## **NOAA Technical Memorandum NMFS**

The National Oceanic and Atmospheric Administration (NOAA), organized in 1970, has evolved into an agency which establishes national policies and manages and conserves our oceanic, coastal, and atmospheric resources. An organizational element within NOAA, the Office of Fisheries is responsible for fisheries policy and the direction of the National Marine Fisheries Service (NMFS).

In addition to its formal publications, the NMFS uses the NOAA Technical Memorandum series to issue informal scientific and technical publications when complete formal review and editorial processing are not appropriate or feasible. Documents within this series, however, reflect sound professional work and may be referenced in the formal scientific and technical literature.

## **NOAA Technical Memorandum NMFS**

This TM series is used for documentation and timely communication of preliminary results, interim reports, or special purpose information; and have not received complete formal review, editorial control, or detailed editing.

## INTRODUCTION

The striped dolphin, *Stenella coeruleoalba*, is widely distributed in the tropical, subtropical and temperate ocean waters of the world. This paper brings together published and unpublished distribution records available through 1986. This work is part of an effort to understand relationships between geographic populations in the Pacific. This effort, known as the "Pacific Dolphin Project," aims to evaluate relations between dolphin populations in the south and central regions with those in the east that are affected by tuna fisheries.

## MATERIALS AND METHODS

### Evaluation of Data

The sighting and stranding records that we used came from a wide variety of sources. Some records were very detailed, giving precise coordinates and morphological descriptions, whereas others were quite general. We did not edit or investigate the records for quality or reliability, but rather included the records at face value.

### Sources of Unpublished Data

Numerous unpublished data sources were consulted. These included sighting records made aboard National Oceanic and Atmospheric Administration (NOAA) research vessels, Japanese research vessels, and "vessels of opportunity," whereby marine mammal observers recorded sightings aboard private and commercial seagoing vessels. Assorted personal correspondence and photos were also used. Appendix 1 summarizes all the unpublished sources.

### Museum Specimens

Museum specimens collected worldwide, except for those from the area covered by Perrin et al. (1985), are listed in Appendix 2.

### Distribution Database

All distribution data records have been recorded on locality record forms and entered into a computerized database, called the "Dolphin Distribution Database." The database is maintained at the Southwest Fisheries Center in La Jolla, California. New records are added to the database as they become available. The distribution report generated from the database is given in Appendix 4.

## RESULTS

Based on our records, we found that *Stenella coeruleoalba* occurs in the Atlantic, Pacific and Indian Oceans and the Mediterranean and Red Seas (Fig.1). This dolphin is generally known to inhabit offshore or pelagic areas (McBrearty et al., 1986). Striped dolphins have been documented from as far south as 41°17'S latitude (Wellington, New Zealand; Mead, 1986) and as far north as 60°N latitude (Greenland; Elliot, 1901). In the western North Atlantic and North Pacific Oceans, seasonal migrations appear to be aligned with movements of the Gulf Stream and Kuroshio Currents, respectively (Leatherwood et al., 1976; Miyazaki et al., 1979).

Distribution in the eastern tropical Pacific Ocean has been well described (Perrin et al., 1985; Au et al., 1979). The large number of distribution records from coastal regions of the Mediterranean Sea and the North Atlantic suggests that substantial populations exist there. Distributional gaps are apparent in open-ocean areas away from land and island groups. This may be due to minimal sighting effort in less accessible ocean areas.

## ACKNOWLEDGEMENTS

The authors thank the following people for contributing unpublished data: Roy Amick, Toshio Kasuya, Robert L. Pitman, Douglas W. Beach, John R. Henderson, Helene Marsh, Laurie J. Simon, Ann Pabst, and P. J. H. van Bree. Roy Allen provided assistance with illustrations.

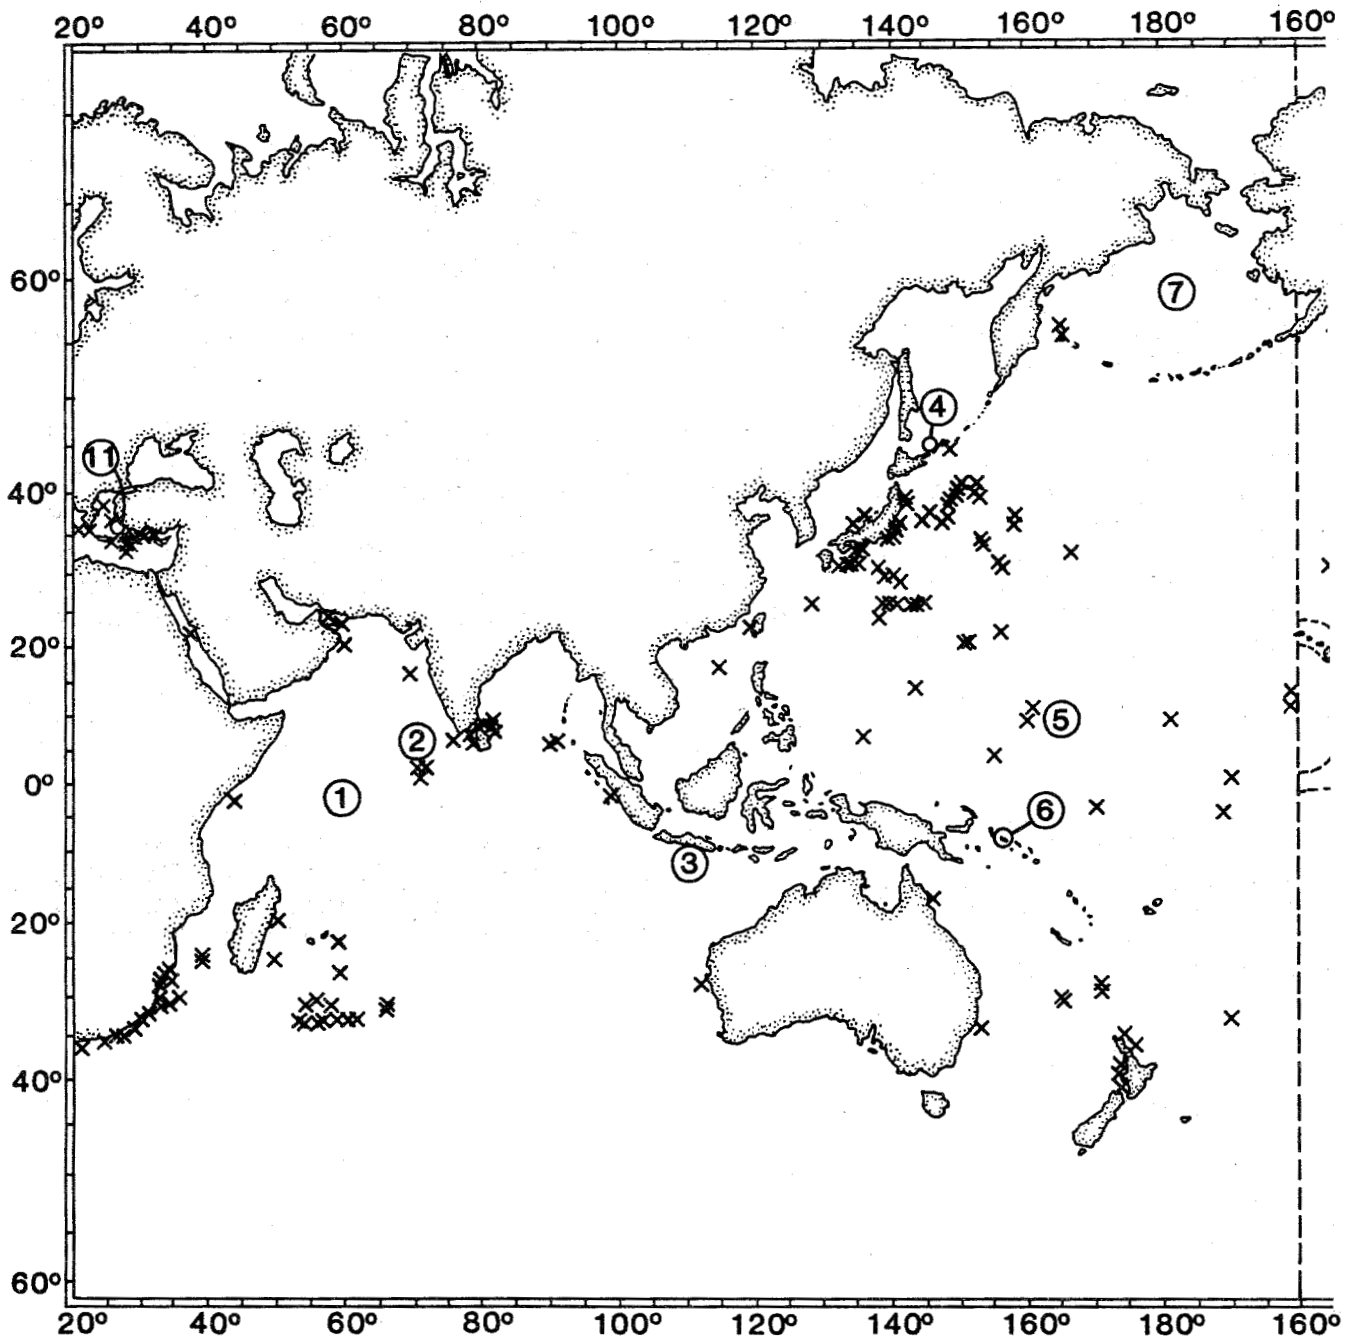

Figure 1. Known distribution of the striped dolphin, *Stenella coeruleoalba*. Distribution east of 160°W longitude in the Pacific Ocean from Perrin et al., 1985 (solid lines = known limit, dotted lines = uncertain limit) and (x's) Cowan et al. (1986), Mead (1986), Bernard et al. (1987), Anon. (1987), S.E.A.N. Bull. (1976, 1980), Smith et al. (1976), Patterson and

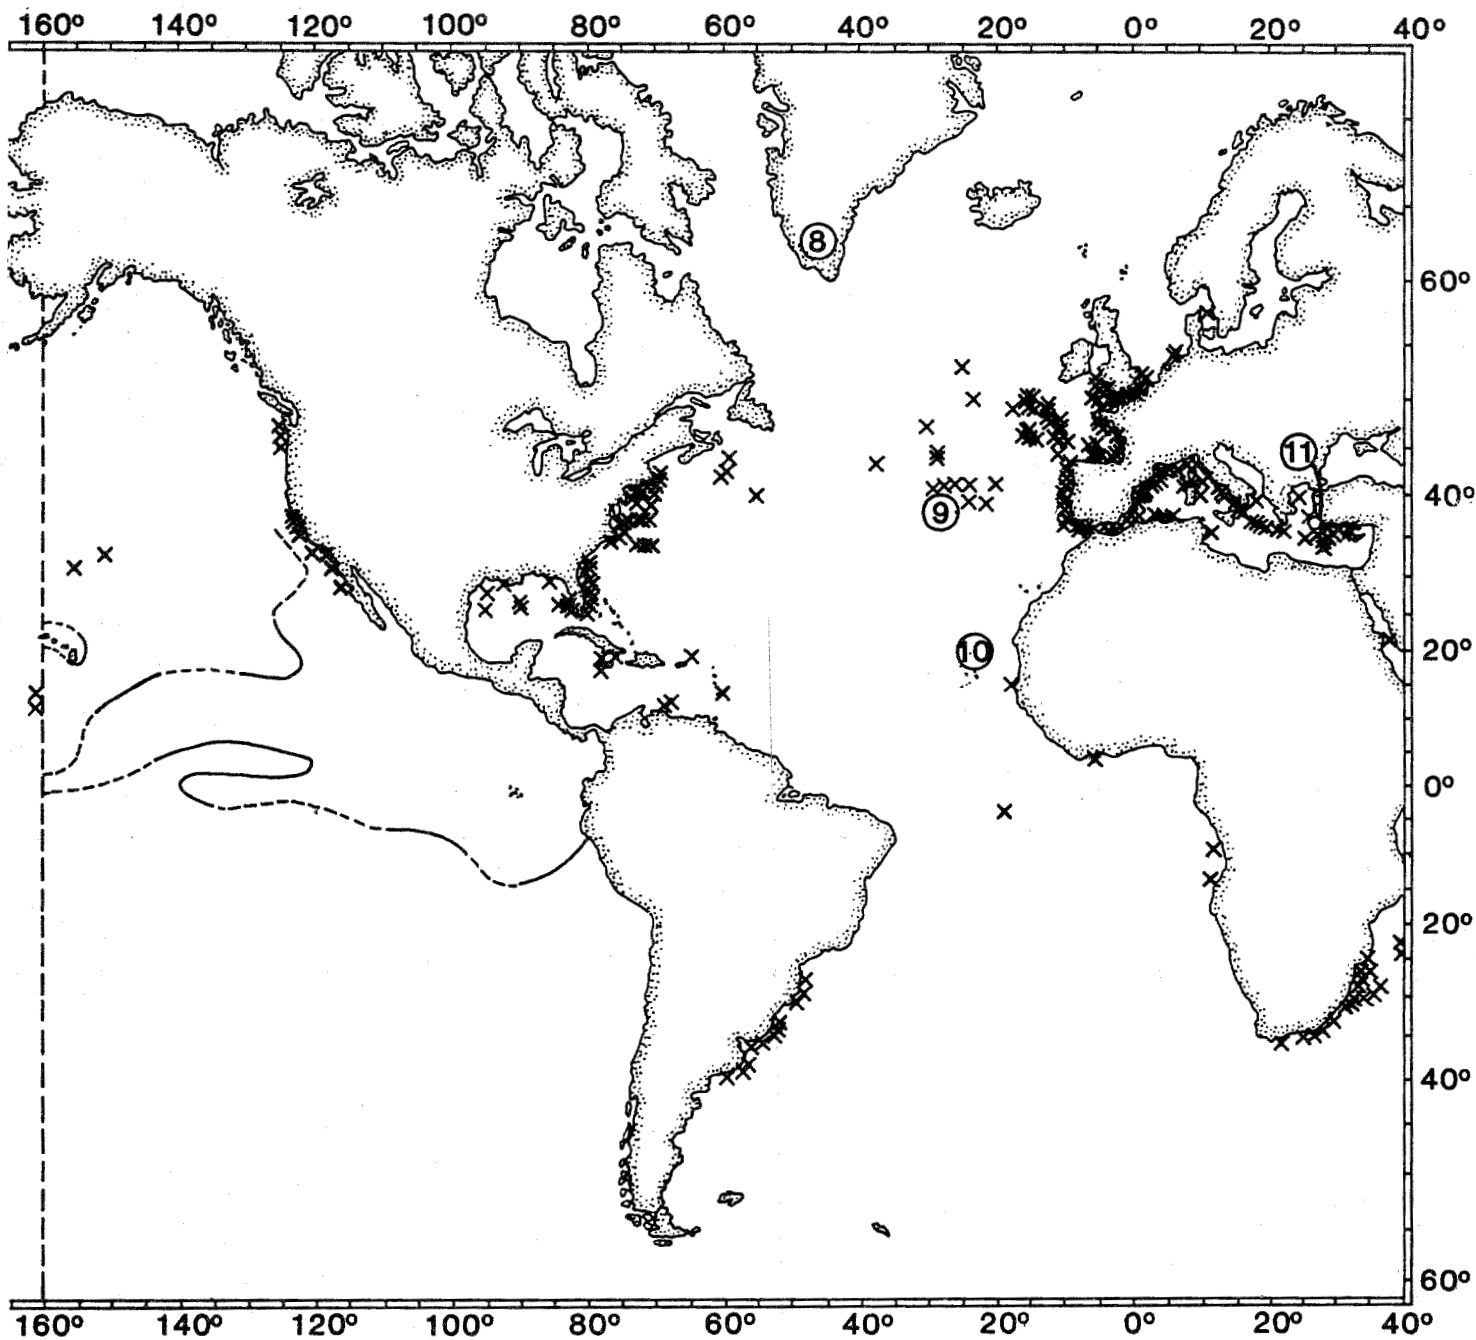

Figure 1 (continued). Alverson (1986). Circled numbers are approximate localities: 1, "east of Seychelles"; 2, "northeast of Maldives"; 3, "south of Java"; 4, "near Nemuro Bay (Japan)"; 5, "Marshall Islands"; 6, "Solomon Islands"; 7, "Bering Sea"; 8, "Greenland"; 9, "Azores Islands"; 10, "north of Cape Verde"; 11, "around the islands of Kos, Rhodes and Kasos."

Appendix Table 1.2 Distribution records received by the authors through personal communications.

Douglas W. Beach, Marine mammal coordinator, Terminal Island, California: letter to Leatherwood, of January 17, 1975 concerning the December 27, 1974 stranding of a *Stenella coeruleoalba* dolphin in Neskowin, Oregon (with photos). (Beach is currently a fishery biologist and manager in charge of the Protected Species Program, NMFS, Northeast Region, Gloucester, Massachusetts.)

P. J. H. van Bree, Instituut voor Taxonomische Zoologie - Zoologisch Museum, Amsterdam, Netherlands: letter to Perrin of August 23, 1986 relating unpublished records of two *Stenella coeruleoalba* strandings from Oman and the Ivory Coast.

John R. Henderson, NOAA, NMFS, Honolulu, HI: letter to Perrin of November 7, 1985 relating data of a striped dolphin stranded on Dadi Beach, Agat Bay, Guam on July 24, 1985.

Toshio Kasuya, Far Seas Fisheries Research Laboratory, Japan Fisheries Agency, Japan: letter to Perrin of September 17, 1986, enclosing unpublished sighting records of striped and spotted dolphins from Japanese coastal waters.

Helene Marsh, James Cook University of North Queensland, Australia: letter of September 23, 1986 to Perrin concerning a stranded striped dolphin from ETTY Bay Beach, Australia.

Ann Pabst, Duke University, North Carolina: letter to Perrin of February 6, 1984 reporting the live stranding of two *Stenella coeruleoalba* on Molokai, Hawaii.

Laurie J. Stuart, Assistant Museum Curator, San Jose State University, California: copy of data sheet depicting the stranding of a striped dolphin at Moss Landing Beach, Monterey County, California on February 22, 1980. Data sent to Perrin. (Laurie Stuart is now Laurie Simons and is currently a graduate student at Arizona State University.)

APPENDIX 4. STRIPED DOLPHIN DISTRIBUTION DATABASE REPORT. The first digit of "SERIES NUM." denotes a geographic region: 0= South Pacific Ocean (south of 20° N Lat. and between 100° E to 160° W Long.); 1= Indian Ocean; 2= Northwest Pacific Ocean (west of 160° W Long. and north of 20° N Lat.); 3= Hawaiian Islands; 4= eastern Atlantic Ocean and Mediterranean Sea (east of the 25° W Long.); 5= western Atlantic Ocean (west of 25° W Long.); 6= Gulf of Mexico and Caribbean islands; 7= eastern Pacific Ocean (east of 160° W Long.); 8= non-specific. "TYPE" record codes: "00"= fishery incidental kill; "01"= sighting and photo; "02"= sighting; "03"= photo of specimen; "04"= specimen exists; "05"= capture (whale or dolphin fishery) "06"= stranding (no specimen collected).

## RECENT TECHNICAL MEMORANDUMS

Copies of this and other NOAA Technical Memorandums are available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22167. Paper copies vary in price. Microfiche copies cost \$4.50. Recent issues of NOAA Technical Memorandums from the NMFS Southwest Fisheries Center are listed below:

- NOAA-TM-NMFS-SWFC- 80 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1952.  
E.M. SANDKNOP, R.L. CHARTER, H.G. MOSER, and J.D. RYAN  
(September 1987)
- 81 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1953.  
E.G. STEVENS, R.L. CHARTER, H.G. MOSER, and M.S. BUSBY  
(September 1987)
- 82 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1954.  
B.Y. SUMIDA, R.L. CHARTER, H.G. MOSER, and D.L. SNOW  
(September 1987)
- 83 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1955.  
D.A. AMBROSE, R.L. CHARTER, H.G. MOSER, and C.R. SANTOS  
METHOT  
(September 1987)
- 84 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1956.  
E.G. STEVENS, R.L. CHARTER, H.G. MOSER, and M.S. BUSBY  
(September 1987)
- 85 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1957.  
B.Y. SUMIDA, R.L. CHARTER, H.G. MOSER, and D.L. SNOW  
(September 1987)
- 86 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1958.  
E.M. SANDKNOP, R.L. CHARTER, H.G. MOSER, and J.D. RYAN  
(September 1987)
- 87 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1959.  
E.G. STEVENS, R.L. CHARTER, H.G. MOSER, and M.S. BUSBY  
(September 1987)
- 88 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1960.  
D.A. AMBROSE, R.L. CHARTER, H.G. MOSER, and C.R. SANTOS  
METHOT  
(September 1987)
- 89 "Summary of distribution records of the spinner dolphin, *Stenella longirostris*, and the pantropical spotted dolphin, *S. attenuata*, from the western Pacific Ocean, Indian Ocean and Red Sea."  
J.W. GILPATRICK, JR., W.F. PERRIN, S. LEATHERWOOD, and L. SHIROMA  
(October 1987)
