## ORDERING INFORMATION

The online version of this document, [www.nefsc.noaa.gov/nefsc/publications/crd/crd0210/](http://www.nefsc.noaa.gov/nefsc/publications/crd/crd0210/), links each bibliographic entry to an e-mail request to the senior NEFSC author or a contact acting in his/her stead. Requesting a copy of a work via e-mail is recommended.

Should you want to request a copy of a work by postal mail, the postal address for the senior NEFSC author or contact is associated with the two-letter code at the end of the bibliographic entry. The key to the codes is as follows:

- MF = National Marine Fisheries Service, 212 Rogers Ave., Milford, CT 06460-6435
- MS = NOAA/University of Massachusetts Cooperative Marine Education and Research Program, c/o Environmental Institute, Blaisdell House, University of Massachusetts, Amherst, MA 01003-0040
- NG = National Marine Fisheries Service, 28 Tarzwell Dr., Narragansett, RI 02882-1199
- NS = National Marine Fisheries Service, National Systematics Laboratory, Smithsonian Institution, P.O. Box 37012, National Museum of Natural History, Room 57WC, MRC 0153, Washington, DC 20013-7012
- OR = National Marine Fisheries Service, ASRC Field Station, P.O. Box 190, Orono, ME 04473
- RG = NOAA/Rutgers University Cooperative Marine Education and Research Program, c/o Institute of Marine and Coastal Sciences, P.O. Box 231, New Brunswick, NJ 08903-0231
- SH = National Marine Fisheries Service, 74 Magruder Rd., Highlands, NJ 07732
- WH = National Marine Fisheries Service, 166 Water St., Woods Hole, MA 02543-1026

## INTRODUCTION

The following bibliography consists of three sections: 1) anonymously peer-reviewed publications ("publications"), 2) transparently (*i.e.*, not anonymously) peer-reviewed and non-peer-reviewed publications ("reports"), and 3) abstracts for oral presentations and poster displays ("abstracts"). The bibliography covers those works which were prepared by Northeast Fisheries Science Center (NEFSC) employees, and which have a 2001 publication date. Authors who were NEFSC employees at the time they composed their works, and/or who were NEFSC employees during all or part of 2001, are denoted in the list by capital letters.

Editorial treatment of bibliographic entries is largely based on the Council of Biology Editors style manual, fifth edition<sup>1</sup>. Special treatment includes the use of the abbreviation "n.p." throughout the "Abstracts" section of the bibliography to indicate that an abstract is not paginated. Also, there are foreign recipients of the issues of this series, many of whom do not use English as a primary language. Consequently, because English-language-based acronyms are particularly difficult to comprehend by non-English-using readers, the standardized abbreviations of these acronyms – when such acronyms appear in serial titles – have been included within square brackets immediately following the acronyms.

Availability of reprints of publications and of photocopies of reports and abstracts varies for each work. **UNDER ALL CIRCUMSTANCES, THOUGH, ANY INITIAL REQUEST FOR A REPRINT OR PHOTOCOPY SHOULD BE DIRECTED TO THE SOLE/SENIOR NEFSC AUTHOR OF THE WORK. SEE “ORDERING INFORMATION” FOR DETAILS.** The NEFSC's Woods Hole Laboratory Library maintains an extensive, although not complete, archive for publications and reports by NEFSC authors, and may be able to supply a reprint or photocopy if the author cannot do so. Secondary requests to the library for a publication or report should be in writing (National Marine Fisheries Service, Northeast Fisheries Science Center, Woods Hole Laboratory Library, 166 Water St., Woods Hole, MA 02543-1026). Expect a significant delay in receiving a reprint or photocopy when requesting it from the library rather than from the author.

Bibliographies of publications, reports, and abstracts for earlier years are available online at <http://www.nefsc.noaa.gov/nefsc/publications/>.

## Northeast Fisheries Science Center Reference Documents

**This series** is a secondary scientific series designed to assure the long-term documentation and to enable the timely transmission of research results by Center and/or non-Center researchers, where such results bear upon the research mission of the Center (see the outside back cover for the mission statement). These documents receive internal scientific review but no technical or copy editing. The National Marine Fisheries Service does not endorse any proprietary material, process, or product mentioned in these documents.

All documents issued in this series since April 2001, and several documents issued prior to that date, have been copublished in both paper and electronic versions. To access the electronic version of a document in this series, go to <http://www.nefsc.noaa.gov/nefsc/publications/series/crdlist.htm>. The electronic version will be available in PDF format to permit printing of a paper copy directly from the Internet. If you do not have Internet access, or if a desired document is one of the pre-April 2001 documents available only in the paper version, you can obtain a paper copy by contacting the senior Center author of the desired document. Refer to the title page of the desired document for the senior Center author's name and mailing address. If there is no Center author, or if there is corporate (*i.e.*, non-individualized) authorship, then contact the Center's Woods Hole Laboratory Library (166 Water St., Woods Hole, MA 02543-1026).

**This document's** publication history is as follows: manuscript submitted for review--July 19, 2002; manuscript accepted through technical review--August 12, 2002; manuscript accepted through policy review--August 12, 2002; and camera-ready copy submitted for publication--August 12, 2002. ## **Publications and Reports of the Northeast Fisheries Science Center**

The mission of NOAA's National Marine Fisheries Service (NMFS) is "stewardship of living marine resources for the benefit of the nation through their science-based conservation and management and promotion of the health of their environment." As the research arm of the NMFS's Northeast Region, the Northeast Fisheries Science Center (NEFSC) supports the NMFS mission by "planning, developing, and managing multidisciplinary programs of basic and applied research to: 1) better understand the living marine resources (including marine mammals) of the Northwest Atlantic, and the environmental quality essential for their existence and continued productivity; and 2) describe and provide to management, industry, and the public, options for the utilization and conservation of living marine resources and maintenance of environmental quality which are consistent with national and regional goals and needs, and with international commitments." Results of NEFSC research are largely reported in primary scientific media (*e.g.*, anonymously-peer-reviewed scientific journals). However, to assist itself in providing data, information, and advice to its constituents, the NEFSC occasionally releases its results in its own media. Those media are in four categories:

***NOAA Technical Memorandum NMFS-NE*** -- This series is issued irregularly. The series typically includes: data reports of long-term field or lab studies of important species or habitats; synthesis reports for important species or habitats; annual reports of overall assessment or monitoring programs; manuals describing program-wide surveying or experimental techniques; literature surveys of important species or habitat topics; proceedings and collected papers of scientific meetings; and indexed and/or annotated bibliographies. All issues receive internal scientific review and most issues receive technical and copy editing.

***Northeast Fisheries Science Center Reference Document*** -- This series is issued irregularly. The series typically includes: data reports on field and lab studies; progress reports on experiments, monitoring, and assessments; background papers for, collected abstracts of, and/or summary reports of scientific meetings; and simple bibliographies. Issues receive internal scientific review, but no technical or copy editing.

***Fishermen's Report*** -- This information report is a quick-turnaround report on the distribution and relative abundance of commercial fisheries resources as derived from each of the NEFSC's periodic research vessel surveys of the Northeast's continental shelf. There is no scientific review, nor any technical or copy editing, of this report.

***The Shark Tagger*** -- This newsletter is an annual summary of tagging and recapture data on large pelagic sharks as derived from the NMFS's Cooperative Shark Tagging Program; it also presents information on the biology (movement, growth, reproduction, etc.) of these sharks as subsequently derived from the tagging and recapture data. There is internal scientific review, but no technical or copy editing, of this newsletter.

**OBTAINING A COPY:** To obtain a copy of a *NOAA Technical Memorandum NMFS-NE* or a *Northeast Fisheries Science Center Reference Document*, or to subscribe to the *Fishermen's Report* or the *The Shark Tagger*, either contact the NEFSC Editorial Office (166 Water St., Woods Hole, MA 02543-1026; 508-495-2228) or consult the NEFSC webpage on "Reports and Publications" (<http://www.nefsc.noaa.gov/nefsc/publications/>).

**ANY USE OF TRADE OR BRAND NAMES IN ANY NEFSC PUBLICATION OR REPORT DOES NOT IMPLY ENDORSEMENT.**
