Oceanography Branch CTD Data Report

CTD_REPORT_2009010DE

NOAA Fisheries Service
Northeast Fisheries Science Center
Woods Hole, MA 02543

DE 09-10
HydroAcoustic Survey
Data Coverage: 13 September – 15 October
GOM, MAB, GB

This report presents a summary of surface and bottom temperature and salinity data collected during the Northeast Fisheries Science Center's HydroAcoustic research survey aboard the NOAA FSV *Delaware II*. All data was obtained with Seabird Electronics SBE Model 19+ profiling CTDs (s/n 4758 and s/n 4759).

Please note there is no data for stations 98, 100, 102, 103, and 104.

Data presented here have been audited, however, corrections and/or updates may be applied at a later time.

The most recent and complete station data can be found in an NODC formatted ASCII file at:

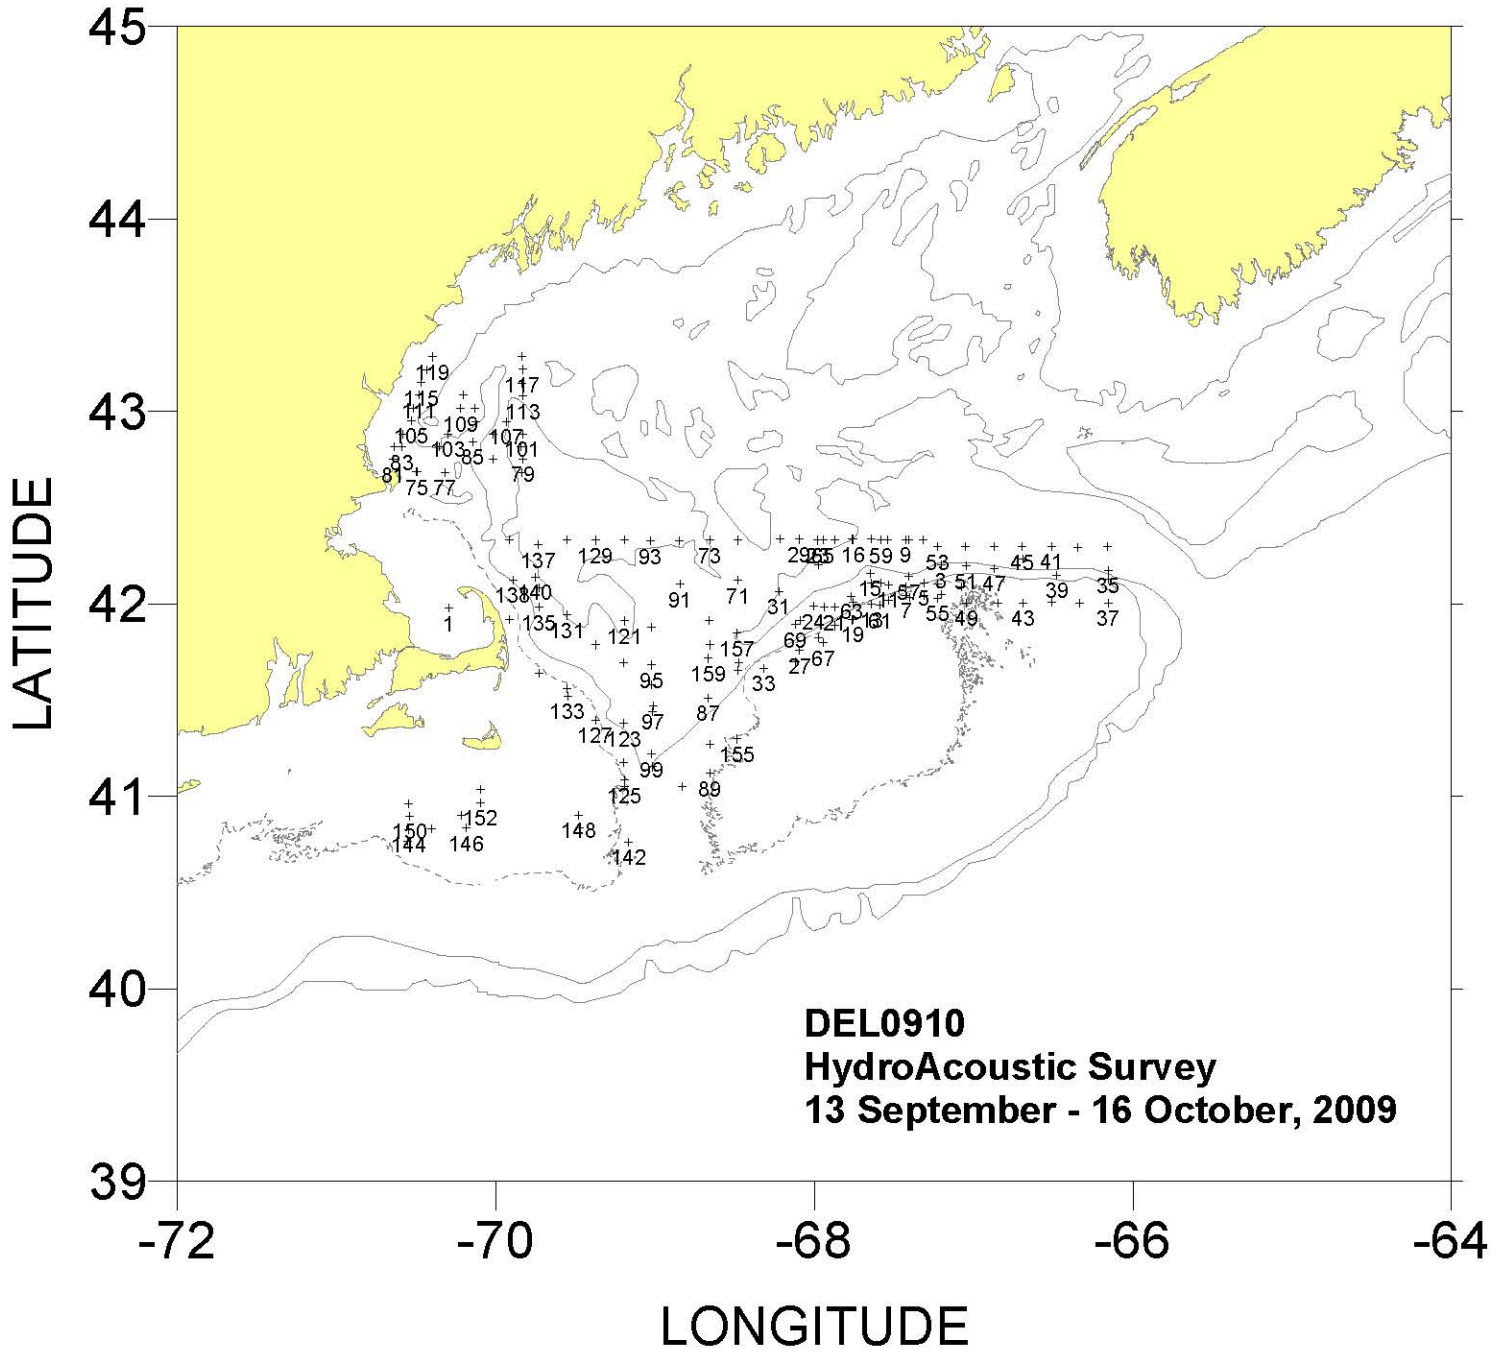

<ftp://ftp.nefsc.noaa.gov/pub/hydro/del0910.dat>

This report may be viewed on the Oceanography Branch website at:

<http://www.nefsc.noaa.gov/HydroAtlas/>

"CRUISE", the code name for a cruise: "CD", the calendar mid-date of all the stations within a region for a cruise:

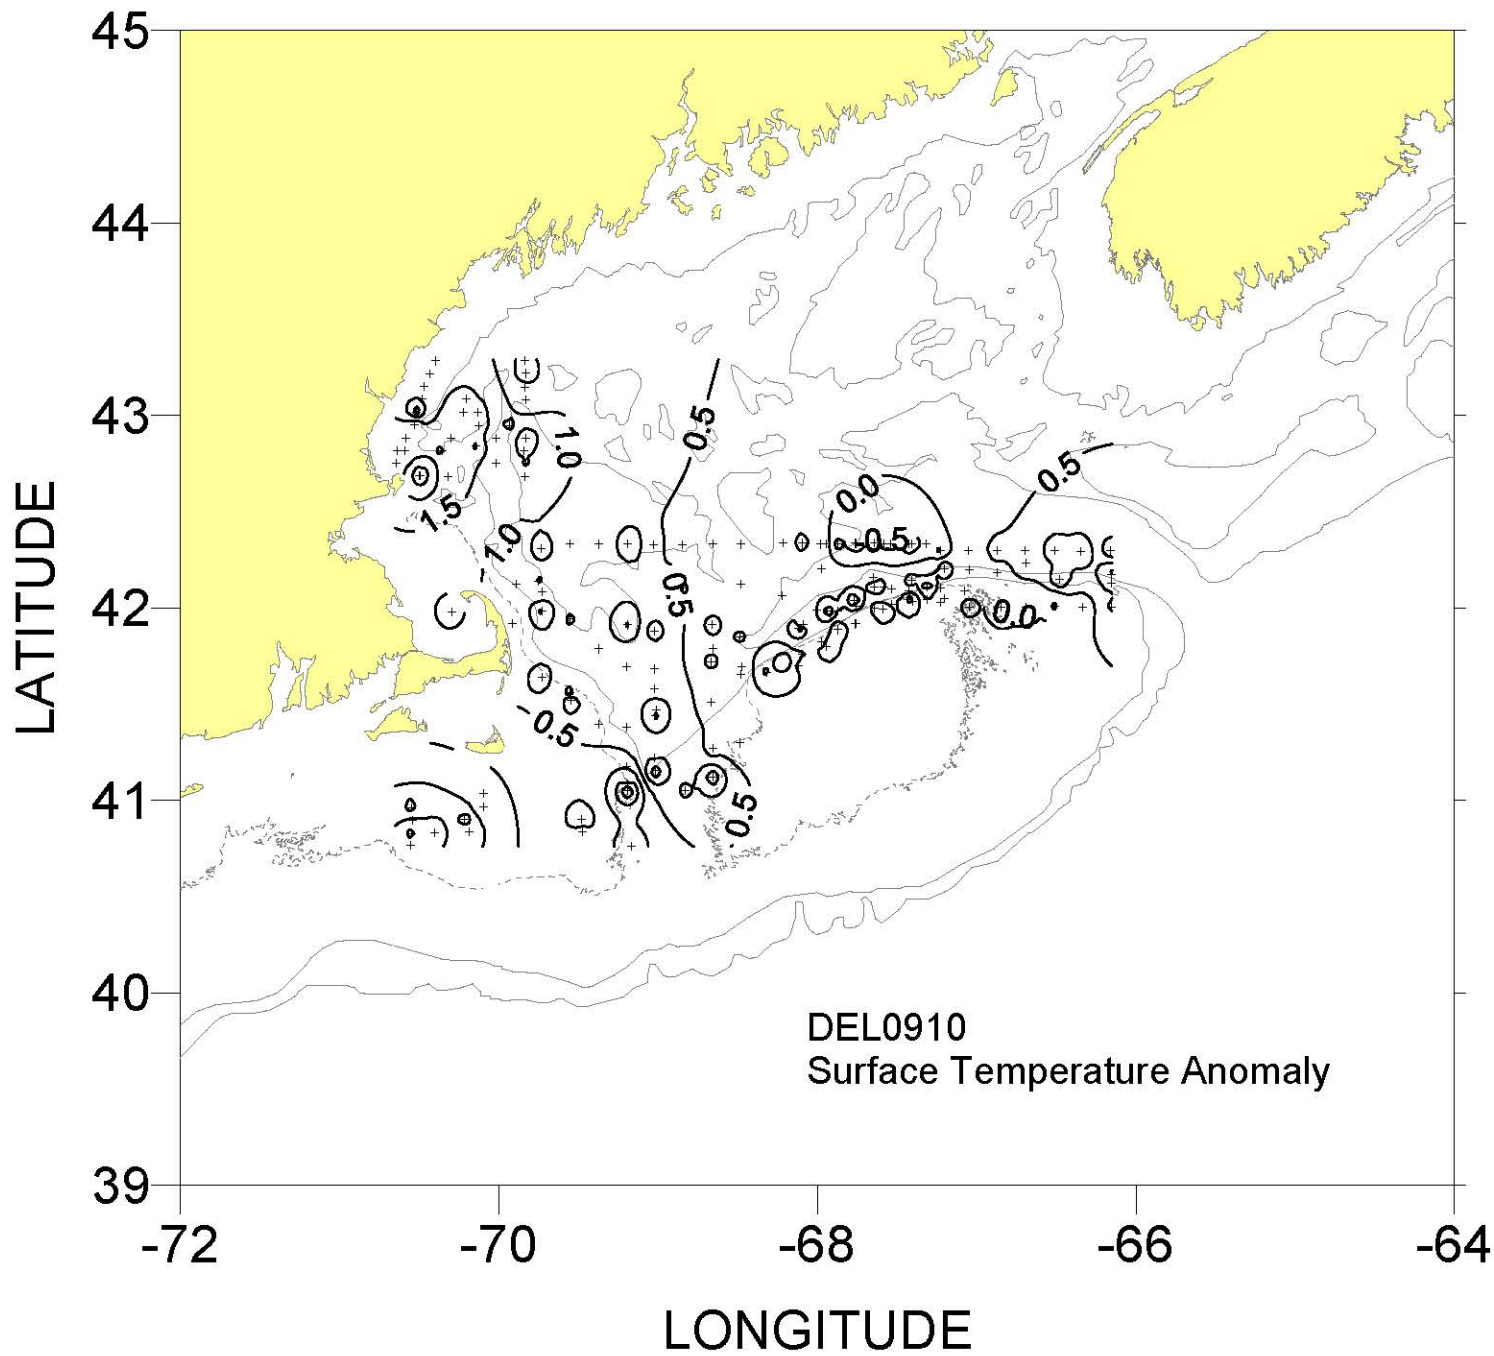

"#obs", the number of observations include in each average: "T/S", the areal average temp/salt: "Anomaly", the areal average temp/salt anomaly:

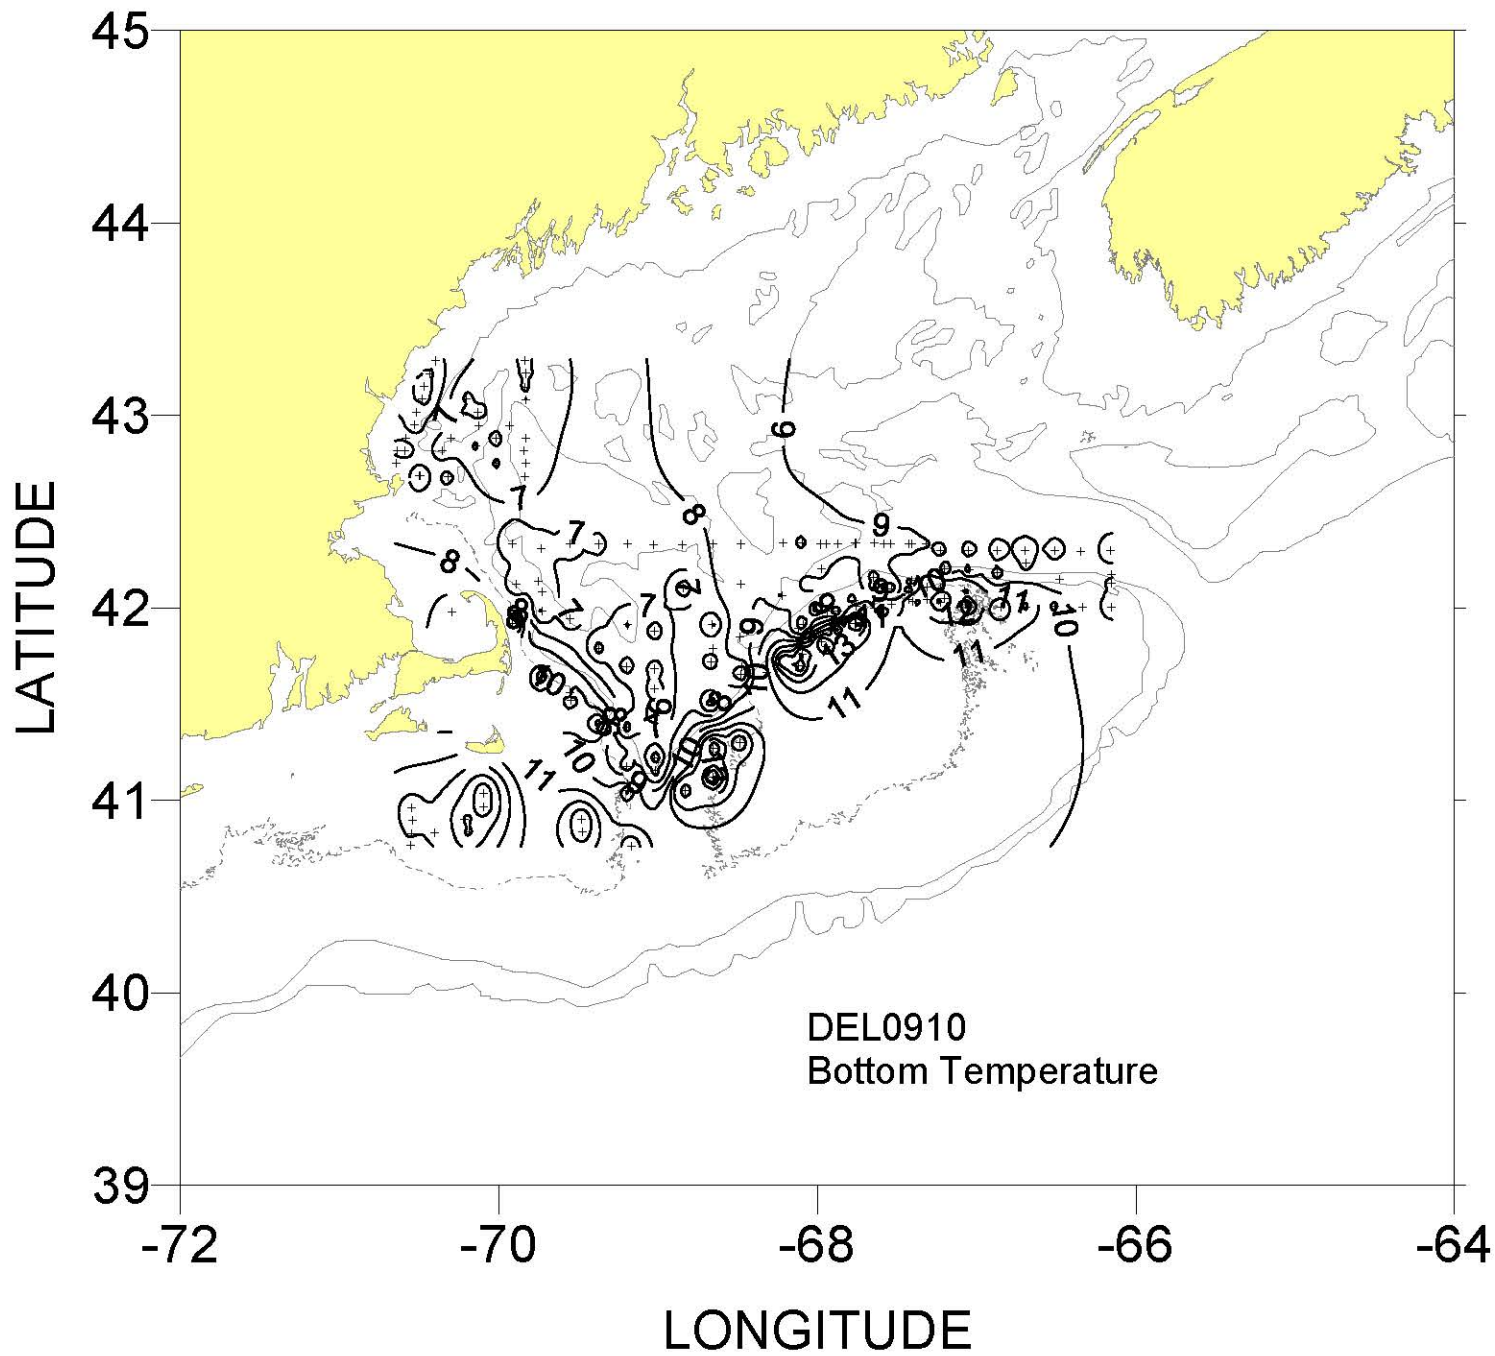

"SDV1", the standard deviation associated with the average temp/salt anomaly: "SDV2", the standard deviation of the individual anomalies from which the average anomaly was derived

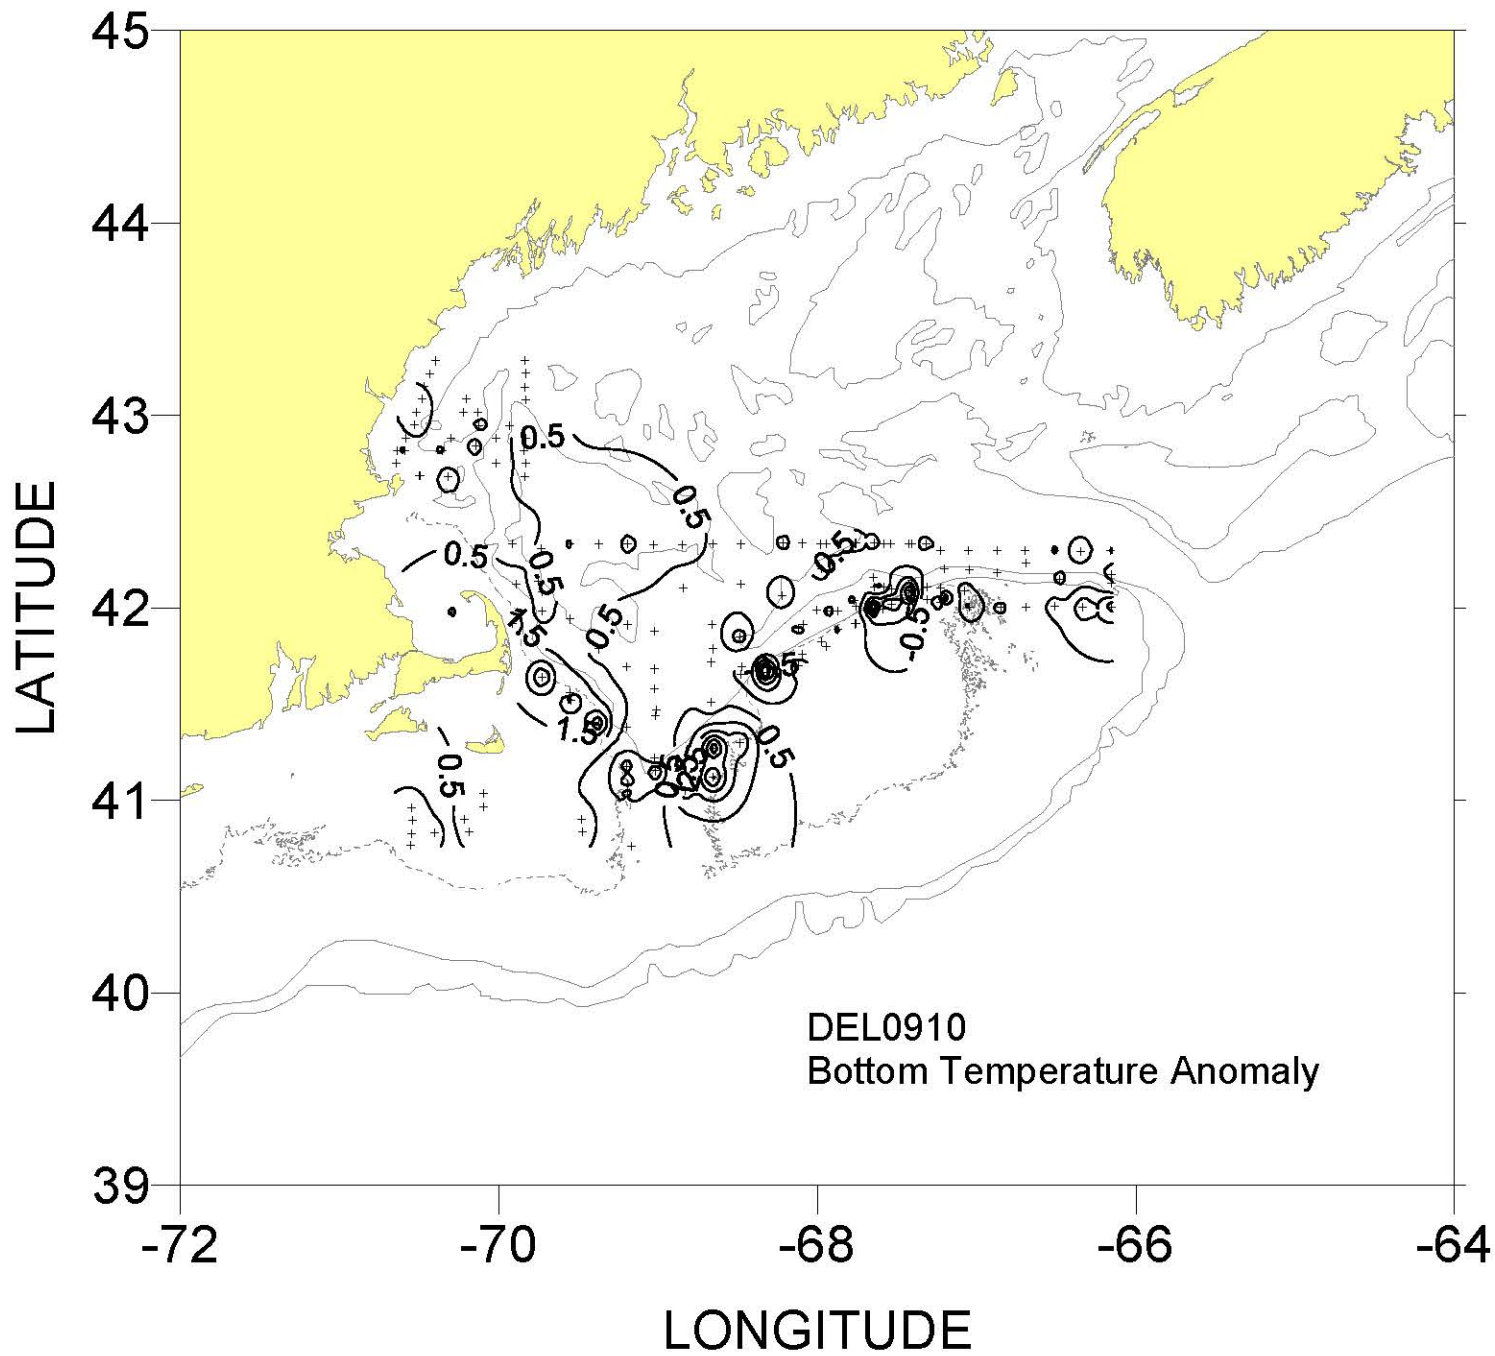

"Flag", a value of "1" indicates that a true areal average could not be calculated due to poor station coverage. The areal averages listed were derived from a simple average of the observations within the region.

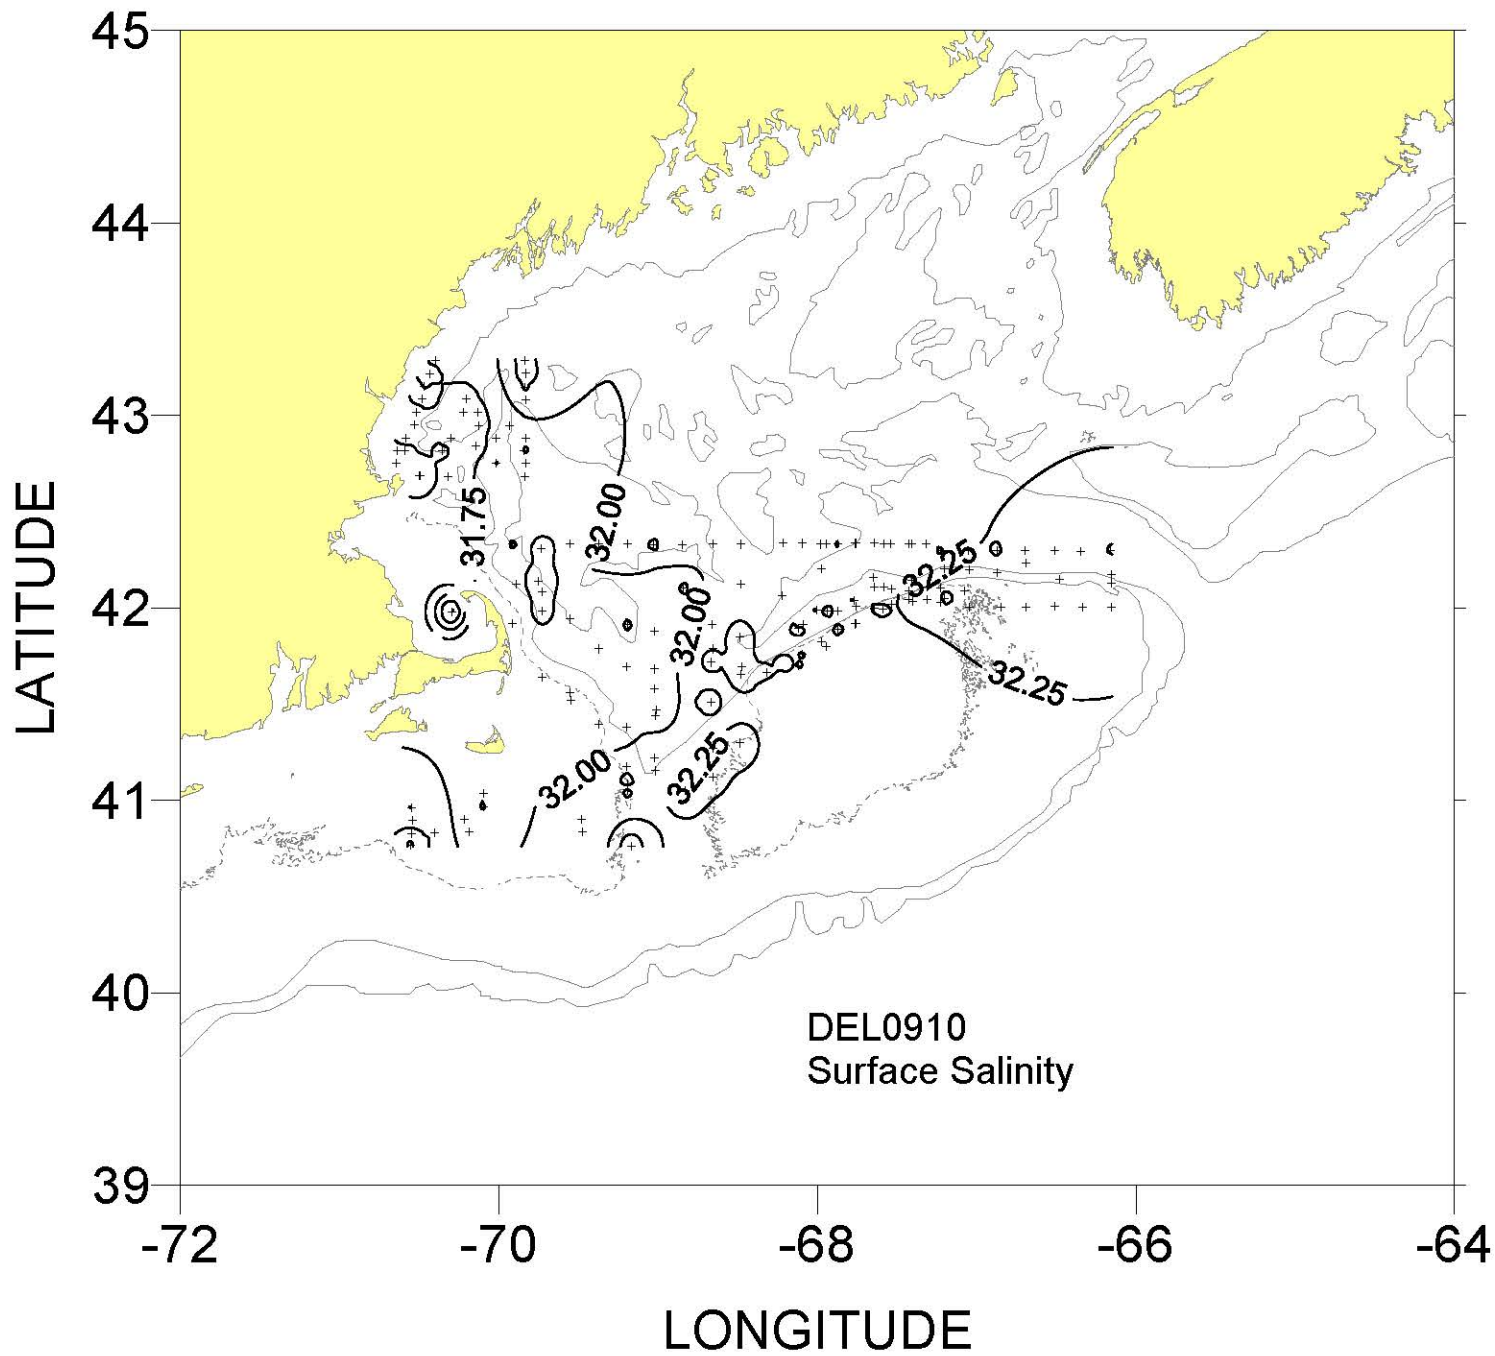

"Purpose", 2 digit code assigned by DMS to identify a unique NEFSC program survey.
