Abstract The editors of Journal of Geophysical Research (JGR): Atmospheres wish to sincerely thank the 2,573 outstanding scientists who reviewed manuscripts for the journal in 2019. Peer review is a crucial process to ensure the integrity and rigor of science. Your reviews have helped to improve the qualities of research by many authors, stimulated new ideas, and impacted the careers of many young scientists. Through these reviews, you contributed not only to the high standard of JGR-Atmospheres but also to the standing of our scientific discipline. Of the 2,573 reviewers listed below for the 1,757 new papers and 1,358 revised papers submitted to the journal (amounting to a total of 3,115 papers), 491 people reviewed three or more papers. On behalf of the journal, the authors, and the community, we thank all reviewers for your selfless service and dedication to the scientific community. We look forward to your continuing support!

Referees for 2019

Individuals in italics provided three or more reviews for JGR: Atmospheres during the year.
