

New Jersey Boater's

RAMP GUIDE

njboatramps.org

I BOAT NJ

Program

On July 1, 2002, the New Jersey State FY 2003 Budget was approved, and included a boater registration fee increase. The Senate Budget and Appropriations Committee approved the fee increase outlined in Assembly Bill No. 2506 as part of an omnibus budget package.

Fees for the initial numbering of all vessels, and for each renewal certificate issued thereto, were adjusted as follows:

All vessels less than 16 ft. - \$12 per year;
16 ft. or more but less than 26 ft. - \$28 per year;
26 ft. or more but less than 40 ft. - \$52 per year;
40 ft. or more but less than 65 ft. - \$80 per year;
65 ft. or more - \$250 per year.

Pursuant to Section 12 of P.L. 1962, c.73 (C. 12:7-34.47) the revenues derived from the fee increase were directed to I BOAT NJ, a program managed by the New Jersey Department of Transportation/Office of Maritime Resources (NJDOT/OMR). Throughout New Jersey's 127 miles of coastline, 1,792 miles of shoreline, and plentiful inland waterways, lakes, and bays, there are numerous opportunities ideal in purpose and objective to fulfill the goal of the dedication of boater registration fees.

The I BOAT NJ Program Mission Statement

The I BOAT NJ Program provides grant funds to selected eligible applicants to promote, improve and enhance the marine industry in the State of New Jersey for the benefit of the general boating public.

Things to Consider When Trailer Boating

Trailer boating is becoming more popular, allowing flexibility and accessibility to many areas, especially where demand for dockage is at a premium.

Successful trailering requires: proper trailer selection, proper trailer hitch selection, and an adequate towing vehicle.

PRE-LAUNCH CHECKLIST

The most critical part of trailer boating is the launch. There are five steps that need to be completed before launching the boat:

- ✂ Raise the lower motor or lower unit to avoid damage during launch;
- ✂ Release tie down lines except the bow winch;
- ✂ Secure fenders in place if they are necessary;
- ✂ Install the drain plug;
- ✂ Attach a line to the bow cleat or other location that can be used to secure the boat while parking.

Boat Ramp Etiquette

Boaters on land preparing to launch and those on the water waiting to haul out need to cooperate to avoid accidents and reduce waiting times. New and experienced boaters need a sense of “good seamanship” when interacting with one another at ramps or on the open seas. Don’t forget to respect the facilities (i.e. restrooms, picnic areas, etc.) that you may use while at the ramp. Here are a few tips to follow:

ARRIVING AT THE RAMP

Parking is limited at some ramps. Contact the operator of the ramp for parking and other pertinent information.

Waiting in line or prior to backing down the boat ramp, is the perfect time to move everything from the tow vehicle that will go on board (i.e. coolers, clothing, equipment, etc.). If you wait until the boat is in the water it will increase the wait time for others behind you.

Once the boat is in the water unhook it from the winch. While the person with you walks the boat to the dock, move the tow vehicle and trailer up the ramp and park in an appropriate area. This allows others behind you to access the ramp.

If you notice someone is having difficulty at the ramp, offer some assistance. If it is your first time with a boat in tow, practice backing your boat and trailer between plastic cones or between a pair of parking spaces prior to arriving at the ramp.

If you are joining a friend on his or her boat and arrive in your own car, park it away from the ramp in a standard parking area. The trailer parking spaces are only for tow vehicles and trailers.

Have an established routine at the ramp. Knowing what needs to be done and how it should be done reduces time spent at the ramp.

When you return to the boat ramp, drop off the person going to get the trailer to the ramp and wait for them out on the water. When the trailer has been backed into

the water, then bring your boat into position for retrieval.

After the boat is on the trailer, secure the safety chain to the bow eye and move up the ramp away from other ramp traffic. Secure the tie-downs and place all equipment and coolers back into the tow vehicle.

ON THE WATER

If a boat is passing you in a channel, slow down. Slowing down will allow the boat to get by more quickly.

When you are anchored close to other boats, allow enough room to swing without coming too close to the other boats at anchor in the event of a wind shift.

The VHF radio is a great source of information. Use the radio when you need to obtain important information and not just for chatting. Channel 16 is used for initial contact between boats and for contacting the Coast Guard.

Adapted from Boat US Trailering Magazine (BoatUS.com)

Ten Checkpoints For Your Trailer

Tires: Make sure to inflate tires to the proper PSI and inspect for spider web cracks on the sidewall. If cracks are present, replace the tires. The tire tread depth should not be less than 2/32". Otherwise the tires are considered worn. Keep a spare tire. During the off season take the tires off the trailer and place it on blocks.

Frame: Inspect for corrosion and rust by crawling under the trailer. If necessary, sand to remove corrosion.

Lights: Plug the trailer into the tow vehicle's electrical system and turn the vehicle on. Turn the lights on and look for any bulbs or lenses that need to be replaced. Two persons are required to examine the trailer's brake lights and reverse lights. While one person depresses the

brakes, the other inspects the lights on the trailer. To check the reverse lights, place the vehicle in reverse and have a second person look at the trailer lights to see if they are working properly. Make sure you have the correct replacement bulbs on hand.

Bunks/Rollers: Inspect the bunks for wear on the carpeting or on the rubber padding beneath the carpet. Each roller should be turned individually to determine whether it has become locked. Inspect the rollers for wear and make sure none have to be replaced. Poly rollers generally last longer than rubber rollers.

Safety Chains: Look for wear and inspect the S-hooks for possible bending. Replace S-hooks with screw-pin shackles that have a wire running through the pin's eye. This connection is more reliable than the S-hooks.

Bearings: Inspect the grease in the hubs. If the trailer is wintered outdoors, replace the grease. If the grease seal needs to be replaced, replace it with a double lip seal. Look over the bottom of the boat inside the trailer tires for grease. If grease is present, the bearings need to be cleaned and replaced.

Brakes: If you are not sure what to do, take the trailer to a dealer and have an expert look them over. Inspect the fluid level in the master cylinder, and clear any debris around the cap before opening it, so that nothing contaminates the fluid. If it is low, you may have to bleed the system to remove air from the lines. Pull the wheel and inspect the disc/drum to determine if you need of new pads/shoes.

Tool Kit: Make sure your tool kit includes the proper wrenches, screwdrivers and a trailer jack that fits your trailer, as well as blocks that can provide support for your tow vehicle's rear wheels.

Winch: Inspect the cable to see if there are any broken wires or worn areas. Clean and lubricate the winch. Finally, make sure you have a strong tie down for the bow and stern of the boat and that both are properly secured to the trailer.

Hitch: Apply grease to the ball and inspect the hitch locking mechanism.

Adapted from Boat US Trailing Magazine (BoatUS.com)

Boating Safety Education & Minimum Mandatory Requirements

***Schedule for Completion of the Mandatory Boating Safety Course**

- Persons born in **1959** or later must possess a Boating Safety Certificate by **June 1, 2007**.
- Persons born in **1949** or later must possess a Boating Safety Certificate by **June 1, 2008**.
- **All persons** who wish to operate a power vessel must possess a Boating Safety Certificate by **June 1, 2009**.

For Those Under 16

1. There are **NO EXEMPTIONS** to New Jersey age requirements.
2. Out-of-state residents in New Jersey for less than 90 days with a certificate issued by their state or country; OR written proof of completion of a substantially similar course to the NJ-approved course will satisfy the education requirements.

Boating Safety Course information may be located at
cgaux.org usps.org boat.us.org

Non-Tidal Boat License

EXEMPTIONS

1. Vessel powered by a motor less than 1 HP or 12-volt electric motor.
2. Vessel 12 feet long or longer with less than 10 HP.
3. While competing in an authorized race pursuant to a permit issued by the Division of State Police in the Department of Law & Public Safety.
4. If the person is an out-of-state resident who has written proof of successful completion of a course substantially similar to a NJ approved Boating Safety Course. A Boat License is separate from the boating safety certificate and is issued by the Motor Vehicle Commission (MVC).

For more information on New Jersey's boating laws and to obtain a copy of the State's Boating Safety Handbook,

contact the nearest NJ State Police unit or call 609-882-2000, ext. 6173 or download a copy of the manual online at njsp.org/maritime. Click on Public Information and then Boating Safety Manual. Be informed. Take a boating safety course and be safe on the water. Consider wearing a PFD at all times. The new inflatable models make this an easy and comfortable choice – for life. For information on dates and locations of boating safety classes near you, call 800-336-BOAT.

Registering Your Boat: You must register your boat in New Jersey if you operate 180 days or more in the State – or if you rent, lease or maintain property for the storage of your vessel. Registration is conducted through the NJ Motor Vehicle Commission at any of their office locations. Bring your title and prior registration with you. If you have a personal watercraft (PWC), have a bill of sale from the previous owner, properly signed and notarized. The registration card must be carried in the boat or PWC at all times when in use. An insurance policy on your boat is not required by law – but is always a good idea.

Proper Display of Letters and Numbers: Your letters and numbers must be block form (scripted lettering is not acceptable), a contrasting color, three inches high and mounted on the forward half of the bow (or vertical structure above the hull). They must read from left to right. Be sure to leave a space between the NJ prefix, the four numbers and the two-letter suffix. The registration decal, showing the expiration date of your registration, always goes aft (behind the letters and numbers) on each side of the boat, as follows:
NJ 1234 AB (port side) - and - NJ 1234 AB (starboard side).

Equipment Required for Your Boat

- Your boat must meet federal and state standards for equipment, including a wearable **U.S. COAST GUARD APPROVED LIFE JACKET OR PERSONAL FLOTATION DEVICE (PFD)** (Type I, II, III or V) for each person on board. PFDs must be in good condition, properly fit each person on board and be readily accessible. All Type V inflatable PFDs must be worn to be counted. Children who have not reached their 13th birthdays must wear PFDs at all times when the boat is underway. All PWC operators and passengers must wear a Type I PFD when operating a PWC. All persons engaged in watersports (water skiing, etc.) must also wear a Type III PFD.

- One Type IV **THROWABLE PFD** must be carried on boats 16' or longer.

- At least one **USCG-APPROVED FIRE EXTINGUISHER** with a B rating is required on all boats with any enclosed compartment, including PWCs. Boats over 26' require 2 extinguishers, boats over 40' require 3.

- A **SOUND-PRODUCING DEVICE** (horn or whistle) is required; on PWCs a whistle is sufficient.

- **NAVIGATION LIGHTS** must be in good working condition and turned on from sunset to sunrise and during reduced visibility. PWCs do not have lights and may not operate between sunset and sunrise and during times of limited visibility.

- US Coast Guard approved **VISUAL DISTRESS SIGNALS** must be carried on all coastal waters.

- **MUFFLERS** must be installed and in good working condition.

- Carburetor-type engines require **BACKFIRE FLAME ARRESTORS**.

- Boats and PWCs towing water skiers must fly an **ORANGE TRIANGULAR FLAG** above the highest point of the vessel.

New Jersey State Police requires of all boaters

- Valid Registration
- Registration number properly displayed
- Validation decals properly displayed

NJ 1234 GH

Boat Ramp Maintenance Permit for Wildlife Management Area Ramps

Any vehicle used to transport or launch a vessel or water conveyance at the Wildlife Management Areas (WMA) listed below must have a Boat Ramp Maintenance Permit or a copy of the applicant's valid hunting, fishing, or trapping license affixed to the lower corner of the driver's side rear window. Boat Ramp Maintenance Permits may be purchased for \$15.00 from various Division offices. Permits may also be purchased through the mail from: N.J. Division of Fish and Wildlife, PO Box 400, Trenton, NJ 08625-0400, Attn: Boat Ramp Permit.

Fish Smart, Eat Smart

Eating fish is good for you, but some fish and shellfish caught in New Jersey could be contaminated with chemicals such as Dioxin, PCBs and Mercury.

REDUCE EXPOSURE TO DIOXIN AND PCBS - Eat only the fillet!

CLEANING FISH - Remove and discard the head, guts, kidneys and liver. Remove the “backstrap meat” along with the skin, lateral line and belly meat.

COOKING FISH - Bake, broil, steam, fry or grill fish and throw away the cooking juices. Use only fish fillets when preparing soups, stews and chowders.

For more information on health advisories and reducing exposure visit www.fishsmarteatsmartnj.org or call 609-984-6070.

Exercise Caution when Fishing near Shellfish Leases on Coastal Bays

Throughout New Jersey’s coastal bays, shellfish harvesters lease areas for the cultivation of hard clams and oysters from the Department of Environmental Protection, Division of Fish and Wildlife, Bureau of Shellfisheries. Shellfish cultivation practices seldom interfere with recreational boating or angling activities because the scale of the operations is small in relation to

the total bay acreage, leases are clustered and located in shallow water areas away from navigation channels, and aquaculture gear profile is low. Most importantly, PVC poles or cedar stakes clearly mark the corner of each individual lease, generally 2-5 acres in size. On occasion, however, aquaculture gear has been entangled in boat propellers and/or fishing rigs resulting in losses to both shellfish harvesters and recreational anglers. By approaching these marked shellfish lease areas with caution, recreational boaters and anglers can avoid these undesired situations and foster a mutual respect with shellfish harvesters and other users of New Jersey’s coastal bays.

Keep New Jersey's Waters Clean - *Use Pumpouts!*

Pumping out your boat's holding tank at a certified facility or into a pumpout boat will help keep New Jersey's water clean, and aid in the protection of our fish, shellfish, and wildlife populations. It will also help protect the health of everyone who enjoys New Jersey's coastal and freshwater resources.

The New Jersey Boater's Pumpout Facility Guide - The official map of New Jersey marinas with vessel pumpout facilities is now available. The Guide is a double sided, full-color map of the State, which lists all of the currently operating pumpout facilities available to boaters. An interactive mapping version of the guide is available online at <http://ims.rutgers.edu/pumpout>. For a free copy of the New Jersey Boater's Pumpout Facility Guide, send your request to the **New Jersey Clean Vessel Act Program**, P.O. Box 418, Port Republic, NJ 08241. For additional information about the New Jersey Clean Vessel Act, contact the New Jersey Division of Fish & Wildlife at 609-748-2056. Visit CVA on the Internet at: njfishandwildlife.org

To report a pumpout station that is not working or if you experience a problem with a pumpout facility, please contact the Marine Trades Association of NJ at (732) 292-1051 or send an email to info@mtanj.org

Your purchase of fishing equipment and motor boat fuels supports Sport Fish Restoration.

Report Suspicious Activities

Fax 609-632-4928, or go to www.njsp.org to report tips or information about suspicious activity or behavior you think may be related to terrorism.

CALL
866-4-SAFE-NJ
(866-472-3365)

**In an emergency,
call 911 or your
local police.**

GET INVOLVED!

Boaters: Be Proactive

Operating and maintaining your boat can contribute to pollution from the discharge of substances such as oil, grease, paint, cleaning chemicals and waste into the water. By following a few basic environmentally sound boating practices you can help protect New Jersey's recreational waters.

Prevent spills during fueling by not over filling the tank, using pads or vent attachments to capture spills, installing a fuel-air separator, listening to the filler pipe and not relying on the gauge.

Keep your engine leak-free and well-tuned to minimize discharge of fuel and oil into the water.

Use an oil absorbent pad or pillow in the bilge to absorb oil as needed.

Use biodegradable, environmentally safe detergents to clean your boat.

Use a pumpout station to dispose of sewage.

Properly dispose of scrap fishing line, garbage, and items for recycling ashore.

The following marinas employ best management practices to reduce their impact on the environment and have been officially recognized as NJ CLEAN MARINAS:

Baywood Marina

Dillon's Creek Marina

Forked River State Marina

Green Cove Marina

Hobby Lobby Marina

Kammerman's Atlantic City Marina

Leonardo State Marina

Main One Marina

Morgan Marina

Riverbank Marina

Robbie's Loveladies Marina

Silver Cloud Harbor Marina

Spencer's Bayside Marina

Viking Yachting Center

Learn more about the program and what you can do to protect New Jersey's waterways at njcleanmarina.org or contact Michael Danko at 732-872-1300 ext. 29 mdanko@njmsc.org or Tali Engoltz at 609-633-2201 tali.engoltz@dep.state.nj.us

Enjoy the boating experience by keeping boating safe, clean, and fun!

Report a Maritime Observation

The New Jersey Department of Transportation (NJDOT) offers an opportunity for boaters to report their observations about aids to navigation, shoaling, etc., within a state navigation channel directly to the Office of Maritime Resources.

You can report your observation by visiting the following website:

www.state.nj.us/transportation/works/maritime/marine_trades.shtm

Please be as detailed as possible in your email.

Stop the Spread of Invasive Species!

Fish, invertebrates and plants that come in contact with your trailer and boat can be inadvertently released into a body of water when trailering your boat from one location to another. Most of these species will not survive in the new environment. However, a few become successful invaders because they are hardy, aggressive and prolific organisms. You can help prevent the spread of invasive species by following the procedures outlined below each time your boat and trailer leave the water:

Zebra Mussel

Remove all visible mud, plants, fish/animals. Before leaving any body of water, examine your equipment, boat, trailer, clothing, boots, buckets, etc.

Eliminate water from all equipment before transporting anywhere. Empty water from the motor, bilge, live well and other areas where water can accumulate.

Clean and dry anything that came in contact with the water.

Do not release or put plants, fish or animals into a body of water unless they came out that body of water. This includes aquarium and aquatic pets, and bait purchased at a store.

Report Sightings

Invasive species such as Northern Snakeheads, Flathead Catfish and Zebra Mussels should not be returned to the water. Please note the date, precise location and contact the proper organization listed below.

Northern Snakeheads, Flathead Catfish and other aquatic species – Contact Fish and Wildlife at 908-236-2118.

Zebra Mussels – Take the mussel with you, store in alcohol and immediately contact New Jersey Sea Grant at 732-872-1300 extension 21.

Visit protectyourwaters.net for more information.

Commercial Vessel Traffic Warning!

Be aware of commercial vessel traffic when using boat ramps. Ships and all other large vessels are not as maneuverable as small boats!

NJ Boat Ramps

New York to Cape May

njboatramps.org

A comprehensive assessment of the location and conditions of all boat ramps in New Jersey was conducted to compile the information contained in this guide.

However, not all ramp owners elected to have their location listed. If a ramp location that you normally use is not listed in the guide, or if you have comments on the guide, please contact us at 732-872-1300, ext. 29. The New Jersey boat ramp listings in this guide are organized from North to South, from New York Harbor down to Cape May and down the Delaware River and Delaware Bay. Latitude and longitude are expressed in degrees and minutes.

Contact municipalities prior to using ramps for permit requirements.

Acknowledgments

The New Jersey Boaters' Ramp Guide project was completed by New Jersey Marine Sciences Consortium (NJMSC) staff, Michael J. Danko, Rory Joyce, Georgeann Sobotka, and Jessica Staats. NJMSC is grateful to the I BOAT NJ Program for funding this assessment and guide. The team would like to thank everyone who provided guidance, editorial comments and information to the project, especially Boat US Trailering Magazine, Marine Trades Association of New Jersey, New Jersey State Police and Stop Aquatic Hitchhikers. A special thank you to Rory Joyce from NJMSC and Genevieve Boehm Clifton from New Jersey Department of Transportation Office of Maritime Resources for persevering with the project as it evolved into its final format, and to the New Jersey Sea Grant Extension Program and the New Jersey Department of Environmental Protection Division of Fish and Wildlife for contributing additional funds towards printing. Finally, we would like to thank all the boat ramp owners for supplying the information necessary to complete this project and for agreeing to be listed in the New Jersey Boater's Ramp Guide. Their willingness to provide access to the water affords us the opportunity to enjoy water-based recreational type activities such as boating, fishing, hunting and wildlife viewing.

This publication was supported by the National Sea Grant College Program of the U.S. Department of Commerce's National Oceanic and Atmospheric Administration under NOAA Grant # NA060AR4170086. The views expressed herein do not necessarily reflect the views of any of those organizations. NJSG-07-655

Acknowledgments *Continued*

The New Jersey Marine Science Consortium (NJMSC) is a non-profit affiliation of 27 colleges, universities and other organizations whose mission is to serve New Jersey through innovative research, education and outreach designed to address coastal issues, develop marine technology, promote science-based management policy and improve science literacy and informed decision making among its citizens. NJMSC conducts programs that provide broad and unbiased information to help sustain New Jersey's coastal economy and promote environmental stewardship.

In 1976, the NJMSC was designated as the managing agent for the New Jersey Sea Grant College Program. New Jersey Sea Grant fosters research, education, and stewardship focusing on marine resources. Its capabilities in marine science and outreach have grown steadily. In 1989, the program was designated as a full Sea Grant College Program, in recognition of its academic and research excellence and strong statewide support.

New Jersey Department of Transportation's Office of Maritime Resources (NJDOT/OMR) is the state advocate for New Jersey's marine trade industry and plans programs based on local, regional and global factors that affect the economic, environmental, technical, political and cultural climate within which New Jersey's marine trade industry conducts business. The Office recognizes that a thriving marine trades industry is good for New Jersey's economy, coastal environment and quality of life. Boating, fishing, waterborne recreation, tourism/ecotourism and the local businesses that support these activities along New Jersey navigation channels, provide thousands of jobs and directly contribute to local and state tax revenues. NJDOT/OMR is proud to manage the I BOAT NJ Program and to be a part of the first ever comprehensive NJ Boat Ramp Guide.

Genevieve Boehm Clifton - Marine Trades Program Manager

The New Jersey Department of Environmental Protection, Division of Fish & Wildlife is responsible for protecting and managing the State's fish and wildlife to maximize their long-term biological, recreational and economic values for all New Jerseyans. Goals of the Division of Fish and Wildlife include: maintaining New Jersey's rich variety of fish and wildlife species at stable, healthy levels and to protect and enhance the many habitats on which they depend; educating New Jerseyans on the values and needs of our fish and wildlife and to foster a positive human/wildlife co-existence; and to maximize the recreational and commercial use of New Jersey's fish and wildlife for both present and future generations.
