NOAA TECHNICAL MEMORANDUMS

National Environmental Satellite Service Series

The National Environmental Satellite Service (NESS) is responsible for the establishment and operation of the environmental satellite systems of NOAA.

NOAA Technical Memorandums facilitate rapid distribution of material that may be preliminary in nature and so may be published formally elsewhere at a later date. Publications 1 through 20 and 22 through 25 are in the earlier ESSA National Environmental Satellite Center Technical Memorandum (NESCTM) series. The current NOAA Technical Memorandum NESS series includes 21, 26, and subsequent issuances.

Publications listed below are available from the National Technical Information Service, U.S. Department of Commerce, Sills Bldg., 5285 Port Royal Road, Springfield, Va. 22161. Prices on request. Order by accession number (given in parentheses). Information on memorandums not listed below can be obtained from Environmental Data Service (D822), 6009 Executive Boulevard, Rockville, MD 20852.

To date, the series consists of NESC TM 1 (for 1958-66); 2 (1967); 11 (1968); and 22 (1969), and NOAA TM NESS 31 (1970); 38 (1971); 46 (1972); 55 (1973); 69 (1974); 79 (1975); and 92 (1976). This issue lists items published or received during 1977 and includes items omitted from previous issues.

In this memorandum, many entries are followed by an identification enclosed in parentheses. Use of these numbers will facilitate ordering copies of a report from the National Technical Information Service (NTIS--see inside cover) or from the Superintendent of Documents, U. S. Government Printing Office. Items with identification numbers prefaced by PB or COM are ordered from NTIS; items identified by number and a price, e.g., (COM-7100132) (GPO \$0.50) are available in microfiche from NTIS or in hard copy, at the price shown, from the Superintendent of Documents. Reprint copies of articles listed in Publications by Staff Members, NESS, will be furnished free of charge as long as supplies are on hand, copies of books listed must be obtained from the publishers, copies of reports on contracts or grants will be supplied to qualified requestors when available.
