Preface

FISHERIES OF THE UNITED STATES, 2003

This publication is a preliminary report for 2003 on commercial and recreational fisheries of the United States with landings from the U.S. territorial seas, the U.S. Exclusive Economic Zone (EEZ), and on the high seas. This annual report provides timely answers to frequently asked questions.

SOURCES OF DATA

Information in this report came from many sources. Field offices of the National Marine Fisheries Service (NMFS), with the generous cooperation of the coastal states, collected and compiled data on U.S. commercial landings and processed fishery products.

The NMFS Fisheries Statistics Division in Silver Spring, MD, managed the collection and compilation of recreational statistics, in cooperation with various States and Interstate Fisheries Commissions, and tabulated and prepared all data for publication. Sources of other data appearing in this publication are: U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Coast Guard, U.S. Customs Service, U.S. Department of the Interior, U.S. Department of Agriculture, and the Food and Agriculture Organization (FAO) of the United Nations.

PRELIMINARY AND FINAL DATA

Data on U.S. commercial landings, employment, prices, production of processed products, and recreational catches are preliminary for 2003. Final data will be published in other NMFS Current Fishery Statistics publications.

The Fisheries Statistics Division of NMFS takes this opportunity to thank states, industry, and foreign nations who provided the data that made this publication possible. Program leaders of the field offices were: Gregory Power, Scott McNamara, and Gene Steady for New England, Middle Atlantic, and Chesapeake; Scott Nelson, U.S. Geological Survey, Great Lakes States; David Gloeckner, Guy Davenport, and Maggie Williams for the South Atlantic and Gulf States; Patricia J. Donley, California; David Hamm, Hawaii and Pacific Islands; John K. Bishop, Oregon and Washington; and Robert Ryznar and Camille Ruse of the Alaska Fisheries Information Network for Alaska.

NOTES

The time series of U.S. catch by species and distance from shore included in this year's "Fisheries of the U.S." is estimated by the National Marine Fisheries Service.

As in past issues of this publication, the units of quantity and value are defined as follows unless otherwise noted: U.S. landings are shown in round weight (except mollusks which are in meat weight); quantities shown for U.S. imports and exports are in product weight, as reported by the U.S. Bureau of the Census; the value of the U.S. domestic commercial landings is exvessel; in the Review Section on important species, deflated exvessel prices are shown. The deflated value was computed using the Gross Domestic Products Implicit Price Deflator using a base year 2000; the value for U.S. imports is generally the market value in the foreign (exporting) country and, therefore, excludes U.S. import duties, freight charges and insurance from the foreign country to the United States; the value for exports is generally the value at the U.S. port of export, based on the selling price, including inland freight, insurance, and other charges. Countries and territories shown in the U.S. foreign trade section are established for statistical purposes in the Tariff Schedules of the United States Annotated (International Trade Commission) and reported by the U.S. Bureau of the Census.

SUGGESTIONS

The Fisheries Statistics Division wishes to provide the kinds of data sought by users of fishery statistics, and welcomes comments or suggestions that will improve this publication.

Address all comments or questions to:

U.S. LANDINGS

Commercial landings (edible and industrial) by U.S. fishermen at ports in the 50 states were 9.5 billion pounds or 4.3 million metric tons valued at \$3.3 billion in 2003—an increase of 108.3 million pounds (up 1 percent) and \$249.9 million (up 8 percent) compared with 2002. Finfish accounted for 87 percent of the total landings, but only 45 percent of the value. The 2003 average exvessel price paid to fishermen was 35 cents compared to 33 cents in 2002.

Catches of Alaska pollock, Pacific whiting and other Pacific groundfish that are processed at-sea aboard U.S. vessels in the northeastern Pacific are credited as “landings” to the state nearest to the area of capture. Information on landing port or percentage of catch transferred to transport ships for delivery to foreign ports is unavailable. These at-sea processed fishery products, on a round (live) weight basis, exceeded 1.1 million metric tons in 2003 and comprised more than 26 percent of the total domestic landings in the 50 states.

Commercial landings by U.S. fishermen at ports outside the 50 states along with Internal Water Processing (IWP) agreements (see glossary) provided an additional 198.3 million pounds (90,000 metric tons) valued at \$76.3 million. This was a decrease of 36 percent, or 119.6 million pounds (54,200 metric tons) in quantity and \$42.0 million (38 percent) in value compared with 2002. Most of these landings consisted of tuna, sea herring and mackerel landed in American Samoa and other foreign ports.

Edible fish and shellfish landings in the 50 states were 7.5 billion pounds (3.4 million metric tons) in 2003—an increase of 314.0 million pounds (142,400 metric tons) compared with 2002.

Landings for reduction and other industrial purposes were 2.0 billion pounds (900,800 metric tons) in 2003—a decrease of 9 percent compared with 2002.

The 2003 U.S. marine recreational finfish catch (including fish kept and fish released (discarded)) on the Atlantic, Gulf, and Pacific coasts was an estimated 452.0 million fish taken on an estimated 82.0 million fishing trips. The harvest (fish kept or released dead) was estimated at 195.0 million fish weighing 263.0 million pounds.

WORLD LANDINGS

In 2002, the most recent year for which data are available, world commercial fishery landings and aquaculture production were 133.0 million metric tons—an increase of 2.3 million metric tons (up 2 percent) compared with 2001.

China was the leading nation with 33.3 percent of the total harvest; Peru, second with 6.5 percent; India, third with 4.5 percent; United States, fourth with 4.1 percent; and Indonesia, fifth with 4.1 percent.

PRICES

The 2003 annual exvessel price index for edible fish increased by 8 percent, shellfish decreased less than 1 percent, and industrial fish remained unchanged when compared with 2002. Exvessel price indices increased for 18 of the 33 species groups being tracked, decreased for 12 species groups, were unchanged for 2 species group, and weren't available for one species. The Coho Salmon price index had the largest increase (37 percent) while Atlantic Pollack price index showed the largest decrease (35 percent).

PROCESSED PRODUCTS

The estimated value of the 2003 domestic production of edible and nonedible fishery products was \$7.0 billion, \$670.0 million less than in 2002. The value of edible products was \$6.6 billion—a decrease of \$681.2 million compared with 2002. The value of industrial products was \$384.7 million in 2003—an increase of \$12.0 million compared with 2002.

FOREIGN TRADE

The total import value of edible and nonedible fishery products was \$21.3 billion in 2003—an increase of \$1.6 billion compared with 2002. Imports of edible fishery products (product weight) were 4.9 billion pounds (2.2 million metric tons) valued at \$11.1 billion in 2003—an increase of 479.4 million pounds and \$974.2 million compared with 2002. Imports of nonedible (i.e., industrial) products were \$10.2 billion—an increase of \$617.2 million compared with 2002.

Review

Total export value of edible and nonedible fishery products was \$12.0 billion in 2003—an increase of \$294.0 million compared with 2002. United States firms exported 2.4 billion pounds (1.1 million metric tons) of edible products valued at \$3.3 billion—a decrease of 3.3 million pounds but \$146.8 million more than in 2002. Exports of nonedible products were valued at \$8.7 billion, \$137.1 million more than 2002.

SUPPLY

The U.S. supply of edible fishery products (domestic landings plus imports, round weight equivalent, minus exports) was 11.8 billion pounds (5.3 million metric tons) in 2003—an increase of 1.4 billion pounds compared with 2002. The supply of industrial fishery products was 1.3 billion pounds (589,694 metric tons) in 2003—a decrease of 329.2 million pounds compared with 2002.

PER CAPITA CONSUMPTION

U.S. consumption of fishery products was 16.3 pounds of edible meat per person in 2003, up 0.7 pound from the 2002 per capita consumption of 15.6 pounds.

CONSUMER EXPENDITURES

U.S. consumers spent an estimated \$61.2 billion for fishery products in 2003. The 2003 total includes \$42.0 billion in expenditures at food service establishments (restaurants, carry-outs, caterers, etc.); \$18.9 billion in retail sales for home consumption; and \$290.4 million for industrial fish products. By producing and marketing a variety of fishery products for domestic and foreign markets, the commercial marine fishing industry contributed \$31.5 billion (in value added) to the U.S. Gross National Product.

Volume of U. S. Domestic Finfish and Shellfish Landings
1960 - 2003

Value of U.S. Domestic Finfish and Shellfish Landings
1960 - 2003

Alaska led all states in volume with landings of 5.3 billion pounds, followed by Louisiana, 1.3 billion pounds; Virginia, 446.8 million pounds; Washington, 379.7 million pounds; and California, 366.3 million pounds.

Alaska led all states in value of landings with \$989.8 million, followed by Louisiana, \$294.0 million; Massachusetts, \$291.6 million; Maine, \$283.8 million; and Washington, \$170.2 million.

Dutch Harbor-Unalaska, Alaska, was the leading U.S. port in quantity of commercial fishery landings, followed by: Empire-Venice, Louisiana; Reedville, Virginia; Intercoastal City, Louisiana; and Cameron, Louisiana.

New Bedford, Massachusetts was the leading U.S. port in terms of value, followed by: Dutch Harbor-Unalaska, Alaska; Hampton Roads Area, Virginia; Kodiak, Alaska; Empire-Venice, Louisiana; and Dulac-Chauvin, Louisiana.

Tuna landings by U.S.-flag vessels at ports outside the continental United States amounted to 187.6 million pounds.

Major U.S. Domestic Species Landed in 2003 Ranked By Quantity and Value (Numbers in thousands)

Rank	Species	Pounds	Rank	Species	Dollars
1	Pollock	3,372,338	1	Crabs	483,586
2	Menhaden	1,599,444	2	Shrimp	424,027
3	Salmon	674,096	3	Lobsters	308,005
4	Cod	591,130	4	Flatfish	266,618
5	Flatfish	444,075	5	Scallops	229,240
6	Hakes	339,944	6	Pollock	208,581
7	Crabs	338,854	7	Salmon	200,838
8	Shrimp	313,624	8	Cod	187,113
9	Herring (sea)	286,050	9	Clams	162,838
10	Sardines	159,493	10	Oysters	103,045

ALASKA POLLOCK AND OTHER PACIFIC TRAWL FISH

U.S. landings of Pacific trawl fish (Pacific cod, flounders, hake, Pacific ocean perch, Alaska pollock, and rockfishes) were 4.6 billion pounds valued at \$422.2 million—an increase of 2 percent in quantity and an increase of 16 percent in value compared with 2002.

Landings of Alaska pollock increased 1 percent to 3.4 billion pounds and were 527.9 million pounds more than their 1998 - 2002 5 - year average. Landings of Pacific cod were 567.5 million pounds — an increase of 11 percent from 512.8 million pounds in 2002. Pacific hake (whiting) landings were 309.4 million pounds (up 8 percent) valued at \$17.2 million (up 26 percent) compared to 2002. Landings of rockfishes were 35.5 million pounds (down 2 percent) and valued at \$15.6 million (down 12 percent) compared to 2002.

ANCHOVIES

U.S. landings of anchovies were 4.0 million pounds—a decrease of 6.8 million pounds (63 percent) compared with 2002. One percent of all landings were used for animal food or reduction and 99 percent were used for bait. The U.S. imports all edible anchovies

HALIBUT

U.S. landings of Atlantic and Pacific halibut were 79.5 million pounds (round weight) valued at \$172.2 million—a decrease of 2.5 million pounds (3 percent), and

an increase \$36.6 million (27 percent) compared with 2002. The Pacific fishery accounted for all but 36,000 pounds of the 2003 total halibut catch. The average exvessel price per pound in 2003 was \$2.17 compared with \$1.65 in 2002.

SEA HERRING

U.S. commercial landings of sea herring were 286.1 million pounds valued at \$25.9 million—an increase of 71.8 million pounds (33 percent), and \$5.3 million (26 percent) compared with 2002. Landings of Atlantic sea herring were 211.7 million pounds valued at \$15.5 million—an increase of 75.8 million pounds (56 percent), and \$6.4 million (70 percent) compared with 2002.

Landings of Pacific sea herring were 74.3 million pounds valued at \$10.4 million—a decrease of 4.1 million pounds (5 percent), and \$1.1 million (10 percent) compared with 2002. Alaska landings accounted for 93 percent of the Pacific coast with 69.0 million pounds valued at \$8.9 million—a decrease of 874.0 thousand pounds (1 percent), and 209 thousand dollars (2 percent) compared with 2002.

JACK MACKEREL

California accounted for 67 percent, Oregon for 32 percent, and Washington 1 percent of the U.S. landings of jack mackerel in 2003. Total landings were 508,000 pounds valued at \$73,000—a decrease of 1.8 million pounds (78 percent), and \$134,000 (65 percent) compared with 2002. The 2003 average exvessel price per pound was 14 cents.

MACKEREL, ATLANTIC

U.S. landings of Atlantic mackerel were 68.2 million pounds valued at \$7.3 million—an increase of 20.8 million pounds (44 percent) and \$1.7 million dollars (30 percent) compared with 2002. New Jersey with 33.1 million pounds and Massachusetts with 23.5 million pounds accounted for 83 percent of the total landings. The average exvessel price per pound was 11 cents in 2003 when compared to 12 cents in 2002.

MACKEREL, CHUB

Landings of chub mackerel were 9.7 million pounds valued at \$676,000—an increase of 2.0 million pounds (25 percent) and \$180,000 (36 percent) compared with 2002. California accounted for 91 percent of total landings. The average exvessel price per pound was 7 cents, an increase of one cent from 2002.

MENHADEN

The U.S. menhaden landings were 1.6 billion pounds valued at \$96.1 million—a decrease of 151.3 million pounds (9 percent) and \$9.0 million (9 percent) compared with 2002. Landings decreased by 18.3 million pounds (4 percent) in the Atlantic states, and 132.9 million pounds (10 percent) in the Gulf states compared with 2002. Landings along the Atlantic coast were 448.1 million pounds valued at \$26.2 million. Gulf region landings were 1.2 billion pounds valued at \$69.8 million.

Menhaden are used primarily for the production of meal, oil, and solubles, while small quantities are used for bait.

NORTH ATLANTIC TRAWL FISH

Landings of butterfish, Atlantic cod, cusk, flounders (winter/blackback, summer/fluke, yellowtail and other), haddock, red and white hake, ocean perch, pollock and whiting (silver hake) in the North Atlantic (combination of New England, Middle Atlantic, and Chesapeake Regions) were 130.2 million pounds valued at \$125.0 million—a decrease of 3.1 million pounds (2 percent), and \$5.4 million (4 percent) compared with 2002. Of these species, flounder led in total value in the North Atlantic, accounting for 48 percent of the total; followed by cod, 22 percent; and haddock, 14 percent.

The 2003 landings of Atlantic cod were 23.6 million pounds valued at \$27.5 million—a decrease of 5.4 million pounds (19 percent) and \$3.2 million (10 percent) compared with 2002. The exvessel price per pound was \$1.17 in 2003, up from \$1.06 cents per pound in 2002.

Landings of yellowtail flounder were 12.3 million pounds—an increase of 464,000 pounds (4 percent) from 2002, and about 1 percent higher than the 5-year average.

Haddock landings decreased to 15.0 million pounds (10 percent) and \$17.0 million (11 percent) compared to 2002.

North Atlantic pollock landings were 10.6 million pounds valued at \$5.4 million—an increase of 2.7 million pounds (34 percent), but a decrease in value \$802,000 (13 percent) compared with 2002.

PACIFIC SALMON

U.S. commercial landings of salmon were 674.1 million pounds valued at \$200.8 million—an increase of 106.9 million pounds (19 percent) and \$45.8 million (30 percent) compared with 2002. Alaska accounted for 94 percent of total landings; Washington, 4 percent; California, Oregon, and the Great Lakes accounted for 2 percent of the catch. Sockeye salmon landings were 184.5 million pounds valued at \$109.9 million—an increase of 48.6 million pounds (36 percent) and \$32.6 million (42 percent) compared with 2002. Chinook salmon landings increased to 27.6 million pounds—up 2.5 million pounds (10 percent) from 2002. Pink salmon landings were 334.1 million pounds—an increase of 78.3 million (31 percent); chum salmon landings were 95.5 million—a decrease of 16.3 million (15 percent); and coho salmon decreased to 32.3 million—a decrease of 6.2 million pounds (16 percent) compared with 2002.

Alaska landings were 630.5 million pounds valued at \$168.1 million—an increase of 107.5 million pounds (21 percent) and \$38.2 million (29 percent) compared with 2002. The distribution of Alaska salmon landings by species in 2003 was: pink, 329.1 million pounds (52 percent); sockeye, 182.8 million pounds (29 percent); chum, 82.1 million pounds (13 percent); coho, 26.6 million pounds (4 percent); and chinook, 10.0 million pounds (2 percent). The average price per pound for all species in Alaska was 27 cents in 2003—an increase of 2 cents from 2002.

Washington salmon landings were 29.4 million pounds valued at \$11.8 million—a decrease of 2.8 million pounds (9 percent), but an increase in value \$1.1 million (11 percent) compared with 2002. The biennial fishery for pink salmon went from 1,000 pounds in 2002 to 5.0 million pounds in 2003. Washington landings of chum salmon were 13.4 million pounds (down 31 percent); followed by chinook salmon, 5.2 million pounds (down 4 percent); coho 4.0 million pounds (down 3 percent); and sockeye 1.8 million pounds (down 43 percent). The average exvessel price per pound for all species in Washington increased from 33 cents in 2002 to 40 cents in 2003.

Oregon salmon landings were 6.7 million pounds valued at \$8.8 million—an increase of 542,000 pounds (9 percent) and \$1.9 million (27 percent) compared with 2002. Chinook salmon landings were 5.1 million pounds

valued at \$8.0 million; coho landings were 1.6 million pounds valued at \$808,000; chum and pink salmon landings were less than 500 pounds and had a value of less than \$500; no sockeye salmon landings were reported for 2003. The average exvessel price per pound for chinook salmon in Oregon increased from \$1.32 in 2002 to \$1.57 in 2003.

California salmon landings were 7.3 million pounds valued at \$12.1 million—an increase of 1.8 million pounds (32 percent) and \$4.7 million (63 percent) compared with 2002. Chinook salmon were the principal species landed in the state. The average exvessel price per pound paid to fishermen in 2003 was \$1.66 compared with \$1.34 in 2002.

SABLEFISH

U.S. commercial landings of sablefish were 47.9 million pounds valued at \$100.1 million—an increase of 6.9 million pounds (17 percent) and \$21.9 million (28 percent) compared with 2002. Landings increased in Alaska to 35.7 million pounds—an increase of 11 percent compared with 2002. Landings increased in Washington to 3.8 million pounds (up 45 percent) and in value to \$6.7 million (up 52 percent). The 2003 Oregon catch was 4.8 million pounds (up 50 percent), and \$7.4 million (up 64 percent) compared with 2002. California landings of 3.6 million pounds and \$4.7 million represent a 24 percent increase in quantity and a 32 percent increase in value from 2002. The average exvessel price per pound in 2003 was \$2.09 compared with \$1.91 in 2002.

TUNA

Landings of tuna by U.S. fishermen at ports in United States, American Samoa, other U.S. territories, and foreign ports were 249.5 million pounds valued at \$162.4 million—a decrease of 91.4 million pounds (27 percent), and \$37.9 million (19 percent) compared with 2002. The average exvessel price per pound of all species of tuna in 2003 was 65 cents compared with 59 cents in 2002.

Bigeye landings in 2003 were 20.8 million pounds—a decrease of 6.8 million pounds (25 percent) compared with 2002. The average exvessel price per pound was \$1.72 in 2003, compared to \$1.40 in 2002.

Skipjack landings were 134.5 million pounds—a decrease of 63.9 million pounds (32 percent) compared with 2002. The average exvessel price per pound was 32 cents in 2003, compared to 33 cents in 2002.

Yellowfin landings were 52.4 million pounds—a decrease of 20.0 million pounds (28 percent) compared with 2002. The average exvessel price per pound was 89 cents in 2003 compared with 72 cents in 2002.

Bluefin landings were 2.2 million pounds—a decrease of 575,000 pounds (21 percent) compared with 2003. The average exvessel price per pound in 2003 was \$4.61 compared with \$5.66 in 2002.

CLAMS

Landings of all species yielded 127.8 million pounds of meats valued at \$162.3 million—a decrease of 2.3 million pounds (2 percent), and \$4.9 million (3 percent) in value compared with 2002. The average exvessel price per pound in 2003 was \$1.27 compared with \$1.29 in 2002.

Surf clams yielded 69.5 million pounds of meats valued at \$39.5 million—a decrease of 2.5 million pounds (3 percent) and \$274,000 (1 percent) compared with 2002. New Jersey was the leading state with 51.3 million pounds (down 4 percent), followed by New York, 13.3 million pounds (up 55 percent); and Maryland, 3.1 million pounds (down 53 percent) compared with 2002. The average exvessel price per pound of meats was 57 cents in 2003, up 2 cents from 2002.

The ocean quahog fishery produced 41.9 million pounds of meats valued at \$26.0 million—an increase of 1.9 million pounds (5 percent) and \$539,000 (2 percent) compared with 2002. New Jersey had landings of 20.3 million pounds (down less than 1 percent) valued at \$10.6 million (down less than 1 percent) while Massachusetts production was 14.2 million pounds (up 15 percent) valued at \$7.3 million (up 10 percent). Together, New Jersey and Massachusetts accounted for 83 percent of total ocean quahog production in 2003. The average exvessel price per pound of meats decreased from 64 cents in 2002 to 62 cents in 2003.

The hard clam fishery produced 10.0 million pounds of meats valued at \$46.3 million—a decrease of 1.5 million pounds (13 percent) and \$4.0 million (8 percent) compared with 2002. Landings in the New England region were 5.2 million pounds of meats (down 15 percent); Middle Atlantic, 3.0 million pounds (down 7 percent); Chesapeake, 357,000 pounds (down 48 percent); and the South Atlantic region, 1.5 million pounds (up 2 percent). The average exvessel price per pound of meats increased from \$4.26 in 2002 to \$4.65 in 2003.

Soft clams yielded 3.1 million pounds of meats valued at \$17.8 million—a decrease of 69,000 pounds (2 percent), but an increase in value 975,000 (6 percent) compared with 2002. Maine was the leading state with 2.4 million pounds of meats (down 5 percent), followed by New York with 163,000 pounds (up 24 percent), Rhode Island with 106,000 pounds (up 94 percent), and Maryland with 34,000 pounds (down 84 percent). The average exvessel price per pound of meats was \$5.76 in 2003, compared with \$5.32 in 2002.

CRABS

Landings of all species of crabs were 338.9 million pounds valued at \$483.6 million—an increase of 31.3 million pounds (10 percent), and \$85.9 million (22 percent) compared with 2002.

Hard blue crab landings were 172.5 million pounds valued at \$137.1 million—an increase of 272,000 pounds (less than 1 percent), and \$7.4 million (6 percent) compared with 2002. Louisiana landed 28 percent of the total U.S. landings followed by: North Carolina, 24 percent; Maryland, 15 percent; and Virginia, 12 percent. Hard blue crab landings in the Chesapeake region were 46.1 million pounds—a decrease of 9 percent; the South Atlantic with 56.8 million pounds increased 26 percent; and the Gulf region with 63.0 million pounds decreased 7 percent. The Middle Atlantic region with 6.5 million pounds valued at \$6.6 million had a decrease of 2.5 million pounds (28 percent) compared with 2002. The average exvessel price per pound of hard blue crabs was 79 cents in 2003, compared with 75 cents in 2002.

Dungeness crab landings were 84.0 million pounds valued at \$133.4 million—an increase of 35.0 million pounds (72 percent) and \$53.4 million (67 percent) compared with 2002. Washington landings of 33.8 million pounds (up 58 percent) led all states with 40 percent of the total landings. Oregon landings were 23.5 million pounds (up 89 percent) or 28 percent of the total

landings. California landings were 21.5 million pounds (up 196 percent) and Alaska landings were 5.2 million pounds (down 33 percent) compared with 2002. The average exvessel price per pound was \$1.59 in 2003 compared with \$1.64 in 2002.

U.S. landings of king crab were 22.9 million pounds valued at \$105.5 million—an increase of 6.1 million pounds (36 percent), and \$20.7 million (24 percent) compared with 2002. The average exvessel price per pound in 2003 was \$4.61 compared with \$5.05 in 2002.

Snow crab landings were 27.5 million pounds valued at \$50.4 million—a decrease of 4.4 million pounds (14 percent), but an increase in value of \$6.4 million (15 percent) compared with 2002. The average exvessel

price per pound was \$1.83 cents in 2003, up from \$1.38 in 2002.

LOBSTER, AMERICAN

American lobster landings were 71.7 million pounds valued at \$284.8 million—a decrease of 10.5 million pounds (13 percent) and \$8.5 million (3 percent) compared with 2002. Maine led in landings for the 22st consecutive year with 54.0 million pounds valued at \$202.0 million—a decrease of 6.8 million pounds (11 percent) compared with 2002. Massachusetts, the second leading producer, had landings of 11.1 million pounds valued at \$51.5 million—a decrease of 1.7 million pounds (14 percent) compared with 2002. Together, Maine and Massachusetts produced 91 percent of the total national landings. The average exvessel price per pound was \$3.97 in 2003, compared with \$3.57 in 2002.

LOBSTERS, SPINY

U.S. landings of spiny lobster were 4.8 million pounds valued at \$23.2 million—a decrease of 359,000 pounds (7 percent) and \$2.4 million (9 percent) compared with 2002. Florida, with landings of 4.2 million pounds valued at \$18.4 million, accounted for 86 percent of the total catch and 79 percent of the value. This was a decrease of 352,000 pounds (8 percent), and \$2.6 million (12 percent) compared with 2002. Overall the average exvessel price per pound was \$4.80 in 2003 compared with \$4.93 in 2002.

OYSTERS

U.S. oyster landings yielded 37.0 million pounds of meats valued at \$103.0 million—an increase of 2.6 million pounds (8 percent) and \$14.0 million (16 percent) compared with 2002. The Gulf region led in production with 29.2 million pounds of meats, 72 percent of the national total; followed by the Pacific region with 7.8 million pounds (21 percent), principally Washington, with 5.8 million pounds (74 percent of the region's total volume); and the Middle Atlantic region with 1.3 million pounds (3 percent). The average exvessel price per pound of meats was \$2.78 in 2003 compared with \$2.59 in 2002.

SCALLOPS

U.S. landings of bay and sea scallops totaled 56.0 million pounds of meats valued at \$229.2 million—an increase of 3.0 million pounds (6 percent) and \$25.4 million (12 percent) compared with 2002. The average exvessel price per pound of meats increased from \$3.84 in 2002 to \$4.09 in 2003.

Bay scallop landings were 18,000 pounds of meats valued at \$100,000—a decrease of 4,000 pounds (18 percent) and \$31,000 (24 percent) compared with 2002. The average exvessel price per pound of meats was \$5.56 in 2003 compared with \$5.95 in 2002.

Calico scallop landings in 2003 were confidential and cannot be publically released.

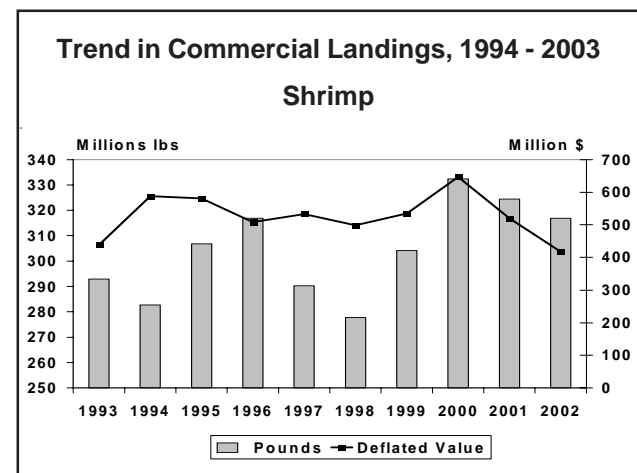

Sea scallop landings were 56.0 million pounds of meats valued at \$229.1million—an increase of 3.0 million pounds (6 percent) and \$25.4 million (12 percent) compared with 2002. Massachusetts and Virginia were the leading states in landings of sea scallops with 25.4 and 17.5 million pounds of meats, respectively, representing 77 percent of the national total. The average exvessel

price per pound of meats in 2003 was \$4.09 compared with \$3.84 in 2002.

SHRIMP

U.S. landings of shrimp were 313.6 million pounds valued at 424.0 million—a decrease of 3.2 million pounds (1 percent) and \$36.9 million (8 percent) in value compared with 2002. Shrimp landings by region were: New England up 141 percent; South Atlantic down 16 percent; Gulf up 11 percent; and Pacific down 43 percent. The average exvessel price per pound of shrimp decreased to \$1.35 in 2003 compared with \$1.45 in 2002. Gulf region landings were the nation's largest with 254.8 million pounds and 81 percent of the national total. Louisiana led all Gulf states with 125.6 million pounds (up 18 percent); followed by Texas, 79.2 million pounds

(up 6 percent); Mississippi, 17.2 million pounds (up 8 percent); Florida (West Coast), 17.0 million pounds (down 7 percent); and Alabama, 15.9 million pounds (up 9 percent). In the Pacific region, Oregon had landings of 20.6 million pounds (down 51 percent); Washington had landings of 8.7 million pounds (down 21 percent); and California had 3.0 million pounds (down 42 percent); compared with 2002.

SQUID

U.S. commercial landings of squid were 129.0 million pounds valued at \$47.4 million—a decrease of 76.6

million pounds (37 percent) but an increase of \$3.9 million (9 percent) compared with 2002. California was the leading state with 86.7 million pounds (67 percent) and was followed by Rhode Island with 25.9 million pounds (20 percent of the national total). The Pacific region landings were 88.3 million pounds (down 46 percent); followed by New England, 29.4 million (up 5 percent); Middle Atlantic, 10.3 million pounds (down 30 percent); South Atlantic, 756,000 pounds (up 318 percent); and the Chesapeake region with 171,000 pounds (down 63 percent) compared with 2002. The average exvessel price per pound for squid was 37 cents in 2003 compared with 21 cents in 2002.

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks such as clams, oysters, and scallops, which are reported in weight of meats (excluding the shell). Landings for Mississippi River drainage are not available.

(2) Less than .5 metric ton, 500 pounds, or 500 dollars.

(3) Data are confidential and included with unclassified shellfish.

Note:—Data are preliminary. Totals may not add due to rounding. Total U.S. Domestic landings include Alaska pollock, Pacific whiting and other Pacific groundfish that are caught in the U.S. EEZ off Washington, Oregon and Alaska and processed at-sea aboard U.S. vessels. Data do not include landings by U.S.-flag vessels at Puerto Rico or other ports outside the 50 States. Data do not include aquaculture products, except oysters and clams.

Total, United States	9,397,164	3,092,318	9,505,448	3,342,184	---	---

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks such as clams, oysters, scallops, which are reported in weight of meats (excluding the shell). Landings for Mississippi River drainage area States are not available.

2) Data not available.

NOTE:—Data are preliminary. Landings of Alaska pollock, Pacific whiting, and other Pacific groundfish that are caught in waters off Washington, Oregon and Alaska and are processed at-sea aboard U.S. vessels are credited to the State nearest to the area of capture. Totals may not add due to roundings. Data do not include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States. Therefore, they will not agree with "U.S. Commercial Landings" beginning on page 8. Data do not include aquaculture products, except oysters and clams.

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks, such as clams, oysters, and scallops, which are reported in weight of meats (excluding the shell). The National Marine Fisheries Service estimated the distance-from-shore landings for data collected by the Service and States. Includes landings from the Great Lakes and other inland waters, but excludes Mississippi River Drainage Area States.

(2) Less than 500 LB or \$500. (3) Data are confidential and included with other shellfish.

NOTE:—Data are preliminary. Totals may not agree due to roundings. Data include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States. Therefore, they will not agree with "U.S. Commercial Landings" tables beginning on page 1. Data do not include aquaculture products, except oysters or clams.

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks, such as clams, oysters, and scallops, which are reported in weight of meats (excluding the shell). The National Marine Fisheries Service estimated the distance-from-shore landings for data collected by the Service and States. Includes landings from the Great Lakes and other inland waters, but excludes Mississippi River Drainage Area States.

(2) Less than .5 MT or \$500. (3) Data are confidential and included with other shellfish.

NOTE:—Data are preliminary. Totals may not agree due to roundings. Data include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States. Therefore, they will not agree with "U.S. Commercial Landings" tables beginning on page 1. Data do not include aquaculture products, except oysters or clams.

Note:--Table may not add due to rounding. Clams, oysters and mussels are reported as meat weights (excludes shell) while all other species such as shrimp and finfishes are reported as whole (live) weights. Some clam and oyster production are reported with U.S. commercial landings. Weights and values represent the final sales of products to processors and dealers. The "Miscellaneous" includes ornamental/tropical fish, alligators, algae, aquatic plants, eels, scallops, crabs, and others. The high value and low production of "Miscellaneous" occurs because production value, but not weight, are reported for many species such as ornamental fishes.

Commercial Fishery Value at Major U.S. Ports 2003

U.S. Commercial Landings

Volume of Domestic Commercial Landings and Aquaculture Production

Note: The 2003 aquaculture production is estimated

Value of Domestic Commercial Landings and Aquaculture Production

U.S. Commercial Landings

Comparisons between the top ten species in descending order of abundance by weight for U.S. commercial landings and recreational fish harvests. Does not include data for Alaska and Texas because no NMFS recreational surveys are conducted in those states. Menhaden, Pacific Hake, Atlantic Sea Herring, Pacific Sardine and Anchovy were excluded from commercial landings because they are industrial fisheries and recreational anglers do not target them.

(1) Less than 1 percent

U.S. Marine Recreational Fisheries

DATA COLLECTION. Detailed information on marine recreational fishing is required to support a variety of fishery management and development purposes and is mandated by the Sustainable Fisheries Act, Public Law 94-265. In 1979, NMFS began the comprehensive Marine Recreational Fisheries Statistics Survey (MRFSS), covering all fishing modes (private/rental boat, party/charter boat, and shore), and including estuarine and brackish water. Although the recreational harvest is only about 9 percent of the total U.S. harvest of finfish for states covered by the MRFSS (see coverage section below), the fishing activities of millions of marine anglers are important to monitor because they are directed at relatively few species. Data collected through the MRFSS and other programs show that recreational fishing significantly impacts the stocks of many marine finfish species. Recreational catches even surpass commercial landings of some species (see figure on preceding page).

METHODS. The MRFSS consists of a telephone survey of coastal county households and a field intercept survey of completed angler fishing trips. The telephone survey collects data on the number of marine recreational fishing trips by residents of coastal counties. The intercept survey collects data on the proportion of fishing trips by residents of non-coastal counties, the species composition of catches, catch rates by species, and lengths and weights of landed fish. These data are combined to produce estimates of catch and effort. Catch estimates are separated into two categories – harvested catch and catch released alive. Harvested catch includes landed fish, catch used for bait, and catch released dead. Whenever possible MRFSS field interviewers identify, count, weigh, and measure landed fish that are available in whole form (catch type A). Angler reports are obtained for catch released alive (catch type B2) and for all other harvested catch (catch type B1), such as catch released dead, used for bait, or landed as fillets. Catch estimates are stratified by subregion, state, wave (bimonthly sampling period), species, fishing mode (private/rental boat, party/charter boat, and shore), primary area fished, and catch type. In addition, economic data are obtained and estimates of participation are produced.

In place of the MRFSS, Oregon and Washington conduct ocean boats surveys to produce catch and effort estimates. Oregon's Ocean Recreational Boat Survey (ORBS) and Washington's Ocean Sampling Program (OSP) consist of a field intercept survey for effort and catch of private/rental boats and party/charter boats. The effort data consist of censuses of boat trips from a

particular ocean port inlet on sampled days. The catch data consist of fish species composition from sampled boats, numbers of anglers, type of fishing, lengths and weights of landed catch, and tag information from marked fish. Catch landed whole are examined by samplers, while other catch is reported by anglers or passenger boat crew. Other catch includes fillets and released fish. The catch rate data and boat counts are combined and expanded by type of day to produce catch and effort estimates in weekly to monthly time periods. Estimates of mean catch per boat, catch per angler, total angler trips and boat trips are produced for each port inlet or port group stratified by time period, type of boat, type of trip and water area. Catch estimates in numbers of fish and weight are produced for each species of fish with tag contribution rates for marked fish species.

On the Atlantic and Gulf coasts, effort for the party/charter fishing mode is now estimated through the For-Hire Survey (FHS), whereas on the Pacific coast effort is estimated through the Party Charter Phone Survey (PCPS). Both surveys differ from the MRFSS because they use a telephone survey of boats, rather than households, as the primary method for estimating fishing effort. The FHS and PCPS telephone surveys are weekly surveys that use a directory of charter boats and/or party/headboats as their sampling frame. Samples of boats are selected at random, and the operators of those boats are contacted for telephone interviews to collect information on the number of boat trips and the numbers of anglers who fished. The telephone surveys estimate the number of trips by boats included in the sampling frames. A dockside survey of boat slips is used to validate the phone-reported effort data and estimate appropriate corrections for any reporting errors. The total catch of any one species is calculated as the product of the adjusted estimate of total angler trips and the estimated mean catch per trip. Although separate estimates are generated for charter boat and party/headboat fishing through the FHS, estimates are not stratified by vessel type through the PCPS. This improved methodology was initiated in 2000 on the Gulf coast, in 2001 on the Pacific coast, and in 2003 on the Atlantic coast. FHS and PCPS numbers are included here for the Gulf and Pacific coasts but not for the Atlantic coast.

COVERAGE. In 2003, the MRFSS included the Atlantic coast (Maine-East Florida), Gulf coast (Louisiana-West Florida), Pacific coast (California, and for a partial year in Oregon and Washington), Puerto Rico and Hawaii. Detailed information and access to the data are available on the

U.S. Marine Recreational Fisheries

Fisheries Statistics web page (<http://www.st.nmfs.noaa.gov/st1/>). Care is advised when comparing catch estimates for the MRFSS time series because of differences in sampling coverage.

- In the South Atlantic and Gulf sub-regions (NC-LA) the MRFSS has not collected catch data from head boats since 1985, so estimates for these sub-regions now only include charter boats in the for-hire sector.
- Marine recreational fishing in Texas is monitored by the Texas Department of Parks and Wildlife and has not been surveyed by the MRFSS since 1985.
- Prior to 1998, on the Pacific coast, ocean boat trips and salmon trips were not sampled during certain waves because they were surveyed by state natural resource agencies.
- Alaska conducts an annual mail survey and has never been surveyed by the MRFSS.
- West Pacific U.S. territories have not been surveyed by the MRFSS since 1981.
- Hawaii was not surveyed between 1981 and 2001.
- The U.S. Caribbean was not surveyed between 1981 and 2000.

Historically, only about five percent of the annual recreational catch on the Atlantic and Gulf coasts is taken during Wave 1 (January - February). Costs to sample these months are very high due to low fishing activity. Therefore, in Jan/Feb of 1981 the MRFSS was not conducted in any region. In 1982, Jan/Feb data collection resumed on the Pacific and Gulf coasts and also on the Atlantic coast of Florida. With a few exceptions (Georgia 1985-1989, South Carolina 1988, North Carolina 1988-1992), the MRFSS has not been conducted in Jan/Feb on the Atlantic coast north of Florida since 1980.

Time periods when the MRFSS has not been conducted:

- Nov/Dec (Maine and New Hampshire) - 1987 to present
- Mar/Apr (Maine and New Hampshire) - 1986 to present
- Jan/Feb (Northern California and Oregon) - 1994
- Jan/Feb (Southern California and Oregon) - 1995
- Nov/Dec (Oregon) - 1994
- Nov/Dec (Washington shore modes) - 2003
- July - Dec (Oregon shore modes) - 2003
- All Waves (California through Washington) - 1990 to 1993

- All Waves (Washington) - 1993 to 1994

Data from other NMFS and state surveys (e.g. southeast head boats, Texas, California Passenger Fishing Vessels, Pacific salmon, Alaska) are not included in this report. The numbers reported for Washington and Oregon for 2003 include shore trips for only part of the year.

DATA TABLES. The estimated harvests (numbers and weight of fish) for the continental U.S. and Hawaii (excluding Texas) are presented. Numbers of fish harvested and released alive are also presented for many important species groups. Estimated harvests are presented by subregion and primary fishing area: inland [sounds, rivers, bays], state territorial seas [ocean to 3 miles from shore, except for Florida's Gulf coast and Puerto Rico, where state territorial seas extend to 10 miles from shore], and Exclusive Economic Zone (EEZ) [ocean from the outer edge of the state territorial seas to 200 miles from shore]. The total numbers of estimated trips and participants are presented by state.

2003 MRFSS DATA. In 2003, about 13 million anglers made 82 million marine recreational fishing trips to the Atlantic, Gulf and Pacific coasts. The estimated total marine recreational catch was 452 million fish, of which over 55 percent were released alive. The estimated total weight of harvested catch was 263 million pounds. The Atlantic coast accounted for the majority of trips (62 percent) and catch (55 percent). The Gulf coast (excluding Texas), accounted for 29 percent of trips, and 38 percent of the catch. The Pacific coast accounted for 9 percent of trips, and 7 percent of the catch. Nationally, most (57 percent in numbers of fish) of the recreational catch came from inland waters, 31 percent from state territorial seas, and 12 percent from the EEZ. The majority of Atlantic, Gulf and Pacific trips fished primarily in inland waters.

ATLANTIC. In 2003, over 6.4 million in-state marine recreational fishing participants took over 49 million trips and caught a total of more than 243 million fish. Twenty-three percent of the trips were made in east Florida, followed by 14 percent in New Jersey, 14 percent in North Carolina, 11 percent in New York, 8 percent in Massachusetts, 7 percent in Maryland, and 6 percent in Virginia. Together, Connecticut, Rhode Island, and South Carolina accounted for 11 percent of the trips, and Delaware, Maine, Georgia, and New Hampshire accounted for the remaining percentage. The most commonly caught non-bait species (in numbers of fish) were Atlantic croaker, summer flounder, striped bass, bluefish, and scup. The

U.S. Marine Recreational Fisheries

largest harvests by weight were striped bass, bluefish, summer flounder, Atlantic croaker and dolphin

The total annual catch of striped bass increased steadily from 8.5 million fish in 1994 to 17.5 million fish in 1997. After increasing from 14.1 million fish in 1999 to nearly 19 million fish in 2000, striped bass catch declined slightly to 15.6 million fish in 2001 and 2002, and then increased to 17.3 million fish in 2003. Over 86 percent of the striped bass caught in 2003 were released alive. Annual summer flounder catch decreased from 28 million fish in 2001 to 20.6 million fish in 2003. Over 78% of the summer flounder caught in 2003 were released alive. Bluefish catch decreased from 11.9 million in 1994 to levels varying between 9 and 13 million from 1996 through 1999, reached 20 million in 2001, and fell to 15 million in 2003. Black sea bass catch, which varied between 9 and 16 million fish from 1994 through 1999, exceeded 18 million in 2000, but returned to around 14 million fish in 2003.

The species most commonly caught on Atlantic coast trips that fished primarily in federally managed waters were black sea bass, Atlantic cod, dolphin, summer flounder, and bluefish. Twenty-nine percent of the total Atlantic catch came on saltwater trips that fished primarily in the state territorial seas, and 59 percent came on trips that fished primarily in inland waters.

GULF OF MEXICO. In 2003, almost 3.3 million in-state marine recreational fishing participants took almost 23 million trips and caught over 167 million fish (excluding Texas). About 70 percent of the trips were made in west Florida, followed by 19 percent in Louisiana, 6 percent in Alabama, and 5 percent in Mississippi. The most commonly caught non-bait species (in numbers of fish) were spotted seatrout, red drum, gray snapper, white grunt, sand seatrout, Spanish mackerel, and Atlantic croaker. The largest harvests by weight were for red drum, spotted seatrout, sheepshead, red snapper, king mackerel, and Spanish mackerel.

Red snapper catch has varied over the last ten years between 1.5 (1995) and 3.2 (1999 and 2002) million fish, with a total catch of over 2.9 million in 2003. King mackerel catch has varied between 420,000 (1999) and 750,000 (1996) over the last ten years, with catch at 398,000 in 2003. Spotted seatrout catch has varied between 19 million and 28 million over the last ten years, with a catch of over 28 million in 2003. Red drum catch varied over the last ten years between 5.9 million (1994) and 8.7 million (2000), reaching 8.6 million in 2003.

The species most commonly caught on Gulf of Mexico trips that fished primarily in federally managed waters were white grunt, red snapper and black sea bass. Twenty-seven percent of the total Gulf catch came on trips that fished primarily in the state territorial seas, and 63 percent came on trips that fished primarily in inland waters.

PACIFIC. In 2003, about 2.5 million in-state marine recreational fishing participants took over 7.6 million trips and caught a total of 30 million fish. Eighty-five percent of the trips were made in CA, followed by 8 percent in WA, and 7 percent in OR. The most commonly caught non-bait species (in numbers of fish) were barred sand bass, kelp bass, black rockfish, lingcod, white croaker, coho salmon, barred surf perch, and California halibut. By weight, the largest harvests were Chinook salmon, albacore, lingcod, black rockfish, California halibut, and barred sand bass.

Total annual catch of lingcod, which has varied between 240,000 (1995) and 584,000 (2000) fish over the last ten years, reached 1.1 million in 2003. Most of this increase was due to fish released alive (744,000 in 2003). Total black rockfish catch, which has varied between 600,000 (1997) and 1.4 million (2000) fish over the last ten years, and exceeded 1.2 million fish in 2002, increased to 1.3 million fish in 2003

The most commonly caught Pacific coast species in federally managed waters were sanddabs, barred sand bass, Pacific barracuda, kelp bass, Chinook salmon, and California scorpionfish. Sixty-four percent of the total Pacific catch came from trips that fished primarily in the state territorial seas, and 24 percent came from trips that fished primarily in inland waters.

PUERTO RICO. In 2003, about 220,000 marine recreational participants took 1.1 million trips and caught a total of about 1.7 million fish. The most commonly caught non-bait species (in numbers of fish) were dolphin, silk snapper, yellowtail snapper, and lane snapper. By weight, the largest harvests were dolphin, wahoo, blue marlin, great barracuda, and silk snapper.

HAWAII. In 2003, about 440,000 marine recreational participants took 2.4 million trips and caught a total of about 12.5 million fish. The most commonly caught non-bait species (in numbers of fish) were iridescent cardinalfish, mackerel scad, bigeye scad, yellowstripe goatfish, skipjack tuna, and yellowfin tuna. By weight, the largest harvests were yellowfin tuna, wahoo, skipjack tuna, highfin rudderfish, hawaiian flagtail, and yellowstripe goatfish.

Other Countries	28,361,485	27,966,135	29,378,740	29,439,570	30,129,065
Total	51,870,288	53,540,548	56,051,995	56,924,622	58,953,332

Note:-- Data for 1998-2001 are revised. Data on imports and exports cover the international trade of 176 countries or areas. The total value of exports is consistently less than the value of imports, probably because charges for insurance, freight, and similar expenses were included in the import value, but not in the export value. The seven fishery commodity groups covered by this table are: 1. Fish, fresh, chilled or frozen; 2. Fish, dried, salted, or smoked; 3. Crustaceans and mollusks, fresh, dried, salted, etc.; 4. Fish products and preparations, whether or not in airtight containers; 5. Crustacean and mollusk products preparations, whether or not in airtight containers; 6. Oils and fats, crude or refined, of aquatic animal origin; and 7. Meals, solubles, and similar animal foodstuffs of aquatic animal origin.

Source:--Food and Agriculture Organization of the United Nations (FAO).

DISPOSITION OF WORLD AQUACULTURE AND COMMERCIAL CATCHES, 1998-2002

Item	1998	1999	2000	2001	2002
----- Percent of Total -----					
Marketed fresh	41.1	39.4	38.8	40.0	39.7
Frozen	21.0	19.5	19.2	20.1	20.0
Canned	8.9	8.5	8.4	8.5	8.7
Cured	8.2	7.6	7.4	7.6	7.3
Reduced to meal and oil (1)	16.6	20.2	21.1	18.4	19.0
Miscellaneous purposes	4.2	4.8	5.1	5.4	5.3
Total	100.0	100.0	100.0	100.0	100.0

Note:-- Data for 1998-2001 are revised. Data for marine mammals and aquatic plants are excluded.

(1) Only whole fish destined for the manufacture of oils and meals are included. Raw material for reduction derived from fish primarily destined for marketing fresh, frozen, canned, cured, and miscellaneous purposes is excluded; such waste quantities are included under the other disposition channels.

Source:--Food and Agriculture Organization of the United Nations (FAO).

Processed Fishery Products

FRESH AND FROZEN

FISH FILLETS AND STEAKS. In 2003 the U.S. production of raw (uncooked) fish fillets and steaks, including blocks, was 611.4 million pounds—94.3 million pounds more than the 517.1 million pounds in 2002. These fillets and steaks were valued at \$1.1 billion. Alaska pollock fillets and blocks led all species with 366.5 million pounds—60 percent of the total. Production of ground-fish fillets and steaks (see Glossary Section-Groundfish) was 465.6 million pounds.

FISH STICKS AND PORTIONS. The combined production of fish sticks and portions was 193.6 million pounds valued at \$261.7 million compared with the 2002 production of 234.3 million pounds valued at \$288.5 million. The total production of fish sticks amounted to 31.5 million pounds valued at \$34.7 million. The total production of fish portions amounted to 162.1 million pounds valued at \$226.9 million.

BREADED SHRIMP. The production of breaded shrimp in 2003 was 152.0 million pounds valued at \$465.3 million, compared with the 2002 production of 146.7 million pounds valued at \$463.8 million.

CANNED PRODUCTS

CANNED FISHERY PRODUCTS. The pack of canned fishery products in the 50 states, American Samoa, and Puerto Rico was 1.3 billion pounds valued at \$1.2 billion—a decrease of 16.2 million pounds and \$65.9 million compared with the 2002 pack. The 2003 pack included 863.7 million pounds valued at \$1.1 billion for human consumption and 437.2 million pounds valued at \$162.7 million for bait and animal food.

CANNED SALMON. The 2003 U.S. pack of salmon was 188.1 million pounds valued at \$242.2 million, compared with 223.7 million pounds valued at \$295.7 million packed in 2002.

CANNED SARDINES. The pack of Maine sardines (small herring) can not be shown due to the confidential nature of the data.

CANNED TUNA. The U.S. pack of tuna was 529.3 million pounds valued at \$668.5 million—a decrease of 17.7 million pounds in quantity and \$6.9 million in value

compared with the 2002 pack. The pack of albacore tuna was 199.1 million pounds comprising 38 percent of the tuna pack in 2003. Lightmeat tuna (bigeye, bluefin, skipjack, and yellowfin) comprised the remainder with a pack of 330.2 million pounds.

CANNED CLAMS. The 2003 U.S. pack of clams (whole, minced, chowder, juice, and specialties) was 126.0 million pounds valued at \$112.9 million. The pack of whole and minced clams was 38.7 million pounds and accounted for 31 percent of the total clam pack. Clam chowder and clam juice was 79.5 million pounds and made up the majority of the pack.

OTHER CANNED ITEMS. The pack of pet food was 437.2 million pounds valued at \$162.7 million—an increase of 72.7 million pounds compared with the 2002 pack.

INDUSTRIAL FISHERY PRODUCTS

INDUSTRIAL FISHERY PRODUCTS. The value of the domestic production of industrial fishery products was \$222.0 million—a decrease of \$11.1 million compared with the 2002 value of \$233.0 million

FISH MEAL. The domestic production of fish and shellfish meal was 602.8 million pounds valued at \$134.0 million—a decrease of 35.1 million pounds and \$5.7 million compared with 2002. Fish meal production was 596.1 million pounds valued at \$133.6 million—a decrease of 37.4 million pounds and \$5.8 million from the 2002 production. Shellfish meal production was 6.7 million pounds—an increase of 2.3 million pounds from the 2002 level.

FISH OILS. The domestic production of fish oils was 195.7 million pounds valued at \$34.4 million—a decrease of 15.2 million pounds and \$7.0 million in value compared with 2002 production.

OTHER INDUSTRIAL PRODUCTS. Oyster shell products, together with agar-agar, animal feeds, crab and clam shells processed for food serving, fish pellets, Irish moss extracts, kelp products, dry and liquid fertilizers, pearl essence, and mussel shell buttons were valued at \$53.5 million, compared with \$51.9 million in 2002—a decrease of \$1.6 million.

Processed Fishery Products

Foreign Trade

IMPORTS

U.S. imports of edible fishery products in 2003 were valued at a record \$11.1 billion, \$974.2 million more than in 2002. The quantity of edible imports was 4.9 billion pounds, 479.4 million pounds more than the quantity imported in 2002.

Edible imports consisted of 4.0 billion pounds of fresh and frozen products valued at \$9.8 billion, 748.4 million pounds of canned products valued at \$1.0 billion, 79.5 million pounds of cured products valued at \$166.5 million, 5.6 million pounds of caviar and roe products valued at \$28.5 million, and 40.8 million pounds of other products valued at

The quantity of shrimp imported in 2003 was 1.1 billion pounds, 165.8 million pounds more than the quantity imported in 2002. Valued at \$3.8 billion, shrimp imports accounted for 34 percent of the value of total edible imports. Imports of fresh and frozen tuna were 461.7 million pounds, 104.0 million pounds more than the 357.7 million pounds imported in 2002. Imports of canned tuna were 459.0 million pounds, 80.9 million pounds more than in 2002. Imports of fresh and frozen fillets and steaks amounted to 993.0 million pounds, an increase of 70.5 million pounds from 2002. Regular and minced block imports were 129.3 million pounds, a decrease of 17.7 thousand pounds from 2002.

Imports of nonedible fishery products were valued at \$10.2 billion — an increase of \$617.2 million

compared with 2002. The total value of edible and nonedible products was \$21.3 billion in 2003, \$1.6 billion more than in 2002 when \$19.7 billion of fishery products were imported.

EXPORTS

U.S. exports of edible fishery products were 2.4 billion pounds valued at \$3.3 billion, a decrease of 3.3 million pounds but an increase of \$146.8 million when compared with 2002. Fresh and frozen items were 2.0 billion pounds valued at \$2.5 billion, an increase of 29.3 million pounds and an increase of \$130.0 million compared with 2002. In terms of individual items, fresh and frozen exports consisted principally of 209.4 million pounds of salmon valued at \$276.9 million, 388.9 million pounds of surimi valued at \$335.4 million and 62.0 million pounds of lobsters valued at \$319.1 million.

Canned items were 183.1 million pounds valued at \$236.6 million. Salmon was the major canned item exported, with 95.7 million pounds valued at \$148.3 million. Cured items were 10.0 million pounds valued at \$20.4 million. Caviar and roe exports were 114.7 million pounds valued at \$510.2 million.

Exports of nonedible products were valued at \$8.7 billion an increase of \$137.1 million when compared with 2002. Exports of fish meal amounted to 243.6 million pounds valued at \$77.8 million. The total value of edible and nonedible exports was \$12.0 billion—an increase of \$294.0 million compared with 2002.

U.S. Trade in Edible Fishery Products, 2003

2001	16,054	37,731	53,785	15,416	38,369
2002	16,793	42,775	59,568	13,045	46,523
2003	22,886	40,456	63,342	16,604	46,738

(1) Imports, exports, foreign exports converted to round (live) weight by using these conversion factors: frozen, 1.75; meat, 4.50; and canned, 5.33.

U.S. SUPPLY OF SNOW (TANNER) CRABS, 1994-2003 (Round weight)

Year	U.S. commercial landings	Imports (1)	Total	Exports (2)	Total supply
----- Thousand pounds -----					
1994	159,574	27,446	187,020	147,006	40,014
1995	80,817	20,969	101,786	59,805	41,981
1996	67,867	28,336	96,203	50,509	45,694
1997	118,898	41,959	160,857	50,604	110,253
1998	251,831	60,166	311,997	58,366	253,631
1999	185,162	110,041	295,203	78,918	216,285
2000	34,497	119,443	153,940	32,239	121,701
2001	26,844	172,581	199,425	28,589	170,836
2002	33,238	175,470	208,708	36,351	172,357
2003	28,818	190,778	219,596	21,405	198,191

(1) Converted to round(live) weight by multiplying fresh and frozen by 1.50; meat, 4.50; and canned, 5.00.

(2) Domestic merchandise converted to round(live) weight by multiplying frozen weight by 2.13 (believed to be mostly sections); meat, 4.50; and canned, 5.33. Foreign exports converted using the same factors as imports.

(3) Estimated, based on available foreign import data.

Per Capita Consumption

The NMFS calculation of per capita consumption is based on a “disappearance” model. The total U.S. supply of imports and landings is converted to edible weight and decreases in supply such as exports are subtracted out. The remaining total is divided by a population value to estimate per capita consumption. Data for the model are derived primarily from secondary sources and are subject to incomplete reporting; changes in source data or invalid model assumptions may each have a significant effect on the resulting calculation.

U.S. per capita consumption of fish and shellfish was 16.3 pounds (edible meat) in 2003. This total was 0.7 pounds more than the 15.6 pounds consumed in 2002. Per capita consumption of fresh and frozen products was 11.4 pounds, 0.4 pound more than 2002.

Fresh and frozen finfish accounted for 5.7 pounds while fresh and frozen shellfish consumption was 5.7 pounds per capita. The fresh and frozen finfish includes approximately 1.1 pounds of farm raised catfish.

Consumption of canned fishery products was 4.6 pounds per capita in 2003, 0.3 pound more than the 4.3 pounds in 2002. Cured fish accounted for 0.3 pound per capita, the same as in previous years. Imports of edible seafood made up 78 percent of the consumption.

PER CAPITA USE. Per capita use is based on the supply of fishery products, both edible and non-edible (industrial), on a round-weight equivalent basis without considering beginning or ending stocks, defense purchases, or exports. The per capita use of all edible and industrial fishery products in 2003 was 68.2 pounds, up 2.2 pounds compared with 2002.

WORLD CONSUMPTION. The FAO calculation for apparent consumption is based on a disappearance model. The three year average considers, on a round weight equivalent basis, a countries landings, imports, and exports. The revised 1999-2001 data indicates that the United States ranks as the third largest consumer of seafood in the world.

Per Capita Consumption U.S. Consumption

Annual per capita consumption of seafood products represents the pounds of edible meat consumed from domestically-caught and imported fish and shellfish adjusted for and exports, divided by the civilian population of the United States as of July 1 of each year.

U.S. ANNUAL PER CAPITA CONSUMPTION OF COMMERCIAL FISH AND SHELLFISH, 1910-2003

(1) Resident population for 1910 and 1920 and civilian resident population for 1930 to date.

(2) Fresh and frozen fish consumption for 1910 and 1920 is estimated. Beginning in 1973, data include consumption of cultivated catfish.

(3) Canned fish consumption for 1920 is estimated. Beginning in 1921, it is based on production reports, packer stocks, and foreign trade statistics for individual years.

(4) Cured fish consumption for 1910 and 1920 is estimated.

(5) The use of beginning and ending inventories was discontinued as of 2003.

*Record years: Canned--5.8, 1936; Cured--4.0, 1909.

Note:--Data for most countries are tentative. Aquatic plants are included where applicable.

Source:--Food and Agriculture Organization of the United Nations (FAO)

Per capita use of commercial fish and shellfish is based on the supply of fishery products, both edible and nonedible (industrial), on a round weight equivalent basis, without considering the beginning or ending stocks, defense purchases, or exports.

Per capita use figures are not comparable with per capita consumption data. Per capita consumption figures represent edible (for human use) meat weight consumption rather than round weight consumption. In addition, per capita consumption includes allowances for beginning and ending stocks and exports, whereas the use does not include such allowances.

Per capita use is derived by using total population including U.S. Armed Forces overseas. The per capita consumption is derived by using civilian resident population.

Primary Wholesale and Processing	\$6,494,361	109.3	\$7,100,171	60.3	\$4,280,938	\$13,594,531	13.6	-
Imports, Processed	\$6,944,413	-	-	-	-	\$6,944,413	-	-
Exports, Processed	-	-	-	-	-	-	-	\$2,519,103
Secondary Wholesale and Processing:								
Edible	\$17,841,370	62.7	\$11,188,341	28.0	\$3,137,607	\$29,029,711	9.9	-
Industrial	\$178,472	62.7	\$111,920	28.0	\$31,386	\$290,392	0.1	-
Retail Trade from Food Service	\$14,876,440	182.4	\$27,135,534	69.8	\$18,930,596	\$42,011,974	60.0	-
Retail Trade from Stores	\$14,153,271	33.4	\$4,730,346	64.2	\$3,038,374	\$18,883,617	9.6	-
TOTAL U.S. VALUE ADDED ACTIVITY:			\$31,544,849				100.0	
CONSUMERS EXPENDITURES (& WHOLESALE PURCHASES OF INDUSTRIAL PRODUCTS) FOR FISHERY PRODUCTS:								\$61,185,982

(1) Includes industrial products and landings by U.S.-flag vessels at U.S. ports, foreign ports, and transfers to internal water processing vessels.

Note.-- The table reports the contribution of commercial marine fishing to the national economy as measured by margin, value added, and sales. These measures are consistent with the Bureau of the Census definitions.

Margin or mark-up is the difference between the price paid for the product by the consumer or wholesale purchaser and the dockside or wholesale value for an equivalent weight of the product. (It is assumed that fishermen catch their fish without paying purchase price and therefore the entire dockside or exvessel price is considered margin.) Value added is a measure of the factors added to the total worth of a product at each stage of the production process. It is defined as the gross receipts of firms minus the cost of purchased goods and services needed to fabricate the products. Gross National Product (GNP) is equal to the sum of the value added of all economic entities in the economy. Value added within a sector represents that sector's contribution to GNP.

Value added includes wages, salaries, interest, depreciation, rent, taxes and profit. Consumer expenditures are the final retail value of seafood products sold through stores and food service outlets plus secondary wholesale and processing of industrial products.

Prices

The Exvessel Price table is an index of changes in the relative dockside value of fish and shellfish sold by fishing vessels. The table indexes the average annual exvessel value (price per pound) received for each species or group to the average price per pound received for the same species or group in the base year 1982.

The exvessel price for each year was obtained by dividing total value for each species or group by its total quantity as reported in the U. S. commercial landings tables on pages 8 thru 13. The index for each species or group was obtained by multiplying the current annual price by the total quantity caught in 1982 (the base year). That

number was then divided by the 1982 value to obtain the final index:

$$\frac{(100 \times \text{Current price} \times \text{1982 quantity})}{\text{1982 Annual value}} = \text{Index}$$

Each index number measures price changes from the 1982 reference period when the index equaled 100. A species of fish that sold for \$0.75 a pound in 1986 and a \$1.00 a pound in 1982 would have an index of 75 in 1986. In 2003, if the price of the same species increased to \$1.07, the index in 2003 would be 107.

Percent Changes in the Exvessel Price Index, 1996-2002
(Change Relative to Base Year = 1982)

INDEXES OF EXVESSEL PRICES FOR FISH AND SHELLFISH, BY YEARS, 1997-2003 (1982=100)

(2) Included with Inland States. (3) Includes American Samoa, Hawaii, and Puerto Rico.

Fishery Products Inspection

FISHERY PRODUCTS AND ESTABLISHMENTS INSPECTED IN CALENDAR YEAR, 2003

Region	Edible fishery products						
	Establishment (1)		Amount inspected				Total
	SIFE (2)	In-plant (3)	Grade A (4)	PUFI (4)	No mark (5)	Lot (6)	
	-Average number-		----- Thousand pounds -----				
Northeast	0	59	27,965	115,745	42,245	95,509	342,409
Southeast	0	83	21,459	46,930	56,126	72,033	210,917
West	3	98	14,515	16,144	92,287	45,895	346,320
Total	3	240	63,939	178,819	190,658	213,437	(7) 899,646

(1) These establishments are inspected under contract and certified as meeting U.S. Department of Commerce (USDC) regulations for construction and maintenance of facilities and equipment processing techniques, and employment practices.

(2) Fish processing establishments approved for sanitation under the Sanitary Inspected Fish Establishment Service (SIFE). Products are not processed under inspection.

(3) Sanitarily inspected fish establishments processing fishery products under USDC inspection. As of December 2003, 125 of these were in the Hazard Analysis Critical Control Point (HACCP) Quality Management Program.

(4) Products processed under USDC inspection in inspected establishments and labeled with USDC inspection mark as "Processed Under Federal Inspection" (PUFI) and/or "U.S. Grade A."

(5) Products processed under inspection in inspected establishments but bearing no USDC inspection mark.

(6) Lot inspected and marked products checked for quality and condition at the time of examination and located in processing plants, warehouses, cold storage facilities, or terminal markets anywhere in the United States.

(7) Based on 2002 per capita consumption data, approximately 14.4 percent of seafood consumed in the U.S. is certified under the auspices of the Seafood Inspection Program.

Note:--Table may not add due to rounding.

Source:--NMFS, Seafood Inspection Program, F/SI.

The Magnuson-Stevens Fishery Conservation and Management Act

The Magnuson-Stevens Fishery Conservation and Management Act, Public Law 94-265 as amended (Magnuson-Stevens Act), provides for the conservation and management of fishery resources within the U.S. Exclusive Economic Zone (EEZ). It also provides for fishery management authority over continental shelf resources and anadromous species beyond the EEZ, except when they are found within a foreign nation's territorial sea or fishery conservation zone (or equivalent), to the extent that such sea or zone is recognized by the United States.

The EEZ extends from the seaward boundary of each of the coastal States (generally 3 nautical miles from shore for all but two States) to 200 nautical miles from shore. The seaward boundaries of Texas, Puerto Rico, and the Gulf coast of Florida are 3 marine leagues (9 nautical miles). The EEZ encompasses approximately 3.36 million square nautical miles.

GOVERNING INTERNATIONAL FISHERY AGREEMENT

Under the Magnuson-Stevens Act, the Secretary of State, in cooperation with the Secretary of Commerce, negotiates Governing International Fishery Agreements (GIFAs) with foreign nations requesting to fish within the EEZ. After a GIFA is signed, it is transmitted by the President to the Congress for ratification.

FOREIGN FISHING PERMITS

Title II of the Magnuson-Stevens Act governs foreign fishing in the EEZ. The process applied to foreign fishing has been described in prior issues of this publication. As U.S. fishing capacity grew, foreign participation in directed fisheries, as well as in foreign joint ventures in which U.S. vessels delivered U.S. harvested fish to permitted foreign vessels in the EEZ diminished until, in 1991, foreign vessels no longer were permitted to conduct directed fishing in the EEZ. This marked the achievement of one of the objectives of the Magnuson-Stevens Act, that is, the development of the U.S. fishing industry to take what were in 1976 underutilized species, and the displacement of directed foreign fishing effort in the EEZ.

As a result of the above, there has been very little total allowable level of foreign fishing (TALFF) issued since 1991. NMFS continues to maintain certain regulations

pertaining to foreign fishing should there be a situation in the future in which allowing limited foreign fishing in an underutilized fishery would be of advantage to the U.S. fishing industry.

FMPs and PMPs

Under the Magnuson-Stevens Act, eight Regional Fishery Management Councils are charged with preparing Fishery Management Plans (FMPs) for the fisheries needing management within their areas of authority. After the Councils prepare FMPs that cover domestic and foreign fishing efforts, the FMPs are submitted to the Secretary of Commerce (Secretary) for approval and implementation. The Department, through NMFS agents and the U.S. Coast Guard, is responsible for enforcing the law and regulations.

The Secretary is empowered to prepare FMPs in the Atlantic and Gulf of Mexico for highly migratory species. Where no FMP exists, Preliminary Fishery Management Plans (PMPs), which only cover foreign fishing efforts, are prepared by the Secretary for each fishery for which a foreign nation requests a permit. The Secretary is also empowered to produce an FMP for any fishery that a Council has not duly produced. In this latter case, the Secretary's FMP covers domestic and foreign fishing.

The Atlantic swordfish, Atlantic sharks, and Atlantic billfish fisheries are currently being managed by the Secretary under the Magnuson-Stevens Act, and the Western Atlantic bluefin tuna fishery is managed under the Magnuson-Stevens Act and the Atlantic Tunas Convention Act.

Under section 304 of the Magnuson-Stevens Act, all Council-prepared FMPs must be reviewed for approval by the Secretary of Commerce. Approved FMPs are implemented by Federal regulations under section 305 of the Act. As of December 31, 2003, there are 48 FMPs in effect. Of these, two are Secretarial FMPs for Atlantic highly migratory species. The FMPs are listed below, under the responsible Council. FMPs may be amended by the Council and the amendments are submitted for approval under the same Secretarial review process as new FMPs. Most of the FMPs have been amended since initial implementation, and the number of amendments is shown with each plan.

The Magnuson-Stevens Fishery Conservation and Management Act

Pacific Fishery Management Council

1. Pacific Coast Groundfish FMP – 16 amendments
2. Pacific Salmon FMP – 14 amendments
3. Coastal Pelagic Species FMP – 10 amendments

Western Pacific Fishery Management Council

1. Bottomfish and Seamount Groundfish FMP – 9 amendments
2. Pelagics FMP – 11 amendments
3. Precious Corals FMP – 6 amendments
4. Crustaceans FMP – 12 amendments
5. Coral Reef Ecosystems FMP

Mid-Atlantic Fishery Management Council

1. Spiny Dogfish FMP
2. Summer Flounder, Scup, and Black Sea Bass FMP – 13 amendments
3. Surf Clam and Ocean Quahog FMP – 13 amendments
4. Atlantic Mackerel, Squid, and Butterfish FMP – 8 amendments
5. Atlantic Bluefish FMP – 1 amendment
6. Tilefish FMP

South Atlantic Fishery Management Council

1. Pelagic Sargassum Habitat of the South Atlantic Region FMP
2. Snapper Grouper FMP – 15 amendments
3. Dolphin and Wahoo FMP
4. Shrimp FMP – 6 amendments
5. Atlantic Coast Red Drum FMP – 1 amendment
6. Golden Crab FMP – 2 amendments
7. Red Drum FMP

Caribbean Fishery Management Council

1. Spiny Lobster FMP – 1 amendment
2. Corals and Reef-Associated Plants and Invertebrates FMP – 1 amendment

3. Queen Conch FMP
4. Shallow Water Reef Fish FMP – 2 amendments

Gulf of Mexico Fishery Management Council

1. Coastal Pelagics FMP (joint w/ S.Atl.) – 14 amendments
2. Coral and Coral Reefs (joint w/ S.Atl.) FMP – 4 amendments
3. Red Drum FMP – 3 amendments
4. Stone Crab FMP – 8 amendments
5. Shrimp FMP – 12 amendments
6. Spiny Lobster FMP (joint w/ S.Atl.) – 7 amendments
7. Reef Fish FMP – 22 amendments

New England Fishery Management Council

1. Northeast Multispecies FMP – 13 amendments
2. Northeastern Skate FMP
3. Deep Sea Red Crab FMP
4. Atlantic Herring FMP
5. Atlantic Sea Scallop FMP – 10 amendments
6. Monkfish FMP
7. Spiny Dogfish FMP
8. Atlantic Salmon FMP – 1 amendment
9. American Lobster FMP – 6 amendments

North Pacific Fishery Management Council

1. Bering Sea/Aleutian Islands Groundfish FMP – 65 amendments
2. Gulf of Alaska Groundfish FMP – 55 amendments
3. King and Tanner Crab FMP – 15 amendments
4. Salmon FMP – 6 amendments
5. Alaska Scallop FMP – 7 amendments

Highly Migratory Species Plans

1. FMP for Atlantic Tunas, Swordfish, and Sharks – 1 amendment
2. Atlantic Billfish FMP – 1 amendment

LIBRARY INFORMATION

The NOAA Library and Information Network Catalog (NOAALINC) represents the automated bibliographic holdings of the NOAA Central Library in Silver Spring, Maryland and 27 other NOAA libraries located around the U.S. Currently, the NOAALINC contains records for more than 250,000 items with 5,000-10,000 added each year.

NOAALINC provides several search methods to locate records of items. Users can search for keywords in titles, subject headings, authors, or series. Users can browse indexes of titles, subject headings, authors, series, or call number. Each bibliographic record shows a brief description of the item with a list of which libraries hold the item. The list of libraries will show the call number, the item's specific information, and whether the item is available for circulation.

NOAALINC is available to anyone, without restriction, 24 hours a day, every day of the year. Visitors to the NOAA Central Library can access the catalog through workstations located throughout the Library. Remote users can access the catalog through a link from the NOAA Central Library's homepage at <http://www.lib.noaa.gov/>.

NOAA personnel may contact their nearest NOAA Library or the NOAA Central Library and arrange to borrow materials. Members of the general public should contact their local library to arrange for an interlibrary loan. Restrictions apply on circulation of certain materials.

For further information contact the NOAA Central Library, 1315 East-West Highway, 2nd Floor, Silver Spring, MD 20910-3282. Telephone: 301-713-2600 (Ext. 124) or E-mail: Library.Reference@noaa.gov.

COMMERCIAL FISHERIES:

Fisheries of the United States is a preliminary report with historical comparisons on the Nation's fishing, fish processing, and foreign trade in fishery products. The following reports are available through NTIS.

Year	Accession No.
1966	COM-75-10662
1967	COM-75-10663
1968	COM-75-10664
1969	COM-75-10665
1970	COM-71-50081
1971	COM-75-10666
1972	COM-73-50644
1973	COM-74-50546
1974	COM-75-10862
1975	PB-253966
1976	PB-268662
1977	PB-282741
Year	Accession No.
1978	PB-297083
1979	PB-80-201593
1980	PB-81-241648
1981	PB-82-215542
1982	PB-83-216473
1983	PB-84-195148
1984	PB-86-144953
1985	PB-87-143145
1986	PB-88-164132
1987	PB-88-215173
1988	PB-89-216485
1989	PB-91-129-320
1990	PB-92-174523/AS
1991	PB-93-204536/AS
1992	PB-94-156387
1993	PB-95-219192

Fisheries Statistics of the United States (Statistical Digest) is a final report on the Nation's commercial fisheries showing more detail than Fisheries of the United States.

Year	Accession No.
1939	COM-75-11265

Publications

HISTORICAL REPORTS:

Historical Catch Statistics is a series of publications reporting catch of certain species in the United States for historical purposes. The following reports are available through NTIS:

Atlantic and Gulf Coast States, 1879 - 1989. Current Fisheries Statistics No. 9010 - Historical Series Nos. 5-9 Revised. Report covers total landings for major species, by state and by region. (NTIS No. PB-93-174266).

Atlantic and Gulf Coast States, 1950 - 1991. Current Fisheries Statistics No. 9210 - Historical Series No. 10-Revised. Report covers landings and value of major species, by Region. (NTIS No. PB-93-174274).

IMPORTS AND EXPORTS OF FISHERY PRODUCTS

Annual Summary:

Year	Accession No.

1978, PB82-168063.

Texas: 1949-77, PB-300603;
1978-79, PB-82-169004.

Shrimp Landings: 1956-76, PB-80-124696;
1978-79, PB-82-156183.

Gulf Coast Shrimp Data: 1958-76, PB-80-126899;
1978-79, PB-82-170390.

INTERNATIONAL REPORTS:

The Division of International Science and Technology, NMFS, prepares assessments of major fisheries to support priority NMFS programs. These reports may be of interest to the wider fishery community as they include biological, commercial, and technical information of potential use to academicians, industry, and environmentalists.

Swordfish:

In 1997 work was completed on a six-volume study, culminating a five-year research project to compile and analyze information on every key swordfish catching nation in the world. World Swordfish Fisheries is the most comprehensive documentation of this fishery ever produced. Each volume of the study contains information on catch, fishing grounds, fishing fleets, gear and methods, markets, trade, bycatch, research, international relations, and other facets of the fishery. The books are carefully documented and have extensive statistical appendices, graphics, and photographic images to help explain the fishery and illustrate key trends. Reports on the swordfish fisheries of the Atlantic-coast countries of Latin America was published in 1999 and reports on the Caribbean islands in 2001. The reports were published as NOAA Fisheries Technical Memoranda. These books are available from the NOAA Library: Steve Quillen, NOAA Library, 1315 East-West Highway, Silver Spring, MD 20910 (Steve.Quillen@noaa.gov)

If NOAA Library supplies are exhausted, xerox copies of these reports can be purchased from the National Technical Information Service (NTIS). NTIS order numbers are available from: Jacki Strader, NMFS Scientific Publications, Northwest Regional Office, 7600

Sandpoint Way NE, Bldg 1, Seattle, WA 98115
(Steve.Quillen@noaa.gov)

Volume I: Executive Overview. Summary of World Fisheries for Swordfish and Overview of Global and Regional Trends. (NMFS-F/SPO23, 1997), 53 p.

Volume II: Africa and the Middle East. Examination of Fisheries and Overview of Regional Trends in Africa and in Select Middle Eastern countries. (NMFS-F/SPO24, 1997), 235 p.

Volume III: Asia. Summary of Asian Fisheries and Overview of Regional Trends. Special Coverage of Japan, Korea, and Taiwan. (NMFS-F/SPO25, 1997), 44 p.

Volume IV: Latin America.

Part A1: Summary of Swordfish Fisheries, along the Pacific coast of South America. Detailed coverage of Chile. (NMFS-F/SPO26-27, 1997), two books, 843 p.

Part A2: Summary of Swordfish Fisheries, along the Atlantic coast of South America. Detailed coverage of Brazil. (NMFS-F/SPO34-36, 1999), three books, 916 p.

Part B: Summary of Swordfish Fisheries of the Caribbean islands. Detailed coverage of Cuba. (NMFS-F/SPO50-53, 2001), four books, 1,316 p.

Volume V: North America. Overview of Canadian and U.S. Fisheries for Swordfish. (NMFS-F/SPO28, 1997), 136 p.

Volume VI: Western Europe. Examination of European fisheries with special emphasis on the European Union member states (especially Spain, Italy, Greece and France). Non-EU countries are also considered. (NMFS-F/SPO29, 1997), 324p.

NORTHEAST REGION:

<http://www.nefsc.nmfs.gov/nefsc/publications/>

Status of Fishery Resources off the Northeastern United States. Various authors for various sections of the document. Continuously updated Web-only document. (<http://www.nefsc.nmfs.gov/sos/>). (F/NEC).

U.S. Atlantic and Gulf of Mexico Marine Mammal Stock Assessments — 2002. Waring, G.T., J.M. Quintal, and C.P. Fairfield, eds., and P.J. Clapham,

T.V.N. Cole, L.P. Garrison, Georgia Department of Natural Resources, A. Hohn, B.G. Maise, W.E. McFee, D.L. Palka, P.E. Rosel, M.C. Rossman, U.S. Fish and Wildlife Service, and C. Yeung, contribs. (listed alphabetically). 2002. (NOAA-TM-NMFS-NE-169; <http://nefsc.noaa.gov/nefsc/publications/tm/tm169>). 318 p. (F/NEC).

Status of the Northeast U.S. Continental Shelf Ecosystem: A Report of the Northeast Fisheries Science Center's Ecosystem Status Working Group. Link, J.S., and J.K.T. Brodziak, eds., and D.D. Dow, S.F. Edwards, M.C. Fabrizio, M.J. Fogarty, D. Hart, J.W. Jossi, J. Kane, K.L. Lang, C.M. Legault, S.A. MacLean, D.G. Mountain, J. Olson, W.J. Overholtz, D.L. Palka, and T.D. Smith, contribs. (listed alphabetically). 2002. (NEFSC-CRD-02-11; <http://www.nefsc.noaa.gov/nefsc/publications/crd/crd0211>). 245 p. (F/NEC).

Essential Fish Habitat Source Document[s]: Life History and Habitat Characteristics [for 37 species managed under fishery management plans by the New England and Mid-Atlantic Fishery Management Councils]. Various authors for various species. September 1999 for 29 species; January 2001 for one species; March 2003 for 7 species. (NOAA-TM-NMFS-NE-122-152, 163 & 173-179; <http://nefsc.noaa.gov/nefsc/publications/tm/tm1list.htm>). Various pages for various species. (F/NEC).

SOUTHEAST REGION:

<http://caldera.sero.nmfs.gov/>

A Review of the Fishing Gear Utilized within the Southeast Region and their Potential Impacts on Essential Fish Habitat. Barnette, M.C. 2001 (NOAA-TM-NMFS-SEFSC-449). 62 p. (F/SER).

Assessing Extinction Risk for West Coast Salmon. 2003. MacCall, A.D. and T.C. Wainwright (editors). (NOAA-TM-NMFS-NWFSC-56) 198p.

The net-pen salmon farming industry in the Pacific Northwest. Nash, C.E. (editor). 2001. (NOAA -TM-NMFS-NWFSC-49) 125 p. (NTIS PB2002-100948).

Status review of Copper Rockfish, Quillback Rockfish, and Brown Rockfish in Puget Sound, Washington. Stout, H.A., B.B. McCain, R.D. Vetter, T.L. Builder, W.H. Lenarz, L.L. Johnson, and R.D. Methot. 2001. (NOAA-TM-NMFS-NWFSC-46) 158 p. (NTIS PB2001-105559).

Status review of Pacific herring in Puget Sound, Washington. Stout, H.A., R.G. Gustafson, W.H. Lenarz, B.B. McCain, D.M. VanDoornik, T.L. Builder, and R.D. Methot. 2001. (NOAA-TM-NMFS-NWFSC-45)175 p. (NTIS PB2001-105561).

Upper Columbia River Steelhead and Spring Chinook Salmon Population Structure and Biological Requirements. Ford, M., P. Budy, C. Busack, D. Chapman, T. Cooney, T. Fisher, J. Geiselman, T. Hillman, J. Lukas, C. Peven, C. Toole, E. Weber, and P. Wilson 2001. (Final Report) 64

Review of potential impacts of Atlantic salmon culture on Puget Sound chinook salmon and Hood Canal summer-run chum salmon evolutionarily significant units. Waknitz, F.W., T.J. Tynan, C.E. Nash, R.N. Iwamoto, and L.G. Rutter. 2002. (NOAA-TM-NMFS-NWFSC-53) 83 p. (NTIS number pending).

Status review of southern resident killer whales (*Orcinus orca*) under the Endangered Species Act. Krahn, M.M., et al. 2002. (NOAA-TM-NMFS-NWFSC-54) 133 p. (NTIS number pending).

The 1999 Northwest Fisheries Science Center Pacific West Coast Upper Continental Slope Trawl Survey of Groundfish Resources off Washington, Oregon, and California: Estimates of Distribution, Abundance, and Length Composition. Builder Ramsey, T., T.A. Turk, E.L. Fruh, J.R. Wallace, B.H. Horness, A.J. Cook, K.L. Bosley, D.J. Kamikawa, L.C. Hufnagle, and K. Piner. 2002. (NOAA-TM-NMFS-NWFSC-55) 143 p. (NTIS number pending).

ALASKA REGION:

<http://www.afsc.noaa.gov/Publications/publications.htm>

A comparison of the eastern and western Bering Sea shelf and slope ecosystems through the use of mass-balance food web models. Aydin, K. Y., V. V.

Lapko, V. I. Radchenko, and P. A. Livingston. 2002. (NOAA-TM-AFSC-130). 78 p. (NTIS No. PB2003-100518).

A survey of fish assemblages in eelgrass and kelp habitats of southeastern Alaska. Johnson, S. W. , M. L. Murphy, D.J. Csepp, P. M. Harris, and J. D. Thedinga. 2003. (NOAA-TM-AFSC-139). 39 p. (NTIS No. PB2004-100139).

Aerial and land-based surveys of Steller sea lions (*Eumetopias jubatus*) from the western stock in Alaska, June and July 2001 and 2002. Sease, J. L., and C. J. Gudmundson. 2002. (NOAA-TM-AFSC-131). 45 p. (NTIS No. PB2003-102164).

Annotated bibliography of the bowhead whale, *Balaena mysticetus*, 1767-1983. Marquette, W. M. 2002. (NOAA-TM-AFSC-127). 325 p. (NTIS No. PB2002-108033).

Aspects of the early life history of capelin (*Mallotus villosus*) in the northwestern Gulf of Alaska: A historical perspective based on larval collections October 1977- March 1979. Doyle, M. J., M. S. Busby, J. T. Duffy-Anderson, S. J. Picquelle, and A. C. Matarese. 2002. (NOAA-TM-AFSC-132). 32 p. (NTIS No. PB2002-102535).

Characteristics of benthic sediments from areas open and closed to bottom trawling in the Gulf of Alaska. Stone, R. P., and M. M. Masuda. 2003. (NOAA-TM-AFSC-140). 40 p. + Appendices (111 p.). (NTIS No. PB2004-100650).

Compilation of marine mammal incidental take data from the domestic and joint venture groundfish fisheries in the U.S. EEZ of the North Pacific, 1989-2001. Perez, M. A. 2003. (NOAA-TM-AFSC-138). 145 p. (NTIS No. PB2004-100649).

Echo integration-trawl survey results for walleye pollock (*Theragra chalcogramma*) on the Bering Sea shelf and slope during summer 2000. Honkalehto, T., W. Patton, S. De Blois, and N. Williamson. 2002. (NOAA-TM-AFSC-126). 66 p. (NTIS No. PB2002-104686).

Echo integration-trawl survey results for walleye pollock (*Theragra chalcogramma*) on the Bering Sea shelf and slope during summer 1999. Honkalehto, T., N. Williamson, and S. De Blois. 2002. (NOAA-TM-AFSC-125). 77 p. (NTIS No. PB2002-104686).

Guide to rockfishes (Scorpaenidae) of the genera *Sebastes*, *Sebastobus*, and *Adelosebastes* of the northeast Pacific Ocean, second edition. Orr, J. W., M. A. Brown, and D. C. Baker. 2002. (NOAA-TM-AFSC-117). 47 p. (NTIS No. PB2001-100757).

Mobile fishing gear effects on benthic habitats: a bibliography (second edition). Dieter, B. E., D. A. Wion, and R. A. McConnaughey (editors). 2003. (NOAA-TM-AFSC-135). 206 p. (NTIS No. PB2003-105080).

Spatial and temporal analysis of eastern Bering Sea echo integration-trawl survey and catch data of walleye pollock, *Theragra chalcogramma*, for 2001 and 2002. Barbeaux, S. J., and M. W. Dorn. 2003. (NOAA-TM-AFSC-136). 34 p. (NTIS No. PB2003-106479).

Steller sea lion research coordination: a brief history and summary of recent progress. Ferrero, R. C., and L. W. Fritz. 2002. (NOAA-TM-AFSC-129). 34 p. (NTIS No. PB2002-107912).

Selection and application of a mark-and-recapture technique for estimating pink salmon escapements. Maselko, J. M., A. C. Wertheimer, and J. F. Thedinga. 2003. (NOAA-TM-AFSC-137). 44 p. (NTIS No. PB2003-107101).

The 2002 eastern Bering Sea upper continental slope survey of groundfish and invertebrate resources. Hoff, G. R., and L. L. Britt. 2003. (NOAA-TM-AFSC-141). 261 p. (NTIS No. PB2004-101668).

The 2001 Pacific west coast bottom trawl survey of groundfish resources: Estimates of distribution, abundance, and length and age composition. Weinberg, K. L., M. E. Wilkins, F. R. Shaw, and M. Zimmermann. 2002. (NOAA-TM-AFSC-128). 140 p. + Appendices. (NTIS No. PB2002-108221).

PACIFIC ISLAND REGION:

Bottom Longline Fishing for Sharks in the Northwestern Hawaiian Islands. Vatter, A., 2003 (AR-PIR-03-01) 19 p

Annual Report on Seabird Interactions and Mitigation Efforts in the Hawaii-based Longline Fishery for Calendar Years 2000 and 2001. 2003. (AR-PIR-03-02) 43p

Annual Report on Seabird Interactions and Mitigation Efforts in the Hawaii-based Longline Fishery for Calendar Year 2002, 2003. (AR-PIR-03-03) 24p

A Survey of Purse Seine Fishing Capacity in the Western and Central Pacific Ocean, 1988 to 2003. Gillett, R and Lewis, A., 2003 (AR-PIR-03-04) 58p

NATIONAL MARINE FISHERIES SERVICE HOME PAGES

The National Marine Fisheries Service provides information on programs and data available to the public and fishing industry via home page. Please use the following address for NMFS' home page - <http://www.nmfs.noaa.gov> through a personal computer. If you wish to access individual office home pages, the addresses and a brief description follow:

Fisheries Statistics - <http://www.st.nmfs.gov/st1/> — Descriptions of commercial and recreational fisheries statistics data collection and economic programs. Access to commercial monthly landings data bases, Marine Recreational Fisheries Statistics Survey (MRFSS) data, cold storage, Market News Reports, processed products data, trade data base, vessel documentation data, and electronic copies of "Fisheries of the United States."

Atlantic Highly Migratory Species (HMS) - <http://www.nmfs.noaa.gov/sfa/hmspg.html> — HMS and Billfish Fishery Management Plans, implementing regulations and related documents. The Stock Assessment and Fishery Evaluation Report for HMS: SAFE2000. Information on Atlantic tunas permits and link to online permit shop. Lists of members of the Advisory Panels, upcoming meetings and other HMS news

Habitat Conservation - <http://www.nmfs.noaa.gov/habitat/> — Describes NOAA programs to conserve, protect, and restore habitats for living marine resources. Information on essential fish habitat, the NOAA Restoration Center and its Community-based Restoration Program, Damage Assessment and Restoration Program (DARP), and Coastal Wetlands Planning, Protection, and Restoration Act program (CWPPRA), and the NOAA Chesapeake Bay Office.

Inspection Program - <http://seafood.nmfs.noaa.gov> — Provides information on the voluntary National Seafood Inspection Program, including the services offered in the US and foreign countries to harvesters, processors, distributors, importers/exporters, buyers, and retailers; list of approved fish establishments and products; fees and charges; policies for advertising services; and official inspection marks and certificates.

Protected Resources - http://www.nmfs.noaa.gov/prot_res/prot_res.html — Contains recovery efforts for species considered endangered or threatened; depleted species of marine mammals; and a comprehensive list of other Internet resources pertaining to protection programs and other issues. Information on Endangered Species Act and Marine Mammal Protection Act.

Office of Constituent Services - <http://www.nmfs.noaa.gov/ocs> — Provides constituents and the general public access to NOAA Fisheries. OCS includes: Public Outreach/Education, Recreational Fisheries, Trade, Commercial, and Financial Services, as well as the S-K Grant Program. <http://www.nmfs.noaa.gov/ocs/skhome.html>

Northeast Region - <http://www.nero.nmfs.gov/doc/nero.html> — Describes the mission and responsibilities of the Regional Office Staffs and Divisions. Provides information on northeast fisheries regulations, quota reports for specific species, multi-species preliminary statistics reports; scallop and multi-species days-at-sea activity reports; federal aid for MARFIN and SK grant programs; vessel permit system data; and links to other NOAA sites.

Northeast Fisheries Science Center - <http://www.nefsc.nmfs.gov> — Provides current and historical northeast fisheries information and data about research facilities, vessels, programs, publications, management, laws and regulations, and answers to frequently asked questions on fish and fisheries research. Features in-depth information on northeast stock status and realtime, at-sea, display of research vessel activities, measurements, and observations.

NATIONAL MARINE FISHERIES SERVICE HOME PAGES

Southeast Region - <http://caldera.sero.nmfs.gov/> — Provides information on regional Federal activities including: fisheries regulations, news releases and fisheries bulletins, fisheries regulations, vessel and dealer permits, fishery management plan implementation/quotas, marine mammals and endangered species management and protection, habitat protection and restoration activities, and federal aid programs for grants and cooperative agreements.

Southeast Fisheries Science Center - <http://www.sefsc.noaa.gov/> — Describes the Center's programs, mission, laboratories, geographic scope, organization, research vessels, and upper-level scientific and management staff. Includes publications, news releases, newsletters (tuna and billfish), and information on the types of research being conducted on Pacific and Antarctic fishes, marine mammals, sea turtles, habitats, and marine ecosystems.

Alaska Region - <http://www.fakr.noaa.gov> — Provides information on in-season state of groundfish catch, current news releases and information bulletins, and current fisheries outlook and effort reports. Information on the Community Development Quota (CDQ) Program, At-Sea Scales Program, fisheries regulations and the manual for Groundfish Recordkeeping and Reporting. Information on the Individual Fishing Quota (IFQ) Program, marine mammals, habitat conservation, and links to other fisheries web sites.

Alaska Fisheries Science Center - <http://www.afsc.noaa.gov/> — Describes the mission of the Center and the organization and purpose of its laboratories, divisions, and programs dedicated to Federal fisheries and marine mammal research in the coastal oceans off Alaska and the West Coast of the United States. Provides stock assessments, databases, AFSC Quarterly Report, cruise reports and schedules, other online documents, publication lists, image gallery of marine mammals, fishes, and crabs, and educational materials.

Northwest Region - <http://www.nwr.noaa.gov> — Provides information on the region's activities, mission and responsibilities. It includes news releases, announcements, documents and Federal Register notices about fisheries management plans, public hearings, programs, regulations, Endangered Species Act listings and proposals, habitat conservation, and regional hydro power activities.

Northwest Fisheries Science Center - <http://nwfsc.nmfs.noaa.gov> — Describes Center research, including status and recovery of endangered salmon and new hatchery-rearing techniques; rapid-response analyzes of chemical pollution and harmful algae blooms in fishery grounds nationwide; assessing the west coast groundfish fishery; and developing new bycatch utilization technologies. News topics, current publications, library resources, and the Center's state-of-the-art water-recycling fish culture facility are also featured.

Southwest Region - <http://swr.nmfs.noaa.gov> — Describes the mission and responsibilities of the regional office. Announcements of Federal Register notices on seasons, trip limits, and quotas. Provides information on fisheries statistics, trade data, canned tuna updates and status of tuna import quotas, and catch reports for various California fisheries. Japanese market reports are available on sablefish, shrimp, landings and wholesale prices, etc., and links to other pertinent sites of interest to fishery and seafood industries.

Southwest Fisheries Science Center - <http://swfsc.nmfs.noaa.gov> — Describes the Center's programs, mission, laboratories, geographic scope, organization, research vessels, and upper-level scientific and management staff. Includes publications, news releases, billfish newsletter, and information on the types of research being conducted on Pacific and Antarctic fishes, marine mammals, sea turtles, habitats, and marine ecosystems.

NOAA Public Affairs - <http://www.noaanews.noaa.gov> — All NOAA and NMFS related Press Releases and links to other NOAA material available to the public. If you would like these releases through electronic mail rather than FAX, send e-mail to jslaff@hq.noaa.gov.

SEA GRANT EXTENSION PROGRAM

The Office of Sea Grant is a major program element of the National Oceanic and Atmospheric Administration. The National Sea Grant College Program is funded jointly by the Federal Government and colleges or universities. Sea Grant's Extension Program offers a broad range of information concerning the Nation's fisheries to recreational and commercial fishermen, fish processors, and others. The following program leaders, listed alphabetically by State, can provide information on Sea Grant activities:

James D. Murray
National Sea Grant Extension Leader
National Sea Grant Office/NOAA
1315 East-West Highway, Room 11752
Silver Spring, MD 20910
(301) 713-2431 x152 FAX: 713-0799
jim.d.murray@noaa.gov

Rick Wallace, Extension Leader
Alabama Sea Grant - Auburn Univ.
Mississippi-Alabama Sea Grant
4170 Commander's Drive
Mobile, AL 36615
(334) 438-5690 FAX: 438-5670
rwallace@acesag.auburn.edu

Paula Cullenberg, MAP Leader
Alaska Sea Grant - Univ. of AK
2221 E. Northern Lights., #110
Anchorage, AK 99508-4140
(907) 274-9691 x112 FAX: 277-5242
anpjc@uaa.alaska.edu

Paul Olin, Interim Extension Leader
California Sea Grant College Program
University of California
2604 Ventura Avenue, Room 100
Santa Rosa, CA 95403
(707) 565-2621 FAX: 565-2623
pgolin@ucdavis.edu

Judith D. Lemus, Extension Leader
Southern California Sea Grant
Univ. of Southern CA - Univ. Park
Los Angeles, CA 90089-0373
(213) 740-1965 FAX: 740-5936
jldlemus@usc.edu

Nancy C. Balcom, Extension Leader
Connecticut Sea Grant - Univ. of CN
1084 Shennecossett Road
Groton, CT 06340-6097
(860) 405-9107 FAX: 405-9109
balcom@uconnvm.uconn.edu

James M. Falk, Extension Leader
Delaware Sea Grant - Univ. of DE
700 Pilottown Road
Lewes, DE 19958-1298
(302) 645-4235 FAX: 645-4007
jfalk@udel.edu

Michael Spranger, Extension Leader
Florida Sea Grant - Univ. of FL
PO Box 110405
Gainesville, FL 32611-0405
(352) 392-1837 x226 FAX: 392-5113
msspranger@mail.ifas.ufl.edu

Keith W. Gates, Extension Leader
Georgia Sea Grant - Univ. of GA
715 Bay Street
Brunswick, GA 31520-4601
(912) 264-7268 FAX: 264-7312
kgates@arches.uga.edu

Richard Brock
Hawaii Sea Grant - Univ. of HI
2525 Correa Road, HIG 232
Honolulu, HI 96822
(808) 956-8191 FAX: 956-2858
Brockr@Hawaii.edu

Brian Miller, Extension Leader
Illinois-Indiana Sea Grant-Purdue Univ.
1200 Forest Products Building
West Lafayette, IN 47907
(765) 494-3573 FAX: 496-6026
bmiller@fnr.purdue.edu

Michael M. Liffman, Extension Leader
Louisiana Sea Grant - LA State Univ.
234 Sea Grant Building
Baton Rouge, LA 70803-7507
(225) 578-6290 FAX: 578-6331
mikelif@lsu.edu

Paul Anderson, Extension Leader
Maine Sea Grant - Univ. of ME
5715 Coburn Hall
Orono, ME 04469-5715
(207) 581-1422 FAX: 581-1426
panderson@maine.edu

Douglas Lipton, Extension Leader
Maryland Sea Grant - Univ. of MD
2200 Symons Hall
College Park, MD 20742
(301) 405-1280 FAX: 314-9091
dlipton@arec.umd.edu

Clifford Goudey, Extension Leader
**MIT Sea Grant - Massachusetts
Institute of Technology**
Building E38-300/Kendall Square
292 Main Street
Cambridge, MA 02139
(617) 253-7079 FAX: 252-1615
cgoudey@mit.edu

William Walton
Fisheries & Aquaculture Specialist
Woods Hole Sea Grant Program
Barnstable Cty. Cooperative Extension
PO Box 367
Barnstable, MA 02630
(508) 375-6849 FAX: 362-4923
wwaltont@whoi.edu

John D. Schwartz, Extension Leader
Michigan Sea Grant - MI State Univ.
334 Natural Resources Building
East Lansing, MI 48824-1222
(517) 355-9637 FAX: 353-6496
schwartzj@msue.msu.edu

Jeffrey L. Gunderson, Extension Leader
Minnesota Sea Grant - Univ. of MN.
2305 E. 5th Street
Duluth, MN 55812
(218) 726-8715 FAX: 726-6556
jgunder1@d.umn.edu

SEA GRANT EXTENSION PROGRAM

David C. Veal, Extension Leader
Mississippi Sea Grant Extension
Mississippi-Alabama Sea Grant
Mississippi State University
2710 Beach Blvd., Suite 1-E
Biloxi, MS 39531
(228) 388-4710 FAX: 388-1375
cdv@ra.msstate.edu

Michael P. Weinstein
President and Chief Executive Officer
New Jersey Sea Grant
New Jersey Marine Science Consortium
Building No. 22 Fort Hancock
Highlands, NJ 07732
(732) 872-1300 x21 FAX: 291-4483
mweinstein@njmsc.org

Dale R. Baker, Extension Leader
New York Sea Grant - Cornell Univ.
340 Roberts Hall
Ithaca, NY 14853-5905
(607) 255-2832 FAX: 255-2812
drb17@cornell.edu

Jack Thigpen, Extension Leader
North Carolina Sea Grant-NC State Univ.
P.O. Box 699
Manteo, NC 27954
(252) 441-3663 FAX: 441-7403
jthigpen@pinn.net

Frank R. Lichtkoppler
Co-Leader Extension
Ohio Sea Grant - OH State Univ.
99 East Erie Street
Painesville, OH 44077
(440) 350-2582 FAX: 350-5928
lichtkoppler.1@osu.edu

Fred L. Snyder, Co-Leader Extension
Ohio Sea Grant - OH State Univ.
Camp Perry - Building 3, Room 12
Port Clinton, OH 43452
(419) 635-1022 FAX: 635-1022
snyder.8@osu.edu

Jay Rasmussen, Extension Leader
Oregon Sea Grant - OR State Univ.
2030 South Marine Science Drive
Newport, OR 97365-5296
(541) 867-0368 FAX: 867-0369
Jay.Rasmussen@hmsc.orst.edu

Eric C. Obert, Extension Leader
Pennsylvania Sea Grant-PA State Univ.
Station Road
Erie, PA 16563
(814) 898-6420 FAX: 898-6462
ecol@psu.edu

Ruperto Chaparro, Extension Leader
Puerto Rico Sea Grant - Univ. of P.R.
PO Box 9011
Mayaguez, PR 00681-9011
(787) 832-8045 FAX: 265-2880

NATIONAL SEA GRANT LIBRARY
(Clearinghouse for all Sea Grant Publications)
Pell Library, University of Rhode Island - Bay Campus
Narragansett, HI 02882
PHONE: 401-874-6160 -- nsgd.gso.uri.edu

ANADROMOUS SPECIES. These are species of fish that mature in the ocean, and then ascend streams to spawn in freshwater. In the Magnuson Act, these species include, but are not limited to, Atlantic and Pacific salmons, steelhead trout, and striped bass. See 42 FR 60682, Nov. 28, 1977.

ANALOG PRODUCTS. These include imitation and simulated crab, lobster, shrimp, scallops, and other fish and shellfish products fabricated from processed fish meat (such as surimi).

AQUACULTURE. The farming of aquatic organisms in marine, brackish or fresh water. Farming implies private or corporate ownership of the organism and enhancement of production by stocking, feeding, providing protection from predators, or other management measures. Aquaculture production is reported as the weight and value of cultured organisms at their point of final sale.

BATTER-COATED FISH PRODUCTS. Sticks and portions or other forms of fish or shellfish coated with a batter containing a leavening agent and mixture of cereal products, flavoring, and other ingredients, and partially cooked in hot oil a short time to expand and set the batter.

BOAT, OTHER. Commercial fishing craft not powered by a motor, e.g., rowboat or sailboat, having a capacity of less than 5 net tons. See motorboat.

BREADED FISH PRODUCTS. Sticks and portions or other forms of fish or shellfish coated with a non-leavened mixture containing cereal products, flavorings, and other ingredients. Breaded products are sold raw or partially cooked.

BREADED SHRIMP. Peeled shrimp coated with breading. The product may be identified as fantail (butterfly) and round, with or without tail fins and last shell segment; also known as portions, sticks, steaks, etc., when prepared from a composite unit of two or more shrimp pieces whole shrimp or a combination of both without fins or shells.

BUTTERFLY FILLET. Two skin-on fillets of a fish joined together by the belly skin. See fillets.

CANNED FISHERY PRODUCTS. Fish, shellfish, or other aquatic animals packed in cans, or other containers, which are hermetically sealed and heat-sterilized. Canned fishery products may include milk, vegetables, or other products. Most, but not all, canned fishery prod-

ucts can be stored at room temperature for an indefinite time without spoiling.

COMMERCIAL FISHERMAN. An individual who derives income from catching and selling living resources taken from inland or marine waters.

CONSUMPTION OF EDIBLE FISHERY PRODUCTS. Estimated amount of commercially landed fish, shellfish, and other aquatic animals consumed by the civilian population of the United States. Estimates are on an edible-weight basis and have been adjusted for beginning and ending inventories of edible fishery products. Consumption includes U.S. production of fishery products from both domestically caught and imported fish, shellfish, other edible aquatic plants, animals, and imported products and excludes exports and purchases by the U.S. Armed Forces.

CONTINENTAL SHELF FISHERY RESOURCES. These are living organisms of any sedentary species that at the harvestable stage are either (a) immobile on or under the seabed, (b) unable to move except in constant physical contact with the seabed or subsoil of the continental shelf. The Magnuson Act now lists them as certain abalones, surf clam and ocean quahog, queen conch, Atlantic deep-sea red crab, dungeness crab, stone crab, king crabs, snow (tanner) crabs, American lobster, certain corals, and sponges.

CURED FISHERY PRODUCTS. Products preserved by drying, pickling, salting, or smoking; not including canned, frozen, irradiated, or pasteurized products. Dried products are cured by sun or air-drying; pickled or salted products are those products preserved by applying salt, or by pickling (immersing in brine or in a vinegar or other preservative solution); smoked products are cured with smoke or a combination of smoking and drying or salting.

DEFLATED VALUE. The deflated values referred to in this document are calculated with the Gross Domestic Products Implicit Price Deflator. The base year for this index is 1987.

EDIBLE WEIGHT. The weight of a seafood item exclusive of bones, offal, etc.

EEZ. See U.S. Exclusive Economic Zone.

EL NINO. This anomalous ocean warming of the eastern Equatorial Pacific occurs at time intervals varying from 2-10 years. El Nino conditions result in an accu-

mulation of warm water off South America which reduced the upwelling of nutrient-rich water necessary to support fisheries production. These conditions extended northward to the U.S. Pacific Coast. In addition to affecting the food available for fish, El Nino appears to alter the normal ranges, distributions, and migrations of fish populations.

EUROPEAN UNION. Austria, Belgium and Luxembourg, Denmark, Federal Republic of Germany, Finland, Greece, France, Ireland, Italy, Netherlands, Portugal, Spain, Sweden, and United Kingdom.

EXPORT VALUE. The value reported is generally equivalent to f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value excludes the cost of loading, freight, insurance, and other charges or transportation cost beyond the port of exportation.

EXPORT WEIGHT. The weight of individual products as exported, i.e., fillets, steaks, whole, breaded, etc. Includes both domestic and foreign re-exports data.

EXVESSEL PRICE. Price received by the harvester for fish, shellfish, and other aquatic plants and animals.

FISH BLOCKS. Regular fish blocks are frozen blocks or slabs of fillets or pieces of fillets cut or sliced from fish. Minced fish blocks are frozen blocks or slabs of minced flesh produced by a meat and bone separating machine.

FISH FILLETS. The sides of fish that are either skinned or have the skin on, cut lengthwise from the backbone. Most types of fillets are boneless or virtually boneless; some may be labeled as “boneless fillets.”

FISH MEAL. A high-protein animal feed supplement made by cooking, pressing, drying, and grinding fish or shellfish.

FISH OIL. An oil extracted from body (body oil) or liver (liver oil) of fish and marine mammals; mostly a byproduct of fish meal production.

FISH PORTION. A piece of fish flesh that is generally of uniform size with thickness of 3/8 of an inch or more and differs from a fish stick in being wider or of a different shape. A fish portion is generally cut from a fish block.

FISH SOLUBLES. A water-soluble protein byproduct of fish meal production. Fish solubles are generally

condensed to 50 percent solids and marketed as “condensed fish solubles.”

FISH STEAK. A cross-section slice cut from a large dressed fish. A steak is usually about 3/4 of an inch thick.

FISH STICK. An elongated piece of breaded fish flesh weighing not less than 3/4 of an ounce and not more than 1-1/2 ounces with the largest dimension at least three times that of the next largest dimension. A fish stick is generally cut from a fish block.

FISHERY MANAGEMENT PLAN (FMP). A plan developed by a Regional Fishery Management Council, or the Secretary of Commerce under certain circumstances, to manage a fishery resource in the U.S. EEZ pursuant to the MFCMA (Magnuson Act).

FISHING CRAFT, COMMERCIAL. Boats and vessels engaged in capturing fish, shellfish, and other aquatic plants and animals for sale.

FULL-TIME COMMERCIAL FISHERMAN. An individual who receives more than 50 percent of his or her annual income from commercial fishing activities, including port activity, such as vessel repair and re-rigging.

GROUND FISH. Broadly, fish that are caught on or near the sea floor. The term includes a wide variety of bottom fishes, rockfishes, and flatfishes. However, NMFS sometimes uses the term in a narrower sense. In “Fisheries of the United States,” the term applies to the following species--Atlantic and Pacific: cod, hake, ocean perch, and pollock; cusk; and haddock.

IMPORT VALUE. Value of imports as appraised by the U.S. Customs Service according to the Tariff Act of 1930, as amended. It may be based on foreign market value, constructed value, American selling price, etc. It generally represents a value in a foreign country, and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States.

IMPORT WEIGHT. The weights of individual products as received, i.e., fillets, steaks, whole, headed, etc.

INDUSTRIAL FISHERY PRODUCTS. Items processed from fish, shellfish, or other aquatic plants and animals that are not consumed directly by humans. These items contain products from seaweeds, fish meal, fish oils, fish solubles, pearl essence, shark and other aquatic animal skins, and shells.

INTERNAL WATER PROCESSING (IWPs). An operation in which a foreign vessel is authorized by the governor of a state to receive and process fish in the internal waters of a state. The Magnuson Act refers to internal waters as all waters within the boundaries of a state except those seaward of the baseline from which the territorial sea is measured.

JOINT VENTURE. An operation authorized under the MFCMA (Magnuson Act) in which a foreign vessel is authorized to receive fish from U.S. fishermen in the U.S. EEZ. The fish received from the U.S. vessel are part of the U.S. harvest.

LANDINGS, COMMERCIAL. Quantities of fish, shellfish, and other aquatic plants and animals brought ashore and sold. Landings of fish may be in terms of round (live) weight or dressed weight. Landings of crustaceans are generally on a live-weight basis except for shrimp which may be on a heads-on or heads-off basis. Mollusks are generally landed with the shell on, but for some species only the meats are landed, such as sea scallops. Data for all mollusks are published on a meat-weight basis.

MAGNUSON-STEVENSON FISHERY CONSERVATION AND MANAGEMENT ACT, Public Law 94-265, as amended. The Magnuson-Stevens Act provides a national program for the conservation and management of fisheries to allow for an optimum yield (OY) on a continuing basis and to realize the full potential of the Nation's fishery resources. It established the U.S. Exclusive Economic Zone (EEZ) (formerly the FCZ - Fishery Conservation Zone) and a means to control foreign and certain domestic fisheries through PMPs and FMPs. Within the U.S. EEZ, the United States has exclusive management authority over fish (meaning finfish, mollusks, crustaceans, and all other forms of marine animal and plant life other than marine mammals, birds, and highly migratory species of tuna). The Magnuson Act provides further exclusive management authority beyond the U.S. EEZ for all continental shelf fishery resources and all anadromous species throughout the migratory range of each such species, except during the time they are found within any foreign nation's territorial sea or fishery conservation zone (or the equivalent), to the extent that such a sea or zone is recognized by the United States.

MARINE RECREATIONAL FISHING. Fishing for pleasure, amusement, relaxation, or home consumption.

MARINE RECREATIONAL CATCH. Quantities of finfish, shellfish, and other living aquatic organisms caught, but not necessarily brought ashore, by marine recreational fisherman.

MARINE RECREATIONAL FISHERMEN. Those people who fish in marine waters primarily for recreational purposes. Their catch is primarily for home consumption, although occasionally a part or all of their catch may be sold and enter commercial channels. This definition is used in the NMFS Marine Recreational Fishery Statistics Survey, and is not intended to represent a NMFS policy on the sale of angler-caught fish.

MAXIMUM SUSTAINABLE YIELD (MSY). MSY from a fishery is the largest annual catch or yield in terms of weight of fish caught by both commercial and recreational fishermen that can be taken continuously from a stock under existing environmental conditions. A determination of MSY, which should be an estimate based upon the best scientific information available, is a biological measure necessary in the development of optimum yield.

METRIC TONS. A measure of weight equal to 1,000 kilograms, 0.984 long tons, 1.1023 short tons, or 2,204.6 pounds.

MOTORBOAT. A motor-driven commercial fishing craft having a capacity of less than 5 net tons, or not officially documented by the Coast Guard. See "boat, other".

NORTHWEST ATLANTIC FISHERIES ORGANIZATION (NAFO). This convention, entered into force January 1, 1979, replaces ICNAF. NAFO provides a forum for continued multilateral scientific research and investigation of fishery resources that occur beyond the limits of coastal nations' fishery jurisdiction in the northwest Atlantic, and will ensure consistency between NAFO management measures in this area and those adopted by the coastal nations within the limits of their fishery jurisdiction.

OPTIMUM YIELD (OY). In the MFCMA (Magnuson Act), OY with respect to the yield from a fishery, is the amount of fish that (1) will provide the greatest overall benefit to the United States, with particular reference to food production and recreational opportunities; and (2) is prescribed as such on the basis of maximum sustainable yield from such fishery, as modified by any relevant ecological, economic, or social factors.

PART-TIME COMMERCIAL FISHERMAN. An individual who receives less than 50 percent of his or her annual income from commercial fishing activities.

PER CAPITA CONSUMPTION. Consumption of edible fishery products in the United States divided by the total civilian population. In calculating annual per capita consumption, estimates of the civilian resident population of the United States on July 1 of each year are used. These estimates are taken from current population reports, series P-25, published by the U.S. Bureau of the Census.

PER CAPITA USE. The use of all fishery products, both edible and nonedible, in the United States divided by the total population of the United States.

PRELIMINARY FISHERY MANAGEMENT PLAN (PMP). The Secretary of Commerce prepares a PMP whenever a foreign nation with which the United States has made a Governing International Fishery Agreement (GIFA) submits an application to fish in a fishery not managed by an FMP. A PMP is replaced by an FMP as soon as the latter is implemented. A PMP applies only to foreign fishing.

RE-EXPORTS. Re-exports are commodities which have entered the U.S. as imports and are subsequently exported in substantially the same condition as when originally imported.

RETAIL PRICE. The price of fish and shellfish sold to the final consumer by food stores and other retail outlets.

ROUND (LIVE) WEIGHT. The weight of fish, shellfish, or other aquatic plants and animals as taken from the water; the complete or full weight as caught. The tables on world catch found in this publication include, in the case of mollusks, the weight of both the shells and the meats, whereas the tables on U.S. landings include only the weight of the meats.

SURIMI. Minced fish meat (usually Alaska pollock) which has been washed to remove fat and undesirable matters (such as blood, pigments, and odorous substances), and mixed with cryoprotectants, such as sugar and/or sorbitol, for a good frozen shelf life.

TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING (TALFF). The TALFF, if any, with respect to any fishery subject to the exclusive fishery management authority of the United States, is that portion of the optimum yield of such fishery which will not be harvested by vessels of the United States, as determined by provisions of the MFCMA.

U.S. EXCLUSIVE ECONOMIC ZONE (EEZ). The MSFCMA (Magnuson-Stevens Act) defines this zone as contiguous to the territorial sea of the United States and extending seaward 200 nautical miles measured from the baseline from which the territorial sea is measured. This was formerly referred to as the FCZ (Fishery Conservation Zone).

U.S.-FLAG VESSEL LANDINGS. Includes landings by all U.S. fishing vessels regardless of where landed as opposed to landings at ports in the 50 United States. These include landings at foreign ports, U.S. territories, and foreign vessels in the U.S. FCZ under joint venture agreements. U.S. law prohibits vessels constructed or registered in foreign countries to land fish catches at U.S. ports.

U.S. TERRITORIAL SEA. A zone extending 3 nautical miles from shore for all states except Texas and the Gulf Coast of Florida where the seaward boundary is 3 marine leagues (9 nautical miles)

USE OF FISHERY PRODUCTS. Estimated disappearance of the total supply of fishery products, both edible and nonedible, on a round-weight basis without considering beginning or ending stocks, exports, military purchases, or shipments to U.S. territories.

VESSEL. A commercial fishing craft having a capacity of 5 net tons or more. These craft are either enrolled or documented by the U.S. Coast Guard and have an official number assigned by that agency.

WHOLESALE FISH AND SHELLFISH PRICES. Those prices received at principal fishery markets by primary wholesalers (processors, importers, and brokers) for customary quantities, free on board (f.o.b.) warehouse.

Federal Inspection Marks for Fishery Products

SEAFOOD INSPECTION PROGRAM. The U.S. Department of Commerce (USDC), National Marine Fisheries Service, a part of the National Oceanic and Atmospheric Administration, conducts a voluntary seafood inspection program on a fee-for-service basis. A HACCP-based service is also available. Services provided by the program include vessel and plant sanitation, product inspection and grading, label reviews, product specification reviews, laboratory analyses, training, education and information. Inspection and certification services are available nationwide and in U.S. territories for all interested parties. Consultative services are provided in foreign countries. Inspection and certification services are also provided for imported and exported products. The USDC Seafood Inspection Program also provides HACCP training, plan development, implementation assistance, and verification service to industry (domestic and foreign) for the purpose of demonstrating compliance with FDA's HACCP rule (21 CFR Parts 123 and 1240) regarding "Procedures for the Safe and Sanitary Processing and Importing of Fish and Fishery Products" which was implemented December 18, 1997.

USERS OF INSPECTION SERVICES. The users of the voluntary seafood inspection service include vessel owners, processors, distributors, brokers, retailers, food service operators, exporters, importers, and those who have a financial interest in buying and selling seafood products. The U.S. Department of Agriculture recommends that USDC inspected products be purchased for its food feeding programs. **The USDC APPROVED LIST OF FISH ESTABLISHMENTS AND PRODUCTS**, published bi-annually, provides a listing of products and participants who contract with USDC.

USDC INSPECTION MARKS. These marks designate the level and the type of inspection performed by the federal inspector. The marks can be used in advertising and labeling under the guidelines provided by the Seafood Inspection Division and in accordance with federal and state regulations regarding advertising and labeling. Products bearing the USDC official marks have been certified as being safe, wholesome, and properly labeled.

"US GRADE A" MARK. The U.S. GRADE A mark signifies that a product has been processed under federal inspection in an approved facility and meets the established level of quality of an existing U.S. grade standard. The U.S. Grade A mark indicates that the product is of high quality, uniform in size, practically free from blemishes and defects, in excellent condition and possessing good flavor and odor.

"PROCESSED UNDER FEDERAL INSPECTION" MARK. The PUF mark or statement signifies that the product has been inspected in an approved facility and was found to be safe, wholesome and properly labeled according to approved specifications or criteria. The language within the PUF mark has been amended to "Processed Under Federal Inspection" to reflect actual inspection procedures and the regulatory requirements for use of the mark.

"LOT INSPECTED" MARK. The USDC Lot Inspected mark identifies products that were officially sampled and inspected to conform to an approved specification or criteria. This mark may be used on retail packages and packaging provided the label and specification are approved.

"RETAIL" MARK. In response to requests made by industry, a new mark has been created for retail or food service establishments. Participants qualify for use of the "Retail Mark" by receiving the USDC HACCP-based service or being under contract for sanitation services and associated product evaluation. Usage of such a mark will give the retail industry the opportunity to advertise on their banners, logos, or menus that their facility has been recognized by USDC for proper sanitation and handling of fishery products.

USDC HACCP MARK. The USDC HACCP-based service is available to all interested parties on a fee-for-service basis. Label approval, record keeping and analytical testing are program requirements. An industry USDC-certified employee trained in HACCP principles is also required for each facility/site in the program. Compliance ratings determine frequency of official visits. Benefits to participants include increased controls through a more scientific approach, use of established marks, increased efficiency of federal inspection personnel, and enhanced consumer confidence. The USDC has made available a HACCP mark and a "banner" to distinguish products that have been produced under the HACCP-based program. The HACCP banner must be used as an attachment to existing inspection grade marks. Establishments meeting HACCP program requirements may use these marks in conjunction with promotional material, packaging, point-of-sale notices, and menus.
