Purpose

Annual summary of U.S. purse seine catch and effort inside U.S. Exclusive Economic Zones (EEZ)s, and outside U.S. EEZs on the high seas and in non-U.S. (foreign) EEZs.

Original data was provided in [DR-23-04](#): provides catch and effort of U.S. purse seine vessels inside and outside of the U.S. EEZ surrounding the PRIA.

This report provides an update to 2022 and data for 2023.

Data Sources

USA purse seine Regional Purse Seine Logbook (RPL), 1988 to 2023. Data version March 16, 2024, Oracle tables: Oracle tables: SPT_RPL_PTA_HEADER_V_20240316, SPT_TRIP_EVT_V_20240316, SPT_CATCH_V_20240316 and various lookup tables. Date of access – March 29, 2024.

Pacific Islands Fisheries Science Center, 2024. U.S. Western Pacific Purse Seine.

Data Summary Notes

The first table represents an annual summary of USA purse seine catch and effort inside U.S. EEZs, and outside U.S. EEZs on the high seas and in non-U.S. (foreign) EEZs.

The spatial area of assignment is based on the geographical point of a purse seine set on the regional purse seine logsheet (RPL). Data are not included if confidential (i.e., an area and year represented by <3 purse seine vessels) and these data will be denoted as *c.d.*. Only fishing data in the Western and Central Pacific Fisheries Commission were extracted; the Inter-American Tropical Tuna Commission area was not considered.

The second table represents the percentage of Pacific Remote Islands Area (PRIA) tuna catch that is landed in American Samoa.
