

SM Decina *et al.* – Supporting Information

WebFigure 1. Map showing location of studies and rates of (a–c) wet, (d–f) dry, (g–i) bulk, and (j–l) throughfall inorganic nitrogen (N) (oxidized N + reduced N) deposition in (a, d, g, j) Eastern Asia; (b, e, h, k) Europe and Western Asia; and (c, f, i, l) North America. Scale bars and north arrows in maps (a), (b), and (c) pertain to all maps in the first, second, and third columns, respectively. Legends quantifying deposition rates in maps (a), (d), (g), and (j) pertain to all maps in the first, second, third, and fourth rows, respectively. Wet and dry N deposition maps in the top two rows are presented both in the main manuscript and again here for comparison to bulk and throughfall N deposition maps.
