I. INTRODUCTION: THE INDEX AND ITS USE

Background*

This Index began in the context of two larger endeavors financed by the National Science Foundation at the University of Washington, (1) the Treaty Information Project (T.I.P.) directed by Professor Peter H. Rohn and (2) the Ocean Law Program directed by Professor William T. Burke.

Since the Index deals with relatively few treaties (300 compared to 14,000 for the T.I.P.), it has been possible to distribute the Index prior to completion of the T.I.P. data bank. Consequently, much of the information in the first section of the Index (particularly treaty obligations - Table III and signature dates - Table II) was obtained manually. This process is bound to have introduced errors, but every effort has been made to keep these to a minimum.

By the time a final revised version of the Index is ready, most or all T.I.P. data should be machine-retrievable thus greatly increasing both the quality and quantity of the Index. The T.I.P. should be especially helpful in providing procedural data for the marine treaties covered. This should serve to supplement the largely substantive information provided in this edition of the Index.

The success of this Index in providing a detailed way of referencing the content of marine treaties will be determined largely by user evaluations.

*I wish to thank James Easterling for coding assistance, Trudy Flynn and Clare Gamble for typing and clerical help, and Wen-ling Chu for computer programming.

For much future work to be justified two conditions must be met. First, a number of people must have need for the type of information included in the Index. And, second, the Index must present the information in a usable format. For these reasons I cannot stress too strongly the importance of users taking time to complete the questionnaire included at the end of the Index.

Coverage

This Index includes all marine treaties found in volumes 1-598 of the United Nations Treaty Series (U.N.T.S.). Marine has been defined as including the following:

- a. fisheries and fishing
- b. oceans and ocean resources
- c. frontier waters (oceans and rivers)
- d. navigation (not including commerce and trade)
- e. water vessel operation.

Obviously these categories are not completely distinct. There are bound to be judgmental errors of inclusion or exclusion. Doubts about coverage can be resolved by consulting Section II which contains a listing of all treaties included. A brief look at this will provide the user with a feel for the type of information contained in the Index.

About 300 treaties are included varying greatly in length and relevance of content. The average treaty required about eleven entries (combinations of 2 to 4 words) to represent its content. Throughout the coding of the treaties, it was necessary to make judgments about how much detail to include. The amount of detail depended in part on how closely treaties corresponded to the criteria specified above. Another facet of the detail problem

was proper names. Generally speaking the criterion applied was this: if the name of a river, lake, etc. were mentioned in the headnote of the treaty, it was included in the Index and can be used to find a reference.

The list of words (dictionary) by which the content of treaties is represented was inductively produced -- that is, during the coding process, words were added as needed. The dictionary totaled 644 words by the time the last treaty was coded. About one-third of these words are suitable for referencing the content. For example, the words "action," "disease," "equal," "meeting," and "regulation" are in the dictionary but none of them is used as the initial word by which an entry is alphabetized. The list of words used to alphabetize entries can be found on page 5.

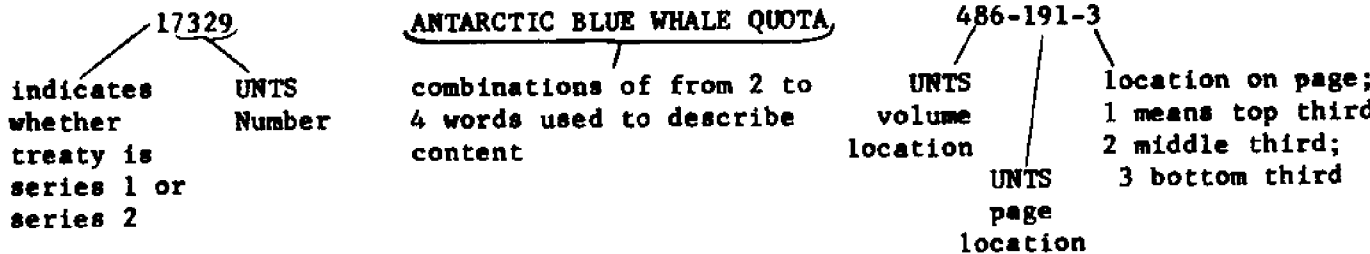

Organization and Use of the Index

The Index itself is divided into three sections each of which contains the same information arranged in a different way. Index -- part I is ordered first by U.N.T.S. treaty number and then by the order in which content appears in the U.N.T.S. Index -- part II is ordered first by treaty number and then alphabetically by content. Index -- part III is ordered alphabetically by content.

The section of the Index used depends upon the type of information being sought. If the user is interested in a specific type of information (e.g., salmon fishing), he should consult part III, the alphabetical index. If the needed information deals with a certain country or one particular treaty, it probably would be preferable to use parts I and II perhaps first checking the listing of country treaty obligations. It is impractical to provide exact rules for using the Index. A little experimentation with the

three sections should suggest the best approach for meeting individual requirements.

The following example will serve to illustrate the format of entries encountered in the Index.

Entries appear in the Index in all meaningful alphabetical orders. The above entry would be indexed thrice, under ANTARCTIC, BLUE, and WHALE. When using the Index these changes in word order must be borne in mind, otherwise confusion about the meanings of entries could result.

ALL USERS ARE URGED TO FILL OUT THE EVALUATION QUESTIONNAIRE CONTAINED IN THE BACK OF THE INDEX. THIS IS THE ONLY MEANINGFUL WAY WE CAN REVISE AND IMPROVE THE INDEX.

III. MARINE TREATY COMMITMENTS BY COUNTRY

NOTE: This table is particularly vulnerable to omissions. Accessions to treaties can occur years after signature. To complicate matters further, new treaty obligations are often slow to find their way into the U.N.T.S. When the data bank of the Treaty Information Project is operational, a relatively error-free table of this sort will be easily attainable. Until that time, users are advised against relying absolutely upon the information given here, although errors of commission will probably be rare.

Please use this form to evaluate the Index to Marine Treaties Registered with the U.N. Future work on the Index will be determined largely by the needs of users. This questionnaire is designed to make it easy for you to comment on the Index. If you desire to make further points in a separate letter, these will be very carefully considered.

1. User's name _____
address _____
occupation _____
2. What type of information did you try to find in the Index? _____

3. When using the Index what specific terms did you look under? _____

4. Which portion of the Index did you use more, the alphabetical part or the parts ordered first by treaty number? _____

5. Please evaluate the organization and ease of use of the Index.
poor fair good excellent (circle one) comments: _____

6. How much of the marine-related information you sought was included in the Index?
none little some most all (circle one) comments: _____

7. The following changes to the Index are being considered; please estimate how much value each would be to your particular research need. Circle one for each.
