September 17, 2003

MEMORANDUM FOR: David Mountain
Jerry Prezioso
Carolyn Griswold
John Sibunka

FROM: Maureen Taylor (ext 2306)

SUBJECT: Argo-Maine 03-01 ECOMON Survey

CTD data from the August ECOMON survey, AM0301, have been processed and are now available in the following locations:

- * whsun2: /ftp/pub/hydro/arm0301.dat (ASCII NODC file)
(and in /data4/hydro)
- * ORACLE Tables: hydro_cruise, hydro_event, hydro_data
- * arm0301.pdf (distributed via email)

There were a total of 86 casts successfully completed including 15 salinity calibration samples. In addition, surface and near bottom samples were taken for total chlorophyll concentration whenever a salinity calibration sample was taken. When the chlorophyll values are available, I will compute the regression for extracted chlorophyll and fluorometer voltage and append to this document.

Please let Cristina Bascuñán or me know if you have any questions concerning this data and for future cruise needs.

COASTWATCH image: 24 August 2003

Areal average surface and bottom temp / salt and anomalies for August ECOMON survey AM0301.

(1) "CRUISE", the code name for a cruise: "CD", the calendar mid-date of all the stations within a region for a cruise: "# obs", the number of observations included in each average: "T / S", the areal average temp / salt: "Anomaly", the areal average temp/salt anomaly: "SDV1", the standard deviation associated with the average temp/salt anomaly: "SDV2", the standard deviation of the individual anomalies from which the average anomaly was derived.

(*) A true areal average could not be calculated due to poor station coverage. The average values listed were derived from a simple average of the observations within the region.

AM0301 Summer Ecomon Survey

20 - 28 August, 2003
