

S4 Table. Summary of Tukey HSD results for the mesocosm study *Callinectes sapidus* handling time interaction term between species and habitat. For each pairwise comparison, 95% confidence intervals (CI) and adjusted p values are presented. Data were fourth-root transformed prior to analysis and are not back-transformed. Only interactions with significant p values at  $\alpha = 0.20$  are shown.

<i>Species and Habitat Comparison</i>	<i>Difference</i>	<i>Lower CI</i>	<i>Upper CI</i>	<i>Adjusted p value</i>
<i>Mercenaria x shell-Mya x oyster</i>	0.54	-0.02	1.1	0.06
<i>Mercenaria x shell-Mya x shell</i>	0.47	-0.09	1.02	0.15
<i>Mercenaria x shell-Mercenaria x sand</i>	0.46	-0.1	1.02	0.17
