APPENDIX N: SECTOR MONITOR INCIDENT REPORT	171
Instructions	172
APPENDIX O: PROGRAM & TRAINING STANDARDS	177

## MONITORING AN OFFLOAD TO A DEALER

### 1. If the vessel is issued a Dockside Monitoring Waiver:

The DSM vendor, when confirming that the trip end hail has been received, must notify the vessel they are *receiving a DSM Waiver*. The vessel operator must provide copies of all VTRs and dealer receipts for the trip to the Sector Manager (SM), or SM designated third party, within 24 hours of offloading.

### 2. If the vessel is selected for Dockside Monitoring coverage:

- a. The vessel may land, but no offloading may commence until the Monitor is present.

NOTE: If a vessel begins offloading or offloads the catch completely before the Monitor arrives the Monitor will report immediately to their provider.

NOTE: If any portion of the catch is offloaded without a Monitor present, the offload cannot be a complete DSM event, even if a dealer report/tally sheet is available.

- b. Vessels offloading at more than one dealer or facility must have a Monitor present during the offload at each location.
  - i. The DSM provider is responsible for logistics and coordination of all DSM activities.
- c. Upon meeting the vessel at the offloading site, the Monitor must:
  - i. Collect copies of all VTRs corresponding to the trip, with all information completely filled out by the vessel operator (no blocked cells).
  - ii. Record whether or not the scales are certified by the dealer's state.
  - iii. Observe and record whether ice and box weights are tared by the dealer before the catch is added. If the scale is not tared the monitor will record the weight of the ice and box from the dealer and record that weight in their report.
  - iv. Ask the captain whether all catch has been offloaded, and whether any is being retained for personal use. The Monitor must record the captain's estimate of weight of each species being retained for home use or retained on the vessel and record the reason(s).

NOTE: **The monitor is not required to board the vessel**. The captain will inform the monitor that all fish have been offloaded. If for some reason the monitor suspects all catch has not been offloaded, when told

that it was, record the situation in the COMMENTS and report to your provider.

- v. Either the Monitor or dealer must record the weight of offloaded fish, by species (and market category, if culled), in a report. This report must be signed by the Monitor and the dealer. The Monitor must keep a copy of the signed report.
- vi. Provide accurate and complete data to the SM, and/or DSM provider, within 24 hours of the completion of the DSM event.
- vii. Send copies of the VTR(s), the dealer receipt(s) if separate from the Monitor's report, and the Monitor's report to the SM and/or DSM provider.
- viii. Keep a copy of his/her report, which must be electronically stored by the DSM vendor.

## MONITORING AN OFFLOAD TO A TRUCK

1. Each sector must specify in its operations plan the remote offloading facilities where sector members will be allowed to offload catch to trucks. The DSM vendor will provide all information to the Monitor concerning remote locations and roving events.
2. Offloading of landings to trucks and subsequent weigh out of landings at all dealer facilities are considered separate (in terms of individual monitors) but conjoined (in terms of fishing trip) events. If a trip is selected for DSM and will offload to a truck, the trip must have a Roving Monitor (RM) present to witness all offload activities, as well as a Dockside Monitor (DM) present at each dealer that receives the fish to certify weigh-out of all landings. The RM and DM may be the same or different individuals.

NOTE: The DSM provider is responsible for logistical support and coordination of operations.

3. If the landings are weighed by a representative of a certified dealer in front of the RM before being loaded into the truck, the event must follow the protocol for offload at a dealer (See Offloading to a Dealer), and a complete DSM event will ensue.
4. If the landings are not weighed by a representative of the receiving dealer in front of the RM before being loaded into the truck, all requirements of DSM when offloading to a dealer will apply (except weight and dealer-receipt records), and the additional requirements of this section will also apply.

5. Additional requirements:

Dockside Monitor

- i. All fish must be weighed in the presence of a DM at the receiving dealer(s) when the truck offloads.
- ii. Sign and collect a copy of the dealer report/tally sheet **OR** generate a Dockside Monitoring Weigh-out Report signed by the monitor and the dealer.
- iii. Submit all paperwork to the DSM provider

Roving Monitor

- i. Upon meeting the vessel at the offloading site the RM must:
- ii. Collect copies of all VTRs corresponding to the trip, with all information completely filled out by the vessel operator (no blocked cells).

- iii. If there are no scales at the offload site, record the number of totes of each species and the captain's estimate of the weight of each species in each tote.
- iv. Ask the captain whether all catch has been offloaded, and whether any is being retained for home use. The RM will record the captain's estimate of weight of any species being retained for home use or retained on the vessel and record the reason(s).
- v. Record all offloaded catch, by species (and market category, if culled), in a report, unless the driver creates such a report or manifest that the RM may use. This report shall be signed by the RM, and the RM shall keep a copy of the signed report.

NOTE: The driver's manifest is similar to a Dockside Monitor collecting the dealer report/tally sheet.

NOTE: Regardless of if a DSM event is fully completed by a Roving Monitor, **all totes must still be tagged appropriately by the RM.** This will help avoid confusion at the receiving dealer and mark the catch as being properly monitored.

- vi. Ensure that each tote is tagged with appropriate identifying information, including but not limited to:
  - Serial number of first VTR page filled out for that trip
  - RM ID number
  - Tote number
  - Species
  - DSM event complete? Yes or No

NOTE: The DSM provider is responsible for supplying tote tags to monitors

- vii. Send copies of the VTR(s), driver manifest(s) if separate from the RM's report, and the RM's report to the DSM provider
- viii. DSM provider will keep a copy of the RM's report, which must be electronically stored.

NOTE: The DSM provider is responsible for matching all corresponding paperwork/reports from all parts of the offload and weigh out of the vessel's catch.

## RESPONSIBILITIES OF A DOCKSIDE/ROVING MONITOR

### CRITERIA FOR A COMPLETE DOCKSIDE MONITORING EVENT

1. The Dockside Monitor and/or Roving Monitor must witness the offload of the entire catch
2. The Monitor must witness the weighing of the entire catch
3. The Monitor must obtain a copy of the VTR from the vessel captain

NOTE: In a roving event, the RM will collect the VTR(s) from the captain

4. The Monitor must obtain a copy of the dealer report/tally sheet and sign the original

**OR**

Generate and complete a Dockside Monitoring Weigh-out Report as provided by the Dockside Monitoring (DSM) vendor

5. The Monitor's data must be available to the Northeast Regional Office (NERO) AND the Sector Manager within **24 hours** of the vessel offloading

### ROVING MONITOR RESPONSIBILITIES

When scales from a certified dealer are NOT present:

1. The Roving Monitor (RM) will witness the offload of the vessel to the truck
2. Fill out a Dockside Monitoring Weigh-Out Report

**OR**

Collect a copy of the driver's report/manifest, which will be signed by the Roving Monitor

3. Tag the totes/boxes of fish with a tote tag (or add their identifying information to an existing tag) with appropriate identifying information, including but not limited to:
  - Serial number of first VTR page filled out for that trip
  - RM ID number
  - Tote number
  - Species

- Dockside Monitoring event complete? Yes or No

NOTE: The Dockside Monitoring Provider is responsible for supplying monitors with tote tags

4. Collect the 'Dockside Monitor' (pink) copy of the Vessel Trip Report (VTR) from the vessel captain
5. All fish must be weighed in the presence of a Dockside Monitor at the receiving dealer(s) when the truck offloads

NOTE: Refer to your provider for logistical support and communication protocols.

## REPORTING REQUIREMENTS FOR DOCKSIDE/ROVING MONITORS

### Dealer report/Tally sheet

The Monitor may collect a copy of the dealer report or official tally sheet. The Monitor must sign the dealer's original copy and obtain a copy. If necessary, a photocopy of the signed dealer report is acceptable.

NOTE: Signing the dealer report/tally sheet is signifying that all catch has been accounted for on the dealer's report/receipt properly and that the entire offload was witnessed by the Monitor according to NMFS protocols.

NOTE: A combination of the dealer report/tally sheet and a Dockside Monitoring Weigh-out Report is acceptable. Submit both reports to the Dockside Monitoring provider.

### **If there is no available Dealer report/Tally sheet:**

#### Dockside Monitoring Weigh-out Report

The Monitor must fill out a separate Dockside Monitoring Weigh-out Report for *each dealer* involved in the offload process. Your provider must supply all monitors with an appropriate Dockside Monitoring Weigh-out Report. All Dockside Monitoring Weigh-out Reports should contain the following fields:

#### ***IDENTIFYING INFORMATION:***

1. Date Landed AND Date of Weigh-out
2. Monitor ID
3. Offload Time
  - a. Offload start time
  - b. Offload end time
  - c. Total offload time
4. Vessel Information
  - a. Vessel Name (can be found on the Vessel Trip Report (VTR) or is usually located on the bow or stern of the vessel)

- b. USCG DOC. Or STATE REG. NO (also referred to as the Hull Number, which can be found on the VTR, collected from the vessel operator, or is usually located on the side, or wheelhouse of the vessel)

NOTE: Some vessels will have letters in their hull number (MS1234)

- c. Permit Number (can be found on the VTR or collected from the vessel operator)
- d. VTR Number (located in the upper right of the VTR)

**5. Dealer Information**

- a. Dealer Name
- b. Dealer Number: This is the federal permit number issued to a dealer by the NMFS Northeast Regional Office (this can be obtained by the dealer or found in Appendix E)
- c. See Appendix E: Dealer List

**6. Sector Information**

- a. Sector Name (should be obtained by your provider or can be collected from the vessel operator)
- b. Port Landed

***SCALE INFORMATION:***

**1. Scale Certified? Yes or No**

- a. This can be obtained by asking a dealer or the presence of a certification sticker.
  - i. ‘YES’ Check off or circle ‘Yes’ and record the certification date.
  - ii. ‘NO’ If the scale is not certified, the expiration date is expired, or the certification information is not known or not available for the MONITOR to see, the Monitor will *still witness the offload* and record the reason for selecting ‘NO’ in the COMMENTS section of your Dockside Monitoring Weigh-out Report.

**2. Certification date**

- a. If the scale has been certified, record the date shown on the certification sticker or as documented in the dealer’s records.

**3. Dealer Box Weight Used?**

- a. If the scale is not tared or the monitor does not witness the scale being tared, record the ice + box weight tare estimate. This can be obtained from the dealer.

4. Dealer Box Weight (lbs)

- a. Record the Dealer Box Weight in whole pounds. This information is obtained from the dealer. Many dealers use an established 'standard box weight'.

Example: Acme Dealer adds 14 lbs/tote, as a form of taring their scale.

***HAVE ALL FISH BEEN OFFLOADED?*** Yes or No

The monitor must ask the captain if all catch has been offloaded from the vessel.

1. 'YES'. Check off 'Yes'.
2. If 'NO,' record in the COMMENTS section:
  - a. Species
  - b. Weight estimate obtained from the vessel captain
  - c. Reason fish are not being landed (*i.e.* offloading remainder of catch at a different dealer or on a different day)

NOTE: If you see a tote of fish that has been offloaded but has not been weighed, record the species and estimated weight on your Dockside Monitoring Weigh-out Report and comment as to why the fish was not weighed. It is the monitor's responsibility to account for all catch whether or not it's properly weighed or recorded by other parties.

NOTE: If the captain or crew are keeping fish for personal consumption, the monitor will report the species and estimated weight on their Dockside Monitoring Weigh-out Report. Even if the monitor does not witness the retained fish leave the vessel, that specific portion of the catch will be considered 'offloaded.'

NOTE: A monitor's role does not include any type of enforcement. If fish are not weighed properly the monitor will observe and describe on a Sector Incident Report.

NOTE: The form and instructions can be accessed from the following online sources:

- NEFOP website [www.nefsc.noaa.gov/femad/fsb/](http://www.nefsc.noaa.gov/femad/fsb/)
- NED OLE website [www.nmfs.noaa.gov/ole/ne\\_northeast.html](http://www.nmfs.noaa.gov/ole/ne_northeast.html)  
or email [ned.sector.enforcement@noaa.gov](mailto:ned.sector.enforcement@noaa.gov)

**CATCH INFORMATION**

1. Species Name (Common Name)
  - a. Record the Species
  - b. See Appendix F: Species List (Common Name)
  
2. Market Category
  - a. Record the Market Category. This can be obtained by the dealer.
  - b. See Appendix B: Market Category
  
3. Total Weight Recorded From the Scale
  - a. By Species and Market Category
  - b. This is the number that is displayed on the scale after a tote has been filled or completed.
  - c. Round to the nearest whole pound
  
4. Number of Totes Weighed
  - a. Record the total number of totes weighed for a particular Species and Market Category
  
5. Catch Destination
  - a. This is defined as where the catch is after sorting. This can also include fish discarded at the docks (*i.e.* discarded due to poor quality)
  - b. See Appendix J: Catch Destination

Example: 44 totes of Scrod (market category) Haddock (species) are weighed on the scale. Record the total weight of the 44 totes of Scrod Haddock in the ‘Weight’ field and record ‘44’ in the ‘Number of totes weighed’ field.

SPECIES NAME	MARKET CATEGORY	WEIGHT (lbs) FROM SCALE	# OF TOTES WEIGHED	CATCH DEST.
Haddock	Scrod	5016	44	1

### ***COMMENTS***

1. This section is used to explain any situation out of the ordinary. Reasons to use the COMMENTS section include, but are not limited to:
  - a. Unusual offloading situations
  - b. Catch not landed (*i.e.* offloading a different day, retained for personal consumption)
  - c. Multiple Dealer situations
  - d. Safety Concerns
  - e. Cooperation Issues
  - f. Taring situations
  - g. Scale certification issues

NOTE: Refer to your provider's procedure for reporting an incident, accident, etc.

### ***NAMES AND SIGNATURES***

#### **Dockside Monitor Weigh-out Report**

This is a report generated by the Monitor

1. The Monitor must print their ID number and sign the Dockside Monitoring Weigh-out Report.
2. If a Monitor cannot obtain a copy of the Dealer report/tally sheet, a representative of the Dealer must print their name and sign the Dockside monitor Weigh-out Report.

#### **Dealer Report/Tally Sheet**

This is a report generated by the Dealer

1. If a copy of the dealer report/tally sheet is obtained, the Monitor must sign the original copy. Signing the dealer report/tally sheet is signifying that all catch has been accounted for on the dealer's report/receipt properly and that the entire offload was witnessed by the Monitor according to NMFS protocols.

NOTE: A monitor may generate their own Dockside Monitor Weigh-out Report and obtain a copy of the Dealer Report/Tally Sheet.

## APPENDIX A: DEFINITIONS

**Certified Dealer:** A dealer holding a federal permit issued by NMFS Northeast Regional Office

**Dockside Monitor (DM):** A certified dockside monitor tasked with observing either the weighing of fish by a dealer at the time of landing or the weighing of fish by a dealer at the time of offload from a truck.

**Dockside Monitoring (DSM):** Monitoring of *all landings* from sector trips taken by sector vessels in order to verify landings of the vessel at the time they are weighed by a dealer. Also to certify the landed weights are accurate as reported on the dealer report.

**Dockside Monitoring Event:** The witnessing of the complete offload and complete weight-out of all catch from a sector vessel. Obtain the following paperwork: VTR(s) from the vessel captain; dealer report/tally sheet OR Dockside Monitoring Weigh-out Report (or a combination of the two). Submit data to the DSM Vendor.

**Dockside Monitoring Vendor (DSM Vendor):** A sector monitoring service provider approved by NMFS to conduct dockside monitoring services.

**End Offload:** When all catch going to an individual dealer has been completely offloaded (*i.e.* when catch intended for Dealer A has been completely offloaded, even if there is still catch onboard intended to go to Dealer B.)

**Fishing Year:** Groundfish Fishing Year is May 1 – April 30.

**Groundfish Species:** Atlantic cod, haddock, Pollock, white hake, redfish, winter flounder, yellowtail flounder, witch flounder, sand dab (windowpane) flounder, American plaice flounder, Atlantic halibut, ocean pout, and Atlantic wolfish.

NOTE: Winter skate, monkfish, and dogfish are closely associated species to groundfish.

**Hail:** Trip start and trip end hails are the means by which sector vessels notify dockside monitoring (DSM) providers of when and where they will be landing their catch, so dockside monitors and/or roving monitors can be dispatched efficiently to witness the offload.

**Landing Time:** The time when a vessel arrives in port. For the monitor's purposes, as soon as the vessel arrives at the offloading site.

**Port:** As defined by the local port agent.

**Roving Monitor (RM):** A certified dockside monitor tasked with observing the offload of fish to a truck at the time of landing without first being weighed.

### **Scale Certification Determination**

**YES:** In order for a scale to be determined certified, an official sticker with all proper and current information (*i.e.* Company Name; Date serviced and/or expiration date; etc) must be present on the scale, OR documentation that a scale has been certified by a licensed company and/or technician must be provided for a DM to review.

**NOTE:** A scale with no sticker but proper documentation where the expiration date is current would be acceptable.

**NO:** There is no sticker or documentation available or the date has expired.

**NOTE:** A monitor must see the sticker or documentation in order to determine that a scale is certified.

**NOTE:** A scale with an expired sticker or expired documentation is considered *not certified*.

**Standard Box Weight:** A weight or poundage used by the dealer to account for the weight of the tote, ice/water, and to account for water weight.

**NOTE:** This weight may differ from dealer to dealer.

**Start Offload:** When the fish hold is opened with intent to take out catch or when catch is prepared to be offloaded (*i.e.* straps are placed around totes in preparation to lift them off the vessel).

**Tare:** An adjustment made for the weight of the packaging (*i.e.* tote) in order to determine the net weight of the goods (*i.e.* fish).

**Total Offload Time:** The total amount of time that an offload takes.

**Trip Duration:** The time range from when the vessel departs port until its return to port.

**Trip ID #:** The Vessel Trip Report (VTR) number on the *first* VTR page used for that trip.

## APPENDIX B: COMMON TERMS

**DSM:** Dockside Monitoring

**DM:** Dockside Monitor

**RM:** Roving Monitor

**SM:** Sector Manager: The person responsible for coordinating and tracking an individual sector's activities and Annual Catch Entitlement.

**DSM Provider/vendor:** The Dockside Monitoring provider or contractor that is hired by the individual sectors and directly employ monitors.

For Dockside Monitoring services there are five (5) approved DSM providers

**TAC:** Total Allowable Catch

**ACE:** Annual Catch Entitlement: The right to harvest a set quantity of fish by species in an assigned sector. Each sector is given an amount or poundage from the ACL; once any particular species hits the set ACE poundage that sector will be closed.

**ACL:** Annual Catch Limit: The level of annual catch of a stock that if met or exceeded triggers, a seasonal closure or a quota closure, which is referred to as an accountability measure (AM). The Magnuson-Stevens Act requires ACLs to be set at levels that prevent overfishing from occurring.

**VTR:** Vessel Trip Report: Completing the VTR properly is the responsibility of the vessel operator. The vessel operator is required to provide a copy of the VTR to the monitor (this will usually be the pink copy).

See Appendix K: Examples of Important Paperwork

**VMS:** Vessel Monitoring System: Used in commercial fishing to allow fisheries regulatory organizations to monitor, the position, time at a position, course and speed of fishing vessels. Updates on dealer prices, weather, and trip hails are also sent over the VMS.

**OLE:** Office of Law Enforcement

**F/V:** Fishing Vessel

**SAFIS:** Standard Atlantic Fisheries Information System: A real-time, web-based reporting system for catch and effort landings on the Atlantic coast. Comprised of four applications:

Electronic Dealer Reports (eDR): collects dealer landings (includes condition & price)

Electronic Trip Reports (eTRIPS): collects catch data from fishers (gear, fishing areas, and catch disposition)

Recreational Logbooks (eREC): collects data from recreational anglers

SAFIS Management System (SMS): provides administrative tools to state and federal SAFIS administrators for management

## APPENDIX C: SECTOR LIST

1. \*NFS 1  
Northeast Fisheries Sector

## APPENDIX I: ESTIMATION METHODS

Regardless of the estimation method used, the entire offloading and weighing events must be completely witnessed by the Monitor.

Any time the catch destination changes it must be recorded separately on your Dockside Monitoring Weigh-out Report.

Example: If a vessel lands five (5) totes of haddock and keeps one (1) tote of haddock (same market category) for the crew, then five (5) totes of haddock are recorded as being landed to the 'Primary Dealer' and one (1) tote of haddock is recorded as being 'Retained by Captain/crew.'

**WEIGHT:** The weight is defined as one that is weighed on a certified dealer scale. Weights may not be obtained from any sea-going observer or at-sea monitor reports.

NOTE: Weights must be collected by a certified dealer.

NOTE: If the Monitor is not shown proper documentation that the scale has been certified, weights should still be recorded.

Example 1: An individual fish is placed on a scale that has been tared at 0.0 lbs *before* the fish is placed on the scale for weighing. The weight displayed on the screen is the actual weight of the fish.

Example 2: A tote (or container) is placed on the scale. The scale is tared, or set to a value of zero with the tote set on the scale. Fish are then placed in the tote. The weight displayed on the screen is the actual weight of all fish in that tote.

NOTE: If the scale is tared with the empty tote placed on the scale, then fish are added, then ice is placed on top, the total weight of that tote is no longer considered an actual weight because the exact weight of the added ice is unknown.

Example 3: Fish are offloaded from a vessel and are weighed using a spring scale that the captain has on the boat. The Monitor would record the weights and describe the situation in the COMMENTS section of their Dockside Monitoring Weigh-out report.

**BASKET/TOTE COUNT:** This method would be used in a situation where totes or containers have been weighed on a dealer's scale and the Monitor sees a tote(s) or container(s) of the same species that is offloaded but not weighed on the dealer's scale. The Monitor will take the average weight of the totes that have been weighed and use that averaged value to apply to the unweighed tote(s) or container(s).

Example: 5 totes of Pollock have been weighed using the dealer's scale. The Monitor sees a tote of Pollock that is offloaded and carried directly into a back room. The Monitor will calculate the average weight of the five (5) totes of pollock and apply that average to the unweighed tote of pollock. Record the situation and your calculations in the COMMENTS section.

*All weights are in pounds (lbs).*

Tote weights: 102, 109, 104, 111, 108

Total weight: 534 lbs

$$\text{Average} = \frac{\text{Total weight}}{\text{Total number of weighed totes}} = \frac{534}{5} = 106.8 = 107 \text{ lbs}$$

The unweighed tote would be recorded as **107** lbs.

**TALLY METHOD:** This method would be used in a situation where species are accounted for by taking an average weight and multiplying by the total number of those species.

Example: A vessel has a handful of summer flounder that they are landing. Seven (7) fish are weighed individually on the dealer's tared scale. The crew decides they would like to keep a summer flounder each for themselves, for a total of three (3) summer flounder not weighed on the dealer's scale. The Monitor will calculate the average weight of the seven (7) individually weighed summer flounder and apply that average to the three (3) unweighed summer flounder. Record the situation and your calculations in the COMMENTS section.

*All weights are in whole pounds (lbs)*

Individual summer flounder weights: 9, 14, 18, 10, 11, 11, 16

Total Weight: 89 lbs

$$\text{Average} = \frac{\text{Total weight}}{\text{Total number of weighed summer flounder}} = \frac{89}{7} = 12.7 = 13 \text{ lbs}$$

Total estimated weight of unweighed summer flounder = 13 x 3 = **39**

**DEALER/CAPTAIN WEIGHT:** This is a weight obtained from the dealer. This value is used to account for the weight on the tote/container + the weight of ice (if any) + water weight. This may be unique to each dealer.

**OR**

An estimated value obtained from the vessel operator/captain.

Example: A large wax cardboard box is filled to a certain level with skate wings. The skate wings are not weighed prior to being placed in the wax box. The dealer says that each of these containers contains 1500 lbs of skate wings. Because the skate wings never officially cross the scale in the presence of the Monitor, the estimated weight of the skate wings is obtained from the dealer.

NOTE: If a dealer receipt/tally report is collected from a dealer and the example noted above occurs, the Monitor is still required to COMMENT that the weight is estimated.

NOTE: Many dealers have what they call a ‘Standard Box Weight.’ *Keep in mind that this may vary from dealer to dealer.* This is the combined weight of a tote + ice (this can also be just a tote, with no ice) and water weight. This value is obtained by the dealer/

Example: If 4 totes of haddock are weighed on a scale that has not been tared

Total weight of 4 totes + ice + haddock = 440 total lbs

The ‘standard box weight’ for that dealer is 10 lbs.

**VISUAL ESTIMATE:** This method would be used when no other estimation method is possible. This would be an educated guess from the Monitor based on what is seen.

Example: A Monitor sees a portion of the catch that is offloaded but not weighed on the dealer’s scale. If the portion of catch cannot be quantified using any of the

other methods listed above, a visual estimation can be used. Record the situation in the COMMENTS section. (*i.e.* A vessel has ½ of a tote of spiny dogfish. The dealer is not accepting any spiny dogfish that day so the fish are rejected.

**OTHER:** Any other method used to estimate offloaded catch will be recorded in detail in the COMMENTS section

## APPENDIX J: CATCH DESTINATION CODES

This refers to the location that a species, by market category, ends up, regardless of the initial intention. For example, if a vessel intends to sell all of their haddock to a dealer, and a portion is rejected, that rejected portion would be recorded as Catch Destination Code 4, with a corresponding explanation in the COMMENTS section.

Primary Dealer	<b>1</b>
Retained by Captain/Crew	<b>2*</b>
Retained as bait (not weighed by a dealer)	<b>3*</b>
Discarded by Vessel ( <i>i.e.</i> product quality, overages, dealer rejection)	<b>4*</b>
Other	<b>5*</b>

**\* Indicates that a comment is required**

**PRIMARY DEALER:** This indicates the listed species and market category have been landed at the dealer listed on the corresponding Weigh-Out Report.

**RETAINED BY CAPTAIN/CREW:** A portion of the catch being kept by the captain and/or crew for personal use or consumption.

Example: Crew might keep a few lobsters, crab claws, fish fillets, etc.

**RETAINED AS BAIT:** Catch kept by the captain or crew specifically for future use as bait. This refers specifically to catch that is not weighed or landed to a dealer.

NOTE: Vessels may keep species, such as small, whole skates, to use as lobster bait.

Examples:

- Skates may be stored in large, round barrels, totes, baskets, or other containers
- Fish heads may be stored in baskets, totes, boxes, or other containers
- Squid may be stored in small plastic buckets, plastic bags, boxes, or other containers

**DISCARDED BY VESSEL:** Catch not landed at a dealer and is not retained for any purpose. Vessels don't typically discard catch in port.

Examples:

- Dealer has rejected a portion of the catch due to poor quality or damage
- Dealer is not accepting a certain species at that time
- Vessel is trying to land more than is allowed by regulations so the dealer rejects the excess portion

**OTHER:** Record any alternate location that an individual species might end up.

## VTR FIELDS

*It is the responsibility of the VESSEL OPERATOR/CAPTAIN to complete these fields!!!*

1. **\*Vessel Name:** Name of the vessel. Unnamed vessels will be recorded as ‘unnamed.’
2. **\*USCG DOC. OR STATE REG. NO:** The official documentation number of the vessel. If the vessel is not documented with the United States Coast Guard, the state registration number is entered instead. State registration numbers begin with a two(2) letter abbreviation for the state the vessel is registered in (*e.g.* ME for Maine).
3. **\*Vessel Permit Number:** Federally-permitted vessels are assigned a six (6) digit number for each fishing permit issued by the National Marine Fisheries Service (NMFS) Northeast Regional Office (NERO) to an individual vessel.
4. **Date/Time Sailed:** Month, day, year, and time (using 24 hour clock) the vessel sails.
5. **Trip Type:** The appropriate box is checked off (commercial, party, or charter)
6. **No. of Crew:** The total number of people onboard.
7. **No. of Anglers:** For party/charter trips only

**NOTE: For each gear, chart area, or mesh/ring size fished for a trip, a new VTR must be completed**

8. **Gear Fished:** The code for the gear fished is entered. If more than one (1) gear is used during this trip a separate VTR must be completed for each gear. These gear codes are provided by the NERO.

**NOTE: Gear used in sectors are gillnet, longline, and bottom otter trawl**

9. **Mesh Ring/Size:** Enter ring/mesh size of the gear being fished. If ring/mesh size changes during the trip, a separate VTR must be filled out.
10. **Quantity of Gear:** The quantity of gear being fished per haul.
11. **Size of Gear:** The size of the gear being fished.
12. **Chart Area:** The three (3) digit area fished. If more than one chart area was fished during this trip, a separate VTR must be filled out.

\*Denotes required fields that Monitors can obtain directly from the VTR. These fields can also be obtained from the captain of the vessel.

**13. AVE Depth in Fathoms:** The average depth fished

NOTE: 1 fathom = 6 feet

**14. Latitude/Longitude:** A single set of latitude and longitude bearings (degrees and minutes) where **most** of fishing effort occurred in the Chart Area.

**15. No. of Hauls:** The total number of tows, sets, or strings hauled or lifted in this trip

**16. Average Tow/Soak Time:** The total estimated amount of time fishing (hours and minutes), not including travel time.

**17. Species Code Name:** The code of each species caught during this trip. These codes are provided to fishers by the NERO.

**18. Kept:**

**Pounds (Comm):** For commercial trips, the hail weight of each species kept for this report page.

**Count (Rec):** For recreational trips (party/charter), the count of each species kept for this report page.

**19. Discarded:**

**Pounds (Comm):** For commercial trips, enter hail weight of each species discarded for this report page.

**Count (Rec):** For recreational trips (party/charter), the count of each species discarded for this report page.

**20. \*Dealer Permit No.:** The permit number issued to each dealer by NMFS NERO that is purchasing the catch from the trip. If all species for the trip are sold to the same dealer, the dealer number for the first species is recorded and a line is drawn through the following Dealer Permit No. lines.

NOTE: If a species or portion of the catch of a species is landed but not sold to a federally permitted dealer, an appropriate code, provided by the NERO is entered.

CODE	DEFINITION
99998	Used for home consumption
00001	Seized for violoations
00002	Sold to another vessel for bait or retained as bait
00003	Transfer

00004	Future Sale
-------	-------------

\*Denotes required fields that Monitors can obtain directly from the VTR. These fields can also be obtained from the captain of the vessel.

- 21. Dealer Name:** The name of the dealer who purchases each species of catch for a trip.
- 22. Date Sold:** Month, day, and year that each species of catch for the trip was sold or otherwise disposed of.
- 23. Port and State Landed:** The name of the port and state where any offloading of catch occurs. Up to two (2) ports may be entered.
- 24. Date Landed/Time Landed:** The month, day, year, and time (24 hour clock) a vessel arrives in each port listed.
- 25. Operator's Name & Permit Number:** Vessel operator/captain's name and NMFS Operator's Permit Number (eighth (8) digit number on the operator's permit issued by NMFS NERO)
- 26. Operator's Signature/Date:** Vessel operator/captain's signature. Also defined as the person responsible for the truth and accuracy of the VTR.

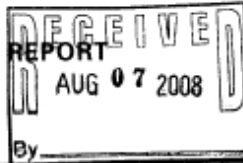

\*Denotes required fields that Monitors can obtain directly from the VTR. These fields can also be obtained from the captain of the vessel.

## APPENDIX L: DOCKSIDE MONITORING DECERTIFICATION POLICY

### Decertification

A monitor will be decertified for failure to conform to the Standards of Conduct signed during the first day of Dockside Monitoring Training. A monitor will be decertified if they falsify data.

**Falsification:** The act of deliberately or knowingly fabricating data collected while performing Dockside Monitoring job duties. This includes intentional recording of inaccurate data, intentional omission or deletion of data, intentional plagiarism, or, in general, the selective alteration of data.

The decertification procedure is subject to appeal in writing from the monitor to Branch Chief, Amy Van Atten. The Branch Chief's determination of decertification is final. Decertification for data quality or falsification reasons would disqualify a monitor from re-applying to work with the At-Sea Monitoring, Dockside Monitoring, or Northeast Fisheries Observer Program.

### **Amy Sierra Van Atten**

Branch Chief: Fisheries Sampling Branch  
National Marine Fisheries Service  
Northeast Fisheries Science Center  
166 Water Street  
Woods Hole, MA 02543-1026.

### Expiration of Certification

An individual's Dockside Monitoring certification is good for one (1) year. A monitor who wishes to continue certification beyond one (1) year must attend refresher training. A monitor who has not performed job duties of a Dockside monitor must complete the full 4 day training course.

**APPENDIX M:  
Instructions for Groundfish Sector  
Dockside Monitoring Hails**

v3, 3/1/10

NMFS point of contact  
Dan Morris  
[Daniel.Morris@noaa.gov](mailto:Daniel.Morris@noaa.gov)  
p: 978.281.9337

**1. INTRODUCTION**

Trip start and trip end hails are the means by which sector vessels notify dockside monitoring (DSM) providers of when and where they will be landing their catch, so dockside monitors can be dispatched efficiently to observe the offloading. In 2010, 50% of the trips by sector vessels must be subject to DSM. It is the sector manager's responsibility to ensure the monitoring occurs at that rate. DSM providers will randomly select which trips are to be monitored.

National Marine Fisheries Service (NMFS) Office of Law Enforcement (OLE) will receive a copy of trip start and trip end hails. The copy will indicate sector vessels' compliance with the hail requirement, and it will inform enforcement agents when and where they may observe landings of sector catch. The information will not be used by NMFS to calculate catch or sector allocation balances, but the hail information may be used for deriving a back-up inventory of trips and as rough indicator of fishing activity.

Because sectors may operate and communicate variously, NMFS is providing some flexibility to sectors and vessels in complying with sector trip hailing requirements. Hails may be made from the vessel using a VMS form, an e-mail, or by voice communication. (Voice hails must be backed up by an e-mail, probably sent by the DSM provider or sector manager. Details are provided below.) To enable these modes NMFS is adding forms to the vessel-side VMS software, providing the message specifications to sectors and 3<sup>rd</sup> party software developers, and posting an automated submission form on-line. NMFS has specified the content and format of the hails, but has left the content, format, and mode of the confirmation message (from the DSM provider to the vessel) at the discretion of the sector.

Trip hails and dockside monitoring are new requirements in the region. NMFS is committed to improving these functions as we learn more about how DSM is working.

## 2. **TRIP START HAIL (TSH)**

**Purpose.** The purposes of the trip start hail (TSH) are to:

- Notify the sector's DSM service provider of the trip and provide a heads up for planning purposes as to when and where the vessel will land its catch.
- Notify the NMFS OLE of the sector trip.

**Requirement.** Unless another arrangement has been made in consultation with the NMFS and addressed in an approved sector operations plan, TSH reports must be submitted prior to leaving port on a sector trip for which catch will count against sector allocation.

**TSH Content.** A TSH messages includes:

- Vessel permit number
- Trip ID # (serial # from the 1<sup>st</sup> page of the vessel trip report (VTR))
- Landing state\*
- Landing port city\*
- Estimated time and date of arrival in port
- Estimated time and date of offloading (required only for trips <6 hrs or if fishing within 6 hrs of offload port)\*\*

\*The landing location state and city are not required by regulation to be included in the TSH. The fields may be used to give the DSM provider advanced notice of where the landing will occur, especially if the fishing trip is to be short (*i.e.*, less than 6 hours). To that end, NMFS has provided the fields in the VMS form and the 3<sup>rd</sup> party message formats. If the landing state and port city fields are not filled in, the hail message must include commas to mark each field. The VMS form will do this automatically. Third party software systems should be checked to ensure they will do the same.

\*\*If the trip is likely to be less than six hours in duration or if the fishing operations occur within a six hour transit from the offloading location, the TSH must include the estimated offload time. 2.3.2. The TSH output message format from VMS and from 3<sup>rd</sup> party software products is provided in the technical appendix to this instruction.

**Transmission.** The TSH may be transmitted by the vessel via one of the following means:

- VMS form.
- Formatted e-mail (either in the e-mail text or as an attachment).
- Voice, including telephone, radio, or in person.

VMS form

- NMFS will provide a form within the vessel-side VMS software that can be used by sector vessels to submit the TSH.
- The TSH must be submitted in addition to the standard VMS activity declaration.
- When sent using the VMS form, the TSH form is automatically sent to NMFS. The vessel-side units do not allow additional addressees to be added to the message. When the form is received by NMFS, it will be automatically forwarded to an address (e.g. to the DSM provider) specified for each vessel by the sector manager in the roster function of the Sector Information Management Module (SIMM).
- Sector managers and dockside monitoring provider companies may wish to set up secondary e-mail forwarding routines of their own to accommodate the sector's particular arrangements with providers. Sectors may use an alternative means of submitting the form that can be transmitted to more than one recipient.

3<sup>rd</sup> party software, formatted e-mail (either in the e-mail text or as an attachment)

- In lieu of using the vessel-side VMS form, vessels may employ electronic logbooks or other software to generate the TSH, so long as the message or file is in the specified format. If the landing state and port city fields are omitted, each must be indicated by a comma in the TSH message.
- The vessel and sector manager are responsible for ensuring the message is forwarded immediately to the DSM provider and NMFS, <NMFS.OLE.NE@noaa.gov >.
- The subject line must be: FORM.OUT.TRIPSTART\_HAIL.2. Note that the subject line distinguishes the hail generated by 3<sup>rd</sup> party software from the VMS form. The distinction is further explained in the technical appendix.
- 3<sup>rd</sup> party software and e-logbooks allow additional addressees to be added to the hail message, obviating the need for NMFS to forward messages sent in this manner. NMFS will not forward messages received by this mode.

Voice, including telephone, radio, or in person

- If the TSH is made by voice communication to the sector manager or the DSM provider, then that party must immediately send the TSH information in the specified format via e-mail to:  
< [NMFS.OLE.NE@noaa.gov](mailto:NMFS.OLE.NE@noaa.gov) >.
- The subject line must be: FORM.OUT.TRIPSTART\_HAIL.2. Note that the subject line distinguishes the hail generated by e-mail from the VMS form. The distinction is further explained in the technical appendix.
- The need for immediate transmission of the e-mail to NMFS requires that some measure be in place to receive and respond to the call. That may mean staffing, an answering service, an integrated voice response system, or some other method. Also, the sector could also restrict the use of this alternative hailing method except for certain times when such services are available.
- NOAA Fisheries Service will provide a form on-line which can be used by the sector manager or DSM provider to satisfy this forwarding requirement.
- These alternative modes allow additional addressees to be added to the hail message forwarded by the sector manager or DSM provider, obviating the need for NMFS to forward messages sent in this manner. NMFS will not forward messages received by this mode.

**TSH confirmation.** The TSH confirmation must be transmitted by the DSM provider (as specified in the sector operations plan), immediately upon receipt of the TSH. The format and content of the TSH confirmation is not specified by NMFS. The vessel may not leave port until the TSH confirmation is received. If the TSH confirmation is not received, the vessel may submit the hail again by a secondary means of transmission in order to obtain a confirmation.

**TSH correction.** The TSH message may be corrected simply by retransmitting the message with the corrected information.

### 3. TRIP END HAIL

**Purpose.** The purposes of the trip end hail (TEH) are to:

- Notify the sector's DSM provider of the intended time and location of landing and offloading and to provide a heads up of the volume of fish to be landed for planning purposes.
- Notify the NMFS Office of Law Enforcement (OLE) of the same landing information.

**Requirement.** When on a sector trip greater than six hours in duration and further than a six hour transit from the offloading location, each sector vessel must hail its trip end at least six hours in advance of arrival at the dock.

For shorter trips and trips closer to shore, unless another arrangement is made in consultation with the NMFS and addressed in an approved sector operations plan, TEH reports must be submitted immediately after completion of fishing operations.

**TEH content.** A TEH message includes:

- Vessel permit number.
- Trip ID # (serial # from the 1<sup>st</sup> page of the VTR)
- First landing state\*
- First landing port city\*
- Dealer
- Estimated time and date of arrival
- Estimated time and date of offload
- Second offload state\*\*
- Second offload port city\*\*
- Total groundfish kept
- Total non-groundfish kept

\*In the TEH, the first landing port city and state is required to be included by regulation.

\*\*If the vessel will be landing catch in only one port, the second offload state and port city fields may be left blank. The hail message must include commas to mark each omitted field. The VMS form will do this automatically. Third party software systems should be checked to ensure they will do the same.

The TEH output message format from VMS and for 3<sup>rd</sup> party software products is provided in the technical appendix to this instruction.

**Transmission.** The TEH may be transmitted by the vessel via one the following means:

- VMS form.
- E-mail transmitted via VMS or other means (either in the e-mail text or as an attachment).
- Voice, including telephone or radio

**VMS form.**

- NMFS will provide a form within the vessel-side VMS software that can be used by sector vessels to submit the TEH.
- A VMS catch report does not satisfy the requirement of the TEH and vice versa.
- When sent using the VMS form, the TEH form is automatically sent to NMFS. The vessel-side units do not allow additional addressees to be added to the message. When the form is received as an e-mail by NMFS, it will be automatically forwarded to an address (e.g. to the monitoring provider) specified for each vessel by the sector manager in the roster function of the SIMM.
- Sector managers and dockside monitoring provider companies may wish to set up secondary e-mail forwarding routines of their own to accommodate the sector's particular arrangements with providers. Sectors

may use an alternative means of submitting the form that can be transmitted to more than one recipient.

3<sup>rd</sup> party software, e-mail transmitted via VMS or other means.

- In lieu of using the vessel-side VMS form, vessels may employ electronic logbooks or other software to generate the TEH, so long as the message or file is in the specified format.
- The vessel and sector manager are responsible for ensuring the message is forwarded immediately to:  
< NMFS.OLE.NE@noaa.gov >
- The subject line must be: FORM.OUT.TRIPEND\_HAIL.2. Note that the subject line distinguishes the hail generated by 3<sup>rd</sup> party software from the VMS form. The distinction is further explained in the technical appendix.
- 3<sup>rd</sup> party software and e-logbooks allow additional addressees to be added to the hail message, obviating the need for NMFS to forward messages sent in this manner. NMFS will not forward messages received by this mode.

Voice, including telephone and radio.

- If the TEH is made by voice communication to the sector manager or the DSM provider, then that party must immediately send the TEH information in the specified format via e-mail to:  
< [NMFS.OLE.NE@noaa.gov](mailto:NMFS.OLE.NE@noaa.gov) >
- The subject line must be: FORM.OUT.TRIPEND\_HAIL.2. Note that the subject line distinguishes the hail generated by e-mail from the VMS form. The distinction is further explained in the technical appendix.
- The need for immediate transmission of the e-mail to NMFS requires that some measure be in place to receive and respond to the call. That may mean staffing, an answering service, an integrated voice response system, or some other method. Also, the sector could also restrict the use of this alternative hailing method except for certain times when the services are available.
- NOAA Fisheries Service will provide a form on-line which can be used by the sector manager or DSM provider to satisfy this forwarding requirement.
- These alternative modes allow additional addressees to be added to the hail message forwarded by the sector manager or DSM provider, obviating the need for NMFS to forward messages sent in this manner. NMFS will not forward messages received by this mode.

**TEH Confirmation.** Upon receipt of the TEH, the DSM vendor must immediately send a confirmation to the vessel that the TEH was received. If the vessel does not receive confirmation, the captain must use the backup system to contact the DSM provider prior

to landing. The DSM provider must inform the vessel in the TEH confirmation (and no earlier) that:

- The vessel will have a dockside monitor (DM) or roving monitor (RM) present; or
- The vessel is issued a DSM waiver for the trip, meaning no DM or RM will be present to witness the offload.

If the DM or RM has an emergency and cannot meet the vessel as scheduled, the DSM provider must notify the vessel, the sector manager, and OLE as soon as possible to resolve the pending DSM event.

**TEH Correction.** If, before the vessel lands, the submitter discovers an error in a submitted TEH or the vessel engages in additional fishing after submission of the TEH, a second TEH must be submitted immediately with the corrected/updated information.

- If the trip has been selected for dockside monitoring and the change affects the time and location of the landing, the vessel or sector manager must make arrangements with the DSM provider to monitor the vessel at the corrected time and place. In such cases the vessel may not offload its catch until the DSM is available to monitor the offloading.
- If the trip has not been selected for DSM, the vessel may proceed into port after the TEH correction has been submitted.

**4. TECHNICAL APPENDIX**

**Acceptable formats** a. Comma separated values in the body of an e-mail; or as a  
b. Plain text file attached to the e-mail

**Addressee** NMFS.OLE.NE@NOAA.GOV

**Subject line**  
TSH from VMS form: FORM.*NER*.TRIPSTART\_HAIL.2

TSH from other: FORM.*OUT*.TRIPSTART\_HAIL.2

TEH from VMS form: FORM.*NER*.TRIPEND\_HAIL.2

TEH from other: FORM.*OUT*.TRIPEND\_HAIL.2

**Field details**

<u>Field</u>	<u>Type</u>	<u>Max. Char.</u>	<u>Other</u>
Vessel permit number	Numeric	6	
Trip ID/VTR serial number	Numeric	14 <sup>1</sup>	
First landing state	Alpha	2	Standard abbreviation
First landing port city	Alpha	16	Plain language
Dealer	Alpha	16	Plain language
Estimated time of arrival	Numeric	10	MMDDHHMI (HH=00-23)
Estimated time of offload	Numeric	10	MMDDHHMI (HH=00-23)
Second offload state	Alpha	2	Standard abbreviation
Second offload port city	Alpha	16	Plain language
Total groundfish kept	Numeric	6	Pounds
Total non-groundfish kept	Numeric	6	Pounds

<sup>1</sup> Although a VTR page number is only eight characters, the field in the hail forms for the trip ID/VTR serial number allows entry of up to 14 characters. This longer field length accommodates the potential use of a contrived trip ID number under alternative vessel trip reporting schemes that may be approved for use in the future.

If a vessel is reporting a trip using the conventional VTR, the VTR page number shall be entered in the first eight spaces, and the remaining spaces should be left blank. In the hail message text, a comma will indicate the start of the new field, so all 14 spaces need not be used.

When alternative trip reporting methods are approved, the 14 digit trip ID number will be a concatenation of the following fields: vessel permit number, date (YYMMDD), hour (HH=00-23). Detailed requirements will be specified when the alternative means of reporting is approved.

**Field order**

**For the trip start hail the field order shall be:**

PERMIT NUMBER,TRIP ID/VTR SERIAL NUMBER,LANDING STATE, LANDING PORT CITY,ESTIMATED TIME OF ARRIVAL,ESTIMATED TIME OF OFFLOAD

**Example of the Trip Start Hail with the 8 character VTR serial/trip ID #:**

123456,02345678,MA,NORTHEAST HARBOR,07150415,07150430

**Example of the Trip Start Hail with the 14 character trip ID # (to be used only if an alternative vessel trip report form or medium is authorized):**

123456,12345610071412,MA,NORTHEAST HARBOR,07150415,07150430

**The field order for the Trip End Hail shall be:**

PERMIT NUMBER,VTR NUMBER,LANDING STATE,LANDING PORT CITY, DEALER, ESTIMATED TIME OF ARRIVAL,ESTIMATED TIME OF OFFLOAD, SECOND OFFLOAD STATE,SECOND OFFLOAD PORT CITY,TOTAL GROUND FISH KEPT,TOTAL NON-GROUND FISH KEPT

**Example of the Trip End Hail with the 8 character VTR serial/trip ID #:**

123456,02345678,MA,NORTHEAST HARBOR,SEAFOOD EXPRESS,  
071500415,07150430,MA,NEW BEDFORD,2400,2675

**Example of the Trip End Hail with the 14 character trip ID # (to be used only if an alternative vessel trip report form or medium is authorized):**

123456,12345610071412,MA,NORTHEAST HARBOR,SEAFOOD EXPRESS,  
07150415,07150430,MA,NEW BEDFORD,2400,2675

## Northeast Multispecies Sector Hail Requirements Information Sheet

*This summary is not a substitute for the regulations; rather it provides a broad overview of restrictions and requirements. You are strongly encouraged to read the regulations in conjunction with this information sheet to fully understand how this fishery is managed. This information sheet will be updated when regulations are revised.*

### TRIP START AND TRIP END HAILS

Sector vessels must notify dockside monitoring (DSM) providers of when and where they will be landing their catch by declaring a trip start and trip end hail, in order for dockside monitors to be dispatched efficiently to observe offloading. For FY 2010, 50 percent of the trips by sector vessels must be subject to DSM. It is the DSM service provider's responsibility to ensure that the monitoring occurs at that rate. DSM service providers will randomly select which trips are to be monitored.

Because sectors may operate and communicate in a variety of ways, NMFS is providing some flexibility to sectors and vessels in complying with sector trip hailing requirements. Hails may be made from the vessel using a VMS form, an e-mail, or by voice communication, as specified in the sector's operations plan. Voice hails must be immediately followed with an e-mail; the DSM provider or sector manager must email NMFS (details are provided below). To enable these options, NMFS is adding forms to the VMS software, providing the message specifications to sectors and 3<sup>rd</sup> party software developers, and posting an automated submission form on the internet. NMFS has specified the content and format of the hails, but has left the content, format, and mode of the confirmation message (from the DSM provider to the vessel) to the sector's discretion.

**Trip Start Hail (TSH):** The purposes of the TSH are to:

- Notify the sector's DSM service provider of the trip and provide advanced notice for planning purposes as to when and where the vessel will land its catch
- Notify NMFS Office of Law Enforcement (OLE) of the sector trip

TSH reports must be submitted prior to leaving port on a sector trip.

If the trip is likely to be less than 6 hours in duration, or if the fishing operations occur within a 6-hour transit from the offloading location, the TSH must include the estimated offload time.

**Trip End Hail (TEH):** The purposes of the TEH are to:

- Notify the sector's DSM service provider of the intended time and location of landing and offloading and to provide an estimate of the volume of fish to be landed for planning purposes
- Notify the NMFS OLE with landing information

On sector trips greater than 6 hours in duration and further than a 6-hour transit from the offloading location, each sector vessel must hail its trip end at least 6 hours in advance of arrival at the dock.

For trips less than 6 hours, or occurring within 6 hours of port, the TEH must be submitted immediately after completion of fishing operations.

Alternative notice times can be approved by NMFS after consultation between the sector and NMFS OLE.

<u>TSH Content</u>	<u>TEH Content</u>
Vessel permit number	Vessel permit number.
Trip ID # (serial # from the 1 <sup>st</sup> page of the vessel trip report (VTR))	Trip ID # (serial # from the 1 <sup>st</sup> page of the VTR)
Landing state*	First landing state
Landing port city*	First landing port city
Estimated time and date of arrival in port	Dealer
Estimated time and date of offloading (required only for trips <6 hrs or if fishing within 6 hrs of offload port)	Estimated time and date of arrival
	Estimated time and date of offload start
	Second offload state**
	Second offload port city**
	Total groundfish kept
	Total non-groundfish kept

\*Landing location state and city are not required by regulation to be included in the TSH, but are required in the TEH.

\*\*If the vessel will be landing catch in only one port, the second offload state and port city fields may be left blank.

*The TSH and TEH messages must include commas to mark each omitted field. The VMS form will do this automatically. Third party software systems should be checked to ensure they will do the same.*

**Transmission:** Hails may be transmitted by the vessel via one of the three following means:

- **VMS form**
  - NMFS will provide a form within the VMS software that can be used by sector vessels to submit the TSH and TEH.
  - The TSH must be submitted in addition to the standard VMS activity declaration.
  - When using the VMS form, the TSH and TEH forms are automatically sent to NMFS. The vessel-side units do not allow additional addressees to be added to the message. When the form is received by NMFS, it will be automatically forwarded to an address (e.g., to the DSM provider) specified for each vessel by the sector manager in the roster function of the Sector Information Management Module (SIMM).
  - Sector managers and dockside monitoring provider companies may wish to set up secondary e-mail forwarding routines of their own to accommodate the sector's particular arrangements with providers. Sectors may use an alternative means of submitting the form that can be transmitted to more than one recipient.
  - A VMS catch report does not satisfy the requirement of the THE, and vice versa.
- **Formatted e-mail (either in the e-mail text or as an attachment)**
  - In lieu of using the VMS form, vessels may employ electronic logbooks or other software to generate the TSH and TEH, so long as the message or file is in the specified format. If the landing state and port city fields are omitted in the TSH, each must be indicated by a comma in the TSH message.
  - The vessel and sector manager are responsible for ensuring the message is forwarded immediately to the DSM provider and NMFS at: [NMFS.OLE.NE@noaa.gov](mailto:NMFS.OLE.NE@noaa.gov).
  - For TSH, the subject line must be: FORM.OUT.TRIPSTART\_HAIL.2. For TEH, the subject line must be: FORM.OUT.TRIPEND\_HAIL.2. Note that the subject line distinguishes the hail generated by 3<sup>rd</sup> party software from the VMS form.
  - The 3<sup>rd</sup> party software and e-logbooks allow additional addressees to be added to the hail message, obviating the need for NMFS to forward messages sent in this manner. NMFS will not forward messages received by this mode.

- **Voice, including telephone, radio, or in person**
  - If the hail is made by voice communication to the sector manager or the DSM provider, then that party must immediately send the TSH or TEH information in the specified format via e-mail to: [NMFS.OLE.NE@noaa.gov](mailto:NMFS.OLE.NE@noaa.gov).
  - For TSH, the subject line must be: FORM.OUT.TRIPSTART\_HAIL.2. For TEH, the subject line must be: FORM.OUT.TRIPEND\_HAIL.2.
  - The need for immediate transmission of the e-mail to NMFS requires that some measure be in place to receive and respond to the call 24 hours per day.
  - NMFS will provide a form on-line for TSH and THE, which can be used by the sector manager or DSM provider to satisfy this forwarding requirement.
  - These alternative modes allow additional addressees to be added to the hail message forwarded by the sector manager or DSM provider, obviating the need for NMFS to forward messages sent in this manner. NMFS will not forward messages received by this mode.

### **Hail Confirmation**

- The TSH confirmation must be transmitted by the DSM provider (as specified in the sector operations plan) immediately upon receipt of the TSH. The format and content of the TSH confirmation is not specified by NMFS. The vessel may not leave port until the TSH confirmation is received. If the TSH confirmation is not received, the vessel may submit the hail again by a secondary means of transmission in order to obtain a confirmation.
- Upon receipt of the TEH, the DSM vendor must immediately send a confirmation to the vessel that the TEH was received. If the vessel does not receive confirmation, the captain must use the backup system to contact the DSM provider prior to landing. The DSM provider must inform the vessel in the TEH confirmation (and no earlier) that:
  - The vessel will have a dockside monitor (DM) or roving monitor (RM) present; or
  - The vessel is issued a DSM waiver for the trip, meaning no DM or RM will be present to witness the offload.

If the DM or RM has an emergency and cannot meet the vessel as scheduled, the DSM provider must notify the vessel, the sector manager, and OLE as soon as possible to resolve the pending DSM event.

### **Hail Corrections**

- The TSH message may be corrected simply by retransmitting the message with the corrected information.
- If, before the vessel lands, the submitter discovers an error in a submitted TEH or the vessel engages in additional fishing after submission of the TEH, a second TEH must be submitted immediately with the corrected/updated information.
  - If the trip has been selected for dockside monitoring and the change affects the time and location of the landing, the vessel or sector manager must make arrangements with the DSM provider to monitor the vessel at the corrected time and place. In such cases, the vessel may not offload its catch until the DSM is available to monitor the offloading.
  - If the trip has not been selected for DSM, the vessel may proceed into port after the TEH correction has been submitted.

# APPENDIX N: SECTOR INCIDENT REPORT INSTRUCTIONS

## SECTOR INCIDENT REPORT

<input type="button" value="Print Form"/>		<b>SECTOR MONITOR INCIDENT REPORT</b>		<input type="button" value="Submit by Email"/>	
Monitor Name Last, First	<input type="text"/>	Address	<input type="text"/>		
Monitor ID or Trip ID	<input type="text"/>	Contact Number	<input type="text"/>		
Monitor Type	<input type="text"/>	Incident Type	<input type="text"/>		
Incident Location	<input type="text"/>	Incident Date	<input type="text"/>		
Vessel or Dealer Name	<input type="text"/>	Vessel or Dealer Permit Number	<input type="text"/>		
Employer Name and Address	<input type="text"/>	Others Involved (vessel or dealer)	<input type="text"/>		
<p><b>Provide a description of the incident with as much detail as possible. Include date, location, time, persons involved, exact quotes/statements and other pertinent information.</b></p>					
<div style="border: 1px solid black; height: 200px; width: 100%;"></div>

## SECTOR MONITOR INCIDENT FORM – INSTRUCTIONS

This interactive form utilizes Adobe Reader 9.0 or later software - you will need to use this software or you will have problems sending the form. To download the most up to date **free** version of Adobe Reader (currently Adobe Reader 9.3) go to <http://get.adobe.com/reader/> . Please read through these instructions before submitting the form – this should save you time and make the process go smoothly. Three key points are as follows.

**Submit** the form via email (see more about this on page 4).

**Please** do not rename the form prior to submitting it via email.

**After** you submit the form via email you can save the document and give it a name.

The form entries are self explanatory – but if you have a question while filling out the form contact Special Agent Tom Gaffney at (508)738-1471.

As this form contains sensitive information (such as home address, etc.) it will not be publically available **unless all sensitive information is redacted**.

In addition to the various text fields the form contains several interactive fields.

1. At Sea vs. Dockside Monitor choice.
2. The Incident Type box has a drop down arrow which contains the most common issues monitors will face. If you don't see a description that fits your situation select "Other".
3. Dates can be manually typed or a calendar feature can be utilized. To use the calendar click the drop down arrow in the right of the box.
4. The form is designed to be digitally signed. Please attempt to sign the form digitally when it is submitted by email, **but** a paper copy with original signature will also be necessary. See page 4 for directions on how to save the document as a PDF.

## Digital Signature

When you click on the digital signature box in the lower left hand corner you will either get a box that looks like this, (which means you already have a digital signature set up and you can click sign).

or a box like this - which means you need to get one from another source or set one up.

Unless you know where to find a previous digital ID click on the “A new digital ID I want to create now” button and then follow the steps. You will then see the box below - don’t worry too much about which of these two options you pick – either works.

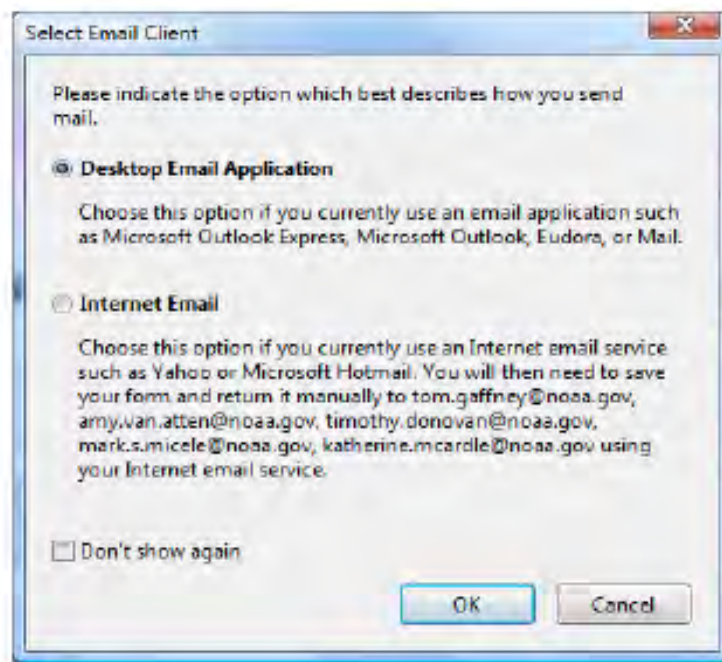

Fill in this box, you will then set your password, and you will then be ready to “sign”.

## Submitting by Email

When you have completed the form and added your digital signature (see below) click on the submit by email button. You will then see this pop up titled “Select Email Client”.

There will be two options available – the easiest route is to go with the Desktop Email Application choice as this is a pain free automated process. Your desktop email program should open automatically with an outgoing message ready to go; all you need to do is hit the send button.

If that route doesn't work for you (it depends on which email service you use and also how it is set up) you will have to send the form via an internet email account. Save the file to your desktop or a folder (**please don't change the name of the file at this point!**) open up your Internet Mail account, and then attach the saved form (it will have an .XML extension).

**After you email the form** you can also save the document as a PDF by going to File ... Save As ... name the file and save, and then attach the saved PDF to your email. If you want to do a “belt and suspenders” job, send the email to me at [Tom.Gaffney@noaa.gov](mailto:Tom.Gaffney@noaa.gov)

**Please** print out the form - you will still need to submit a hand signed copy as well (you can sign in the box next to your digital signature – sorry for the redundancy!). If you would like to insure privacy put the form in an envelope marked “NOAA ENFORCEMENT” and mail it to  
27 Bernard Saint Jean Drive  
East Falmouth, MA 02644

Any questions? Please contact Special Agent Tom Gaffney at [Tom.Gaffney@noaa.gov](mailto:Tom.Gaffney@noaa.gov) or at (508)738-1471.

## TRAINING STANDARDS FOR DOCKSIDE /ROVING MONITORING

### Attendance and Conduct Standards for Trainees

1. Attend all training classes and activities and be on time for all sessions
2. Participate in discussions and exercises
3. Be alert during training sessions
4. Complete all homework and readings as assigned
5. Communication with trainers, staff, classmates, and guest speakers in a respectful and professional manner
6. Will not take part in any illegal activities
7. Will not attend any part of training sessions under the influence of drugs or alcohol
8. Follow all house rules and rules established by the training program
9. Wear a seatbelt whenever a driver or passenger in a government or personal vehicle
10. Submit a signed copy of these STANDARDS the first day of training

### Performance Standards

1. Exams that require an individual minimum score of 85%
  - Fish ID Practical Exam
    - Closed Book Portion (15%): Students are tested on groundfish species
      - Minimum 85% for this exam is required for certification
    - Open Book Portion (15%): Students are tested on other commonly landed species; they may use any materials to complete this portion
      - Minimum 85% for this exam is required for certification
2. Receive an overall grade of at least 85% :
  - Dockside /Roving Monitoring Exam (35%)
  - Fish ID Exams (30%)
  - Homeworks (15%)
  - Quizzes (15%)
  - Performance, attitude, and participation (5%)
3. Turn in all homework completed and **on time**
  - 50% deduction on late assignments
  - NO credit given on assignments turned in > 24 hours late

4. Successfully complete all training sessions and workshops

I, \_\_\_\_\_, (Print Full Name) have fully read and understand the Training Standards for a Dockside/Roving monitor.

**ACKNOWLEDGEMENT OF RISK**

Disclosure of Existing Medical Conditions

If there are any medical conditions that may affect your ability to perform your duties as a Dockside /Roving Monitor, please inform the training staff immediately and list them in the provided space below. Though not limited to, some examples are: asthma, heart conditions, current pregnancy, diabetes, joint conditions, previous injuries that may affect work performance, inner ear injuries, head injuries, etc.

List any medical conditions here OR write in 'NONE'.

## **STANDARDS of CONDUCT**

Dockside /Roving Monitors work in a self-supervised capacity and must maintain high standards of conduct. Dockside /Roving Monitors are required to follow the outlined Standards of Conduct at all times.

1. Dockside /Roving Monitors must maintain a professional, objective demeanor at all times.
2. Be able to work independently, while following technical instructions.
3. Be able to get along well with others.
4. Be able to collect and record data in an unbiased manner.
5. Has never been decertified as a Dockside /Roving Monitor to problems with data quality or standards of conduct, in any NMFS program. The Dockside /Roving Monitor's references of previous employment as NMFS At-sea monitor, observer, or Dockside /Roving Monitor shall be verified by the contractor as qualifying for this requirement.
6. Any Dockside /Roving Monitor, or Dockside /Roving Monitor Trainee, involved in falsification of data shall be removed from the Dockside /Roving Monitoring Program.

Falsification of Data is defined as: *The act of deliberate or knowing fabrication data collected during observed fishing trips or Dockside /Roving Monitoring, this includes intentional recording of inaccurate data, intentional omission or deletion of data, intentional plagiarism, or, in general, the selective alteration of data.*

7. May not have a direct financial interest, other than the provision of Dockside /Roving Monitoring services, in the fishery, including, but not limited to:
  - Any ownership, mortgage holder, or other secured interest in a vessel or processor involved in the catching, taking, harvesting or processing of fish.
  - Any business selling supplies or services to any vessel or processor in the fishery.
  - Any business purchasing raw or processed products from any vessel or processor in the fishery.
8. Demonstrate respect and the ability to follow confidentiality policies.

9. Must not solicit or accept, directly or indirectly, any gratuity, gift, favor, entertainment, loan, or anything of monetary value from anyone who conducts fishing or fishing related activities that are regulated by NMFS, or who has interests that may be substantially affected by the performance or nonperformance of the official duties of a Dockside/Roving Monitor.
10. Understand and sign the Statement of Non- Conflict of Interest.
11. Understand and sign the Statement of No Criminal Convictions.
12. Understand and sign the Acknowledgement of Risk.

I, \_\_\_\_\_, (Print Full Name) have fully read and understand the Standards of Conduct for a Dockside/Roving monitor.

### **STATEMENT OF NON-CONFLICT OF INTEREST**

I, the undersigned, of this document, declare under penalty of perjury, under the laws of the United States of America, that all statements contained in this application and any accompanying documents is true and correct, with full knowledge that all statements made in this application are subject to investigation and that any false or dishonest answer to any question may be grounds for denial as a Dockside/Roving Monitor candidate and/or decertification of a Dockside/Roving Monitor. The signer of this document is free from a conflict of interest as described in the following paragraph:

A Dockside/Roving monitor:

1. Must not have a direct or indirect interest (financial or otherwise) in the New England multispecies groundfish fishery, managed under Federal regulations, including, but not limited to:
  - a. any ownership, mortgage holder, or other secured interest in a vessel or processor involved in the catching, taking, harvesting or processing of groundfish,
  - b. any business selling supplies or services to any vessel or processor in the groundfish fishery,
  - c. any business purchasing raw or processed products from any vessel or processor in the groundfish fishery,
  - d. any groundfish sector or sector manager,
  - e. advocacy groups, or
  - f. research institutions.
2. Must not have any immediate family members (i.e. spouse, parent, child, or siblings) with a direct or indirect interest in the New England multispecies groundfish fishery, as defined above (a-f);
3. Must perform ones duties as a Dockside /Roving Monitor without regard to any preference by representatives of vessels;
4. Must not solicit or accept, directly or indirectly, any gratuity, gift, favor, entertainment, loan, or anything of monetary value from anyone who conducts fishing or fishing related activities

that are regulated by NMFS, or who has interests that may be substantially affected by the performance or nonperformance of the official duties of a Dockside/Roving Monitor; and

5. Must not, in any way, misuse his/her position, including, but not limited to improper use or disclosure of information, aiding in a known violation, or falsification of data or failure to report complete and accurate data.

I \_\_\_\_\_, (Print Full Name) hereby claim, to the best of my knowledge, to be free from any conflict of interest, with regards to becoming a Dockside/Roving Monitor.
