

S5 Table. Summary of Tukey HSD results for the mesocosm study *Callinectes sapidus* search time interaction term between species and density. For each pairwise comparison, 95% confidence intervals (CI) and adjusted p values are presented. Data were fourth-root transformed prior to analysis and are not back-transformed. Only interactions with significant p values at $\alpha = 0.20$ are shown.

<i>Species and Density Comparison</i>	<i>Difference</i>	<i>Lower CI</i>	<i>Upper CI</i>	<i>Adjusted p value</i>
<i>Mya x med-Mya x low</i>	0.57	0.24	0.91	0.0003
<i>Mya x med-Mercenaria x low</i>	0.35	0.02	0.69	0.04
<i>Mercenaria x med-Mya x med</i>	-0.37	-0.70	-0.03	0.03
