

Climate Ready Ohio

Module 3 Notes

The Climate Ready Ohio PowerPoint slides are designed to replace or complement some of the slides in Climate Ready Great Lakes. In addition, these notes provide suggestions for small alterations to the standard Module 3 text to make the presentation more applicable to Ohio audiences.

The Climate Ready Great Lakes modules and supporting information are available at <http://www.regions.noaa.gov/great-lakes/resources/climate-ready-great-lakes>.

Slide 23: Add this sentence to the notes section (copied from slide 25) to make the connection between the Maryland activity and the Great Lakes more obvious. "This exercise was specifically made for Maryland; however, it can be adapted for Great Lakes communities by incorporating climate change adaptation recommendations specific to the Great Lakes into the role play."

Slide 25: If using the notes as a script, remove or shorten the first sentence in the notes (since it has already been used for slide 23).

Slide 45: You may consider adding a link for the Ohio State webinars (changingclimate.osu.edu) to the slide, or to provide the link as part of the course materials.
