"Region", the geographic region of the northeast continental shelf.; "CD", the calendar mid-data of all the stations within a region
"# obs", the number of observations included in each average: "Temp/Salt", the areal average temperature/salinity:

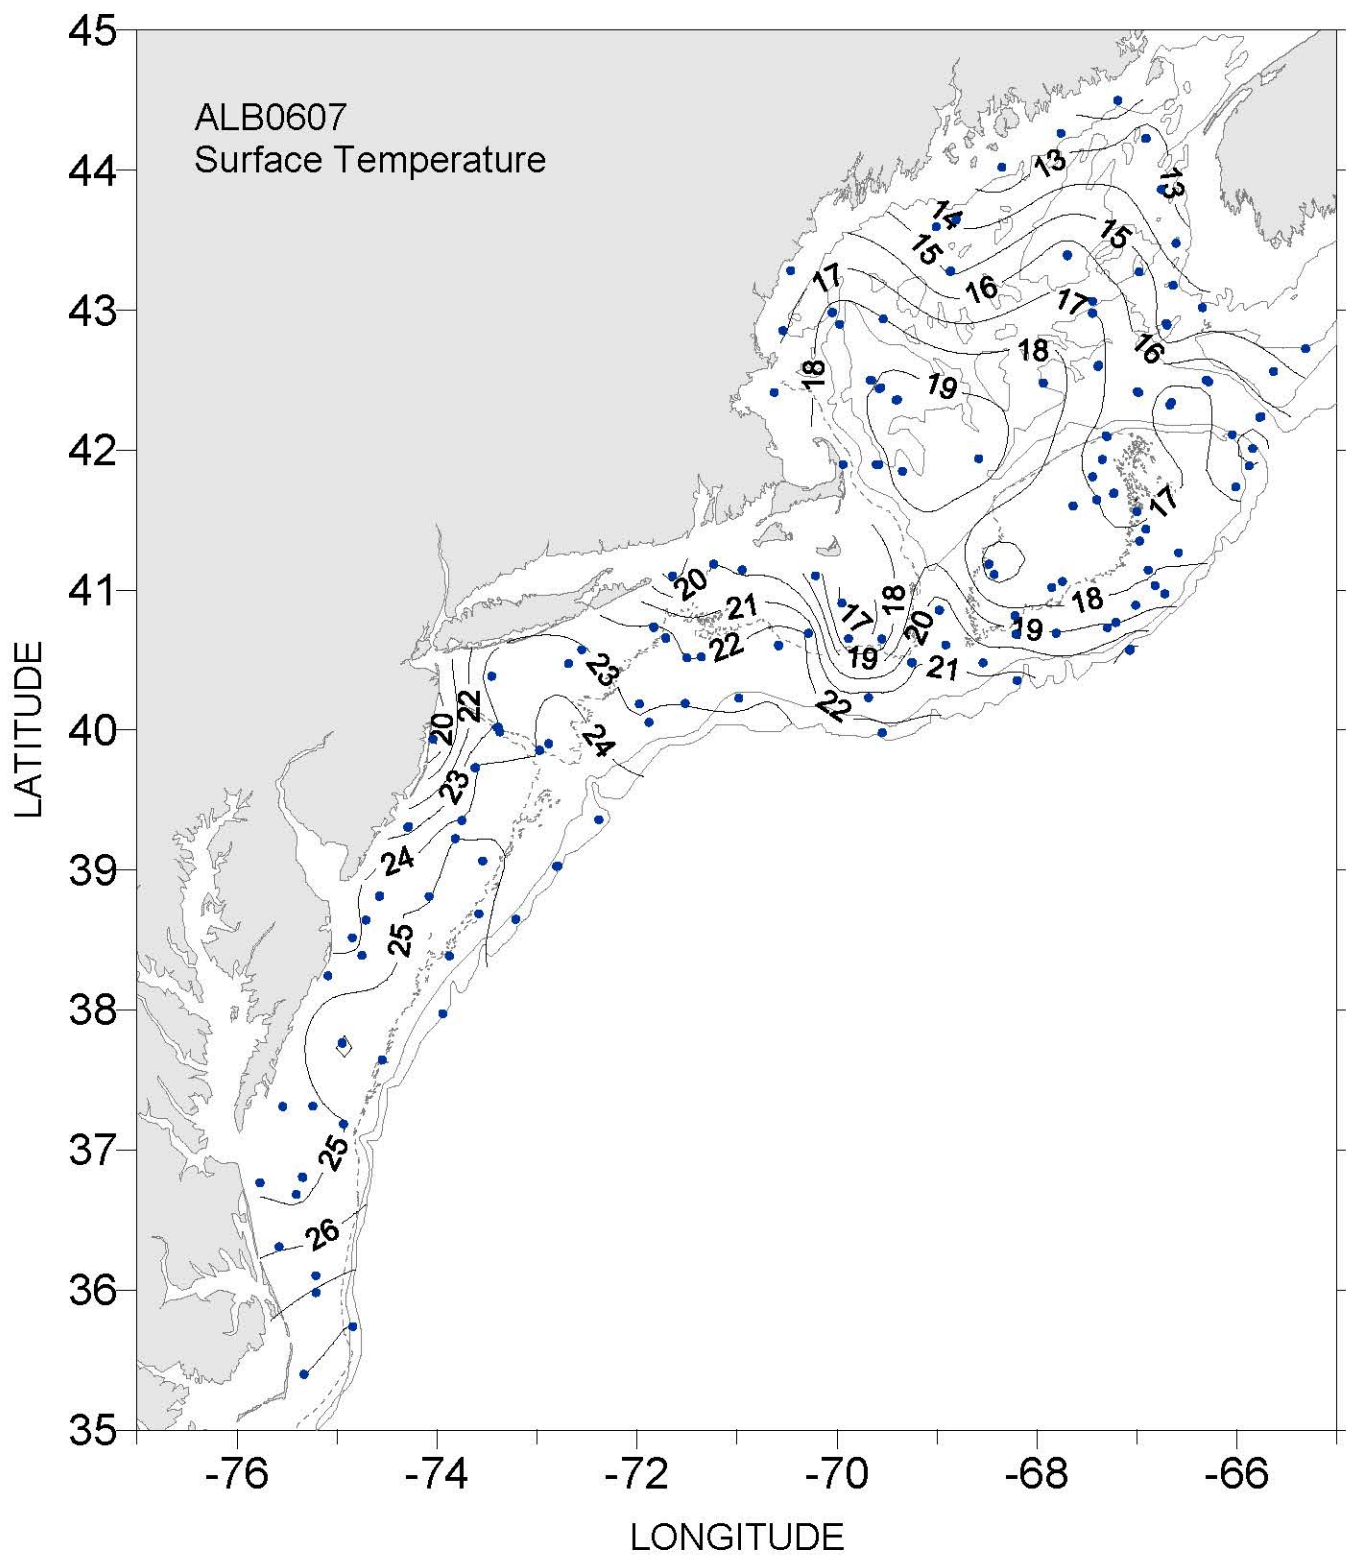

for a time period:

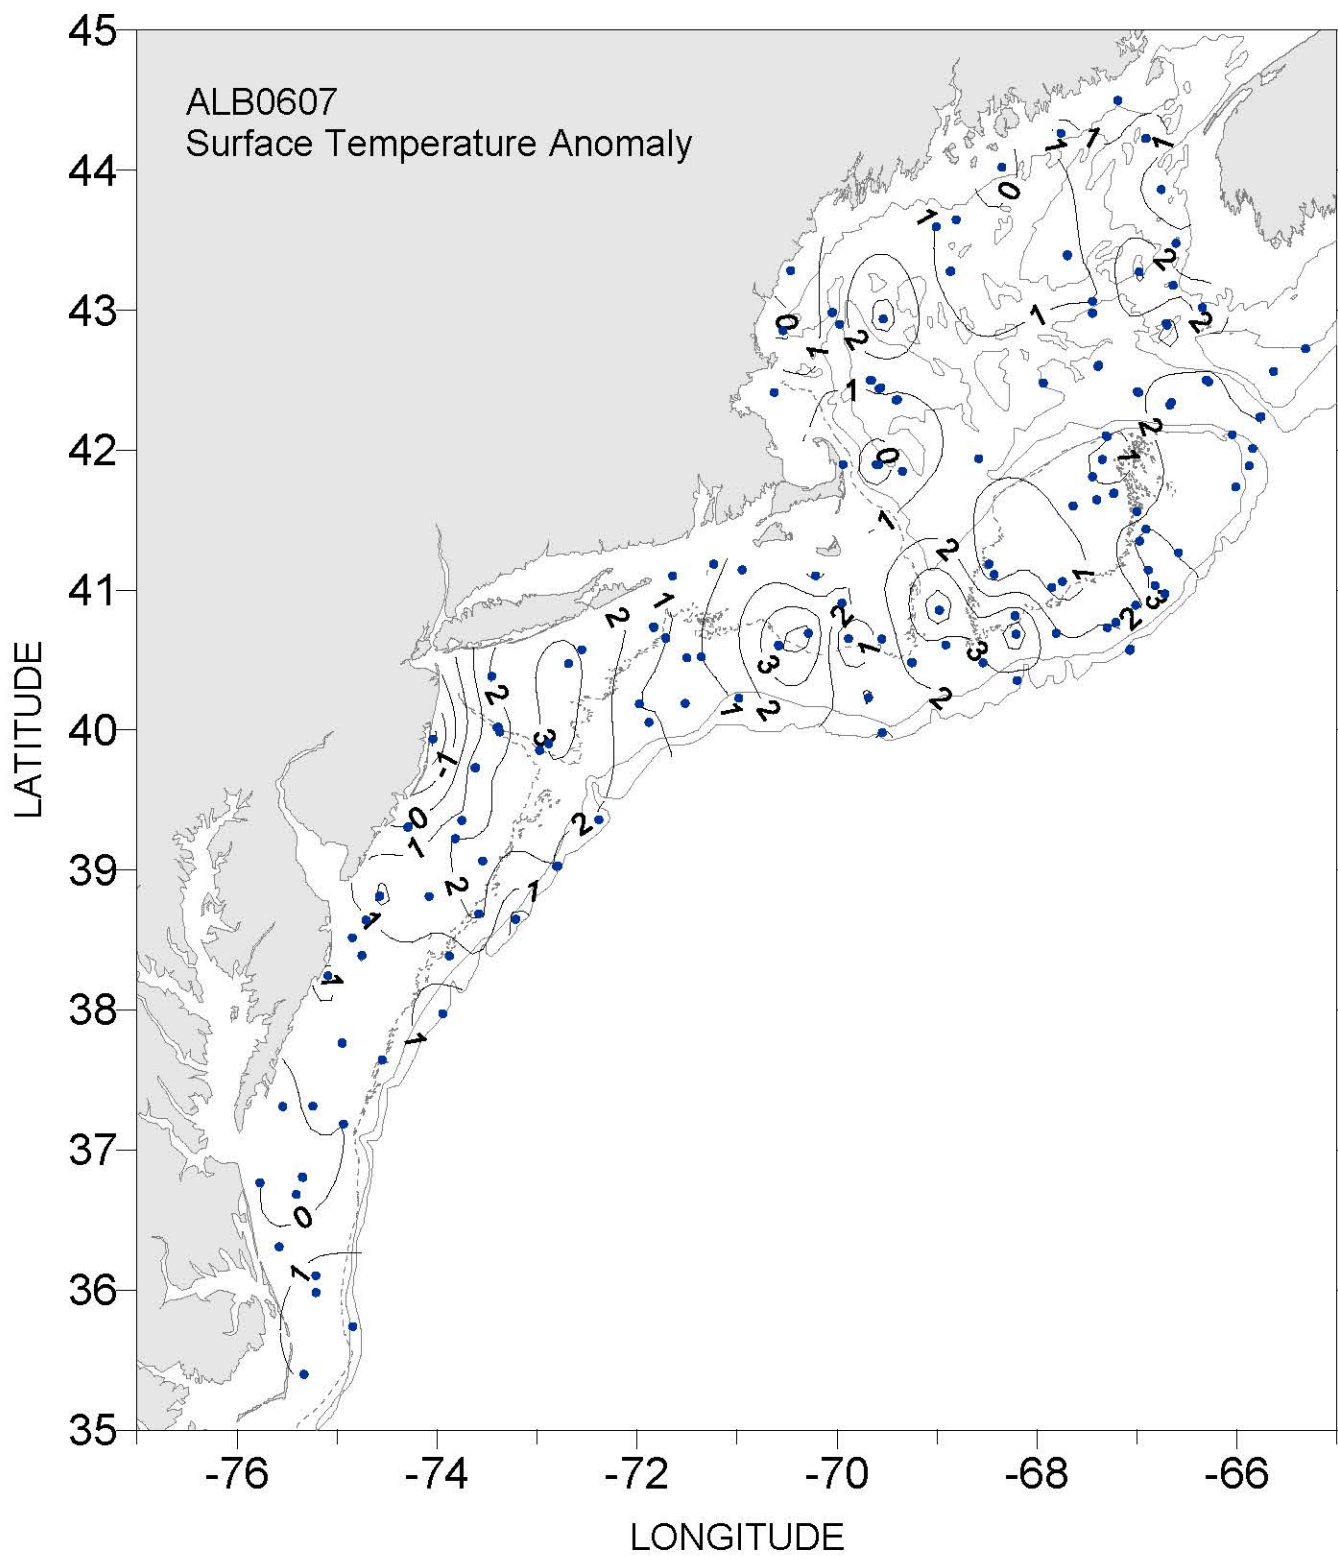

"Anomaly", the areal average t/s anomaly: "SDV1", the standard deviation associated with the average t/s
anomaly: "SDV2", the standard deviation of the individual anomalies from which the average anomaly was derived

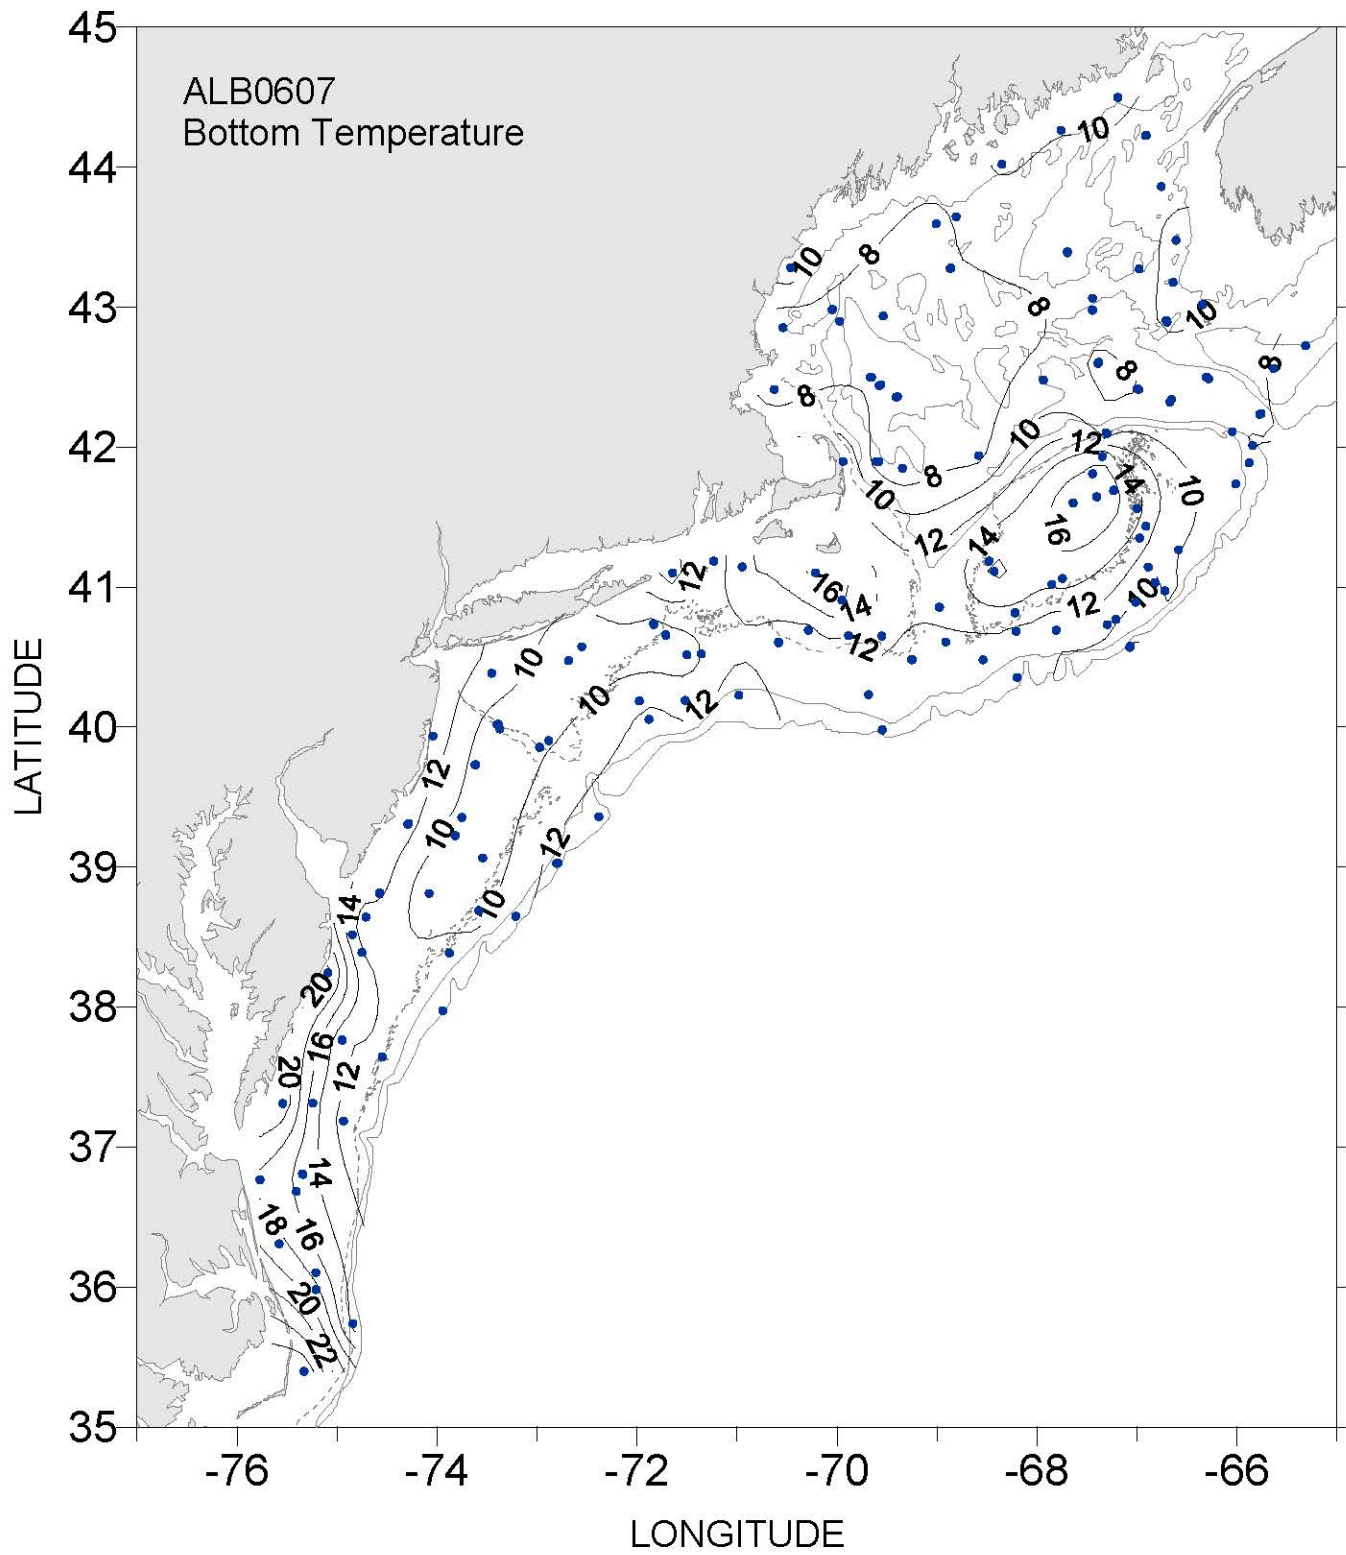

"Flag", a value of "1" indicates that a true areal average could not be calculated due to poor station coverage.
average values listed were derived from a simple average of the observations within the region

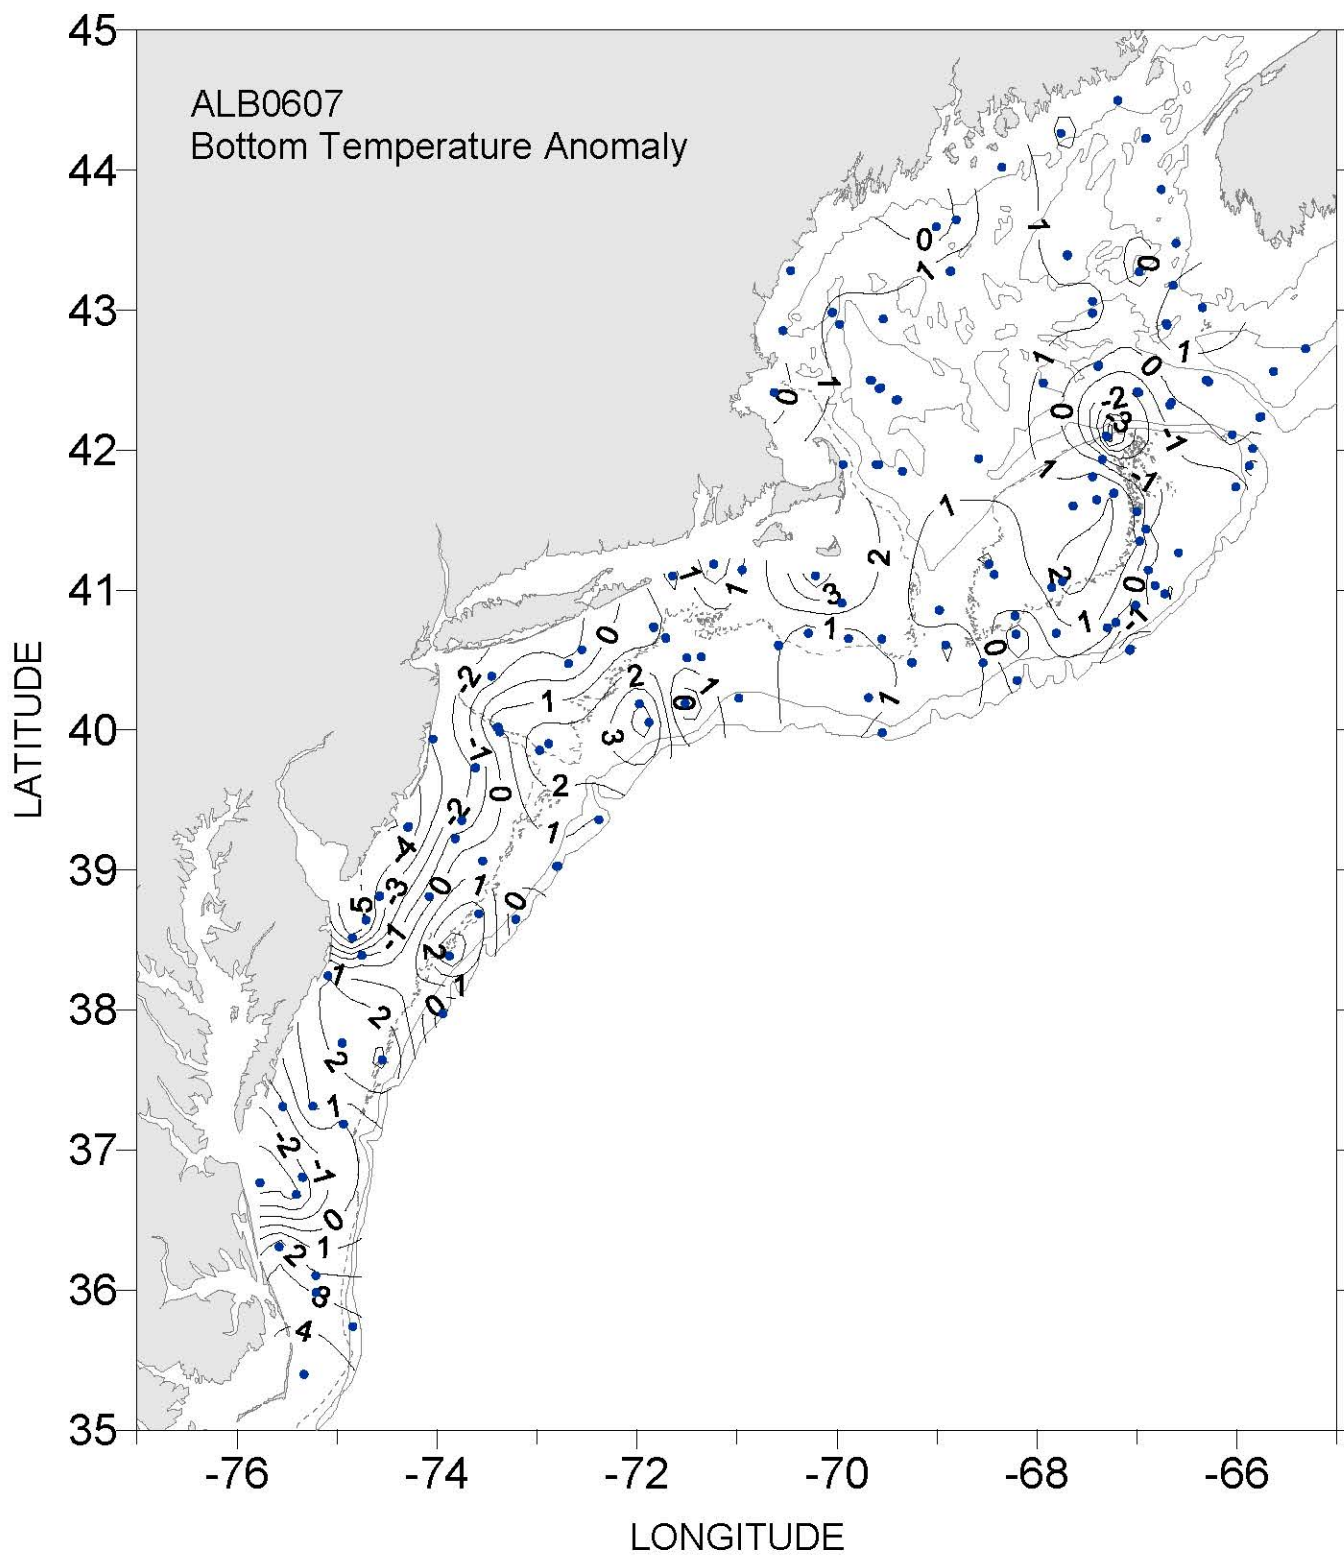

h

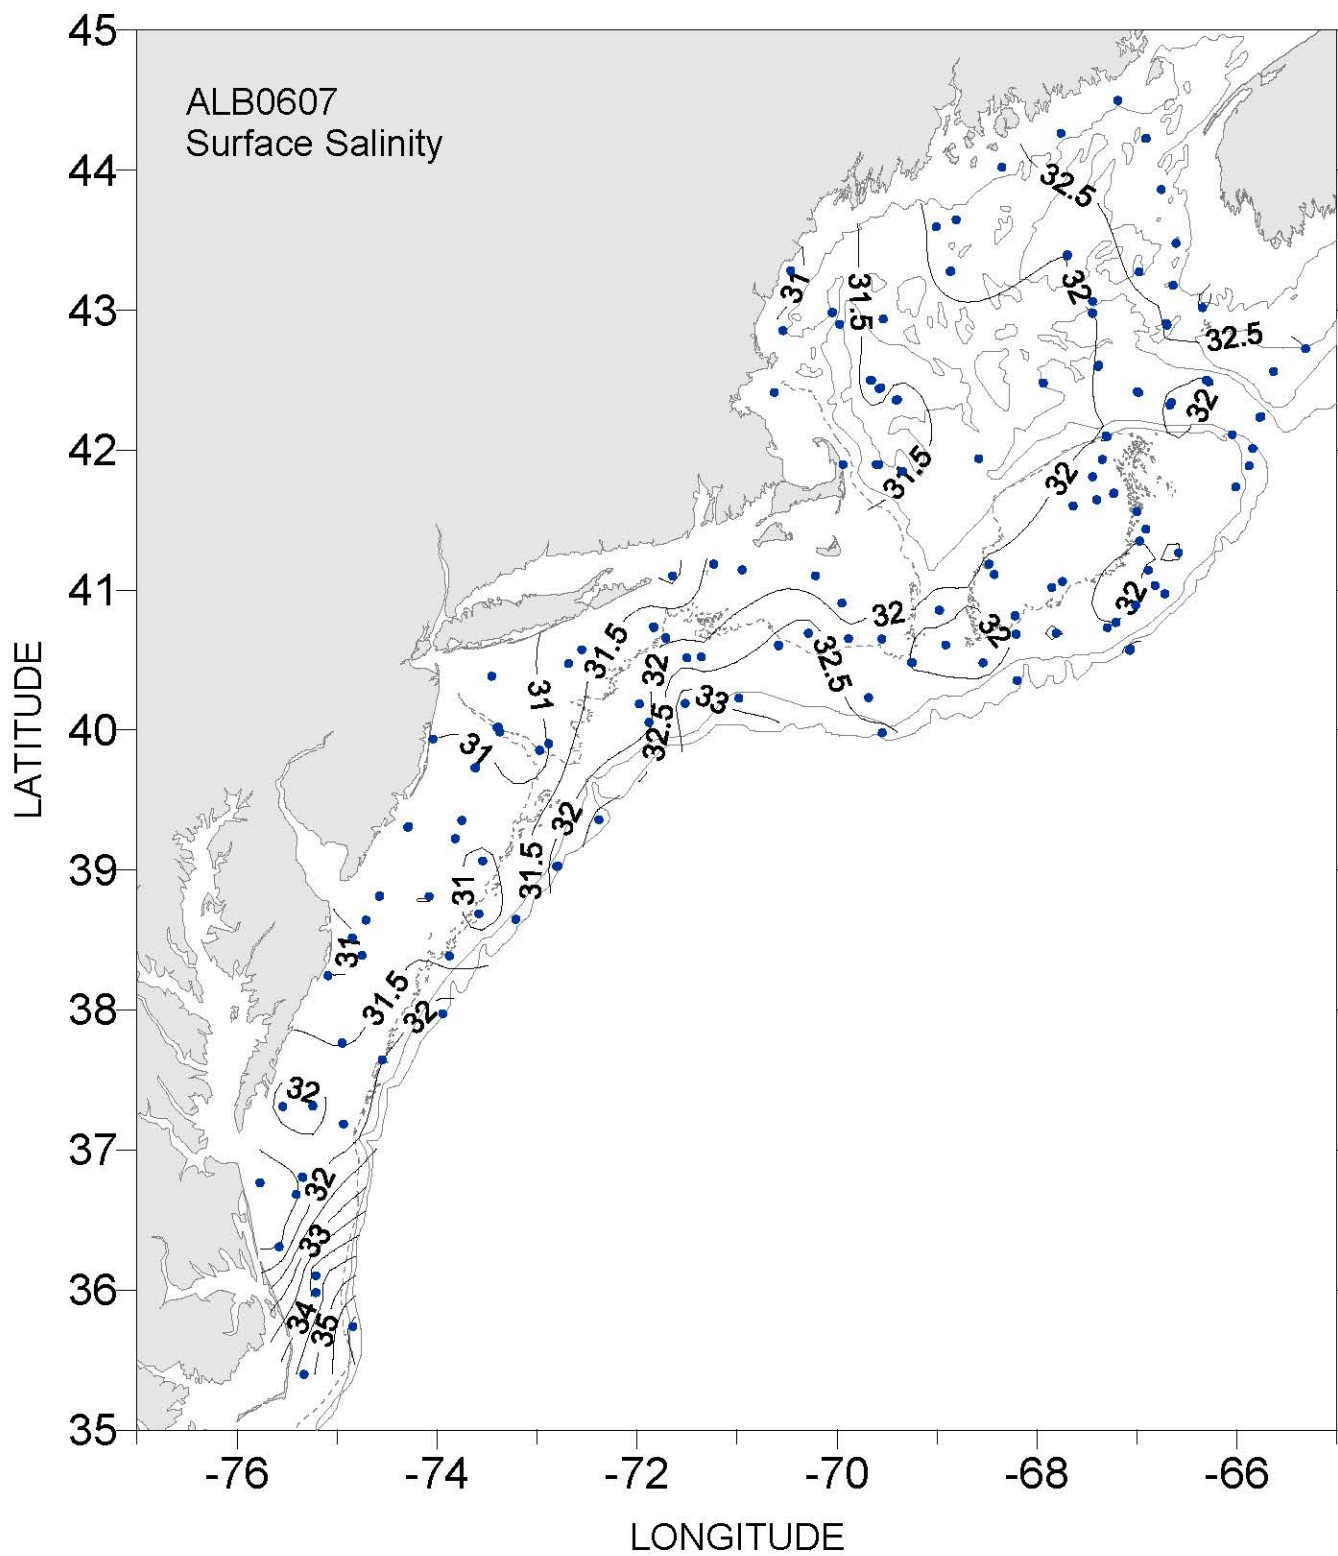

*** 100m station depth exclusion used for regions: Georges Bank, MAB North, and MAB Sout
