NOAA TECHNICAL MEMORANDUMS

National Earth Satellite Service Series

The National Earth Satellite Service (NESS) is responsible for the establishment and operation of NOAA's environmental satellite systems.

NOAA Technical Memorandums facilitate rapid distribution of material that may be preliminary in nature and so may be published formally elsewhere at a later date. Publications 1 to 20 and 22 to 25 are in the earlier ESSA National Environmental Satellite Center Technical Memorandum (NESCTM) series. The current NOAA Technical Memorandum NESS series includes 21, 26, and subsequent issuances.

Publications listed below are available (also in microfiche form) from the National Technical Information Service, U.S. Department of Commerce, Sills Bldg., 5285 Port Royal Road, Springfield, VA 22161. Prices on request. Order by accession number (given in parentheses). Information on memorandums not listed below can be obtained from Environmental Data and Information Service (OA/D812), 11400 Rockville Pike, Rockville, MD 20852.

PREFACE

This technical memorandum is one of a series (see inside covers) containing lists of articles and reports published by or for the National Earth Satellite Service (NESS). To date, the series consists of NESCTM 1 (for 1958-1966), 2 (1967), 11 (1968), and 22 (1969); NOAA TM NESS 31 (1970), 33 (1971), 45 (1972), 55 (1973), 69 (1974), 79 (1975), 92 (1976), 97 (1977), 104 (1978), 108 (1979), and 115 (1980).

This issue lists items published or received during 1981 and includes items omitted from the previous issue.

In this memorandum, several entries (most of which are also listed on the inside cover) are followed by parentheses enclosing numbers prefaced by P3 or COM. Use of these numbers will facilitate ordering copies. Reprints of articles listed in Publications by Staff Members will be furnished free of charge as long as supplies last, the books listed must be obtained from the publishers, and copies of reports on contracts or grants will be supplied to qualified requestors when available.

Mention of a commercial company or product does not constitute an endorsement by the NESS. Use for publicity or advertising purposes of information from this publication concerning proprietary products or the tests of such products is not authorized.

NOAA SCIENTIFIC AND TECHNICAL PUBLICATIONS

The National Oceanic and Atmospheric Administration was established as part of the Department of Commerce on October 3, 1970. The mission responsibilities of NOAA are to assess the socioeconomic impact of natural and technological changes in the environment and to monitor and predict the state of the solid Earth, the oceans and their living resources, the atmosphere, and the space environment of the Earth.

The major components of NOAA regularly produce various types of scientific and technical information in the following kinds of publications:

PROFESSIONAL PAPERS — Important definitive research results, major techniques, and special investigations.

CONTRACT AND GRANT REPORTS — Reports prepared by contractors or grantees under NOAA sponsorship.

ATLAS — Presentation of analyzed data generally in the form of maps showing distribution of rainfall, chemical and physical conditions of oceans and atmosphere, distribution of fishes and marine mammals, ionospheric conditions, etc.

TECHNICAL SERVICE PUBLICATIONS — Reports containing data, observations, instructions, etc. A partial listing includes data serials; prediction and outlook periodicals; technical manuals, training papers, planning reports, and information serials; and miscellaneous technical publications.

TECHNICAL REPORTS — Journal quality with extensive details, mathematical developments, or data listings.

TECHNICAL MEMORANDUMS — Reports of preliminary, partial, or negative research or technology results, interim instructions, and the like.

Information on availability of NOAA publications can be obtained from:
