data do not include aquaculture products, except oysters and clams.

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks, such as clams, oysters, and scallops, which are reported in weight of meats (excluding the shell). The National Marine Fisheries Service estimated the distance-from-shore landings for data collected by the Service and States. (2) Includes landings from the Great Lakes and other inland waters, but excludes Mississippi River drainage area States. (3) Less than 500 mt or \$500. NOTE:--Data are preliminary. Data include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States and catches by U.S.-flag vessels transferred to internal water processing vessels (IWPs) in U.S. waters. Therefore, they will not agree with "U.S. Commercial Landings" tables beginning on page 1. There may also be differences in totals due to rounding. Data do not include aquaculture products, except oysters and clams.

NA:--Not available. SW:--Saltwater.

NOTE:--Table may not add due to rounding. Clams, oysters and mussels are reported as meat weights (excludes shell) while other identified species such as shrimp and finfishes are reported as whole (live) weights. Some clam and oyster aquaculture production are reported with U.S. commercial landings. Weights and values represent the final sales of products to processors and dealers. "Miscellaneous" includes ornamental/tropical fish, alligators, algae, aquatic plants, eels, scallops, crabs, and others. The high value and low production of "Miscellaneous" occurs because production value but not weight are reported for many species such as ornamental fishes.

Source:--Fisheries Statistics and Economics Division, F/STI, NMFS.

(1) The scientific name of Pacific whiting (hake) is *Merluccius productus* while Atlantic whiting (silver hake) are *M. bilinearis* and *M. albidus*. Florida landings of 18,900 pounds and \$1,512 for 1950 are not included in summary. The 1990-97 Washington landings include fishes caught in the EEZ or other waters principally off the coasts of Washington and Oregon that are processed by ships at sea.

(2) Less than 500 lb or \$500.

## U.S. MARINE RECREATIONAL FISHERIES

**DATA COLLECTION.** Data on commercial fisheries were collected for many years, yet before 1979 there was no continuous, systematic collection of marine recreational fishery data. Detailed information on marine recreational fishing is required to support a variety of fishery management and development purposes and is mandated by the Sustainable Fisheries Act, Public Law 94-265. In 1979, NMFS began the comprehensive Marine Recreational Fishery Statistical Survey (MRFSS). Data collected through the MRFSS show that recreational fisheries have tremendous impacts on fish stocks. For several important species recreational landings surpass commercial landings.

The MRFSS consists of an intercept survey of anglers in the field and a telephone survey of coastal county households. The intercept survey collects data on species composition, catch rates, and fish lengths and weights. The telephone survey collects data on the number of marine fishing trips. These independent data are combined to produce estimates of catch, effort, and participation. Estimates are generated by subregion, state, wave (bimonthly sampling period), species, mode and primary area fished. In addition, economic and demographic data are also obtained.

The MRFSS is being conducted in 1998 along the coast of the entire continental United States except the state of Texas. Sampling coverage varies across the time series (see figures). Detailed information and the ability to access data are available on the Fisheries Statistics and Economics web page ([www.st.nmfs.gov/st1](http://www.st.nmfs.gov/st1)). Data from other NMFS and state surveys (SE head boats, Texas, California Passenger Fishing Vessels, Oregon/Washington ocean boats, Pacific salmon, Alaska) are not included in this report.

**DATA TABLES.** The estimated number of fish caught and weight of the harvest are presented for 64 commonly caught species. The estimated number caught includes a) fish brought ashore in

whole form that were identified, weighed, and measured; and b) fish that were not available for identification. The latter type includes fish used for bait, discarded, filleted or released alive. Harvest does not include fish that were released alive. Estimated catch and harvest is presented by subregion and primary fishing area: inland [sounds, rivers, bays], state territorial seas [ocean to 3 miles from shore, except for Florida's Gulf coast, where state territorial seas extend 10 miles from shore], and Exclusive Economic Zone (EEZ) [ocean from the edge of the state territorial seas to 200 miles from shore]. The total number of estimated trips and participants are presented by state.

All estimates are shown with proportional standard errors (PSE). The PSE's express the standard error of an estimate as a percentage of the estimate and are a measure of precision. A 95% confidence interval indicates a 95% certainty that the true value lies between the lower and upper limits. The 95% confidence intervals are calculated as: 1) the lower limit is the estimate minus 1.96 times the standard error, and 2) the upper limit is the estimate plus 1.96 times the standard error. For example, if the estimated trips equal 64 million with a PSE of 1%, then the upper confidence interval would be 65,254,400 (64 million + (1.96 X 640,000)).

**1997 MRFSS DATA.** In 1997, almost 9 million people made 68 million marine recreational fishing trips to the Atlantic, Gulf and Pacific coasts. The estimated marine recreational finfish catch was 366 million fish. Over 50% percent of the catch was released alive. The estimated total weight of the harvest was 234 million pounds.

The Atlantic and Gulf coasts accounted for 79% of the participants, 90% of the fishing trips, and 92% of the marine recreational finfish catch. Most (57%) of the catch came from inland waters, 32% from state territorial seas, and 11% from the EEZ. The distribution is different for the Atlantic and Gulf coasts versus the Pacific coast. On the Atlantic and Gulf the majority of the catch

was from inland waters, while on the Pacific coast the majority was from the state territorial seas.

**ATLANTIC AND GULF.** The estimated number of Atlantic and Gulf coast trips made between 1993 and 1997 remained at about 58 million. The estimated number of people engaged in marine recreational fishing on the Atlantic and Gulf coast ranged from a low of 6.6 million in 1996 to a high of 7.6 million in 1994. In 1997, 7 million marine recreational fishing participants took 61 million trips and caught a total of 337 million fish. By subregion, the Gulf of Mexico accounted for the highest numbers of fish caught (45%) followed by the Mid-Atlantic (31%). Thirty percent of the recreational fishing trips were made in the South Atlantic, 30% in the Gulf of Mexico, 28% in the Mid-Atlantic, and 12% in the North Atlantic.

The most commonly caught non-bait species (numbers of fish) were spotted seatrout, Atlantic croaker, summer flounder, striped bass, black sea bass, and bluefish. Top-ranked non-bait species (catch in numbers) by subregion were striped bass in the North Atlantic, summer flounder in the Mid-Atlantic, bluefish in the South Atlantic, and spotted seatrout in the Gulf of Mexico. By weight, the largest harvests were dolphin, striped bass, bluefish, red drum, king mackerel, summer flounder, and spotted seatrout. The average weight for all fish combined was 1.6 pounds while the average weights for the top species were 2.6 pounds for bluefish, 10.1 for striped bass, 5.1 for red drum, 10.1 for dolphin, 1.1 for spotted seatrout, 1.8 for summer flounder, and 10.1 for king mackerel.

The catch of striped bass increased steadily and dramatically since 1990 with a record catch of over 17 million fish in 1997. Over 91% of striped bass were released alive in 1997. Spotted seatrout, summer flounder, Atlantic croaker and black sea bass catches remained relatively steady from 1993-1997. Bluefish catches increased from 10 million in 1995 and 1996 to 13 million in 1997.

Eleven percent of the catch on the Atlantic and Gulf coasts came from the EEZ. The most commonly caught species in federally managed waters were black sea bass, Atlantic mackerel, dolphin, red snapper, Atlantic croaker, summer flounder and bluefish.

**PACIFIC.** In 1997, 1.8 million marine recreational fishing participants took 7.2 million trips and caught a total of 29 million fish. Seventy-two percent of the trips were made in California, followed by 20% in Washington, and 8% in Oregon.

The most commonly caught non-bait species (numbers of fish) were Pacific (chub) mackerel, surf smelt, white croaker, kelp bass and barred sand bass. The largest harvests were California halibut, Pacific mackerel, Pacific barracuda, black rockfish, barred sandbass, and lingcod. The average weight for all fish combined was 0.9 pounds. Average weights for some of the top species were: 9.0 pounds for California halibut, 0.9 pounds for Pacific (chub) mackerel, 2.0 pounds for black rockfish, 1.5 pounds for barred sandbass, and 7.1 pounds for lingcod.

Surf smelt jumped from the 1993-1995 average of a little over a million fish to almost 5 million fish in 1996. California halibut catch has shown no real trend since 1993, ranging from a low of 347,000 fish in 1993 to a high of 924,000 fish in 1997. Pacific mackerel reached a 4-year high in 1996 with 6.0 million fish caught.

Seven percent of the total marine recreational catch on the Pacific coast came from the EEZ. The most commonly caught Pacific coast species in federally managed waters were Pacific mackerel, barred sand bass, yellowtail rockfish, blue rockfish, Pacific barracuda, kelp bass, and white croaker. The percent of the catch from the state territorial sea was about 60% in 1997, while the inland catch increased from 13-17% in the early 1990's to 33% for 1997.

# U.S. MARINE RECREATIONAL FISHERIES

MRFSS Sampling Coverage by Wave, State, and Mode, 1979-1997.

Note: Salmon trips are excluded on the Pacific coast. Ocean-boat trips were excluded in WA in 1989 and in Oregon during July-August during 1987-1989 and 1993-1997.

1996...	4.3	5.4	3.5	19.9	8.9	92.2	101.1	121.0

(1) Includes U.S.-flag vessel landings at foreign ports, transfer of catches onto foreign vessels within the U.S. EEZ (joint ventures), and the weight of mollusk shells. (2) Includes diadromous fishes including salmon and other anadromous fishes and catadromous fishes such as eels.

Note:--There are 2,204.6 pounds in a metric ton. Prior to 1970, the world commercial catch of whales and seals is excluded. For the years 1970-1996, data for marine mammals and aquatic plants are excluded.

Source:--Fishery Statistics of the United States; Fisheries of the United States; Food and Agriculture Organization of the United Nations (FAO) - Yearbook of Fishery Statistics, Rome; various volumes.

## IMPORTS

### CANNED TUNA NOT IN OIL, QUOTA AND IMPORTS, 1988-97

Year	Quota (1)		Over quota (2)		Total	
	<u>Thousand pounds</u>	<u>Metric tons</u>	<u>Thousand pounds</u>	<u>Metric tons</u>	<u>Thousand pounds</u>	<u>Metric tons</u>
1988.....	85,186	38,640	193,784	87,900	278,970	126,540
1989.....	76,733	34,806	234,323	106,288	311,056	141,094
1990.....	87,157	39,534	171,472	77,779	258,628	117,313
1991.....	75,093	34,062	237,237	107,610	312,330	141,672
1992.....	73,724	33,441	259,739	117,817	333,463	151,258
1993.....	72,681	32,968	144,287	65,448	216,968	98,416
1994.....	73,294	33,246	168,224	76,306	241,518	109,552
1995.....	73,367	33,279	126,176	57,233	199,543	90,512
1996.....	80,027	36,300	117,205	53,164	197,232	89,464
1997.....	78,620	35,662	139,715	63,374	218,335	99,036

(1) Imports have been subject to tariff quotas since April 14, 1956, and are based on 20 percent of the previous year's domestic pack, excluding the pack in American Samoa. Dutiable in 1956 to 1967 at 12.5 percent ad valorem; 1968, 11 percent; 1969, 10 percent; 1970, 8.5 percent; 1971, 7 percent; and 1972 to 1997, 6 percent.

(2) Dutiable in 1972 to 1997, 12.5 percent.

Note:--Data in this table will not agree with tuna import data released by the U.S. Department of Commerce, Bureau of the Census. Any tuna entered for consumption or withdrawn from a warehouse for consumption during the calendar year, except for receipts from insular possessions of the U.S., is subject to this quota.

## SUPPLY OF FISHERY PRODUCTS

U.S. SUPPLY OF KING CRAB, 1988-97  
(Round weight)

Year	U.S. commercial landings	Imports (1)	Total	Exports (1)	Total supply
-----Thousand pounds-----					
1988.....	20,973	(2)	20,973	10,554	10,419
1989.....	26,391	5,150	31,541	(3) 13,196	18,345
1990.....	33,917	4,925	38,842	(3) 19,486	19,356
1991.....	28,140	7,087	35,227	15,320	19,907
1992.....	19,056	11,958	31,014	16,241	14,773
1993.....	24,732	7,395	32,127	24,372	7,755
1994.....	11,960	15,035	26,995	15,013	11,982
1995.....	14,673	18,360	33,033	11,847	21,186
1996.....	21,000	26,533	47,533	17,650	29,883
1997.....	18,027	39,666	57,693	12,516	45,177

(1) Imports, exports, foreign exports converted to round (live) weight by using these conversion factors: frozen, 1.75; meat, 4.50; and canned, 5.33 (2) Not reported.

(3) Estimated, based on available foreign import data.

U.S. SUPPLY OF SNOW (TANNER) CRABS, 1988-97  
(Round weight)

Year	U.S. commercial landings	Imports (1)	Total	Exports (2)	Total supply
-----Thousand pounds-----					
1988.....	146,326	6,765	153,091	122,741	30,350
1989.....	164,643	3,927	168,570	(3) 111,028	57,542
1990.....	213,395	10,772	224,167	(3) 187,069	37,098
1991.....	357,122	19,091	376,213	(3) 316,162	60,051
1992.....	350,039	18,882	368,921	281,214	87,707
1993.....	255,733	31,224	286,957	220,618	66,339
1994.....	159,574	27,446	187,020	147,006	40,014
1995.....	80,817	20,969	101,786	59,805	41,981
1996.....	67,867	28,336	96,203	50,509	45,694
1997.....	118,898	41,959	160,857	50,604	110,253

(1) Converted to round (live) weight by multiplying fresh and frozen by 1.50; meat, 4.50; and canned, 5.00. (2) Domestic merchandise converted to round (live) weight by multiplying frozen weight by 2.13 (believed to be mostly sections); meat, 4.50; and canned, 5. Foreign exports converted using the same factors as imports. (3) Estimated, based on available foreign import data.

# SUPPLY OF FISHERY PRODUCTS

## U.S. SUPPLY OF AMERICAN LOBSTERS, 1988-97 (Round weight)

Year	U.S. commercial landings	Imports (1)	Total	Exports (2)	Total supply
-----Thousand pounds-----					
1988.....	48,643	72,638	121,281	(3)	121,281
1989.....	52,926	42,530	95,456	10,310	85,146
1990.....	61,017	49,592	110,609	15,274	95,335
1991.....	63,337	65,381	128,718	21,485	107,233
1992.....	55,841	59,335	115,176	20,332	94,844
1993.....	56,513	55,570	112,083	20,354	91,729
1994.....	66,416	65,949	132,365	31,646	100,719
1995.....	66,406	62,923	129,329	35,587	93,742
1996.....	71,641	65,379	137,020	39,919	97,101
1997.....	83,921	73,033	156,954	45,262	111,692

(1) Only imports from Canada and St. Pierre and Miquelon are considered American lobster and were converted to round (live) by using these conversion factors: 1.00, Whole; 4.50, meat; and 4.64, canned. (2) Domestic exports converted to live weight by 1.00, whole; 4.00, meat; and 4.50, canned. Foreign exports converted using import factors. (3) Not reported.

## U.S. SUPPLY OF SPINY LOBSTERS, 1988-97 (Round weight)

Year	U.S. commercial landings	Imports (1)	Total	Exports (2)	Total supply
-----Thousand pounds-----					
1988.....	7,166	132,071	139,237	(3)	139,237
1989.....	8,125	87,793	95,918	6,373	89,545
1990.....	7,120	88,426	95,546	6,948	88,598
1991.....	7,096	81,332	88,428	3,388	85,040
1992.....	4,872	77,848	82,720	2,001	80,719
1993.....	6,076	70,884	76,960	1,306	75,654
1994.....	8,104	68,787	76,891	1,304	75,587
1995.....	7,123	86,900	94,023	5,035	88,988
1996.....	8,308	75,595	83,903	3,033	80,870
1997.....	7,240	74,120	81,360	5,842	75,518

(1) Imports were converted to round (live) weight by using these conversion factors: 1.00, whole; 3.00, tails; 4.35, other; and 4.50 canned. (2) Domestic exports converted to round weight by using: 1.00, whole; 3.00, tails, 4.00, other; 4.50, canned. Foreign exports converted using import factors. (3) Not reported.

## SUPPLY OF FISHERY PRODUCTS

**U.S. SUPPLY OF CLAMS, 1988-97**  
(Meat weight)

Year	U.S. commercial landings (1)	Imports (2)	Total	Exports	Total supply
-----Thousand pounds-----					
1988.....	131,740	14,872	146,612	1,458	145,154
1989.....	138,166	13,254	151,420	1,863	149,557
1990.....	139,198	15,830	155,028	2,961	152,067
1991.....	134,243	12,291	146,534	2,948	143,586
1992.....	142,449	14,262	156,711	1,662	155,049
1993.....	147,752	9,579	157,331	1,809	155,522
1994.....	131,427	15,507	146,934	2,617	144,317
1995.....	134,224	12,645	146,869	2,853	144,016
1996.....	123,239	14,340	137,579	3,448	134,131
1997.....	114,180	13,184	127,364	3,651	123,713

(1) For specific breakout see table on page 1.

(2) Imports and exports were converted to meat weight by using these conversion factors: 0.40 in shell or shucked; 0.30, canned chowder and juice; and 0.93, other.

**U.S. SUPPLY OF OYSTERS, 1988-97**  
(Meat weight)

Year	U.S. commercial landings	Imports (1)	Total	Exports	Total supply
-----Thousand pounds-----					
1988.....	31,892	46,414	78,306	(2)	78,306
1989.....	29,250	37,662	66,912	1,090	65,822
1990.....	29,193	27,546	56,739	1,004	55,735

(1) Resident population for 1909 to 1929 and civilian resident population for 1930 to date.

(2) Fresh and frozen fish consumption from 1910 to 1928 is estimated. Beginning in 1973, data include consumption of artificially cultivated catfish. Domestic landings used in calculating consumption are preliminary after 1977.

(3) Canned fish consumption for 1911 to 1920 is estimated. Beginning in 1921, it is based on production reports, packer stocks, and foreign trade statistics for individual years.

(4) Cured fish consumption for 1910 to 1928 is estimated.

(5) Data for 1909 estimate based on the 1908 census and foreign trade data.

\*Record.

(1) Data include groundfish and other species. Data do not include blocks, but fillets could be made into blocks from which sticks and portions could be produced.

(2) Product weight of fillets and steaks and sticks and portions, edible (meat) weight of shrimp.  
\*Record.

Note:--Domestic landings data used in calculating these data are preliminary after 1977.

## U.S. USE

Per capita use of commercial fish and shellfish is based on the supply of fishery products, both edible and nonedible (industrial), on a round weight equivalent basis, without considering the beginning or ending stocks, defense purchases, or exports.

Per capita use figures are not comparable with per capita consumption data. Per capita consumption figures represent edible (for human use) meat weight consumption rather than round weight consumption. In addition, per capita consumption includes allowances for beginning and ending stocks and exports, whereas the use does not include such allowances.

Per capita use is derived by using total population including U.S. Armed Forces overseas. The per capita consumption is derived by using civilian resident population.

## U.S. ANNUAL PER CAPITA USE OF COMMERCIAL FISH AND SHELLFISH, 1960-97 (1)

## PRICES

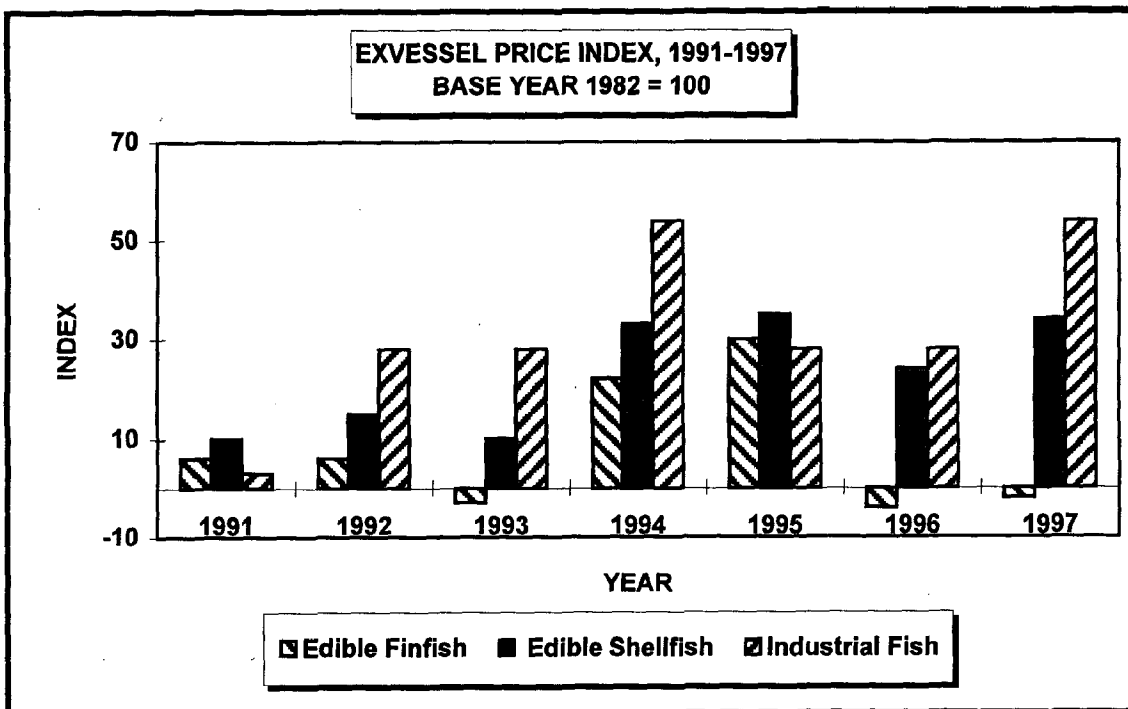

The Exvessel Price table is an index of changes in the relative dockside value of fish and shellfish sold by fishing vessels. The table indexes the average annual exvessel value (price per pound) received for each species or group to the average price per pound received for the same species or group in the base year 1982.

The exvessel price for each year was obtained by dividing total value for each species or group by its total quantity as reported in the U. S. commercial landings tables on pages 1 thru 4. The index for each species or group was obtained by multiplying the current annual price by the total quantity caught in

1982 (the base year). That number was then divided by the 1982 value to obtain the final index:

$$\frac{(100 \times \text{Current price} \times \text{1982 quantity})}{\text{1982 Annual value}} = \text{Index}$$

Each index number measures price changes from the 1982 reference period when the index equaled 100. A species of fish that sold for \$0.75 a pound in 1986 and a \$1.00 a pound in 1982 would have an index of 75 in 1986. In 1997, if the price of the same species increased to \$1.07, the index in 1997 would be 107.

## VALUE ADDED

The value added table reflects changes in the value of fishery products from year to year, using measures such as mark-up, value added as a percent of mark-up, and sales of fishery products in each sector (1). Using a model developed for Fisheries of the U.S. in 1987, the value added table is updated every year to reflect changes in the annual quantity and value of landings, processed products, and imports and exports of several species. These annual updates allow partial re-estimation of the mark-ups, value added, and sales of each sector.

Complete re-estimation of the annual mark-ups and value added requires secondary information such as average revenues and costs of operation for businesses involved in the processing, wholesaling or retailing of fishery products. The revenue and cost data needed to estimate mark-ups in each sector are only published once every five years. In addition, there is a two-year lag between the collection and publication of these data. Thus, the margins estimated in the value added tables from 1992 through 1996 are based on 1990 financial data that became available in 1992.

The 1997 value added table incorporates newly available 1995 financial data, as well as 1997 fisheries data, to re-estimate the mark-up of fishery products at each market level. Therefore, the estimated 1997 mark-ups and value added in each sector reflect the annual change in fisheries activity as well as changes in the economy as a whole since 1990.

To differentiate between the effects of changes in the economy from changes in fishing activity, the 1997 model was estimated using both the old 1990 and the new 1995 financial data. Between 1996 and 1997, the estimated total U.S. value added activity increased 16%. Half of this increase is attributable to the updated financial data. Also between 1996 and 1997, estimated consumer expenditures increased by almost 13%; of this, less than 3% is due to the updated financial data. The table presented on the following page incorporates the updates from *both* the financial data as well as the new, 1997 fisheries data. The 1995 financial data will be used in the model until new data are available in 2002.

(1) See footnotes following the value added table for definitions of these terms.

**SUMMARY OF 1997 VALUE ADDED, MARGINS, AND CONSUMER EXPENDITURES FOR COMMERCIAL MARINE FISHERY PRODUCTS IN THE UNITED STATES (1)**

Sector of activity	Purchase of fishery inputs	Mark-up of fishery inputs	Total mark-up within sector	Value added as percent of total	Value added within sector	Value of sales by sector	Value added contribution	Offshore fleet & exported fishery products
	Thousand dollars	Percentage of fishery inputs	Thousand dollars	Percentage	Thousand dollars	Thousand dollars	Percentage of GNP contribution	Thousand dollars

<b>CONSUMERS EXPENDITURES (4 WHOLESALE PURCHASES OF INDUSTRIAL PRODUCTS) FOR FISHERY PRODUCTS:</b>								
						<b>\$85,471,074</b>		

(1) Includes industrial products and landings by U.S.-flag vessels at U.S. ports, foreign ports, and transfers to internal water processing vessels. Note.-- The table reports the contribution of commercial marine fishing to the national economy as measured by margin, value added, and sales. These measures are consistent with the Bureau of the Census definitions.

Margin or mark-up is the difference between the price paid for the product by the consumer or wholesale purchaser and the dockside or wholesale value for an equivalent weight of the product. (It is assumed that fishermen catch their fish without paying purchase price and therefore the entire dockside or exvessel price is considered margin.) Value added is a measure of the factors added to the total worth of a product at each stage of the production process. It is defined as the gross receipts of firms minus the cost of purchased goods and services needed to fabricate the product. Gross National Products (GNP) is equal to the sum of the value added of all economic entities in the economy. Value added within a sector represents that sector's contribution to GNP.

Value added includes wages, salaries, interest, depreciation, rent, taxes and profit. Consumer expenditures are the final retail value of seafood products sold through stores and food service outlets plus secondary wholesale and processing of industrial products.

(1) These establishments are inspected under contract and certified as meeting U.S. Department of Commerce (USDC) regulations for construction and maintenance of facilities and equipment processing techniques, and employment practices.

(2) Fish processing establishments approved for sanitation under the Sanitary Inspected Fish Establishment service (SIFE). Products are not processed under inspection.

(3) Sanitarily inspected fish establishments processing fishery products under USDC inspection As of December 1996, 106 of these establishments were in the Hazard Analysis Critical Control Point (HACCP) Program.

(4) Products processed under USDC inspection in inspected establishments and labeled with USDC inspection mark as "Processed Under Federal Inspection" (PUFI) and/or "U.S. Grade A."

(5) Products processed under inspection in inspected establishments but bearing no USDC inspection mark.

(6) Lot inspected and marked products checked for quality and condition at the time of examination and located in processing plants, warehouses, cold storage facilities, or terminal markets anywhere in the United States.

Note:--Table may not add due to rounding.

## THE MAGNUSON-STEVENS FISHERY CONSERVATION AND MANAGEMENT ACT

The Magnuson-Stevens Fishery Conservation and Management Act, Public Law 94-265 as amended (Magnuson-Stevens Act), provides for the conservation and management of fishery resources within the U.S. Exclusive Economic Zone (EEZ). It also provides for fishery management authority over continental shelf resources and anadromous species beyond the EEZ, except when they are found within a foreign nation's territorial sea or fishery conservation zone (or equivalent), to the extent that such sea or zone is recognized by the United States.

The EEZ extends from the seaward boundary of each of the coastal States (generally 3 nautical miles from shore for all but two States) to 200 nautical miles from shore. The seaward boundaries of Texas, Puerto Rico, and the Gulf coast of Florida are 3 marine leagues (9 nautical miles).

### GOVERNING INTERNATIONAL FISHERY AGREEMENTS

Under the Magnuson-Stevens Act, the Secretary of State, in cooperation with the Secretary of Commerce, negotiates Governing International Fishery Agreements (GIFAs) with foreign nations requesting to fish within the EEZ. After a GIFA is signed, it is transmitted by the President to the Congress for ratification.

### FOREIGN FISHING PERMITS

Title II of the Magnuson-Stevens Act governs foreign fishing in the EEZ. The process applied to foreign fishing has been described in prior issues of this publication. As U.S. fishing capacity grew, foreign participation in directed fisheries, as well as in foreign joint ventures in which U.S. vessels delivered U.S. harvested fish to permitted foreign vessels in the EEZ diminished until, in 1991, foreign vessels no longer were permitted to conduct any harvesting or processing operations in the EEZ. This marked the achievement of one of the objectives of the Magnuson-Stevens Act, that is, the development of the U.S. fishing industry to take what were in 1976 underutilized species, and the

displacement of the foreign fishing effort in the EEZ by 1991.

As a result of the above, there has been no total allowable level of foreign fishing since 1991, although 25,000 mt of Atlantic mackerel and 40,000 mt of Atlantic herring were available for joint venture fishing in 1997. However, no joint venture permits were issued in 1997 because no foreign nations elected to participate in joint venture fishing in 1997. NMFS continues to maintain certain regulations pertaining to foreign fishing, such as the foreign fishing fee schedule, should there be a situation in the future in which allowing limited foreign fishing in an underutilized fishery would be of advantage to the U.S. fishing industry.

### FMPs and PMPs

Under the Magnuson-Stevens Act, eight Regional Fishery Management Councils are charged with preparing Fishery Management Plans (FMPs) for the fisheries needing management within their areas of authority. After the Councils prepare FMPs that cover domestic and foreign fishing efforts, the FMPs are submitted to the Secretary of Commerce (Secretary) for approval and implementation. The Department, through NMFS agents and the U.S. Coast Guard, is responsible for enforcing the law and regulations.

The Secretary is empowered to prepare FMPs in the Atlantic and Gulf of Mexico for highly migratory species. Where no FMP exists, Preliminary Fishery Management Plans (PMPs), which only cover foreign fishing efforts, are prepared by the Secretary for each fishery for which a foreign nation requests a permit. The Secretary is also empowered to produce an FMP for any fishery that a Council has not duly produced. In this latter case, the Secretary's FMP covers domestic and foreign fishing.

As of December 31, 1997, three Preliminary Fishery Management Plans (PMPs) were in effect, some of which have been amended since first being implemented.

# THE MAGNUSON-STEVENSON FISHERY CONSERVATION AND MANAGEMENT ACT

The Atlantic swordfish, Atlantic sharks, and Atlantic billfish fisheries are currently being managed by the Secretary under the Magnuson-Stevens Act and the Western Atlantic bluefin tuna fishery is managed under the Atlantic Tunas Convention Act.

## **FISHERY MANAGEMENT PLANS (FMPs)**

Under section 304 of the Magnuson-Stevens Act, all Council-prepared FMPs must be reviewed for approval by the Secretary. After FMPs have been approved under section 304 of the Magnuson-Stevens Act, they are implemented by Federal regulations, under section 305 of the Act. As of December 31, 1997, there are 39 FMPs in place. Of these, three are Secretarial FMPs for Atlantic highly migratory species. The 36 FMPs the Councils prepared are listed below. The FMPs are amended by the Councils and the amendments are submitted for approval under the same Secretarial review process as new FMPs. Most of the FMPs listed have been amended since initial implementation. Those marked with a double asterisk (\*\*) were amended in 1997.

Northeast Multispecies (\*\*)  
American Lobster (\*\*)  
Atlantic Bluefish  
Atlantic Coast Red Drum  
Atlantic Mackerel, Squid, and Butterfish (\*\*)  
Atlantic Salmon  
Atlantic Sea Scallops (\*\*)  
Atlantic Surf Clams and Ocean Quahogs (\*\*)  
Summer Flounder, Scup, and Black Sea Bass (\*\*)

Gulf and South Atlantic Spiny Lobster  
Caribbean Reef Fish  
Gulf of Mexico Reef Fish (\*\*)  
Gulf of Mexico Corals  
South Atlantic Corals  
South Atlantic Golden Crab  
Caribbean Coral Reef Resources  
Gulf of Mexico Shrimp (\*\*)  
Gulf of Mexico Stone Crab  
Gulf of Mexico Red Drum  
Coastal Migratory Pelagics  
Caribbean Queen Conch  
Caribbean Spiny Lobster  
South Atlantic Snapper/Grouper  
South Atlantic Shrimp (\*\*)  
Northern Anchovy  
King and Tanner Crab (\*\*)  
Commercial and Recreational Salmon (\*\*)  
High Seas Salmon  
Pacific Coast Groundfish (\*\*)  
Gulf of Alaska Groundfish (\*\*)  
Bering Sea and Aleutian Islands  
Groundfish (\*\*)  
Alaska Scallops (\*\*)  
Western Pacific Crustaceans  
Western Pacific Precious Corals  
Western Pacific Bottomfish and Seamount  
Groundfish  
Western Pacific Pelagics

In 1997, NMFS published 862 documents in the Federal Register which affected domestic fishing issues and either proposed or implemented fishery management actions (i.e., FMP and amendments). The documents published include hearing, meeting, correction, and proposed and final rule documents.

***LIBRARY INFORMATION***

The NOAA Library and Information Network Catalog (NOAALINC) resides on Stilas, an integrated library system provided by the Sirsi Corporation. NOAALINC represents the automated holdings of the NOAA Central Library in Silver Spring, Maryland and 22 other NOAA libraries located around the U.S. Currently, the NOAALINC contains records for more than 200,000 items with 5,000-10,000 added each year.

NOAALINC provides several search methods to locate records of items. Users can search for keywords in titles, subject headings, authors, or series. Users can browse indexes of titles, subject headings, authors, series, or call number. Each bibliographic record shows a brief description of the item with a list of which libraries hold the item. The list of libraries will show the call number, item's specific information, and whether the item is available for circulation.

NOAALINC is available to anyone, without restriction, 24 hours a day, every day of the year. Visitors to the NOAA Central Library can access the catalog thru workstations located throughout the Library. Remote users can access the catalog thru a link from the NOAA Central Library's homepage at - <http://www.lib.noaa.gov/>.

NOAA personnel may contact the nearest NOAA Library or the NOAA Central Library and arrange to borrow materials. Members of the general public should contact their local library to arrange for an interlibrary loan. Restrictions apply on circulation of certain materials.

For further information contact the NOAA Central Library, 1315 East-West Highway, 2nd Floor, Silver Spring, MD 20910-3282. Telephone: 301-713-2699 (Ext. 124) or E-mail: [reference@nodc.noaa.gov](mailto:reference@nodc.noaa.gov).

## PUBLICATIONS

PUBLICATIONS AVAILABLE FROM NATIONAL MARINE FISHERIES SERVICE AND  
NATIONAL TECHNICAL INFORMATION SERVICE (NTIS)  
U.S. DEPARTMENT OF COMMERCE

**SCIENTIFIC PUBLICATIONS:**

Information on formal scientific publications by NMFS (such as NMFS journals and technical publications) may be obtained from the Scientific Publications Office (F/ST21), 7600 Sand Point Way, N.E., BIN C-15700, Seattle, WA 98115.

Telephone: 206-526-6107

**CURRENT FISHERY STATISTICS (CFS) SERIES:**

The reports listed below are in the Current Fisheries Statistics (CFS) series. They are statistical bulletins on marine recreational fishing, commercial fishing, and on the manufacture and commerce of fishery products. For further information or to obtain a subscription to these publications, contact the office shown below:

NOAA, National Marine Fisheries Service  
Fisheries Statistics and Economics Division (F/ST1)  
1315 East-West Highway  
Silver Spring, MD 20910  
Telephone: 301-713-2328

The bulletins shown below cover freezings and holdings prior to 1997 and holdings only for 1997 and the U.S. foreign trade in fishery products. If you wish a copy of the following publications, check the designated space ( ) and return to the Office indicated above. The following are available annually:

- ( ) FF - Frozen Fishery Products (Annual)
- ( ) FT - Imports and Exports of Fishery Products (Annual)

**OTHER PUBLICATIONS:**

All publications listed below may be obtained from NTIS (address and phone number listed on page 142) or the originating office (code follows in parentheses). Copies are available only as long as supply lasts.

- ( ) A Guide to Tunas of the Western Atlantic Ocean, NMFS, 1997. 18 p. (SF)
- ( ) Endangered Species Act, Biennial Report, Status of Recovery Program, FY 1989-1991. (F/PR)

( ) Fishery Management Plan for Sharks of the Atlantic Ocean. (F/SF)

( ) Habitat Protection Activity Report. 1991 - 1993. (F/PR)

( ) Magnuson Fishery Conservation and Management Act, As Amended through November 28, 1990. (F/SF)

( ) Marine Mammal Protection Act, Annual Report. 1988-1989. (F/PR)

( ) Marine Mammal Protection Act, Annual Report. 1990-1991. (F/PR)

( ) Our Living Oceans - The First Annual Report on the Status of U.S. Living Marine Resources. (F/ST)

( ) Our Living Oceans - Report on The Status of U.S. Living Marine Resources, 1992 Data. (F/ST)

( ) Our Living Oceans - Report on The Status of U.S. Living Marine Resources, 1993 Data. (F/ST)

( ) Our Living Oceans - Report on The Economic Status of U.S. Fisheries, 1996. (F/ST)

( ) Report on Apportionments of Membership on the Regional Fishery Management Council (RFMCs) in 1994. (F/SF)

( ) The Saltonstall-Kennedy Grant Program: Fisheries Development and Utilization Research and Development Grants (F/IS)

( ) The Saltonstall-Kennedy Grant Program: Fisheries Development and Utilization Research and Development Grants - Annotated Bibliography (F/SF)

( ) USDC Approved List of Fish Establishments and Products -- Semi-Annual Report. (National Seafood Inspection Laboratory, Pascagoula, MS.)

**Aquaculture and Capture Fisheries: Impacts in U.S. Seafood Markets.** (NTIS No. PB-88-204185/GBA)

**INTERNATIONAL REPORTS:**

The Division of International Science and Technology, NMFS, prepares assessments of major fisheries to support priority NMFS programs. These reports may be of interest to the wider fishery community as they include biological, commercial, and technical information of potential use to academicians, industry, and environmentalists.

**Swordfish:**

In 1997 work was completed on a six-volume study, culminating a two-year research project to compile and analyze information on every key swordfish catching nation in the world. *World Swordfish Fisheries*, is the most

comprehensive documentation of this fishery ever produced. Each volume of the study contains information on catch, fishing grounds, fishing fleets, gear and methods, markets, trade, bycatch, research, international relations, and other facets of the fishery. The books are carefully documented and have extensive statistical appendices, graphics, and photographic images to help explain the fishery and illustrate key trends.

**World Swordfish Fisheries: An Analysis of Swordfish Fisheries, Market Trends, and Trade Patterns, Past-Present-Future.** Complete six-volume set. (NTIS No. PB-98-123414/GBA).

**Volume I: Executive Overview.** Summary of World Fisheries for Swordfish and Overview of Global and Regional Trends. 53 p. (NTIS No. PB-98-123425/GBA).

**Volume II: Africa and the Middle East.** Examination of Fisheries and Overview of Regional Trends in Africa and in Select Middle Eastern countries. 235 p. (NTIS No. PB-98-123433/GBA).

**Volume III: Asia.** Summary of Asian Fisheries and Overview of Regional Trends. Special Coverage of Japan, Korea, and Taiwan. 144 p. (NTIS No. PB-98-123441/GBA).

**Volume IV: Latin America.** Summary of Swordfish Fisheries, along the Pacific Coast of South America. Both volumes 843 p. Further individual country reports are planned for 1998.

**Part A., Section 1, Segment A.** Covers Fisheries of Colombia, Ecuador, and Peru (428 p.) (NTIS No. PB-98-123458/GBA).

**Segment B.** Provides in-depth Information about Chile (415 p.) (NTIS No. PB-98-123466/GBA).

**Volume V: North America.** Overview of Canadian and U.S. Fisheries for Swordfish. 136 p. (NTIS No. PB-98-123474/GBA).

**Volume VI: Western Europe.** Examination of European fisheries with special emphasis on the European Union member states (especially Spain, Italy, Greece and France). Non-EU countries are also considered. 324 p. (NTIS No. PB-98-123482/GBA).

**World Fleet:**

The Office of International Affairs, NMFS, prepared a six-volume study which analyzed trends in the world's distant-water fishing fleets. The subjects covered included catch, fishing areas, vessel construction and imports, flag-of-convenience registration, international agreements, and joint ventures.

## PUBLICATIONS

**World fishing Fleets: An Analysis of Distant-water Fleet Operations.** Complete six-volume set. (NTIS No. PB-94-140811/GBA).

**Volume I: Executive Summary.** Overview of world distant-water fishing fleets and summary of regional trends. 54 p. (NTIS No. PB-94-140829/GBA).

**Volume II: Africa.** Compilation of information by U.S. Embassies on fleet operations in selected African countries. 51 p. (NTIS No. PB-94-140837/GBA).

**Volume III: Asia.** Overview of Asian fleets and individual studies of China, Japan, Republic of Korea, and Taiwan fleets. 144 p. (NTIS No. PB-94-140845/GBA).

**Volume IV: Latin America.** Overview of Caribbean, Central America, South America, and individual reports on the Latin American fleets engaged in distant-water fisheries. 513 p. (NTIS No. PB-94-140852/GBA).

**Volume V: Baltic States, Commonwealth of Independent States, and Eastern Europe.** Overview of each of these three blocs and 10 individual country studies including Russia, Poland, and Ukraine. 286 p. (NTIS No. PB-94-140860/GBA).

**Volume VI: Western Europe and Canada.** Overview sections for Europe Community and non-EC countries and individual country studies for all West European fishing nations and Canada. 362 p. (NTIS No. PB-94-140878/GBA).

**World Shrimp and Salmon Culture Study:**

A detailed overview of the salmon and shrimp culture industries in each of the primary producing countries of the world. The reports include information on species, areas developed, companies and farms, hatcheries, culture methods, research, harvests, exports, investments, environmental factors, trade, feed, and other subjects. The study was completed in 1992.

**World Salmon Culture.** This book provides detailed information about farmed salmon aquaculture around the world. A historical background is provided for all key farmed salmon producing nations. The work is carefully illustrated with graphs and statistical tables. An excellent resource for individuals seeking background information on salmon culture. 323 p. (NTIS No. PB-93-134617/GBA).

**World Shrimp Culture.** Complete work is available in two volumes (Volume II. has 3 parts). Readers may also purchase individual parts separately. 1,152 p. (NTIS No. PB-93-134625/GBA).

**Volume I: Asia, Africa, Europe, the Middle East, and North America.** Overview sections for Asia with reporting on shrimp culture in other countries. 362 p. (NTIS No. PB-94-140878/GBA).

**Volume II. Latin America**

**Part I.** This book includes a detailed Latin American overview and individual reports on the shrimp culture industry in the Caribbean island countries. 326 p. (NTIS No. PB93-134641/GBA).

**Part II.** This book includes a brief summary of the shrimp culture industry in Central America as well as individual reports on Mexico and each Central American country. 356 p. (NTIS No. PB93-134658/GBA).

**Part III.** This book includes a brief regional summary of shrimp culture in South America and individual reports on the shrimp culture industry of each South American country. 329 p. (NTIS No. PB93-134666/GBA).

**Other International Reports:**

**Available Foreign Fisheries Market Reports, 1976-1983.** These lists detail available reports covering 59 countries and regions. (NTIS No. ITA-83-02-010/GBA).

**Available Foreign Fishery Reports, 1984-1992.** Covering the same information as the 1976-1983 report.

**NORTHEAST REGION:**

**A History of Benthic Research in the NMFS Northeast Fisheries Science Center.** Steimle, F.W., J.M. Burnett, and R.B. Theroux. 1995. *Mar. Fish. Rev.* 57(2):1-13. (F/NEC).

**Expanding opportunities in ocean sciences: strengthening the links between HBMSU [historically black and minority state colleges and universities] undergraduates and oceanic graduate studies: proceedings of a conference: +1-12 September 1995, Hampton University, Hampton, Virginia.** Jearld, A., Jr., compiler and editor. 1996. *Northeast Fish. Sci. Cent. Ref. Doc.* 96-08. (F/NEC).

**History of Salmon Fisheries and Management in the North Atlantic.** Friedland, K.D. 1994. *ICES Coop. Res. Rep.* 197:6-22. (F/NEC).

**Northeast Fisheries Science Center Publications, Reports, and Abstracts for Calendar Year 1996.** Gibson, J.A. 1998. *Northeast Fish. Sci. Cent. Ref. Doc.* 97-13. (F/NEC).

**Proceedings of the Symposium on the Potential for the Development of Aquaculture in Massachusetts: 15-17 February 1995, Chatham/ Edgartown/Dartmouth, Massachusetts.** Castro, C.A., and S.J. Soares, editors. 1996. *NOAA Tech. Memo. NMFS* NE-109. (NTIS No. PB-97-103782).

**Status of Fishery Resources off the Northeastern United States for 1995.** Conservation and Utilization Division, Northeast Fisheries Science Center. 1995. *NOAA Tech. Memo. NMFS* NE-108. (NTIS No. PB-95-263414).

### SOUTHEAST REGION:

**Habitat Protection Accomplishments of the National Marine Fisheries Service - Fiscal Year 1996.** Habitat Conservation Division, Southeast Regional Office. 1996. 88 p.+Appen. (F/SER).

**National Marine Fisheries Service Guidelines for Proposed Wetland Alternation in the Southeastern United States.** Habitat Conservation Division, Southeast Regional Office. March 1992. 17 p. (F/SER).

**Summary of Federal Aid Grants and Cooperative Agreements Programs, National Marine Fisheries Service, Southeast Region, 1986-1995.** Sutter, Frederick C. 1985. 112p. (F/SER)

### SOUTHWEST REGION:

**A Global Perspective on Artificial Reefs and Fish Aggregating Devices.** In Indo-Pacific Fishery Commission (IPFC), **Proceedings of the Symposium on Artificial Reefs and Fish Aggregating Devices as Tools for the Management and Enhancement of Marine Fishery Resources, Colombo, Sri Lanka, 14-17 May 1990.** Regional Office for Asia and the Pacific (RAPA), Food and Agriculture Organization of the United States, Bangkok. (F/SWC).

## MENHADEN

Menhaden, also called pogey, shiner or bunker by fishermen, belong to the family Clupeidae and are related to herring, shad and sardine. They are small, pelagic fishes that often occur in large, dense schools of thousands of fish. There are four species of menhaden that occur along the U.S. Atlantic and Gulf coasts. The Atlantic menhaden (*Brevoortia tyrannus*) pictured above and the Gulf menhaden (*B. patronus*) are the principal species landed. Commercial fishermen locate schools of fish using spotters in airplanes and then capture them with purse seines. Menhaden, because of their high fat and oil content, are a valued industrial component of the U.S. commercial fishery.

About 2.0 billion pounds of menhaden valued at \$112 million were landed by U.S. fishermen in 1997. Menhaden comprised about 21 percent of the total U.S. domestic landings and were second only to Alaska (walleye) pollock in the volume of fish landed. Small quantities of menhaden were sold for bait, but most harvested fish were cooked and rendered into meal, oil and solubles. These processed products were used in poultry and cattle feeds, fertilizers, paints, lubricants, plasticizers, and oils. Menhaden are also important as a forage fish for striped bass, tuna, bluefish, and other predators.

## SERVICES

### NATIONAL MARINE FISHERIES SERVICE FISHERIES MARKET NEWS

#### FAX-ON-DEMAND SYSTEM

The National Marine Fisheries Service (NMFS) has collected market information at principal U.S. ports for 60 years. In an effort to provide a continuing high level of service to the seafood community this information is now available through the NMFS Fax-on-Demand Service. Up-to-date information on various landings data, wholesale values, foreign trade, cold storage holdings, trade leads, and Japanese market are now just a phone call away. The cost to you is a phone call, the service is free. Please feel free in helping NMFS spread the word about the Fax-on-Demand Service.

#### INSTRUCTIONS

1. You **must** place your call from a fax machine. At any fax machine, pick up handset (or use speaker phone capability, if so equipped) and using the fax machine's numeric keypad, dial the NMFS Fax Management System phone number:

**301 - 713 - 1415**

2. A human voice will greet you and welcome you to the NMFS Fax Management System and will immediately ask you to enter your **Fax Mailbox Number, followed by the pound (#) sign**. Respond by entering the mailbox number for Fisheries Market News:

**200 #**

3. After you are welcomed to the Fisheries Market News Fax Service you will be guided by a series of human voice prompts. First you are given the opportunity to **enter a document number (like those found on the document listing), followed by the pound (#) sign**:

**Examples:** For daily New York Fulton Market Fresh Prices, enter **21#**  
For most recent Cold Storage Report enter **71#**

**For a list of available documents (Menu of Document Choices), enter 1#**

4. Follow remaining voice prompts for confirmation of selection(s) and entering additional document numbers. After you have selected the documents you want, you will be prompted to press the pound (#) key to proceed.
5. You will now be asked to press the **START** or **SEND** key on fax machine. Wait until you hear the typical fax tone indicating a good connection and hang up the handset.

Please call **(301-713-2328)** for further information or if you have any questions or problems.

### NATIONAL MARINE FISHERIES SERVICE FISHERIES MARKET NEWS

#### HOME PAGES

The National Marine Fisheries Service provides information on programs and data available to the public and fishing industry via Internet home pages. Please use the following address for NMFS' home page - <http://www.nmfs.gov> through a personal computer. If you wish to access individual office home pages the addresses and a brief description follows:

**Fisheries Statistics and Economics** - <http://www.st.nmfs.gov/st1/>. Describes commercial and recreational fisheries statistics data collection programs and provides access to: commercial landings data bases; Marine Recreational Fisheries Statistics Survey (MRFSS) data; fishery economics; cold storage data; Market News Reports; trade data; U.S. Coast Guard vessel documentation; and electronic copies of the publication "Fisheries of the United States."

**Inspection Program**- <http://www.nmfs.gov/iss/issue.html>. Provides information on the voluntary National Seafood Inspection Program, including the services offered in the US and foreign countries to harvesters, processors, distributors, importers/exporters, buyers, and retailers; list of approved fish establishments and products; fees and charges; policies for advertising services; and official inspection marks and certificates.

**Protected Resources** - [http://nmfs.gov/tmcintyr/prot\\_res.html](http://nmfs.gov/tmcintyr/prot_res.html). Contains recovery efforts for species considered endangered or threatened; depleted species of marine mammals; and a comprehensive list of other internet resources pertaining to protection programs and other issues. Information on Endangered Species Act and Marine Mammal Protection Act.

**Sustainable Fisheries Act/Magnuson-Stevens Act** - <http://www.nmfs.gov/sfa.html>. The Sustainable Fisheries Act of 1996 amended the Magnuson-Stevens Fishery Conservation and Management Act (MSFCM) (1976 et seq.). Provides electronic copies of both Acts, a legislative history and guide to the amendments to the Act, and a tracking system for Council and NMFS actions implementing the amendments. In addition, the MSFCM Act amendment actions requiring public comment are posted with completed research reports and other documents required by the Sustainable Fisheries Act.

**Saltonstall-Kennedy Grant Program** - <http://www.nmfs.gov/sfweb/skhome.html>. Description of the Saltonstall-Kennedy (S-K) Program, the most recent solicitation for proposals, application forms and instructions, FAQs, and Regional contacts for the S-K Program, as well as the latest update to the S-K Annotated Bibliography of completed projects.

**Northeast Region** - <http://www.nero.nmfs.gov/doc/nero.html>. Describes the mission and responsibilities of the Regional Office Staffs and Divisions. Provides information on northeast fisheries regulations, quota reports for specific species, multi-species preliminary statistics reports; scallop and multi-species days-at-sea activity reports; federal aid for MARFIN and SK grant programs; and links to other NOAA sites.

**Northeast Fisheries Scientific Center** - <http://www.nefsc.nmfs.gov>. Provides current and historical northeast fisheries information and data about research facilities, vessels, programs, publications, management, laws and regulations, and answers to frequently asked questions on fish and fisheries research. Features in-depth information on northeast stock status and realtime, at-sea, display of research vessel activities, measurements, and observations.

**Southeast Region** - <http://caldera.sero.nmfs.gov/>. Provides information on regional Federal activities including: fisheries regulations, news releases and fisheries bulletins, fisheries regulations, vessel and dealer permits, fishery management plan implementation/quotas, marine mammals and endangered species management and protection, habitat protection and restoration activities, and federal aid programs for grants and cooperative agreements.

**Southeast Fisheries Science Center** - <http://www.sefsc.noaa.gov/>. Describes the mission of the Center in support of NMFS including laboratories dedicated to research covering North Carolina to Texas and the Caribbean. Provides research data to support the programs which include large marine ecosystem, collecting and reporting statistical/economic data, fishery resource conservation, protection of marine mammals and endangered species, and impact analysis / environmental assessments.

**NATIONAL MARINE FISHERIES SERVICE  
FISHERIES MARKET NEWS****HOME PAGES**

**Alaska Region** - <http://www.fakr.noaa.gov/> Provides information on in season state of groundfish catch, statistics, information bulletins, regulations, maps, tables, and instructions. Sablefish and halibut individual fishing quota program, catch data and appeal cases. Information on Marine Mammal Authorization Program.

**Alaska Fisheries Science Center** - <http://www.afsc.noaa.gov/>. Describes the mission of the Center and the organization and purpose of its laboratories, divisions, and programs dedicated to Federal fisheries research in the coastal oceans off Alaska and the West Coast of the United States and marine mammal research on current ecosystems. Provides stock assessment, cruise reports and schedules, educational materials, publication lists, and other online documents.

**Northwest Region** - <http://www.nwr.noaa.gov/>. Provides information on the region's activities, mission and responsibilities. It includes news releases, announcements, documents and Federal Register notices about fisheries management plans, public hearings, programs, regulations, Endangered Species Act listings and proposals, habitat conservation, and regional hydro power activities.

**Northwest Fisheries Science Center** - <http://research.nwfsc.noaa.gov/nwfsc-homepage.html>. Describes Center research, including status and recovery of endangered salmon and new hatchery-rearing techniques; rapid-response analyzes of chemical pollution and harmful algae blooms in fishery grounds nationwide; assessing the west coast groundfish fishery; and developing new bycatch utilization technologies. News topics, current publications, library resources, and the Center's state-of-the-art water-recycling fish culture facility are also featured.

**Southwest Region** - <http://swr.ucsd.edu>. Described the mission and responsibilities of the regional office. Announcements of Federal Register notices on seasons, trip limits, quotas and other fishery management plan information. Provides information on fisheries statistics, trade data, canned tuna updates and status of tuna import quotas, and catch reports for various California fisheries. Japanese market reports are available on sablefish, shrimp, landings, cold storage and wholesale prices. Links to other pertinent sites of interest to fishery and seafood industries.

**Southwest Fisheries Science Center** - <http://swfsc.ucsd.edu>. Descriptions of programs, laboratories, geographic scope, center organization, research vessels, upper level scientific/management staffs, publications, newsletters (tuna and billfish), and mission of the Center. Information on types of research being conducted on fishes, marine mammal, sea turtles, habitat and marine ecosystems. Also, updated NOAA's Resource Guide for Teachers of Marine Science is available for download.

**BULLETIN BOARDS**

Several National Marine Fisheries Service offices provide public access to electronic bulletin board services operating 24-hours a day to furnish the fishing industry with current information. Listed below are necessary facts needed to access these bulletin boards via a personal computer.

**Northwest Region:** The Northwest Regional Office service is available by dialing **206-526-6405** at 2400 baud, no parity, 8 data bits, 1 stop bit, full duplex. (The region plans to upgrade baud rate to 28.8 by January 1995.) Information is presented through a system of menus and displayed on-line. A variety of reports are included: current groundfish and salmon regulations; current entry program, limited entry groundfish permits; foreign trade news and data files; HACCP FDA information; Saltonstall / Kennedy Program; view your account; testing system; NMFS news and phone numbers; list of files or transfers; and miscellaneous information. For additional information contact John Bishop, 206-526-6119, at the Northwest Regional Office.

**Southwest Region:** The Southwest Regional Office service is available by dialing **310-980-4059** at 2400 baud, no parity, 8 data bits, 1 stop bit, full duplex. Information is presented in the form of bulletins organized through a system of menus and displayed on-line. Announcements include Federal Register notices of seasons, trip limits, and quotas for groundfish, salmon, and coastal pelagic fisheries. Trade and industry reports are available for fishery product imports into Southern California / Arizona / Hawaii, canned tuna industry updates and status of canned tuna import quotas, catch reports and the status of quotas or allocations for various California fisheries, a calendar of public meetings and events, Pacific Council News and information concerning protected species and marine recreational fisheries. For additional information contact Dan Viele, 310-980-4039, at the Southwest Regional Office.

## SEA GRANT EXTENSION SERVICE

The Office of Sea Grant is a major program element of the National Oceanic and Atmospheric Administration. The National Sea Grant College Program is funded jointly by the Federal Government and colleges or universities. Sea Grant's Extension Service offers a broad range of information concerning the Nation's fisheries to recreational and commercial fishermen, fish processors, and others. The following program leaders, listed alphabetically by State, can provide information on Sea Grant activities:

William Hosking, Coordinator  
Alabama Sea Grant Extension  
Auburn University Marine  
Extension & Research Center  
4170 Commander's Drive  
Mobile, AL 36615  
(334) 438-5690 FAX: 438-5670

Bruce J. Miller, Assoc. Dir.  
Director of Extension/Pacific  
Programs, Sea Grant Extension  
Service, Univ. of HA  
1000 Pope Road, MSB 227  
Honolulu, HI 96822  
(808) 956-8645 FAX: 956-2858

Donald E. Kramer, Extension/MAP Leader  
Alaska Sea Grant College Program  
2221 East Northern Lights #110  
Anchorage, AK 99508  
(907) 274-9691 FAX: 277-5242

Brian Miller,  
Sea Grant Extension Leader  
Forestry & Natural Resources  
Purdue Univ. - Forestry Bldg.  
West Lafayette, IN 47907  
(912) 264-7268 FAX: 264-7312

Christopher M. DeWees,  
Coordinator  
Sea Grant Extension Program  
Department of Wildlife  
and Fisheries  
Univ. of CA - Davis  
Davis, CA 95616  
(916) 752-1497 FAX: 752-4154

Michael Liffman, Assist. Dir.  
Louisiana Sea Grant College  
Program, LA State Univ.  
136 Wetland Resources Building  
Baton Rouge, LA 70803  
(504) 388-6290 FAX: 388-6331

Susan Yoder, Extension Leader  
USC Sea Grant Program  
Hancock Institute of Marine  
Studies, University Park  
Los Angeles, CA 90089  
(213) 740-1964 FAX: 740-5936

Ron Beard, Extension Leader  
ME/NH Sea Grant College Program  
21 Coburn Hall, Univ. Of ME  
Orono, ME 04469  
(207) 581-1440 FAX: 581-1423

Nancy Balcom, Interim Extension Leader  
Sea Grant Extension Program  
Univ. of Connecticut  
1084 Shennecossett Road  
Groton, CT 06340  
(860) 405-9107 FAX: 485-9109

Douglas Lipton, Extension Leader  
Cooperative Extension Service  
2218B Symons Hall - Univ. of MD  
College Park, MD 20742  
(301) 405-1280 FAX: 314-9032

Kent Price, Extension Leader  
Delaware Sea Grant College Prog.  
Marine Advisory Service  
700 Pilottown Road  
Lewes, DE 19958  
(302) 645-4256 FAX: 645-4007

Cliff Goudey, Extension Leader  
MIT Sea Grant College Program  
E38-324/Kendall Square  
292 Main Street  
Cambridge, MA 02139  
(617) 253-7079 FAX: 258-5730

Marion L. Clarke, Leader  
Florida Sea Grant Extension  
Univ. of FL - Bldg. 803  
P.O. Box 110405  
Gainesville, FL 32611  
(352) 392-1837 FAX: 392-5113

Dale Leavitt, Extension Leader  
WHOI Sea Grant Program  
Mail Stop #2, Coastal Research Lab.  
Woods Hole Oceanographic  
Institute  
Woods Hole, MA 02543  
(508) 289-2997 FAX: 457-2172

Keith Gates,  
Sea Grant Extension Leader  
Marine Extension Service  
715 Bay Street  
Brunswick, GA 31520  
(912) 264-7268 FAX: 264-7312

John Schwartz, Extension Leader  
Michigan Sea Grant College Prog.  
Michigan State University  
334 Natural Resource Building  
East Lansing, MI 48824  
(517) 355-9637 FAX: 353-6496

SEA GRANT EXTENSION SERVICE

Jeffery Gunderson, Extension Leader  
Minnesota Sea Grant  
Univ. of MN - Duluth  
208 Washburn Hall  
Duluth, MN 55812  
(218) 726-8715 FAX: 726-6556

David C. Veal, Extension Leader  
MS Sea Grant  
Coastal Research/Extension Center  
2710 Beach Blvd., Suite 1-E  
Biloxi, MS 39531  
(601) 338-4710 FAX: 388-1375

Brian E. Doyle, Extension Leader  
Sea Grant College Program  
Univ. of NH - Kingman Farm  
Durham, NH 03824

## GLOSSARY

**ANADROMOUS SPECIES.** These are species of fish that mature in the ocean, and then ascend streams to spawn in freshwater. In the Magnuson Act, these species include, but are not limited to, Atlantic and Pacific salmons, steelhead trout, and striped bass. See 42 FR 60682, Nov. 28, 1977.

**ANALOG PRODUCTS.** These include imitation and simulated crab, lobster, shrimp, scallops, and other fish and shellfish products fabricated from processed fish meat (such as surimi).

**AQUACULTURE.** The farming of aquatic organisms in marine, brackish or fresh water. Farming implies private or corporate ownership of the organism and enhancement of production by stocking, feeding, providing protection from predators, or other management measures. Aquaculture production is reported as the weight and value of cultured organisms at their point of final sale.

**BATTER-COATED FISH PRODUCTS.** Sticks and portions or other forms of fish or shellfish coated with a batter containing a leavening agent and mixture of cereal products, flavoring, and other ingredients, and partially cooked in hot oil a short time to expand and set the batter.

**BOAT, OTHER.** Commercial fishing craft not powered by a motor, e.g., rowboat or sailboat, having a capacity of less than 5 net tons. See motorboat.

**BREADED FISH PRODUCTS.** Sticks and portions or other forms of fish or shellfish coated with a non-leavened mixture containing cereal products, flavorings, and other ingredients. Breaded products are sold raw or partially cooked.

**BREADED SHRIMP.** Peeled shrimp coated with breading. The product may be identified as fantail (butterfly) and round, with or without tail fins and last shell segment; also known as portions, sticks, steaks, etc., when prepared from a composite unit of two or more shrimp pieces whole shrimp or a combination of both without fins or shells.

**BUTTERFLY FILLET.** Two skin-on fillets of a fish joined together by the belly skin. See fillets.

**CANNED FISHERY PRODUCTS.** Fish, shellfish, or other aquatic animals packed in cans, or other containers, which are hermetically sealed and heat-sterilized. Canned fishery products may include milk, vegetables, or other products. Most, but not all, canned fishery products can be stored at room temperature for an indefinite time without spoiling.

**COMMERCIAL FISHERMAN.** An individual who derives income from catching and selling living resources taken from inland or marine waters.

**CONSUMPTION OF EDIBLE FISHERY PRODUCTS.** Estimated amount of commercially landed fish, shellfish, and other aquatic animals consumed by the civilian population of the United States. Estimates are on an edible-weight basis and have been adjusted for beginning and ending inventories of edible fishery products. Consumption includes U.S. production of fishery products from both domestically caught and imported fish, shellfish, other edible aquatic plants, animals, and imported products and excludes exports and purchases by the U.S. Armed Forces.

**CONTINENTAL SHELF FISHERY RESOURCES.** These are living organisms of any sedentary species that at the harvestable stage are either (a) immobile on or under the seabed, (b) unable to move except in constant physical contact with the seabed or subsoil of the continental shelf. The Magnuson Act now lists them as certain abalones, surf clam and ocean quahog, queen conch, Atlantic deep-sea red crab, dungeness crab, stone crab, king crabs, snow (tanner) crabs, American lobster, certain corals, and sponges.

**CURED FISHERY PRODUCTS.** Products preserved by drying, pickling, salting, or smoking; not including canned, frozen, irradiated, or pasteurized products. Dried products are cured by sun or air-drying; pickled or salted products are those products preserved by applying salt, or by pickling (immersing in brine or in a vinegar or other preservative solution); smoked products are cured with smoke or a combination of smoking and drying or salting.

**DEFLATED VALUE.** The deflated values referred to in this document are calculated with the Gross Domestic Products Implicit Price Deflator. The base year for this index is 1987.

**EDIBLE WEIGHT.** The weight of a seafood item exclusive of bones, offal, etc.

**EEZ.** See U.S. Exclusive Economic Zone.

**EUROPEAN UNION.** Belgium and Luxembourg, Denmark, Federal Republic of Germany, Greece, France, Ireland, Italy, Netherlands, Portugal, Spain, and United Kingdom. This was formerly known as European Economic Community (EEC).

**EXPORT VALUE.** The value reported is generally equivalent to f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value excludes the cost of loading, freight, insurance, and other charges or transportation cost beyond the port of exportation.

**EXPORT WEIGHT.** The weight of individual products as exported, i.e., fillets, steaks, whole, breaded, etc. Includes both domestic and foreign re-exports data.

**EXVESSEL PRICE.** Price received by the harvester for fish, shellfish, and other aquatic plants and animals.

**FISH BLOCKS.** Regular fish blocks are frozen blocks or slabs of fillets or pieces of fillets cut or sliced from fish. Minced fish blocks are frozen blocks or slabs of minced flesh produced by a meat and bone separating machine.

**FISH FILLETS.** The sides of fish that are either skinned or have the skin on, cut lengthwise from the backbone. Most types of fillets are boneless or virtually boneless; some may be labeled as "boneless fillets."

**FISH MEAL.** A high-protein animal feed supplement made by cooking, pressing, drying, and grinding fish or shellfish.

**FISH OIL.** An oil extracted from body (body oil) or liver (liver oil) of fish and marine mammals; mostly a byproduct of fish meal production.

**FISH PORTION.** A piece of fish flesh that is generally of uniform size with thickness of 3/8 of an inch or more and differs from a fish stick in being wider or of a different shape. A fish portion is generally cut from a fish block.

**FISH SOLUBLES.** A water-soluble protein byproduct of fish meal production. Fish solubles are generally condensed to 50 percent solids and marketed as "condensed fish solubles."

**FISH STEAK.** A cross-section slice cut from a large dressed fish. A steak is usually about 3/4 of an inch thick.

**FISH STICK.** An elongated piece of breaded fish flesh weighing not less than 3/4 of an ounce and not more than 1-1/2 ounces with the largest dimension at least three times that of the next largest dimension. A fish stick is generally cut from a fish block.

**FISHERY MANAGEMENT PLAN (FMP).** A plan developed by a Regional Fishery Management Council, or the Secretary of Commerce under certain circumstances, to manage a fishery resource in the U.S. EEZ pursuant to the MFCMA (Magnuson Act).

**FISHING CRAFT, COMMERCIAL.** Boats and vessels engaged in capturing fish, shellfish, and other aquatic plants and animals for sale.

**FULL-TIME COMMERCIAL FISHERMAN.** An individual who receives more than 50 percent of their annual income from commercial fishing activities, including port activity, such as vessel repair and re-rigging.

**GROUND FISH.** Broadly, fish that are caught on or near the sea floor. The term includes a wide variety of bottom fishes, rockfishes, and flatfishes. However, NMFS sometimes uses the term in a narrower sense. In "Fisheries of the United States," the term applies to the following species—Atlantic and Pacific: cod, hake, ocean perch, and pollock; cusk; and haddock.

**IMPORT VALUE.** Value of imports as appraised by the U.S. Customs Service according to the Tariff Act of 1930, as amended. It may be based on foreign market value, constructed value, American selling price, etc. It generally represents a value in a foreign country, and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States.

**IMPORT WEIGHT.** The weights of individual products as received, i.e., fillets, steaks, whole, headed, etc.

**INDUSTRIAL FISHERY PRODUCTS.** Items processed from fish, shellfish, or other aquatic plants and animals that are not consumed directly by humans. These items contain products from seaweeds, fish meal, fish oils, fish solubles, pearl essence, shark and other aquatic animal skins, and shells.

**INTERNAL WATER PROCESSING (IWPs).** An operation in which a foreign vessel is authorized by the governor of a state to receive and process fish in the internal waters of a state. The Magnuson Act refers to internal waters as all waters within the boundaries of a state except those seaward of the baseline from which the territorial sea is measured.

## GLOSSARY

**JOINT VENTURE.** An operation authorized under the MFCMA (Magnuson Act) in which a foreign vessel is authorized to receive fish from U.S. fishermen in the U.S. EEZ. The fish received from the U.S. vessel are part of the U.S. harvest

**LANDINGS, COMMERCIAL.** Quantities of fish, shellfish, and other aquatic plants and animals brought ashore and sold. Landings of fish may be in terms of round (live) weight or dressed weight. Landings of crustaceans are generally on a live-weight basis except for shrimp which may be on a heads-on or heads-off basis. Mollusks are generally landed with the shell on, but for some species only the meats are landed, such as sea scallops. Data for all mollusks are published on a meat-weight basis.

**MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT.** Public Law 94-265, as amended. The Magnuson Act provides a national program for the conservation and management of fisheries to allow for an optimum yield (OY) on a continuing basis and to realize the full potential of the Nation's fishery resources. It established the U.S. Exclusive Economics Zone (EEZ) (formerly the FCZ - Fishery Conservation Zone) and a means to control foreign and certain domestic fisheries through PMPs and FMPs. Within the U.S. EEZ, the United States has exclusive management authority over fish (meaning finfish, mollusks, crustaceans, and all other forms of marine animal and plant life other than marine mammals, birds, and highly migratory species of tuna). The Magnuson Act provides further exclusive management authority beyond the U.S. EEZ for all continental shelf fishery resources and all anadromous species throughout the migratory range of each such species, except during the time they are found within any foreign nation's territorial sea or fishery conservation zone (or the equivalent), to the extent that such a sea or zone is recognized by the United States.

**MARINE RECREATIONAL FISHING.** Fishing for pleasure, amusement, relaxation, or home consumption.

**MARINE RECREATIONAL CATCH.** Quantities of finfish, shellfish, and other living aquatic organisms caught, but not necessarily brought ashore, by marine recreational fisherman.

**MARINE RECREATIONAL FISHERMEN.** Those people who fish in marine waters primarily for recreational purposes. Their catch is primarily for home consumption, although occasionally a part or all of their catch may be sold and enter commercial channels. This definition is used in the NMFS Marine Recreational Fishery Statistics Survey, and is not intended to represent a NMFS policy on the sale of angler-caught fish.

**MAXIMUM SUSTAINABLE YIELD (MSY).** MSY from a fishery is the largest annual catch or yield in terms of weight of fish caught by both commercial and recreational fishermen that can be taken continuously from a stock under existing environmental conditions. A determination of MSY, which should be an estimate based upon the best scientific information available, is a biological measure necessary in the development of optimum yield.

**METRIC TONS.** A measure of weight equal to 1,000 kilograms, 0.984 long tons, 1.1023 short tons, or 2,204.6 pounds.

**MOTORBOAT.** A motor-driven commercial fishing craft having a capacity of less than 5 net tons, or not officially documented by the Coast Guard. See "boat, other."

**NORTHWEST ATLANTIC FISHERIES ORGANIZATION (NAFO).** This convention, which entered into force January 1, 1979, replaces ICNAF. NAFO provides a forum for continued multilateral scientific research and investigation of fishery resources that occur beyond the limits of coastal nations' fishery jurisdiction in the northwest Atlantic, and will ensure consistency between NAFO management measures in this area and those adopted by the coastal nations within the limits of their fishery jurisdiction.

**OPTIMUM YIELD (OY).** In the MFCMA (Magnuson Act), OY with respect to the yield from a fishery, is the amount of fish that (1) will provide the greatest overall benefit to the United States, with particular reference to food production and recreational opportunities; and (2) is prescribed as such on the basis of maximum sustainable yield from such fishery, as modified by any relevant ecological, economic, or social factors.

**PACKAGED FISH.** A term used in NMFS publications prior to 1972 to designate fresh or frozen raw fish fillets and steaks.

**PART-TIME COMMERCIAL FISHERMAN.** An individual who receives less than 50 percent of their annual income from commercial fishing activities.

**PER CAPITA CONSUMPTION.** Consumption of edible fishery products in the United States divided by the total civilian population. In calculating annual per capita consumption, estimates of the civilian resident population of the United States on July 1 of each year are used. These estimates are taken from current population reports, series P-25, published by the U.S. Bureau of the Census.

**PER CAPITA USE.** The use of all fishery products, both edible and nonedible, in the United States divided by the total population of the United States.

**PRELIMINARY FISHERY MANAGEMENT PLAN (PMP).** The Secretary of Commerce prepares a PMP whenever a foreign nation with which the United States has made a Governing International Fishery Agreement (GIFA) submits an application to fish in a fishery not managed by an FMP. A PMP is replaced by an FMP as soon as the latter is implemented. A PMP applies only to foreign fishing.

**RE-EXPORTS.** Re-exports are commodities which have entered the U.S. as imports and are subsequently exported in substantially the same condition as when originally imported.

**RETAIL PRICE.** The price of fish and shellfish sold to the final consumer by food stores and other retail outlets.

**ROUND (LIVE) WEIGHT.** The weight of fish, shellfish, or other aquatic plants and animals as taken from the water; the complete or full weight as caught. The tables on world catch found in this publication include, in the case of mollusks, the weight of both the shells and the meats, whereas the tables on U.S. landings include only the weight of the meats.

**SURIMI.** Minced fish meat (usually Alaska pollock) which has been washed to remove fat and undesirable matters (such as blood, pigments, and odorous substances), and mixed with cryoprotectants, such as sugar and/or sorbitol, for a good frozen shelf life.

**TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING (TALFF).** The TALFF, if any, with respect to any fishery subject to the exclusive fishery management authority of the United States, is that portion of the optimum yield of such fishery which will not be harvested by vessels of the United States, as determined by provisions of the MFCMA.

**U.S. EXCLUSIVE ECONOMIC ZONE (EEZ).** The MFCMA (Magnuson Act) defines this zone as contiguous to the territorial sea of the United States and extending seaward 200 nautical miles measured from the baseline from which the territorial sea is measured. This was formerly referred to as the FCZ (Fishery Conservation Zone).

**U.S.-FLAG VESSEL LANDINGS.** Includes landings by all U.S. fishing vessels regardless of where landed as opposed to landings at ports in the 50 United States. These include landings at foreign ports, U.S. territories, and foreign vessels in the U.S. FCZ under joint venture agreements. U.S. law prohibits vessels constructed or registered in foreign countries to land fish catches at U.S. ports.

**U.S. TERRITORIAL SEA.** A zone extending 3 nautical miles from shore for all states except Texas and the Gulf Coast of Florida where the seaward boundary is 3 marine leagues (9 nautical miles).

**USE OF FISHERY PRODUCTS.** Estimated disappearance of the total supply of fishery products, both edible and nonedible, on a round-weight basis without considering beginning or ending stocks, exports, military purchases, or shipments to U.S. territories.

**VESSEL.** A commercial fishing craft having a capacity of 5 net tons or more. These craft are either enrolled or documented by the U.S. Coast Guard and have an official number assigned by that agency.

**WHOLESALE FISH AND SHELLFISH PRICES.** Those prices received at principal fishery markets by primary wholesalers (processors, importers, and brokers) for customary quantities, free on board (f.o.b.) warehouse.

## Federal Inspection Marks for Fishery Products

**NATIONAL FISHERY PRODUCTS INSPECTION PROGRAM.** The U.S. Department of Commerce (USDC), National Marine Fisheries Service, a part of the National Oceanic and Atmospheric Administration, conducts a voluntary seafood inspection program on a fee-for-service basis. A HACCP-based service is also available. Services provided by the program include vessel and plant sanitation, product inspection and grading, label reviews, product specification reviews, laboratory analyses, training, education and information. Inspection and certification services are available nationwide and in U.S. territories for all interested parties. Consultative services are provided in foreign countries. Inspection and certification services are also provided for imported and exported products. The USDC Seafood Inspection Division also provides HACCP training, plan development, implementation assistance, and verification service to industry (domestic and foreign) for the purpose of demonstrating compliance with FDA's HACCP rule (21 CFR Parts 123 and 1240) regarding "Procedures for the Safe and Sanitary Processing and Importing of Fish and Fishery Products" which was implemented December 18, 1997.

**USERS OF INSPECTION SERVICES.** The users of the voluntary seafood inspection service include vessel owners, processors, distributors, brokers, retailers, food service operators, exporters, importers, and those who have a financial interest in buying and selling seafood products. The U.S. Department of Agriculture recommends that USDC inspected products be purchased for its food feeding programs. The **USDC APPROVED LIST OF FISH ESTABLISHMENTS AND PRODUCTS**, published bi-annually, provides a listing of products and participants who contract with USDC.

**USDC INSPECTION MARKS.** These marks designate the level and the type of inspection performed by the federal inspector. The marks can be used in advertising and labeling under the guidelines provided by the Seafood Inspection Division and in accordance with federal and state regulations regarding advertising and labeling. Products bearing the USDC official marks have been certified as being safe, wholesome, and properly labeled.

**"US GRADE A" MARK.** The U.S. GRADE A mark signifies that a product has been processed under federal inspection in an approved facility and meets the established level of quality of an existing U.S. grade standard. The U.S. Grade A mark indicates that the product is of high quality, uniform in size, practically free from blemishes and defects, in excellent condition and possessing good flavor and odor.

**"PROCESSED UNDER FEDERAL INSPECTION" MARK.** The PUFImark or statement signifies that the product has been inspected in an approved facility and was found to be safe, wholesome and properly labeled according to approved specifications or criteria. The language within the PUFImark has been amended to "Processed Under Federal Inspection" to reflect actual inspection procedures and the regulatory requirements for use of the mark.

**"LOT INSPECTED" MARK.** A new USDC Lot Inspected mark was created to replace the "Officially Sampled" and "Accepted Per Specifications" lot inspection marks used on retail labels. The latter marks were no longer allowed/accepted after September 30, 1997. The use of the new mark meets the needs of both industry and consumers by conveying that the products bearing the mark have been examined by the USDC Program.

**"RETAIL" MARK.** In response to requests made by industry, a new mark has been created for retail or food service establishments. Participants qualify for use of the "Retail Mark" by receiving the USDC HACCP-based service or being under contract for sanitation services and associated product evaluation. Usage of such a mark will give the retail industry the opportunity to advertise on their banners, logos, or menus that their facility has been recognized by USDC for proper sanitation and handling of fishery products.

**USDC HACCP MARK.** The USDC HACCP-based service is available to all interested parties on a fee-for-service basis. Label approval, record keeping and analytical testing are program requirements. An industry USDC-certified employee trained in HACCP principles is also required for each facility/site in the program. Compliance ratings determine frequency of official visits. Benefits to participants include increased controls through a more scientific approach, use of established marks, increased efficiency of federal inspection personnel, and enhanced consumer confidence. The USDC has made available a HACCP mark and a "banner" to distinguish products that have been produced under the HACCP-based program. The HACCP banner must be used as an attachment to existing inspection grade marks. Establishments meeting HACCP program requirements may use these marks in conjunction with promotional material, packaging, point-of-sale notices, and menus.
